YOUR COMPUTER

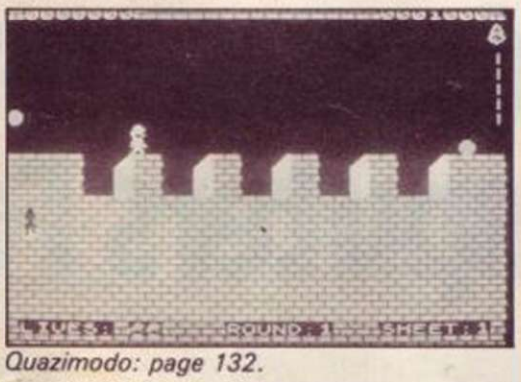
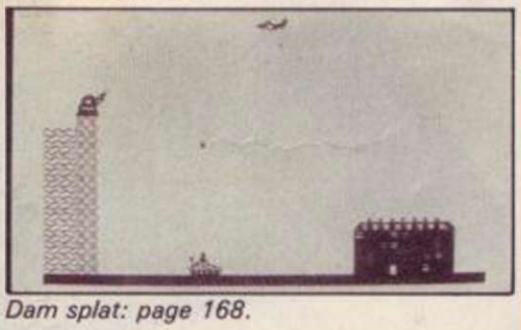
Contents

DECEMBER 1983

Software shortlist: page 89.



Quazimodo: page 132.



Dam splat: page 168.

Above: ZX-81 bubble sort: page 183.

Below: The spirit of Christmas to come.

Electric Globe by Tony Bassett. 01-328 3861.

74 COMPETITION: Bumper Christmas Competition! Win a £1200 Advance B! A £400 Advance A! Activision-Atari sets! Fun, fun, fun!

76 EDITORIAL AND YOUR LETTERS: A Spectrum owner with technical difficulties; Tim Hartnell lambasted, and Vic-20 load command problem solved.

78 NEWS: Oh no, it's Trevor; dating games to embarrass Auntie; new generation machines from Japan and plug-in expansion box for the Electron.

81 YOUR COMPUTER CHRISTMAS FAIR: Glad tidings of great joy — Your Computer's very first Christmas Fair all to itself. We preview the gifts to be bestowed.

83 FIRST BYTES: Our introduction for micro novices: databases and sorting.

87 COMPUTER CLUB: Paul Bond floats down the Cam.

89 SOFTWARE SHORTLIST: My name is uncle Groucho, you win a fat cigar; or you can plumb the depths of Cyrus or drive a big fast car. The latest commercial software.

93 ON THE GRID: A long hard look at what you get for between £100 and £400. *Your Computer* takes 13 machines including the Atari 600XL, Sord and BBC on the road.

106 PRINTER SURVEY: From the cheapest £40 black and white thermal printer to a first-time review of the Tandy ink-jet full-colour printer. David Horne rolls the presses.

114 COMMODORE SOFTWARE SURVEY: The wide range of software available for Commodore's trusty Vic-20 and the newer CBM-64 leaves Peter Connor breathless.

121 THE SPIRIT OF CHRISTMAS TO COME: Martin Soble peers through a glass darkly into 1984. Meirion Jones' grim spectre confronts the makers.

128 BBC CHRISTMAS CAROLS: Save the wassail. Andrew Bindon coaxes tidings of comfort and joy from the BBC Micro. Guaranteed to warm the hearts of frozen cherubs.

132 SPECTRUM QUAZIMODO: Paul Hargreaves saves Ezmeralda.

135 DRAGON SKY SHIELD: The end of civilisation, by Alan Richards.

143 DRAW: A relocatable vector drawing facility a bit like the one on the Spectrum. David King puts back into the ZX-81 what the printer routines took out.

148 VIC TRICKS: Amaze your friends with John Ransley's routines.

153 ORIC DISASSEMBLER: Mike Shackleton converts mnemonics.

158 ATARI INTERRUPTS: Do VBIs leave you blank? Is a DLI liable to give you a long face? Chris Lam shows you how to get the Atari to do lots of things at once.

161 BBC FRUITWORM: Mind the bricks and rocks or you will never grow up to be a nice big slimy creature. Shingo Sugiura demonstrates that even a worm will turn.

168 CBM-64 DAM SLAM: Simon Scott drowns the secret state police.

173 DRAGON SCREEN KIT: Sound and vision by Damian Clancy.

176 ZX-81/SPECTRUM CONVERTER: M C Evans spreads peace and goodwill with a routine enabling you to run ZX-81 programs on a Spectrum.

183 ZX-81 BUBBLE SORT: Not shell sorting or file inversion. Andy Scott rearranges numbers or strings into ascending or descending alphanumerical order.

186 VIC-20 SAS ASSAULT: Can you defeat the attack in P Brabbin's game

191 SCRAM-81: Philip Harwood comes in on a wing and a prayer.

197 VIC EXPANSION: Now you can put all that programming from the previous two articles into practice. Damian McComb completes his mind-expanding vocabulary.

202 BBC HEARTSTOP: John Dawson's continuing story of everyday life in a general hospital. Can you keep the patients alive despite impending health cuts?

205 RESPONSE FRAME: Tim Hartnell reassures worried users.

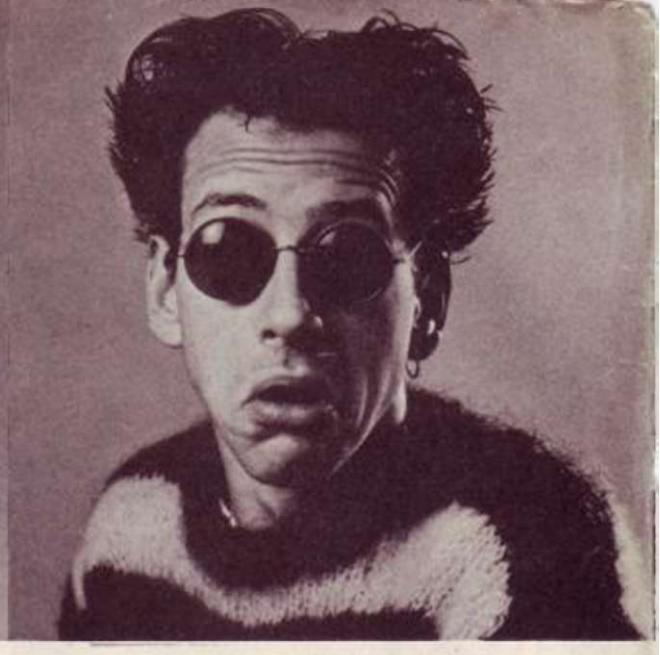
209 SOFTWARE FILE: A festive feast of fun Oric, CBM-64, BBC etc.

235 COMPETITION CORNER: The winner of October's competition for a an Atari 600XL is announced. No brain-teaser this time because of the big competition.

330 DATEBASE: Microcomputer events of every conceivable magnitude anywhere in the known universe. Let us know of anything happening in your area.

“I'm very sorry about your programming headache... why not call at the next counter and buy some Aspirin?”

“I'm afraid we can't help you with that fault, maybe you'd better write to the manufacturer!”



“No! We haven't that on disk... but we have the latest DURAN DURAN.”

WHEN IT COMES TO PERSONAL COMPUTER SPECTRAVIDEO™ IS BEYOND ANY COMPARE!

To the delight of our customers, and the dismay of our competitors, we now proudly present the most advanced, most capable personal computer system available today: Spectravideo™'s SV-318 and SV-328. While the SV-318 is "everything home computer users were waiting for, "the SV-328 is specially designed "for the small business that doesn't plan to stay that way." These 2 computers, too, are beyond any comparison in their price range.

And they do not stand alone. Seldom, if every, has a new computer been supported by so many peripherals. Of exceptional quality, all this hardware rides into you on the crest of the very last technology.

Additionally — and importantly — Spectravideo™ is very software oriented. With built-in CP/M compatibility, the SV system allows you to take advantage of thousands of pre-existing programs. And with the MSX software compatible standard, jointly launched by Spectravideo™ and most of Japan's largest electronics firms, Spectravideo™ can take advantage of all software developed by other MSX participants. Plus, Spectravideo™ is now producing its own line of top-quality software. Finally, the SV system includes several innovative and interesting accessories that you will want to use.

Because of product depth and ease-of-operation, the SV system will give you full usage from the moment you unpack it. Yet it is both capable and expandable enough to give you long-term usage, too. That's why Spectravideo™ is truly, "The computer system you'll grow into, not out of."

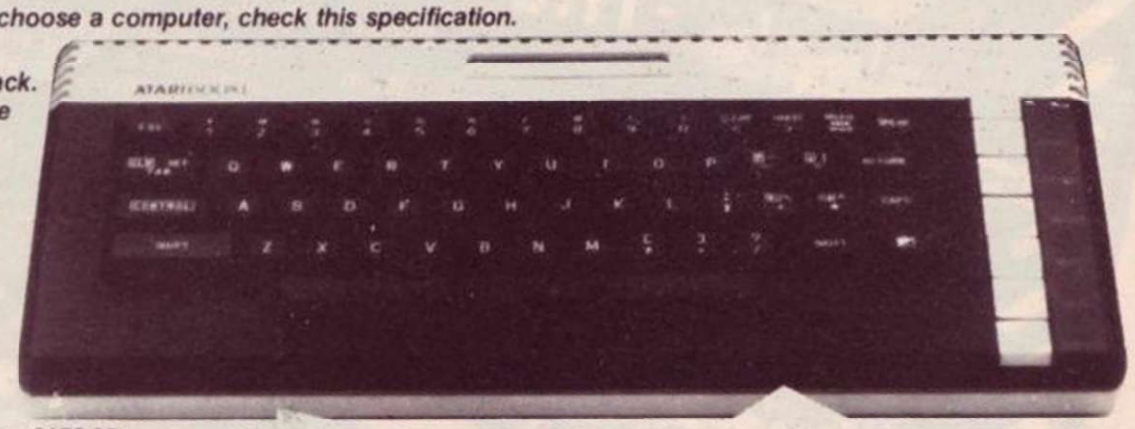
NO CHARGE FOR Atari • Commodore 64

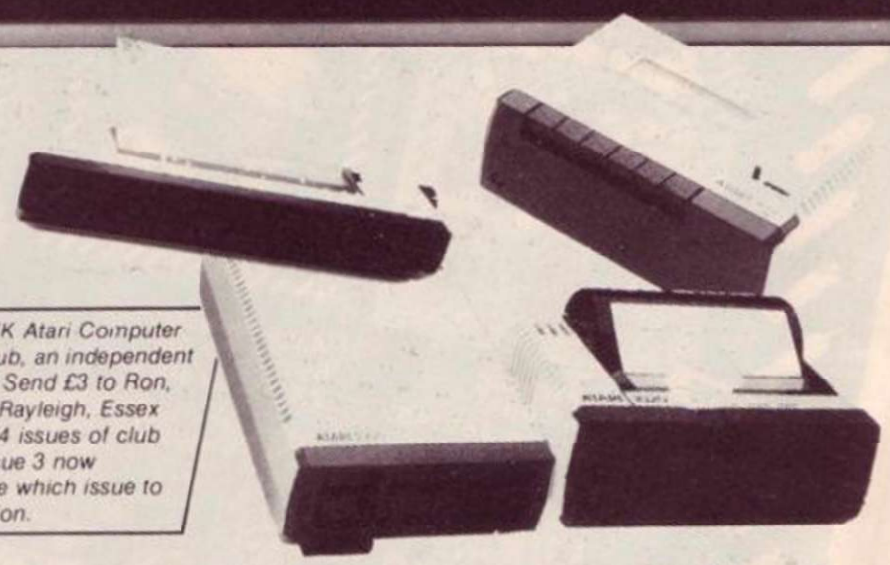
NEW ATARI 600XL

A brilliant new computer from Atari. Before you choose a computer, check this specification.

- ★ *16K RAM expandable to 64K with one plug-in pack.*
- ★ *External processor bus for future CP/M module running CP/M2.2 with its own 64K RAM.*
- ★ *International character set.*
- ★ *256 colours – up to 128 displayable at one time.*
- ★ *5 text modes and 11 graphics modes.*
- ★ *Full-travel typewriter-style keyboard.*
- ★ *24K built-in BASIC and operating system.*
- ★ *4 special function keys.*
- ★ *Software compatible with almost all existing software for 400/800.*



Atari 600XL Computer (AF77J)	*Price £159.95*
Extension RAM Pack for 600XL (AF79L)	*Price £89.95*
Program Recorder (AF80B)	*Price £49.95*
Disk Drive (AF81C)	*Price £269.95*
Colour Printer (plain paper) (AF83E)	*Price £199.95*
Letter-quality Printer (AF82D)	*Price £299.95*
Joysticks (AC37S)	*per pair Price £13.95*
Le Stick (AC45Y)	*each Price £24.95*



The Atari 800XL is unlikely to be available before Christmas, but is in any case no different from the 600 XL except all 64K RAM is built inside box.

Check out our huge range of software for Atari. Ask for our free leaflet XH52G.

★ **Maplin are an authorised service centre for Atari** ★

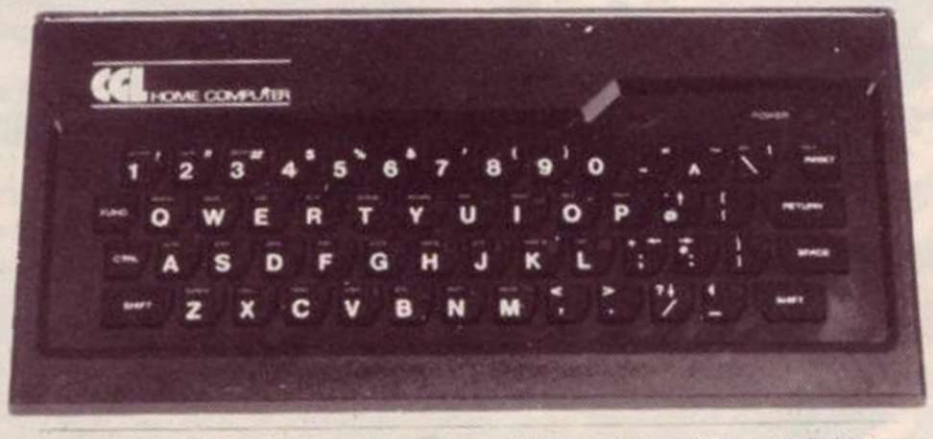
Join the UK Atari Computer Owners Club, an independent user group. Send £3 to Ron, P.O. Box 3, Rayleigh, Essex SS6 8LR for 4 issues of club magazine. Issue 3 now available. State which issue to start subscription.

POWERFUL CGL M5

M5

The M5 contains one of the most powerful colour video processors available. An incredible 32 sprites simultaneously and 16K of RAM dedicated to graphics alone. Driven by the powerful Z80A main processor, there M5 contains three tone generators and a noise generator all with envelope control like a mini-synthesiser. The M5 comes complete with BASIC, superb handbooks for beginners and lead to connect to almost any standard cassette recorder.

CGL M5 computer (AF64U)	*Price £149.95*
BASIC G – A BASIC with extended and very powerful graphics commands (KS01B)	*Price £34.95*
Joypads (AF65V)	*per pair Price £24.95*



Lots of new peripherals and software becoming available now. Check with our sales desk for further information.

If your order contains over £120 worth of computer hardware apply now for credit with no extra charges. Telephone: Mail Order: (0702) 552911; London Shop: 01-748 0926; Manchester Shop: 061-236 0281; Birmingham Shop: 021-356 7292; Southampton Shop: (0703) 25831; Southend Shop: (0702) 554000 or write to P.O. Box 3, Rayleigh, Essex. SS6 8LR.
You pay 10% down, then 10% per month for a further 9 months, (to nearest penny). Example: Atari 600XL. Cash price 159.95. Credit terms £15.95 down, then £16.00 per month for nine months. Total £159.95 which equals the cash price.
Credit quotations on request. This offer subject to approval which may take up to 48 hours or more, and is only open to whose who live on UK mainland and are over 18.
Please note that we act as credit brokers for this service.

On one hand, the best all-round performance

Colour Genie is now one of the most successful home computers that you can buy.

Not just because of price.

But simply because more families are realising that a computer with less all-round performance than the 32K Colour Genie is a waste of money and not so rewarding.

After all, you cannot tell what will interest you most until you've tried everything computers can offer you.

Some others ask you to compare the technical facts. Well, to give them all a surprise we've published some of 32K Colour Genie's most important features.

But for the less technical, here are a few other important questions and answers.

WHY YOU CAN'T BUY A COLOUR GENIE AT THE CORNER SHOP

You see, ALL computers are more complex than they first appear.

So when you start computing, you do need a bit of help. A Saturday shop assistant is NOT the right person to go to.

To ensure that you obtain the answers to any doubts or questions you may have about computers, a list of the many Genie specialists appears below. But if you have any problem whatsoever, get in touch with us at Lowe Computers — we're here to help.

WHY OUR 32K CAN MEAN A LOT MORE THAN EVEN THE MOST RECENT COMPETITORS

It's easy to quote big memory numbers like 32K. In many other popular computers of that size, it is not so easy to use it all.

Even some of the newest models let you use little more than two thirds of the user memory. The other third is snatched away to drive the computer.

- Design efficiency. 95% of RAM is available for user memory
- 16K ROM with Microsoft Colour BASIC Extended
- Forth (optional)
- 256 predefined characters with 128 more you can program yourself. A massive 256 can be displayed at any one time
- Repeat operates on all 63 keys
- 4 function keys giving 8 user programmable statements
- Full editing and tracing facilities for de-bugging
- Screen resolution of 320 x 200 with text and graphics
- Or 160 x 102 individually addressable pixels in 4 colours
- Screen display, 25 rows of 40 characters
- 16 colours (8 full, plus 8 tints)
- 80 commands plus more than 40 graphics, arithmetic and special functions
- 8 octaves, independent on each of 3 separate sound channels with independent volume, duration and envelope on each channel
- Full synthesised sound effects via separate T.V. or Hi-Fi output ports
- Cartridge based software
- Prestel/Viewdata modem. Software cartridge loaded for fast system access
- Floppy disc system
- Superb digital joysticks, with numeric pads and two fire buttons.

Colour Genie has the type of "drive" facility that you would expect to find on a computer costing around £400. It uses less than 5% of RAM -giving you as much as 30K for more exciting games and more useful applications.

WHY GOOD PICTURES CAN BE MORE COLOURFUL ON THE COLOUR GENIE

Many other computers offer several modes. These give high resolutions but at a cost.

On some, high resolution uses so much RAM that you get only 2 colours,and very little memory left to play with.

But Colour Genie has got other ideas to let you have the good quality picture effect of high resolution (320 x 200 for the technical). AND FULL COLOUR

THIS IS HOW IT WORKS.

Colour Genie lets you create as many as 128 different shapes that it tucks away in its memory, in addition to the 128 shapes it has permanently stored (you can see 64 of them on the keys in the photograph).

On the other, the lowest price in its class

£168! (incl. VAT)

You can then use all 256 in any order to create a full picture "brick- by- brick", for any game or application you invent.

And you can colour each shape in any of the 16 colours and tints, each time you use it.

The pixel graphics mode allows line plotting and generation of solid shapes.

Check out our "PAINT" command, for remarkable colour computing.

YOU WANT WORDS AS WELL!

Sure – Colour Genie won't limit you on that! Text and graphics are fully mixable.

WHY YOU CAN PLAY AMAZING GAMES – AND AMAZING GRACE

Not only can you play -or make exciting games. You can do it very noisily too!

Colour Genie gives you three independently controlled seperate channels (or 'voices') each with a full range of 8 octaves.

So you can compose pleasant music –or drive everyone out of the house!

WHY COLOUR GENIE IS A TOUCH HEAVIER THAN MOST OTHERS

Some computers are designed as a simple box, with several untidy add-on pieces. Not only do add-ons add to cost, but they can add to more niggling faults as well.

So Colour Genie contains all that's necessary to make it work including the power transformer.

It is also made of stronger materials than many others, to cope with the most boisterous of families.

But just in case you find a 10lb box a bit awkward to carry to the car, you'll find it has got a built-in carrying handle!

Just another touch of service with the compliments of Lowe Computers. The top name in home and hobbyist communication and computer systems.

Special offer worth at least £40

FREE suite of 7 programs.
2 games, 3 utility programs and 2 music demonstrators.

Extensive and rapidly expanding software library holding all the best games PLUS education, mystery, adventure, business and utility programs

SINCLAIR ADD-ONS

COMPUTER STANDS

POWER BASE

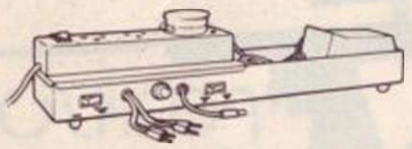
ZX81 ref. PBZX81 £13.00
plus 95p P+P

Spectrum ref. PBS1 £13.50
PBS2 £19.00

Raised stand for ZX81 and Spectrum. Fitted LOAD/SAVE switch, and power ON/OFF for screen clearing. Saves wear and tear on connections. Front lip holds computer in place. No soldering, comes complete with all necessary plugs and cables.
NEW Spectrum Sound, with built in variable sound amplifier. (PBS2).

plus 95p P+P

STACKPACKS



STACKPACK FIVE - ZX81 version including sockets, mains switch, neon cable and plug. Ref. BPS £19.35 + £1.50 P + P

STACKPACK SIX - ZX81 version excluding sockets etc. Ref. BP6 £12.05 + 80p P + P

MICROCARE STACKPACKS have been designed to be used independently or in conjunction with 'Interface 1'. The STACKPACK has a neat housing for the Sinclair Transformer and has room enough for cable stowage. All STACKPACKS have SAVE/LOAD and ON/OFF switches to simplify these tasks and save needless wear and tear on plugs and sockets.

STACKPACK ONE - The complete BACKPACK for the Spectrum - SAVE/LOAD, ON/OFF, FULLY VARIABLE SOUND AMPLIFICATION - THREE BUILT IN 13AMP SOCKETS WITH MAINS SWITCH AND NEON INDICATOR, PLUS MAINS CABLE AND PLUG. Ref BP1 £26.00 + £1.50 P + P

STACKPACK TWO - All the features of BACKPACK ONE but without sockets, cable and plug. The top is suitable for carrying your own 'DURAPLUG' type 4 way 13amp connector. Ref BP2 £18.50 + £1.00

STACKPACK THREE - Includes 3 x 13AMP sockets, mains switch, neon indicator, cable and plug but does not include sound amp. Ref. BP3 £20.00 + £1.50 P + P

STACKPACK FOUR - No extras, just SAVE/LOAD and ON/OFF switches Ref. BP4 £12.04 + £1.00

MICROSTATION

The **MICROCARE MICROSTATION** is a compact workstation designed to accommodate a ZX81 or Spectrum, Cassette Recorder, Printer, Microdrive with room behind for the BACKPACK of your choice. It is ideal for use in restricted spaces and allows the computer and its peripherals to be moved around with a minimum of effort.
Ref. MS £6.00 + £1.50

WOBBLE STOPPERS

At last, a fool proof method of avoiding ZX81 whiteouts caused by Ram-Pack wobble. Simply turn the plastic thumbscrew until the Ram-Pack is held firmly against the ZX81. No soldering no stick-on pieces, just common sense! Flat or tilted models.

Large flat or tilted for ZX81 and Ram-Pack and Printer ref. LW **£5.75** flat
LTW **£6.75** tilted
plus 60p P+P

Small tilted for ZX81 and Ram-Pack ref. STW

£6.25 plus 60p P+P

Small flat ZX81 and Ram-Pack ref. SW

£5.25 plus 60p P+P

WEARSAVER

This compact unit (4" x 3" x 1½") has a SAVE/LOAD switch and a 9 volt ON/OFF switch for screen clearing. Simply plug in your *EAR* and *MIC* plugs and your power plug.

SPECTRUM Ref WSS £9.00 + 95p

sinclair special 5

Inside... New Interface 2 and ROM cartridges! New Software!

TAKING NEW SOFTWARE IN NEW DIRECTIONS

You'll see that this issue of Sinclair Special devotes considerable space to software. Why, when we've so much to say about hardware and peripherals? Simply because at Sinclair we believe in supporting first-class hardware with first-class software.

This month sees the start of a new commitment to education in our catalogue, both for adults and children.

In the field of micro theory, we've programs like Beyond BASIC and Make-a-Chip, which take you from the creation of simple ZX® assembler subsets to simulated circuit design projects.

There's Musicmaster, to teach you music terminology, note values and composition.

And if you're keen to beat your Spectrum at chess (which can be hard), you'll certainly want to try Chess Tutor 1, the first program in a complete chess masterclass.

Coming soon...

In the pipeline are many new releases, some of which break completely new ground. LOGO and micro-PROLOG for instance. They're fifth generation languages which will take you and your Spectrum closer than ever before to the creation and application of artificial intelligence.

A formal agreement between Sinclair and Macmillan Education has been announced, the first results of which will be published this autumn. These consist of five programs in a complete early reading course plus the first four of a series of programs based on Macmillan's top selling Science Horizons Scheme. All programs are designed for use in schools or the home.

And with Blackboard software, we're publishing six more home education programs for primary school children. Covering alphabet, spelling and punctuation, each of these programs is a true gem, unlike any other education software, and fascinating to run. Even for adults!

I believe that these new titles represent a major advance in educational software for the home.

New ROM software too!

You may well have heard news of ZX Interface 2® and ROM cartridge programs. You'll find full details of the Interface and its software on the facing page (and there's an order form on the back page too!). These offer an instant games playing facility at unbeatable prices, and expand the possibilities of using your Spectrum in yet another direction.

Alison Maguire

Alison Maguire
Applications Software Manager

SOFTWARE UPDATE

The latest cassette software for ZX® Computers

Chess Tutor 1
For 48K RAM Spectrum. **£9.95.**

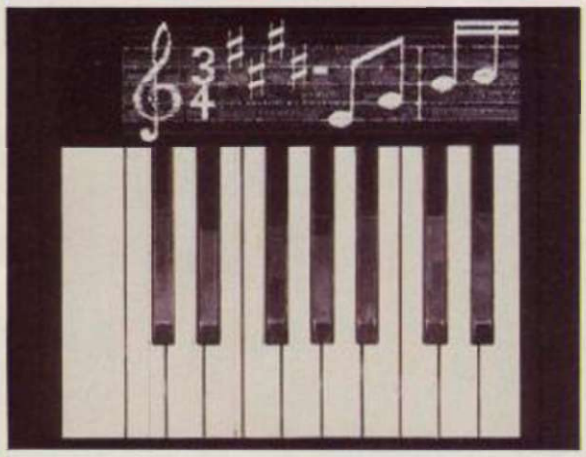
Chess Tutor is a new way of learning all about chess – using your ZX Spectrum.®

It starts from the beginning by teaching you about the chess pieces and the way they move – including castling, en passant, promotion, check, checkmate, stalemate and perpetual check.

Then it teaches you the basic tactics – pins, forks, double attacks and skewers.

There are over 120 exercises and over 200 questions for you to answer – with demonstrations and hints from your ZX Spectrum when you want them.

You can choose which parts of the course you want – and even experienced players may be surprised at what they can learn from Chess Tutor.

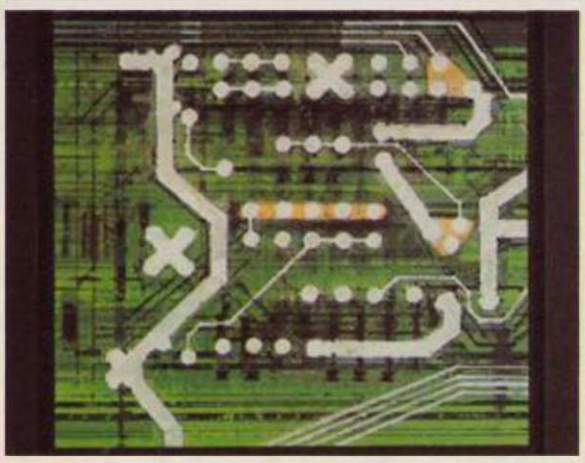


Musicmaster
For 48K RAM Spectrum. **£9.95.**

Musicmaster turns your ZX Spectrum into a musical instrument which will not only play tunes, but will also demonstrate key signatures, durations of notes, and scales.

You can write your own tunes – in any key – play them over and over again, save them on tape, modify them.

You can either write your music on a stave, or place a simple overlay on your Spectrum for a 17-note keyboard.



Make-a-Chip
For 48K RAM Spectrum. **£9.95.**

Make-a-Chip teaches you the basic elements of circuit design, shows you how they fit together, and then lets you design and test your own circuits.

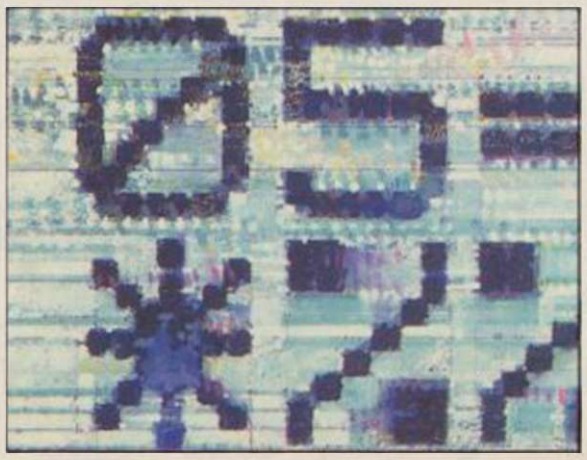
When you have designed a circuit, you can give it inputs and outputs and your ZX Spectrum will check it for you. Then it will run it, or tell you what's wrong so that you can modify it.

Make-a-Chip is a fascinating way of finding out how computer logic works.

Print Utilities
For 16K and 48K RAM Spectrum. **£9.95.**

Increase the printing and display facilities of your ZX Spectrum with the Print Utilities program.

Print Utilities enables you to enhance your programs by generating characters of eight different sizes which you can place anywhere on your screen.



Beyond BASIC
For 48K RAM Spectrum. **£9.95.**

Takes the agony out of assembler. Takes the mystery out of machine code.

Beyond BASIC gives you a deeper insight into the workings of your ZX Spectrum. It explains what happens inside your micro when you run a program, and it teaches you simple Z80 machine code programming.

A major feature of Beyond BASIC is that it enables you to write your own Z80 assembler programs – then you can actually see on your screen how they affect the ZX Spectrum memory and registers.

ZX INTERFACE 2®

The New ROM Cartridge/Joystick Interface

Loads programs instantly! Takes two joysticks! Just plug-in and play!

The ZX Interface 2 is the latest new peripheral for the ZX Spectrum® system. It enables you to use new ZX® ROM cartridge software: plug-in programs that load instantly. It allows you to use two standard joysticks, without the need for separate, special interfaces.

To use new ZX ROM cartridge programs, just connect Interface 2 to the rear of your Spectrum or Interface 1 and plug in the cartridge of your choice. The program is then loaded, ready to run!

You can use any joystick that has a 9-way D plug. Use one or two of them for extra fun with ZX ROM cartridge or Sinclair cassette programs – or with dozens of other Spectrum-compatible programs!

SEE BACK PAGE FOR ZX INTERFACE 2 AND ROM CARTRIDGE ORDER FORM!

...AND BRAND NEW ROM CARTRIDGE SOFTWARE!

There's already plenty of choice of ZX ROM cartridge programs for your Spectrum. Some are old favourites, in an exciting new form. Others are new.

And now, thanks to ROM cartridge technology, you can run them *all* on a 16K RAM Spectrum, even if they were originally written only for 48K machines!

Every ROM cartridge program loads fast and faultlessly. No wires, no waiting, no worries about loading errors! All of them are affordably priced too, at £14.95.

Backgammon

Everything you need to play the famous and deceptively simple board game. Board, stones, rolling dice and doubling dice are shown in full colour and high resolution. Choose from four levels of skill to suit experts and beginners alike – full rules are included.

Space Raiders

Your skill is all that's stopping successive waves of aliens from destroying Earth. Use your gun base to attack. Shelter behind buildings... move out and blast the passing alien soaceship!

Full-colour high-resolution graphics with sound.

New! PSSST

Robbie the Robot sits in his garden. Help him fetch compost to cultivate his prize Thyrgodian Megga Chrysanthodil. Help him make the right choice of pesticide, to ward off devilish insects. Stop the insects breeding to overwhelming numbers before Robbie's plant has bloomed. PSSST is horticulture with a horrendous twist!

One and two player option, with a host of features including sound effects.

Chess

This sophisticated program does everything you'd expect at board game level, and much more besides.

The high-resolution chessboard and pieces are arranged in a row and column system, so it's easy to key in your moves.

At any stage of the game you can request the computer to suggest a move, reverse roles or change the level of skill.

Full-colour high-resolution graphics.

Planetoids

Dodge and swerve using your thrust button, turn on a planetoid... fire! But beware – the alien ship moves fast to destroy you with cluster bombs. And when it comes to the crunch, use your hyperspace button!

Full-colour high-resolution graphics with sound.

Hungry Horace

Horace is forever being chased around the park by guards.

He steals their lunch, eats pathway flowers and creates chaos in the park by ringing the alarm!

You'll have to be quick to keep Horace out of trouble!

Full-colour high-resolution graphics with sound.

New! Tranz Am

Set in a future time ruled by cars and trophies, in a land where petrol replaces gold, and status is possession of the 8 Great Cups of Ultimate.

Driving your Super Blown Red Racer, use your skill to outwit and crash the Deadly Black Turbos. Use your instruments to locate and collect the trophies – before you overheat or run out of fuel.

A program with outstanding multi-directional movement, graphic features, and a playing area equivalent to more than 600 times actual screen area.

Horace and the Spiders

Guide Horace on the hazardous journey to the cobwebbed house full of poisonous spiders.

Safely in the house, you must move along cobwebs, choose a spot... and jump on it! The spiders will be in a frenzy – scuttling to repair their precious web.

And when a spider is spinning a new section, you're safe to attack and destroy it!

Kill all the spiders, and a new web appears... with even more spiders to catch.

Full-colour high-resolution graphics.

New! Cookie

You're Charlie the Chef, who keeps his ingredients locked in the larder. But if the ingredients escape, they bring the inedible Nasties with them!

You must daze the escaping ingredients with flour bombs, and knock them into the mixing bowl. Stop them getting into the dustbin, at all costs! And beware of Nasties that get into the mixing bowl!

Cookie is fast-moving panic in the pantry, with a cast of real characters. A program to make you smile – and sweat!

New! Jet Pac

As Chief Test Pilot of the Acme Interstellar Transport Company, your task is to deliver and assemble spaceship kits. On your way round the galaxy, you're free to collect precious stones and gold.

The catch? Rocket fuel is precious and scarce. And the aliens don't take kindly to the theft of their valuables. You'll need your wits and your lasers!

With a host of features, including multi-directional movement, explosions, sound effects and one and two player option.

ZX MICRODRIVE

NOW ON RELEASE

The ZX Microdrive® System – as you'd expect from Sinclair – is unique to the world of computing. It's a compact, expandable add-on system which provides high-speed access to massive data storage. With just one Microdrive alone (and Interface 1), you'll have at least 85K bytes of storage, the ability to LOAD and SAVE in mere seconds, the beginnings of a local area network of up to 64 Spectrums, *and* a built-in RS232 interface! The cost? Less than £50 for each Microdrive.

How to get ZX Microdrive

Spectrum owners who bought direct from us, by mail order, have been sent full details. Order forms are being mailed in strict rotation, so if you haven't yet received your order form please bear with us. We're making good progress in meeting the huge demand.

If you didn't buy your Spectrum by mail order, don't worry. Send us the form from the bottom of this page. We'll add your name to the mailing list, and send you details by return.

Each Microdrive costs £49.95. Interface 1 costs £49.95, but just £29.95 if purchased with a ZX Microdrive. Extra ZX Microdrive cartridges: £4.95.

How to order

Simply fill in the relevant sections on the order form below. Note that there is no postage or packing to pay on some purchases. Orders may be sent FREEPOST (no stamp needed). Credit card holders may order by phone, calling 01-200 0200, 24 hours a day. 14-day money-back option, of course. Please allow 28 days for delivery.

®ZX, ZX Spectrum, ZX Interface and ZX Microdrive are all registered trade marks of Sinclair Research Ltd.

Unlock Your Imagination

...with SCOPE Computer Graphics Language and write arcade-style game programs to compete with the professionals.

THIS sensational SCOPE utility and your Spectrum will unlock your imagination. It's amazingly simple and fast and enables you to write fast-moving games in MACHINE CODE.

SCOPE realises your potential and releases it. You'll amaze family and friends and surprise the professionals. *They said it couldn't be done.*

TECHNICAL DETAILS

SCOPE is a fully structured multitask compiled language, specifically for writing arcade-type games enabling you to program machine code without any knowledge of machine code.

SCOPE can be used as an assembler with SCOPE words as plain language mnemonics, therefore no knowledge of machine code is required.

Each command word will write into the program memory the relevant machine code.

It is generated from BASIC and is fully compatible with BASIC.

The language from the user end is very easy to comprehend and is comprehensive, providing many features not available from BASIC. SCOPE has to be used to be believed.

- ☐ *As fast as MACHINE CODE*
- ☐ *Simpler than BASIC*
- ☐ *Instruction Manual*
- ☐ *£11.95*

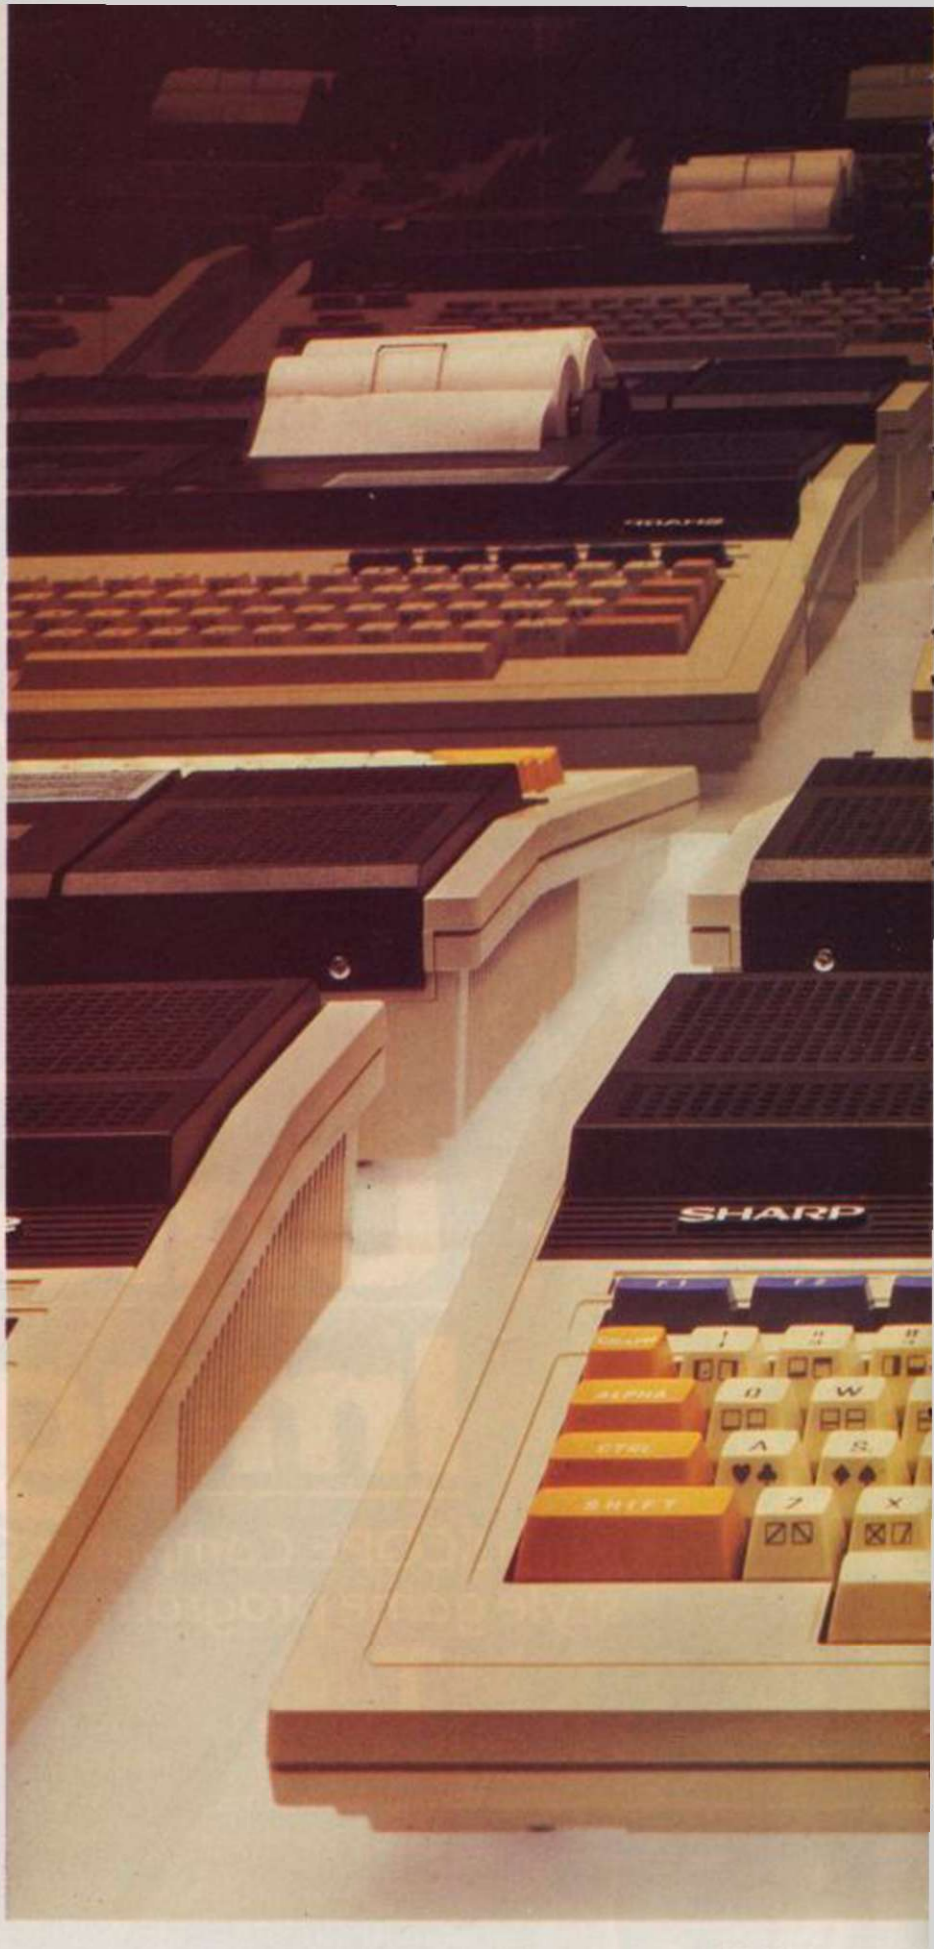
NO LIMIT



Now, a home computer with virtually no limit to its possibilities. The astonishing new Sharp MZ700. A machine with a dazzling array of talents.

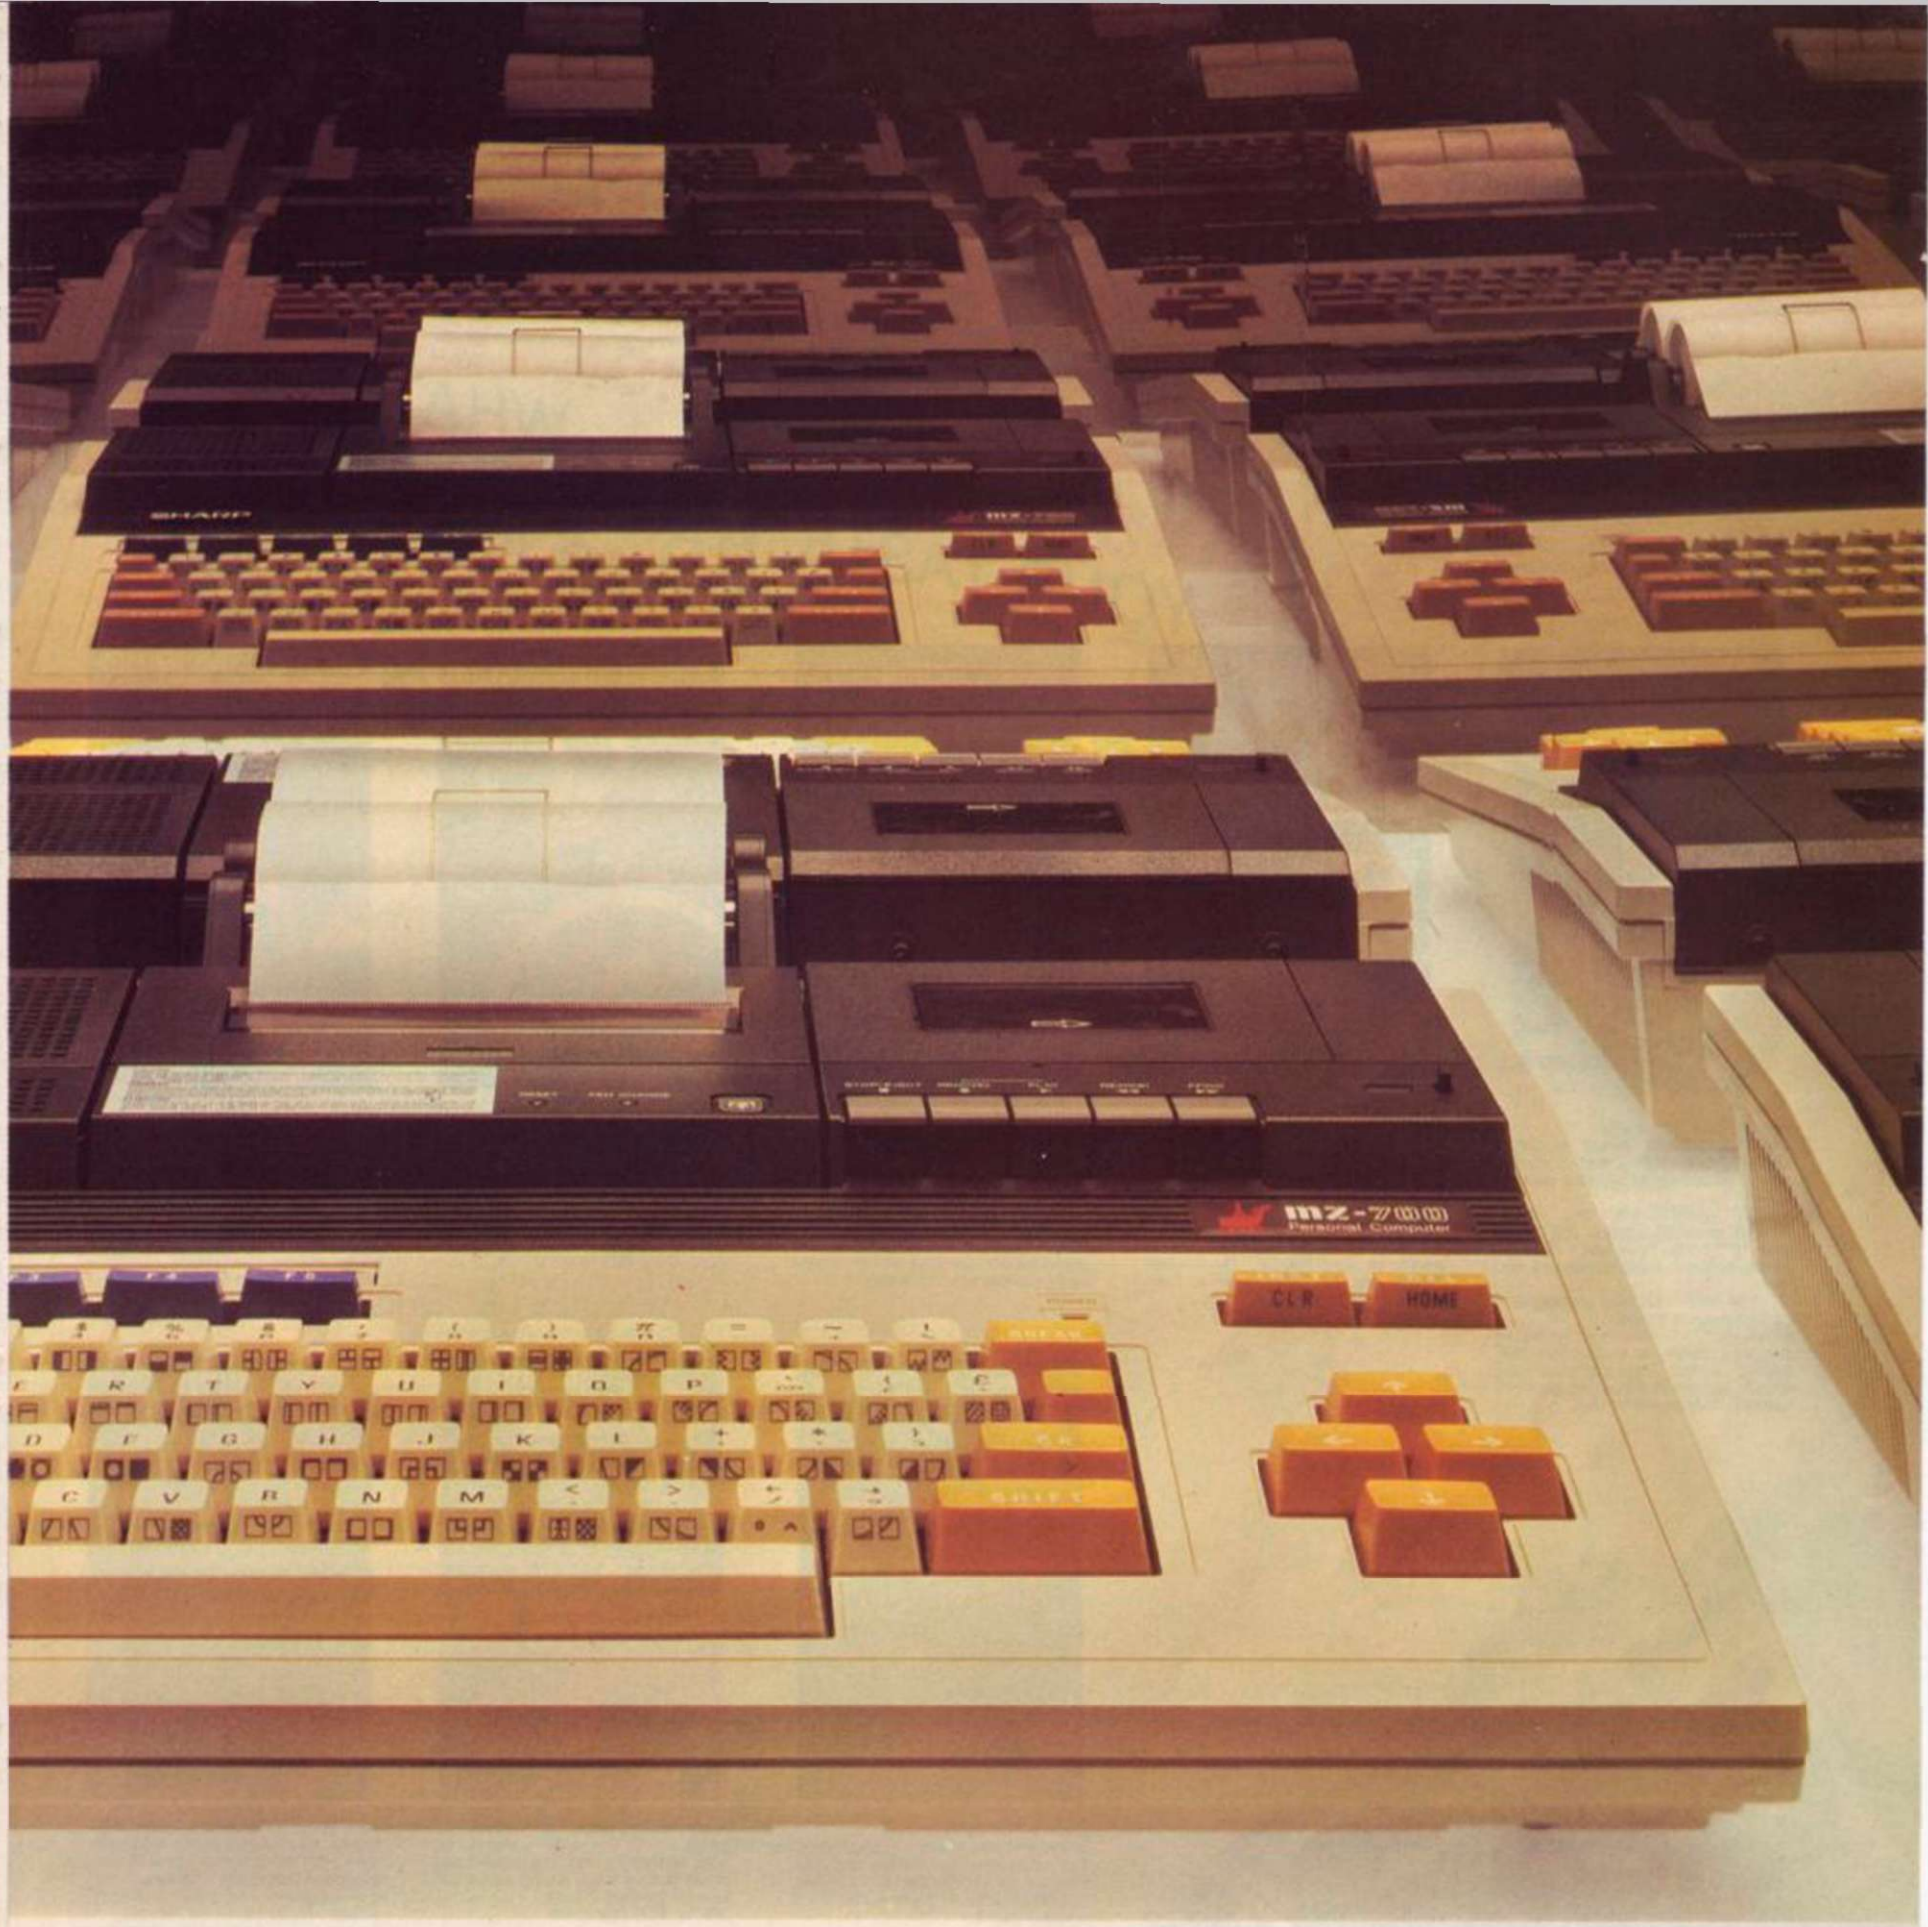
First, it's a 'clean' machine. So you are not limited to any one computer language. You have the flexibility to run and write programs in BASIC, FORTRAN, MACHINE CODE, PASCAL, ASSEMBLER and many others. And the MZ700's 512 predefined characters mean you can build up detailed pictures on the screen, without spending time specifying and designing special characters for games and special effects.

Second, it has a memory of 64K. So as your technique improves and develops, you are able to move forward to more and more advanced programming.

All of which makes this the perfect home computer for parents, as well as children.

The MZ700 gives you access to a wide choice of new software, from only £3·95 per cassette. An additional plotter/printer, costing £129·95, can produce high resolution graphics in 4 colours. A data cassette recorder is an extra at £39·95. Both add-ons fit snugly into this easy to carry compact system with no trailing wires. And you get ten exciting games, free on purchase, including Super Puckman, Circus Star, Snake v. Snake, and Man-Hunt.

The brilliant new MZ700.
The no-limit computer. £249·95. From Sharp. Where great ideas come to life.



CPU:	Z80A		1

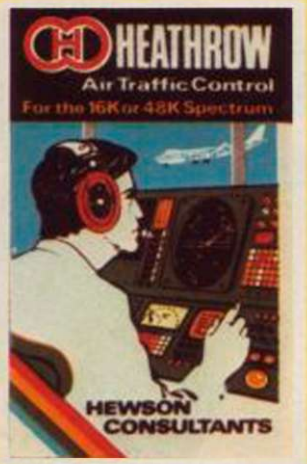
FOR SOFTWARE THAT CHALLENGES MIND AND DEXTERITY ... WHATEVER YOUR TASTE, WE HAVE SOMETHING FOR YOU

SPECTRUM



For the 16K Spectrum.
YOUR TASK: to direct incoming aircraft from holding stacks to runway – smoothly, safely and expeditiously.
YOUR INSTRUMENTS: Radar screen showing aircraft call signs, blips and trails. Four stack displays giving altitude, heading, speed and size.
SEVEN levels of play including a demonstration mode.
FEATURES: mixed aircraft, restricted airspace, minimum separation, outbound traffic, emergencies, unknown aircraft, radio failure, loss of a runway, instrument failure.

Find a map hidden in an inhospitable world inhabited by Dragons, Elves, Centaurs and other gruesome creatures. Role play the Wizard, Cleric, Rogue, Fighter or Simpleton, each with different characteristics. Fight your way through the Gloomy Castle, Maze and Mountains etc, with weapons and Magic. Remember things are not always what they seem. For the 48K spectrum.

An educational package which gives an appreciation of the location of all the countries of the world. Includes two fully detailed world maps. 16K version – shows the location and names the capital. 48K version – All the above plus population, area, currency, main languages etc and comparative statistics on the largest and smallest countries etc.

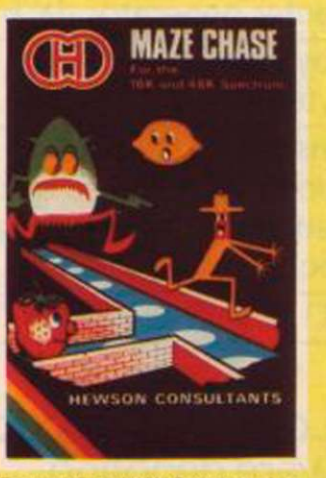
16K Spectrum. Defeat each squadron of Beeple Zaps and another appears only closer. Cyrian mothership with ejecting Zeetle Baps. 5 levels of play from Orions snail's pace to close your eyes and hope. Real time scoring. 3 lives. Pan galactic gargle blaster for highest score. Descending asteroids.

Fast and furious action. Joystick or Keyboard control. Locate the seiddab on your galaxy scanner. Scour the star studded blackness for your first sight of the enemy. Track their course and react rapidly as they try to break away. Let them grow in your sights and punch the fire button as they come into range.
16K or 48K Spectrum

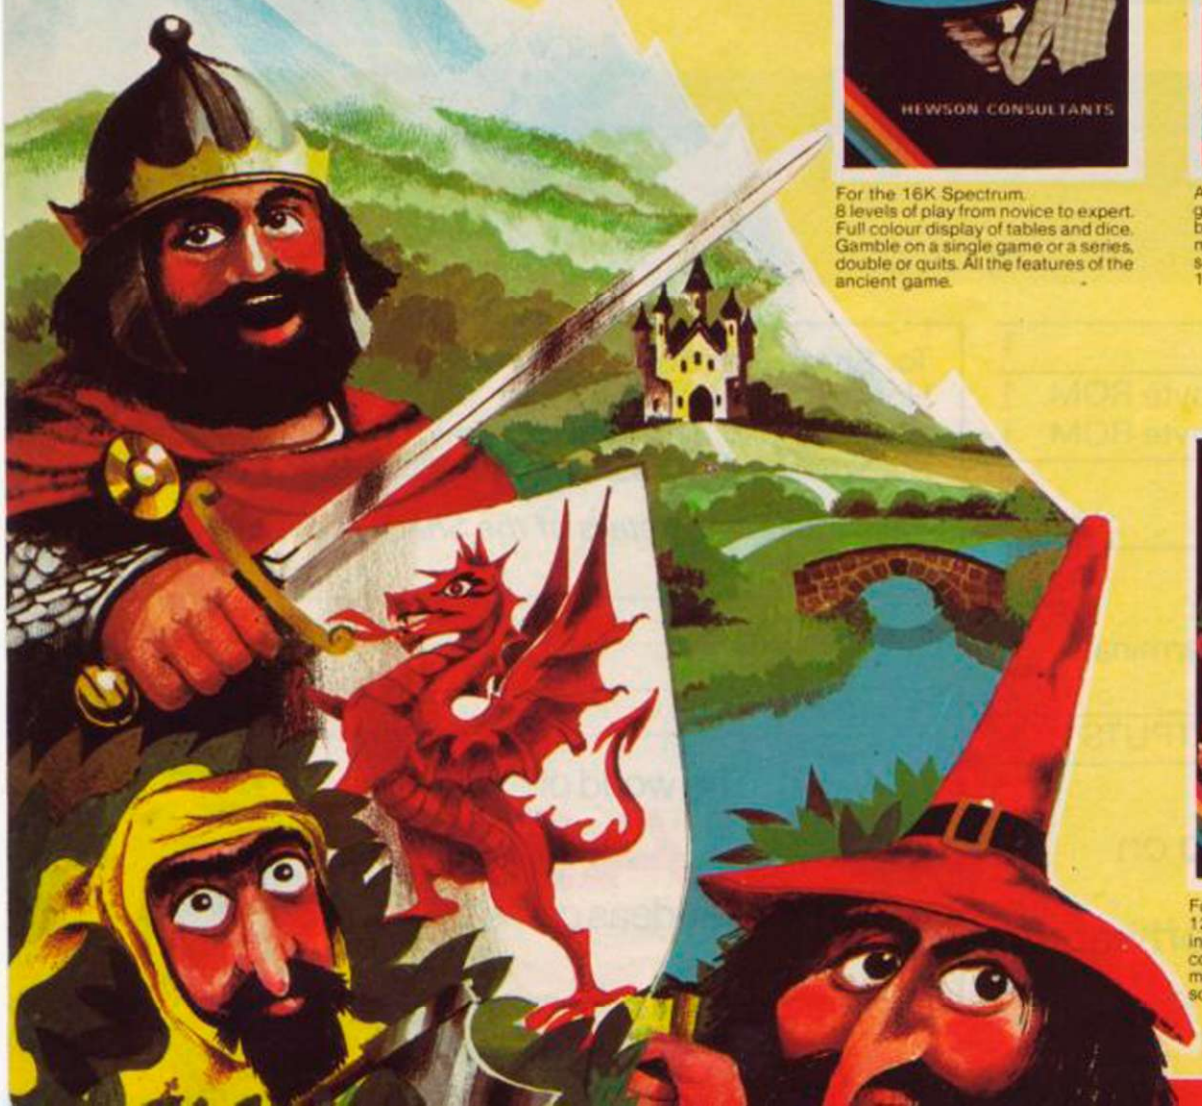
For the 16K Spectrum.
8 levels of play from novice to expert. Full colour display of tables and dice. Gamble on a single game or a series, double or quits. All the features of the ancient game.

A fast moving action packed arcade game. Climb the ladders, dig holes, bury monsters, eat the power pill, move fast to avoid being eaten. On screen scoring, 3 lives.
16K or 48K Spectrum

New all machine code version of our highly successful flight simulator. Now with perspective cockpit view, improved instruments, detailed map, four beacons and other enhancements. Multiple levels of play to develop your flying skills. Complete with printed flight debrief at the end of your flight – signed by the program author! The most realistic simulator on the market. 16K or 48K Spectrum.

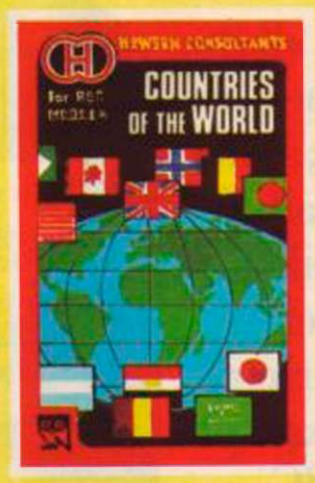


For the 16 and 48K Spectrum. 4, or 12 mazes, highest score to date, 4 independent guardians, 3 lives, full colour, fast machine code action, magic strawberries, eat lemons to score more, real time scoring.



HEWSON CONSULTANTS

BBC



An educational package which gives an appreciation of the location of all the countries of the world. Includes detailed world map. Shows the location and names the capital plus population, area, currency, main languages, and comparative statistics on the largest and smallest countries etc. BBC Model B

Take the controls of your computer and fly by night over mountains to a safe landing. Take off, bank left and right, navigate between beacons, adjust the flaps and the rudder. A careful simulation of the deliberate operation of flying a plane – unrealistic speeds and altitudes cannot occur because your plane will crash. BBC Model B.

Steer your Formula One racer around one of five circuits – including Silverstone, Monza and Brands Hatch. Break the lap record only by strategy – and sheer courage. Pit stops, wet and dry tyres, chicanes, fire and weather hazards, means total concentration is needed just to stay alive! BBC Model B.

40 BEST MACHINE CODE ROUTINES FOR THE ZX SPECTRUM *by Andrew Hewson and John Hardman*
How to load and save machine code. How to use the system variables. How program lines are stored. How to use the stack, the display, the attribute files. ROUTINES. Scroll –up, down, side to side by pixel or by character. Rotate character, invert character – horizontally and vertically. Line renumber – including GOSUBs, GOTOs, RUN etc., and many more.

20 BEST PROGRAMS FOR THE ZX SPECTRUM *by Andrew Hewson*
Program titles include: Machine Code Editor. Index File – filing system for the ZX Spectrum. Duckshoot. Graphix – construct up to 210 graphics. Plus football, digitiser, diary and many more.

DRAGON

Hi Res, real time flight simulator. Two runways, take off, bank, adjust trim, navigate between beacons, loop the loop, do barrel rolls and land. Superb cockpit display of dials and readouts. Instruments, Alt, ASI, VSI, AH, ILS, TS, RPM, GAS, TEMP, HDG, BCN, BRG, FLAP, and GEAR. Simply the BEST.

Selected software available from JOHN MENZIES, SPECTRUM and all leading micro computer software retailers.

Boots

Not all home computers stay at home.

The BBC Micro is the ideal family computer–simple to operate, yet fast, powerful, with enormous potential.

But it's nice to know, when you buy one for your home, that the business, educational and scientific worlds agree with your choice.

Here are a few stories to illustrate how the BBC Micro gets out and about. And one to remind you how helpful it can be when it stays at home.

A practical lesson in business admin.

The contribution of the BBC Micro in the classroom has long been recognised at Perins Community School in Hampshire.

The School has 12 BBC Micros used extensively across the syllabus: in fact some pupils are using them to study for their GCE O Levels in computing.

One of the programs available to Perins teachers such as David Beck, pictured below with his class, is "Newsagent."

This program contains all the necessary information for the class to run a newsagent's shop; allowing them to organise daily deliveries, make up bills and keep an eye on stock control and ordering.

It's a nice example of how the BBC Micro can be used not only to acquaint a class with the language of computers, but also with some of the realities of the community in which they live.

Correcting Jodrell Bank.

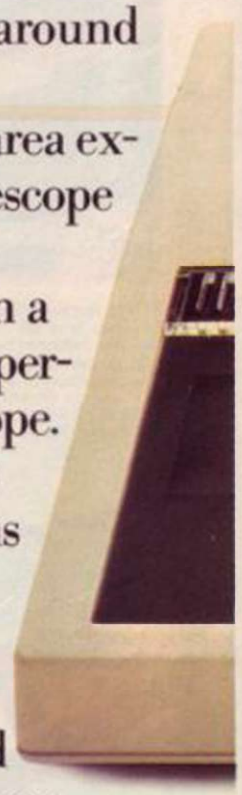
The BBC Micro is a familiar worker around Jodrell Bank.

You'll find it in the reception area explaining the workings of a radio telescope to visitors, for example.

But it's also been helping in a more testing task: to improve the performance of the Defford telescope.

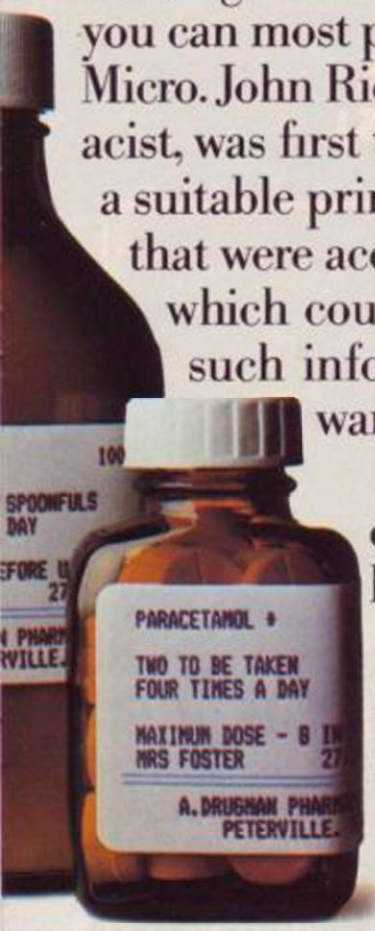
In this application it has been used to make calculations necessary to determine the precise parabolic shape of the dish.

Theodolites are used to do the measuring–then the BBC Micro works out the necessary corrections.



The end of the scrawl.

If any of you have noticed how much easier it is to read and understand labels on drugs and medicines these days, then you can most probably thank the BBC Micro. John Richardson, a Preston pharmacist, was first to realise how a micro with a suitable printer could produce labels that were accurate and legible and which could include, automatically, such information as drug reaction warnings.



At the same time it could record drug usage for better stock control.

He chose the BBC Micro for its versatility and potential for expansion.

John Richardson believes that this system will be recognised as standard in the profession and be used in hospitals, health centres and pharmacies throughout the UK.

Meanwhile back at home.

Dr. & Mrs. Yarwood bought a BBC Micro as a birthday present for their 12 year old daughter.

However, it quite quickly became common property.

All three can now write their own programs. Mrs. Yarwood is particularly proud of one program she has compiled to help teach her daughter French vocabulary.

They all agree that although the Micro is fast and powerful enough to be at home in Jodrell Bank, it is also the ideal computer at the Yarwood home: simple to set up (virtually any TV set and cassette player is all you need) and simple to use.

All this for only £399.

The BBC Micro comes with a comprehensive, step-by-step User Guide which introduces you to your micro and shows you how to construct useful programs of your own.

You will also receive a free "Welcome" cassette which contains 15 different programs for you to experiment with, ranging from music and graphics to games like Kingdom and Bat 'n' Ball.

The BBC Micro is available from W H Smith Computer Shops, Boots, John Lewis and local Acorn stockists.

Alternatively if you would like to order one with your credit card or if you want the address of your nearest supplier just phone 01-200 0200 or 0933-79300.

The BBC Microcomputer System.

Designed, produced and distributed by Acorn Computers Limited.

INVADERS

A superb example of this truly classic arcade game. Includes all the features of the original and much, much more.

6·95

LIGHT CYCLE

The MASTER CONTROL PROGRAM has ordered you to race your light cycle on the infamous grid. This is an incredibly fast, adrenalin pumping game that is very addictive. There is an option to race against either another player or the computer – but we warn you its very very good!

6·95

THE ULTRA

You have been challenged to a duel to the death in outer space by the ULTRA, an evil race of mutants from the darkest depths of the galaxy. We dare you to accept their challenge!
This is a PURE arcade game and a must for all you alien zappers! 16 different screens make things really tricky.

6·95

HOPPER

Help FERGUS and his friends across the highway avoiding the traffic, and then over the treacherous river on the backs of turtles and logs to the safety of the lilly pond.
Features include: 6 lanes of traffic, diving turtles, crocodiles & flies.

6·95

CENTIPEDE

You are caught in a vicious jungle of giant insects. Centipedes are attacking you from all sides. Killer fleas are dropping from the sky, and to top things off there's a venemous spider lurking in the background. You only have your trusty laser cannon as defense.

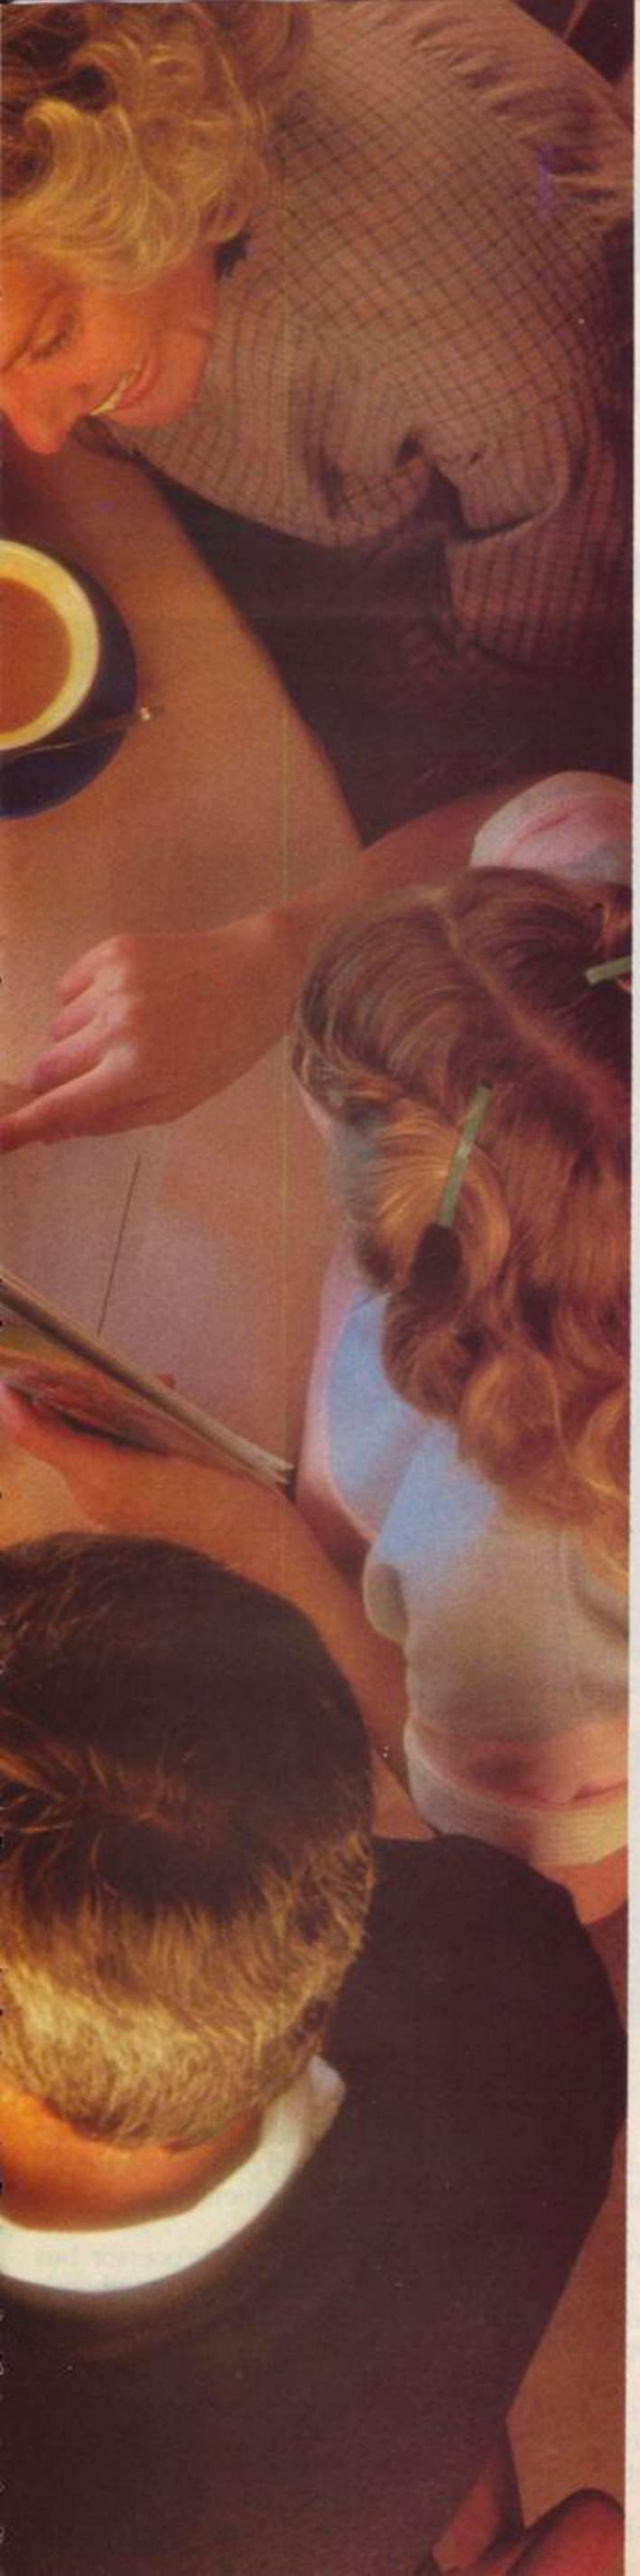
TEXAS INSTRUMENTS
HOME COMPUTER



The unbeatable TI Home Computer. It's all the computers your family will ever need.

Buying a home computer is something you have to get right first time. It's too late when you've got one to find it won't take plug-in software. Or can't be programmed without an expensive accessory.

The TI Home Computer is a real computer system

The TI Home Computer has got the memory power you might expect from more expensive computers, built in. At its heart is a powerful TMS 9900 16-BIT Microprocessor. Most other home computers have only an 8-BIT. And you can expand the memory from 16K of RAM up to 52K.

The total memory capacity is 114K Bytes.

A wide range of software for everyone

Another feature that makes the TI system so powerful, yet so easy to use is Solid State Software.™ These plug-in cartridges cover everything from space games like Parsec™ to teaching maths, managing home finances and composing music. And the range is getting wider all the time.

It even has what professionals look for in a home computer

CPU: TMS 9900 16-BIT, plus 256-byte Scratchpad RAM.
Memory: Total 114K bytes; 26K bytes ROM internal; up to 36K ROM cartridges external; 16K built-in RAM expandable to 52K bytes.
Keyboard: 48 Key QWERTY, alpha lock, function key auto repeat.
Sound: 5 octaves, 3 simultaneous tones, noise tone.
Colour: 16 foreground and background. High resolution.
Interfaces: Cassette, TV, 2 joysticks, main peripheral port.

™ trademark of Texas Instruments.

More than one programming language

The standard programming language, TI BASIC, is built into your TI Home Computer so you can begin programming right away. But there's an expanded range of optional languages like Extended BASIC, TI Logo, USCD-Pascal, TI FORTH and Assembler.

With these you can fully expand your programming skills.

A wide range of peripherals

Most computers lose a lot of memory when you add peripherals. The TI Home Computer is different. Every peripheral comes with its own built-in programs to keep the loss of memory to a minimum.

The convenient Peripheral Expansion System houses up to eight peripherals. Additional hardware cards simply plug in. You can even add a complete Floppy Disk Memory System.

The peripherals include memory expansion, RS232 Interface, P-Code card and more. There's also a sophisticated matrix printer and Solid State Speech™ synthesizer – which you can use with your own TI BASIC programs.

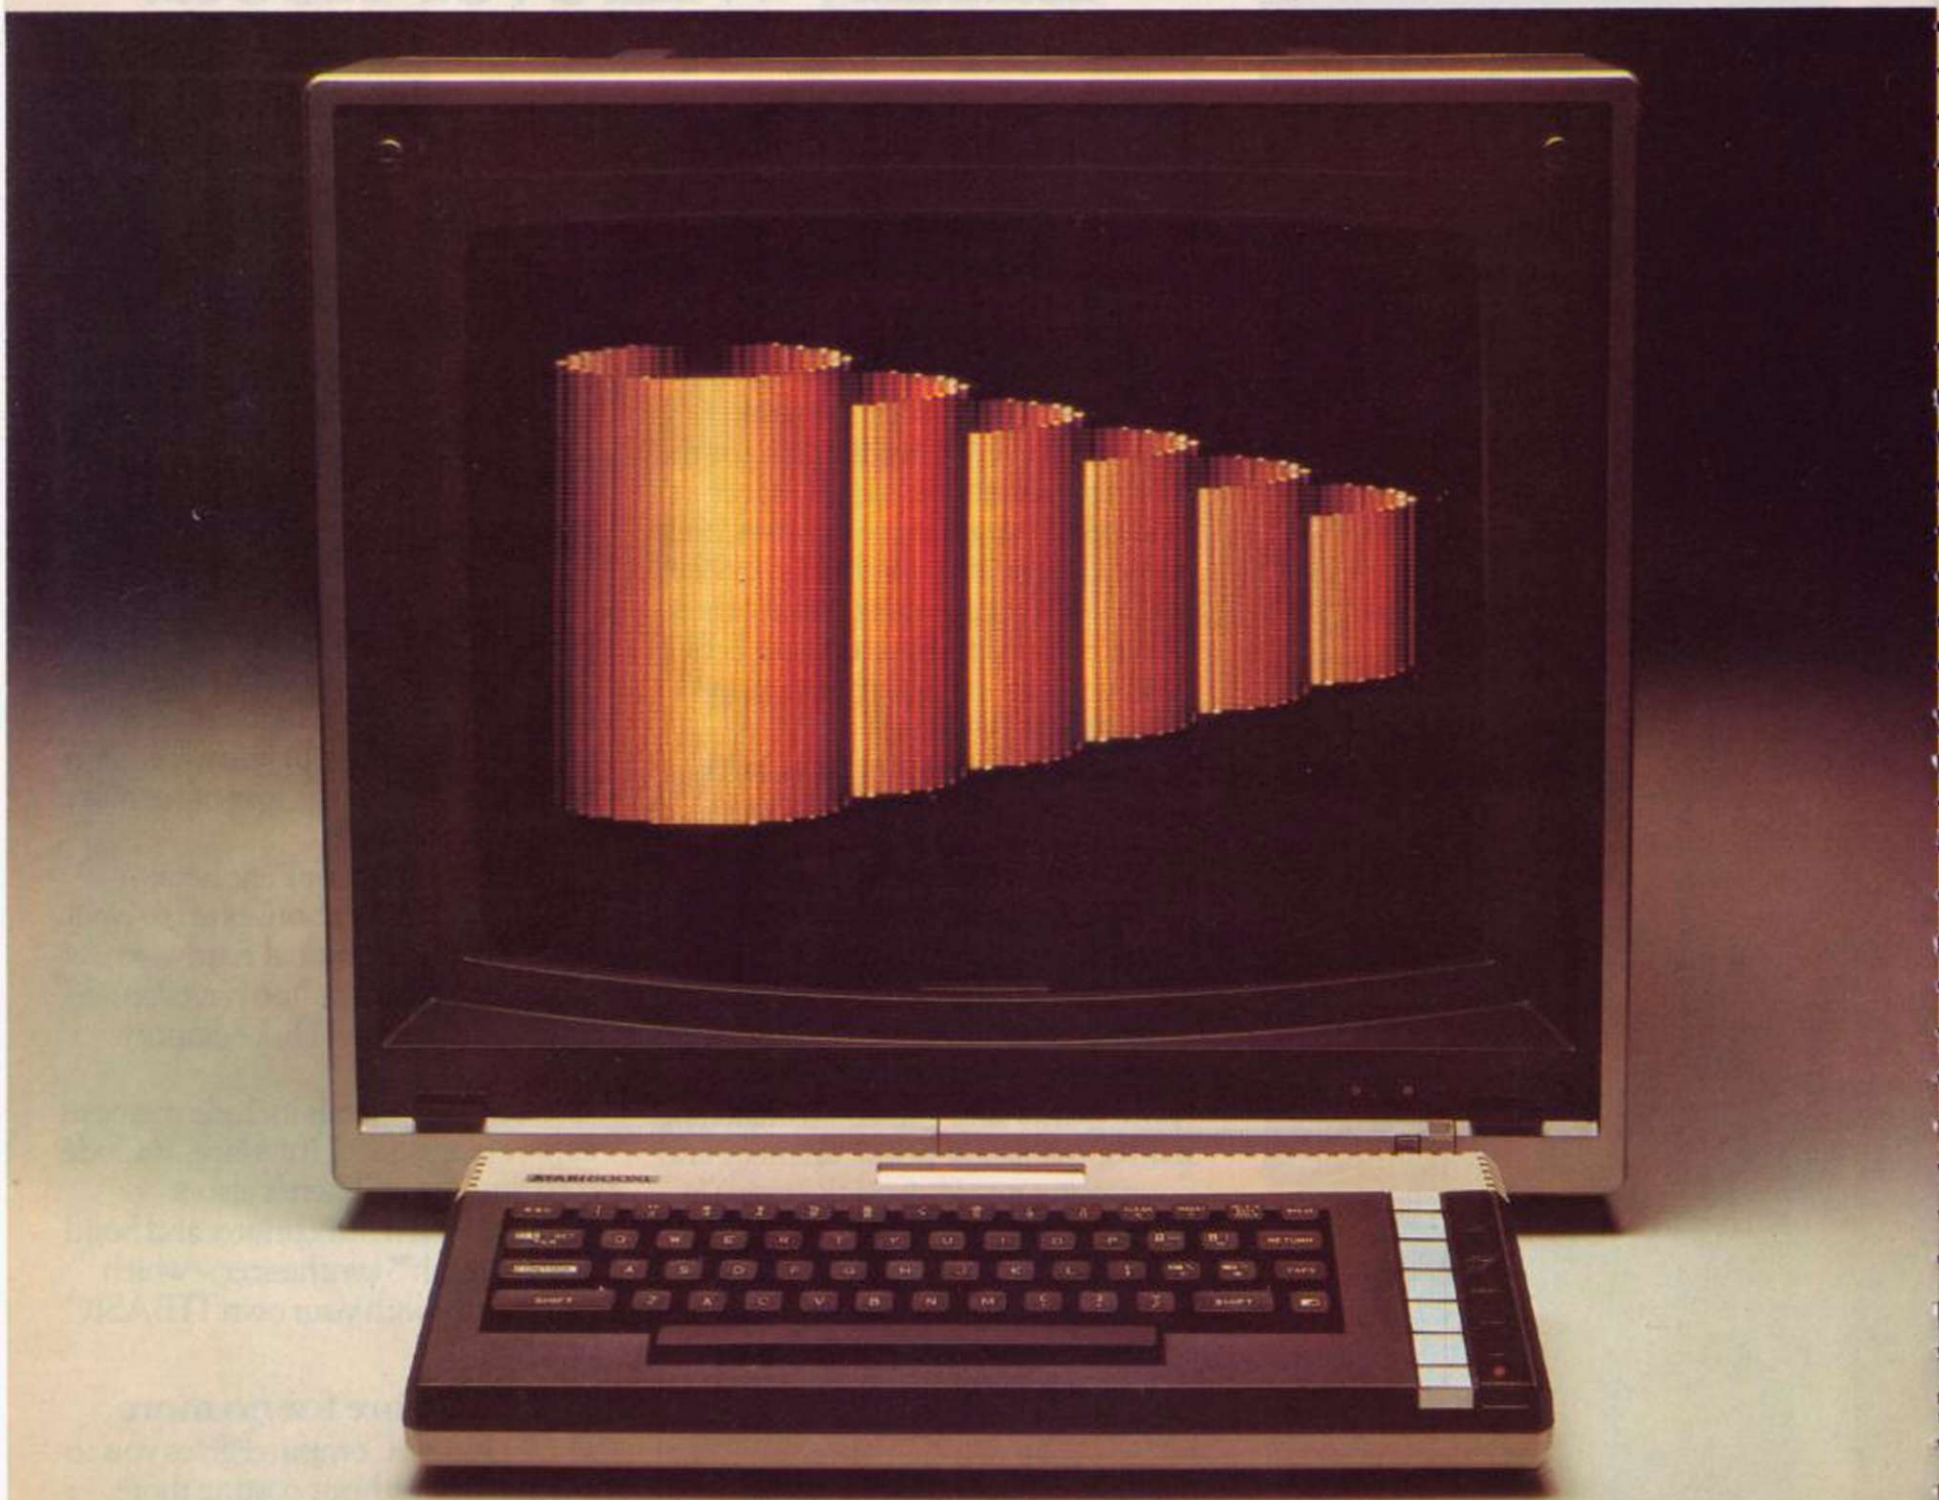
A lot more for no more

The TI Home Computer gives you so much more without costing more. At today's price it's exceptional value. Take your family round to try one. If you never try it you'll never know what you're missing.

TEXAS INSTRUMENTS

Creating useful products and services for you.

As your expe
so can your



600XL Home Computer.

Whatever you want your home computer to do, the ATARI 600XL™ can do it.

ATARI 600XL product specifications.

Colour capabilities: 16 colours and 16 intensities 256 shades.

Memory: 16K RAM expandable to 64K with memory expansion module. 24K ROM operating system including ATARI BASIC programming language.

Sound: 4 independent sound synthesisers. Each with a 3½ octave range.

Display: 11 graphic modes. 5 text modes. Up to 320 x 192 resolution. Maximum text display 24 lines by 40 columns.

Special ATARI integrated circuits: GTIA for graphics display. POKEY for sound and controller ports. ANTIC for screen control and I/O.

CPU: 6502C microprocessor. 0.56 micro-second cycle. 1.8 Mhz.

Extended graphics functions: High resolution graphics. Multi-coloured character set. Software screen switching. Multiple redefined character sets. Player missile (sprite) graphics. Fine screen scrolling. Changeable colour registers. Smooth character movement. Simple colour animation facilities.

Programming features: Built in ATARI BASIC programming language plus 8 other languages. HELP key will provide additional information and menu screens. Syntax checking on entry.

Input/Output: External processor bus for expansion with memory and peripherals. 2 controller ports. Serial I/O connector. Monitor output.

Software: Over 1000 items of software available including self teaching programs with unique voice over. Education. Home management. Programming aids. Atari user written programs (APX). And Atari's famous entertainment software.

rience grows Atari 600XL.

1. Program Recorder.

2. 64K Memory Module.

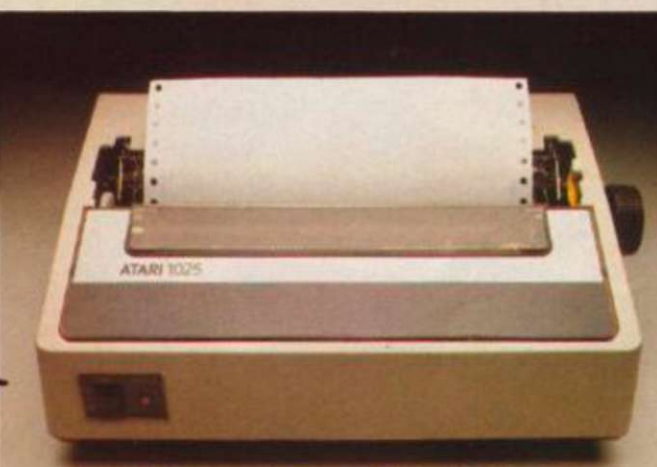
3. Touch Tablet.

4. Trak Ball™ Controller.

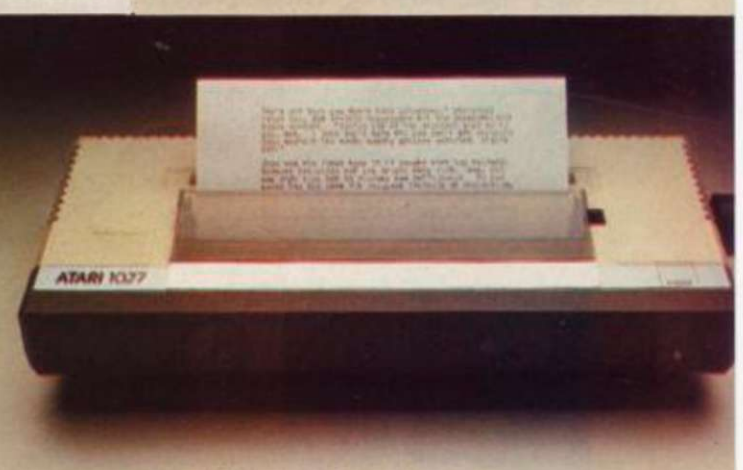
5. Super Joysticks.

6. Colour Printer.

7. Disk Drive.



8. 80 Column Dot Matrix Printer.



9. Letter Quality Printer.

These peripherals will be available soon:

1. ATARI 1010™ Program Recorder for low cost storage and retrieval capability. Data transmission 600 baud. Storage capability 100K bytes on a 60 minute cassette. Track configuration 4 track, 2 channels (digital and audio). Auto record/playback/pause control.

2. ATARI 64K Memory Module gives the 600XL a massive 64K RAM.

3. ATARI Touch Tablet enables you to paint pictures and draw diagrams, with the touch of a stylus.

4. ATARI Trak Ball™ Controller enables cursor movement in any direction; adds to the pleasure of Atari games.

5. ATARI Super Joysticks. Gives you a greater competitive edge over your games.

6. ATARI 1020™ Colour Printer plotter. Four colour graphic print capability. 40 column. 10 characters per second. 5, 10 and 20 characters per inch.

7. ATARI 1050™ Dual Density Disk Drive. 5¼ inch disks holding 127K randomly accessible bytes provides both expansion and flexibility for your 600XL system with DOS III.

8. ATARI 1025™ 80 Column Dot Matrix Printer prints 5, 10 or 16.5 characters per inch. 40 characters per second. Ideal for program listings, financial reports, etc.

9. ATARI 1027™ Letter Quality Printer for word processing letters in professional type.

If you'd like to know more about the ATARI 600XL, write to Atari International (UK) Inc., P.O. Box 407, Blackhorse Road, London SE8 5JH and we'll send you all the details.

The new Atari XL home computer system.

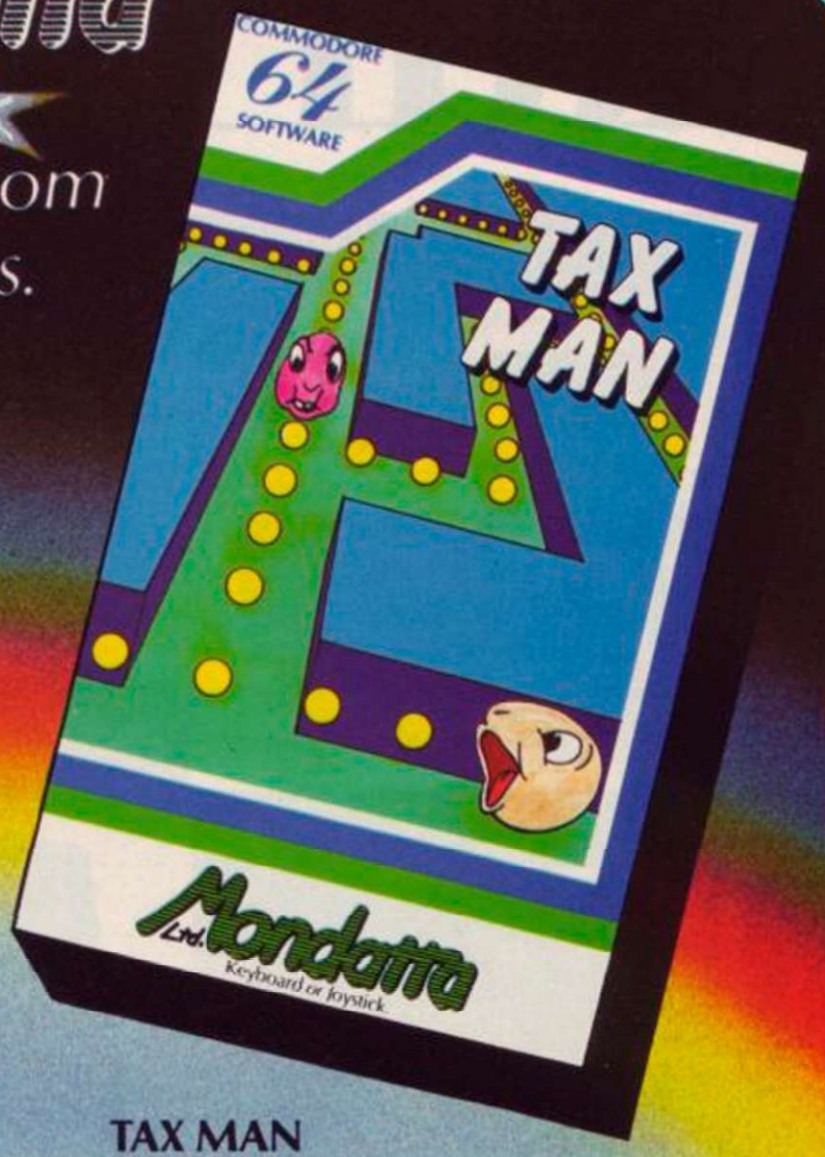
®ATARI and design Reg U.S. Pat and TM Off. TM. Trademark of Atari Inc. The ATARI 600XL is compatible with ATARI 400 and 800 programs.

SOFTWARE you can afford!

For the Commodore 64

Ltd. Mondatta

Software from the States.



SUPER COPTOR

Fly Super Coptor in a Mission to Save your Country from destruction. Beware of "Air Missiles", "Radar Baloons", "Laser Screens". Control your "Super Coptor" with split second timing — are you up to it — 9 nerve popping, action packed levels of play.

ONLY £5.65.

TAX MAN

You are on the run, gathering as much money as possible while being pursued by Taxmen with tax bills in their hands. Ready to pounce on you and make you bankrupt. Can you outsmart them or will they amubush you by hiding in the background.

6 exciting "Arcade Action" levels of play. A completely new version of this "nerve popping" game.

ONLY £5.65.

DO YOU WANT A SHARE OF THE ACTION - £55,000

Mondatta will pay up to £55,000 for good quality games software. Send details to the Software Development Manager at the nearest address below.

DEALER INQUIRIES WELCOME.

POST COUPON NOW

Please rush me _____ Tax Man at £5.65 each
_____ Super Coptor at £5.65 each
+ 50p post & packing.

100 FREE PROGRAMS
FROM SILICA SHOP — WITH EVERY PURCHASE OF AN
ATARI 400 800

ATARI

REDUCED PRICES!

We at Silica Shop are pleased to announce some fantastic reductions in the prices of the Atari 400 800 personal computers. We believe that the Atari at its new price will become the U.K.'s most popular personal computer and have therefore set up the Silica Atari Users Club. This club already has a library of over 500 programs and with your purchase of a 400 or 800 computer we will give you the first 100 free of charge. There are also over 350 professionally written games and utility programs, some are listed below. Complete the reply coupon and we'll send you full details. Alternatively give us a ring on 01-301 1111 or 01-309 1111.

ATARI 400 with 16K	**£99**
ATARI 400 with 48K	**£158**
ATARI 800 with 48K	**£249**

400/800 SOFTWARE & PERIPHERALS

Don't buy a T.V. game! Buy an Atari 400 personal computer and a game cartridge and that's all you'll need. Later on you can buy the Basic Programming cartridge (£35) and try your hand at programming using the easy to learn BASIC language. Or if you are interested in business applications, you can buy the Atari 800 + Disk Drive + Printer together with a selection of business packages.

Silica Shop have put together a full catalogue and price list giving details of all the peripherals as well as the extensive range of software that is now available for the Atari 400/800. The Atari is now one of the best supported personal computers. Send NOW for Silica Shop's catalogue and price list as well as details on our users club.

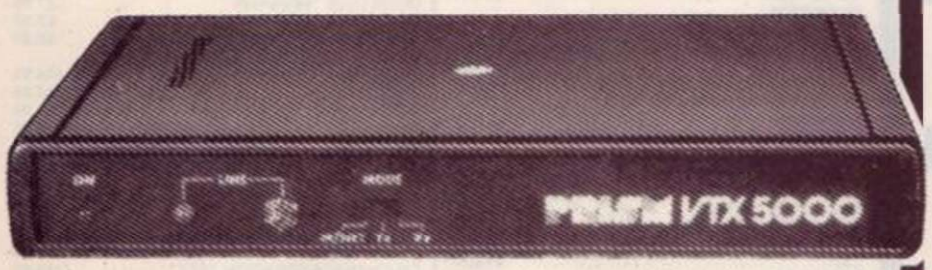
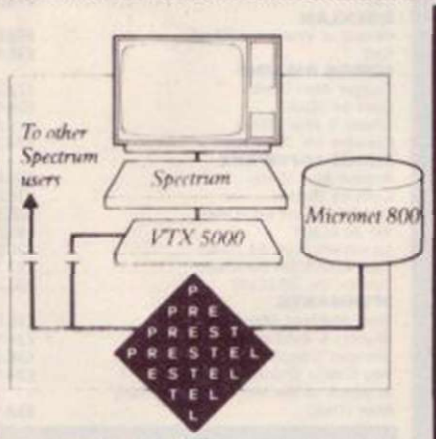
NOW, YOUR ZX SPECTRUM IS YOUR KEY TO THE WORLD

with the incredible

PRISM VTX 5000 MODEM



- Versatile modem for ZX Spectrum (16K or 48K) versions
- Slim design fits easily, matches your micro
- Instant access to Prestel™ & Micronet 800 information services
- Instant communication with other ZX Spectrum users
- Use the Prism VTX 5000 with a Sinclair printer - and print Prestel frames



If you own a Sinclair ZX Spectrum, we've got some great news for you. Plug in the slim device above, and your micro instantly becomes a highly intelligent interactive terminal, accessing a massive database that includes the entire Prestel™ information service, and the spectacular new Micronet 800 micro-users' databank™. The Prism VTX 5000 modem fits neatly under your ZX Spectrum (it works with 16K and 48K versions) and talks to the world via your telephone. Besides the familiar - and growing - Prestel service (Spectrum UK has its own micro users' update on Prestel), the Micronet 800 service puts a vast array of downloadable games, education and business packages, and micro information at your fingertips. You can talk to other ZX Spectrum users, too - either directly, for the cost of a 'phone call, or via the Micronet 800 coded 'Mailbox' system which holds messages until you're ready to access them. The Prism VTX 5000 comes complete with connecting leads and instructions; plus a full Micronet 800 information / application pack. Plus! a voucher worth up to £25 for a FREE Jack Plug installation (if required) by British Telecom - Ask your local SPECTRUM dealer for full details.

SPECTRUM PRICE

£99.95

- Including Micronet 800 joining fee, and VAT
- Average domestic subscription (includes both Micronet 800 AND Prestel!) - around £1 a week

™ Prestel and the Prestel symbol are trademarks of British Telecommunications

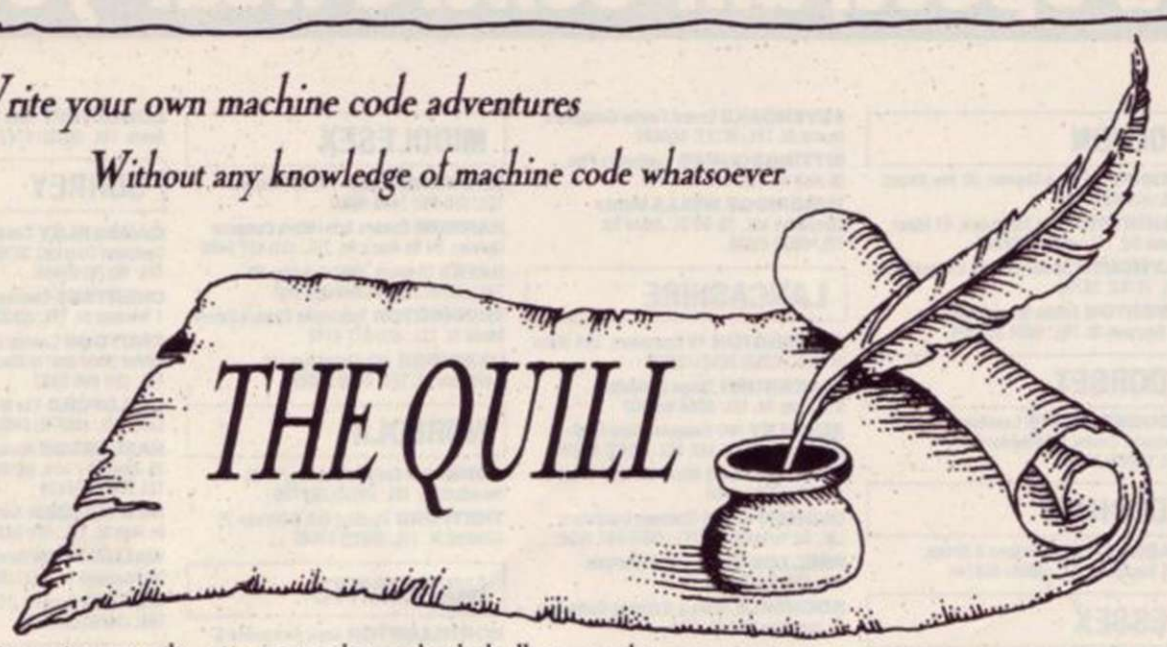
Write your own machine code adventures

Without any knowledge of machine code whatsoever

THE QUILL



THE QUILL is a major new utility written in machine code which allows even the novice programmer to produce high-speed machine code adventures of superior quality to many available at the moment without any knowledge of machine code whatsoever.

Using a menu selection system you may create well over 200 locations, describe them and connect routes between them. You may then fill them with objects and problems of your choice. Having tested your adventure you may alter and experiment with any section with the greatest of ease . A part formed adventure may be saved to tape for later completion. When you have done so *THE QUILL* will allow you to produce a copy of your adventure which will run independently of the main *QUILL* editor, so that you may give copies away to your friends.

THE QUILL is provided with a detailed tutorial manual which covers every aspect of its use in writing adventures. It is impossible to describe all the features of this amazing program in such a small space so we have produced a demonstration cassette which gives further information and an example of its use.

This demo-cassette is available at **£2.00.** and *THE QUILL* itself at **£14.95.**

FOR THE 48K SPECTRUM AT £14.95

Our Software is now available from many computer shops nationwide, or direct from us by post or telephone.

SAE for full details of our range.

Dealer enquires welcome.

DOWNSWAY

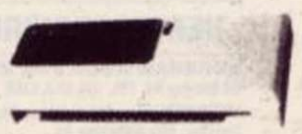
Three for the price of one!

Switchable
DOWNSWAY 16K CARTRIDGE FOR VIC 20



A smartly styled RAM cartridge in a sturdy injection-moulded ABS plastic case which matches the finish of the computer.

SPECIAL FEATURE! The cartridge is switchable for either 3, 8 or 16K use, and despite the small size of the cartridge (less than 20mm protrudes when fitted to the VIC 20) the switch can be operated without removing the cartrdge.

The Downsway cartridge plugs directly into the rear expansion port and at a flick of a switch you can have 6655, 11755, or 19967 bytes of RAM immediately available — all with just one cartridge!

Plus full compatibility with all appropriate accessories.

ULTIMATE PLAY THE GAME is a trade name of Ashby Computers & Graphics Ltd. The Green, Ashby de la Zouch, Leics. LE6 5JU

COMMODORE

BOOKS BY MELBOURNE HOUSE

Here are four great books from Melbourne House to put you in total control of your Commodore 64 and VIC 20. Each is clearly written with step by step instructions, and fully illustrated. Now you can explore the full potential of your Commodore micro with exciting programs, brilliant new games and innovative programming techniques.

VIC 20 Exposed

First time computer owners or experienced programmers — get more out of your VIC 20. Understand all the facilities of your micro and get the maximum potential out of your programs: "VIC 20 Exposed" lets you understand exactly how this versatile home computer works, from BASIC right through to machine language — all in simple, straightforward language.

VIC Innovative Computing

Packed with exciting arcade, strategy and adventure games — these 30 easy to enter programs open a whole new dimension in computer game excitement.

"If you were to ask me which books I would buy, I would take VIC Innovative Comuting"
— Practical Computing

"Good value for money with some fascinating type-it-yourself games. Even those with little experience of programming their VIC 20 should be able to make full use of these listings"
—Educational Comuting

Commodore 64 Games Book

Teach your Commodore 64 every trick in the book. 30 programs ranging from nerve shattering space games such as Galaxy Raid and Earth Defence, to real life adventures including Sea Harrier and Flight Simulator. You can enter them all yourself by simply following the easy to enter listings.

"For a Commodore 64 games enthusiast this book is a must"
— Personal Computer News

Commodore 64 Exposed

The definitive book for the Commodore owner. A complete and comprehensive guide, that clearly explains every function of your Commodore 64, from BASIC to machine language. This book goes far beyond the data provided in the Commodore user's guide. Includes full details on advanced programming, graphics and sound, plus simple demonstration programs that can be entered in minutes.

Pat the Postman
Really original. All Pat has to do is collect parcels whilst avoiding obstacles – like cars, fires, trains, etc. Skill level and Hall of Fame.
48K Spectrum. £6.95

Deffendar
Earth is under attack from mutant aliens in an accurate implementation of a top arcade game – and one of the most difficult to survive in!
48K Spectrum. £6.95

Cruise Attack
Save the city from annihilation in this wonderful version of an arcade favourite. Nine skill levels, bonus points for attack ships.
48K Spectrum. £6.95

Nanas
Catch the bananas, miss the coconuts. Easy? Try it and see. Simple in concept, hilariously entertaining – it'll drive you bananas.
16K Spectrum. £5.95

Timequest
A warp-space accident spreads your capsule across time. As you land in each new era, fresh perils face you. A very skillful graphic adventure
48K Spectrum. £6.95

One Hundred & Eighty
That famous shout tells you what it's all about! A good implementation of a difficult game – doubles, trebles, twenty-five and bull all possible.
48K Spectrum. £6.95

Land of Sagan
A quest to find the long lost Staff of Health. Is it in one of the castles? Or in the Tower? There are plenty of problems – and plenty of opponents – in this great graphic adventure.
48K Spectrum. £6.95

Creepy Crawler
An authentic version of one of the most addictive arcade games devised. All the usual features (Centipede, Spider, Bug, etc) with full use of Spectrum graphics and sound.
16K Spectrum. £5.95

Mad Martha II
Great sequel to the best-selling Mad Martha. Hilarious graphic adventure, with hero Henry in sunny Spain, beset by wacky waiters, mad bulls and the wrathful Martha.
48K Spectrum. £6.95

SAS Assault
Your mission – rescue the Russian ambassador from terrorist kidnappers, before the Kremlin declares war. Loads in two parts – your rating in the second depends on your skill in the first.
48K Spectrum. £6.95

Star Trek
Defend the star systems against the Klingon attack. Runs in real time – so you have to make the right decisions fast!
48K Spectrum. £6.95

Drakmaze
Find your way round Dracula's domain. A game to get your teeth into!
48K Spectrum. £6.95

Laserwarp
Invaders, Aliens, this game has the lot – and you have to survive to destroy the Master! Simple controls, far from simple task.
48K Spectrum. £6.95

Knockout
No aliens, lasers, invaders or rockets – just simple but absorbing fun which up to 4 players can enjoy.
48K Spectrum. £6.95

Galakzions
Watch out as the Galakzions break formation to attack in such force that no mere human can survive!
16K Spectrum £5.95

See them at Lightning, PCS, Tiger, Co-op, Menzies, W H Smith & other leading retailers

DO YOU WANT A WORD PROCESSOR FOR YOUR BBC OR A WORD PROCESSOR FOR YOUR BBC ?

Yes there is a difference between word processors and we can offer the best because it's the FIRST PROFESSIONAL DISC BASED WORD PROCESSOR FOR THE BBC COMPUTER.

The MERLIN SCRIBE uses the disc on your computer the same way that professional systems costing many hundreds of pounds do.
Until now any document you wished to create has been limited to the few pages which could be squeezed into your computer memory. This means the computer is really using the disc as if it were a cassette!
The SCRIBE can create documents far greater in size than the computer memory, and really uses the disc as it was intended to be used. SCRIBE automatically loads and offloads pages between disc and memory without you even knowing it's happening!

Amongst the many super features available are:
* Optional 40 & 80 column screen format selection.
* On screen formatting - you see it as it's printed INCLUDING UNDERLINING.
* Right justify, word wrap, insert, delete, move copy & centre.
* Document merge (will merge two documents into one from disc).
* Addresses all four drive units allowed by your BBC disc system.

Plus many more professional features.
SCRIBE comes in ROM with five minute fitting instructions, printer utilities on disc and a comprehensive manual.

PRICE £59.95

Also MERLIN SCRIBE in ROM for cassette machines £29.95, and on tape £19.95. All prices include VAT. Post and Packaging 60p.

See us on Stand 211 at the YOUR COMPUTER Christmas Fair

CRAZY CAVEMAN - Journey back to prehistoric times! A tribe of cave dwellers sends out a hunting party, but the men are scattered when they are ambushed by a huge sabre-toothed tiger! You are one of these hunters: separated from your companions and a long way from shelter, you begin the hazardous trek home. On the way there are many dangers, like ROLLING ROCKS, DINOSAURS, DODOS AND PREHISTORIC BIRDS.

For the 64

BLUE MOON - You are the pilot of an intergalactic spacecraft. Your mission is to rescue a sister-ship and her crew who are trapped on a hostile planet and to return with them to the safety of the Blue Moon. However, journeying across the vastness of space there are many hazards to negotiate, such as the deadly BLUE BOUNCERS, COMETS, BELL BIRDS, DROIDS and TECOM ALIENS.

CALPAC LEARNING SERIES

Colour graphics and sound are used extensively to make learning more enjoyable.

1. TENS AND UNITS ADDITION. You may choose simple sums or sums which involve carrying ten. Helpful correction sequences are provided if mistakes are made. An attractive landscape is formed as the sums are successfully completed, and the scene is animated at the end of the program.

2. TENS AND UNITS SUBTRACTION. Choose simple or difficult sums. Either of the two methods of subtraction taught in schools may be selected at the start of the program. Detailed help is given if errors are made. Correct answers add sections to a bridge. If no mistakes are made, the tank will drive across the completed bridge and fire its gun.

3. PICTURE PLOTTER. This program has been written so that children can create their own pictures on the television screen. It is so simple that even pre-reading children can use it, yet its sophistication makes it suitable for producing multicolour maps and diagrams.

4. NORTH AMERICAN INDIANS. This program helps to develop reading and comprehensive skills. You complete sentences using a word from the list on the screen. Correct responses are rewarded by the creation of an Indian scene which includes tipis and buffalo.

You may replace the questions in this program with your own (create a bank of up to 250 questions with a 48K Spectrum). Any subject area may be chosen.

© J. J. Warren 1983
Published by Calpac Computer Software, 108 Hermitage Woods Crescent, St Johns, Woking, Surrey GU21 1UF

CALPAC LEARNING SERIES

VOL. 2 FROM 7 YEARS

Colour graphics and sound are used extensively to make learning more enjoyable.

5. MULTIPLICATION TABLES. This program with correction sequences enables you to test individual multiplication tables, or all tables up to a maximum that you choose. Carriages are added to a train as the score increases – see the train glide through the countryside when the test is finished.

6. THE ROMANS. Answer questions on the Romans to win a horse, chariot, viaduct and temple. Answer enough correctly and the horse will gallop away with its chariot.

7. SPELLING TESTER. The words in the test are initially displayed on the screen. Then short sentences are used as prompts for the words, which must by typed correctly to add stages to a space-ship.

Replace the words and sentences in the program with weekly spelling lists, save them on cassette, and you will rapidly create a whole library of programs.

8. HOMOPHONES. Sale or sail; bare or bear? Choose the correct word to complete the sentence. Extra motivation is provided by a coloured pot-plant, which grows with each correct response. The plant flowers in an unusually tuneful fashion at the end of the program.

CALPAC LEARNING SERIES

VOL. 3 FROM 9 YEARS

Colour graphics and sound are used extensively to make learning more enjoyable.

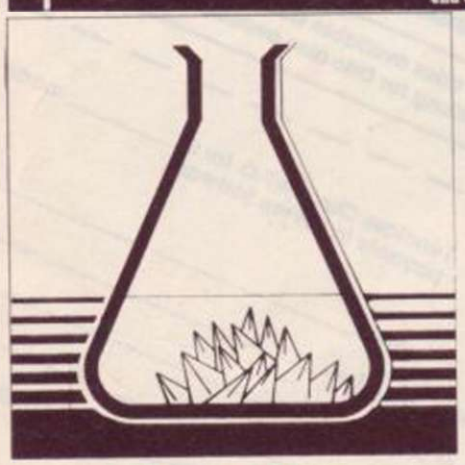
9. NOUNS, VERBS, ADJECTIVES AND ADVERBS. Sentences are displayed and you select the named parts of speech. Instant feedback and helpful comments ensure positive learning. Correct answers are rewarded by the creation of a coastal scene, which is animated at the end of the program.

10. VERB PRACTICE. You have to complete the sentences using the correct tenses of the verbs. The program concentrates on those irregular verbs that often cause difficulty. An underwater landscape is created as questions are correctly answered.

11. THE STRUCTURE OF THE FLOWER. This program explains how the parts of the flower are involved in the formation of seeds. This is a three part program which makes full use of high resolution colour graphics.

12. LONG DIVISION. This detailed program takes the learner through long division sums in easy stages. Correction sequences are automatically provided when they are needed. Sums with remainders can be chosen if required.

SPECTRUM FROM 9 YEARS 16K 48K



O-LEVEL

CALPAC CHEMISTRY SERIES

These programs have been designed to improve your understanding of four topics which are fundamental to chemistry at O-level. The subject matter has been carefully structured to cover the most important aspects of:

- Elements, compounds, mixtures and separations
- Structure, bonding and properties
- Redox, electrolysis and the activity series
- Acids, bases and salts

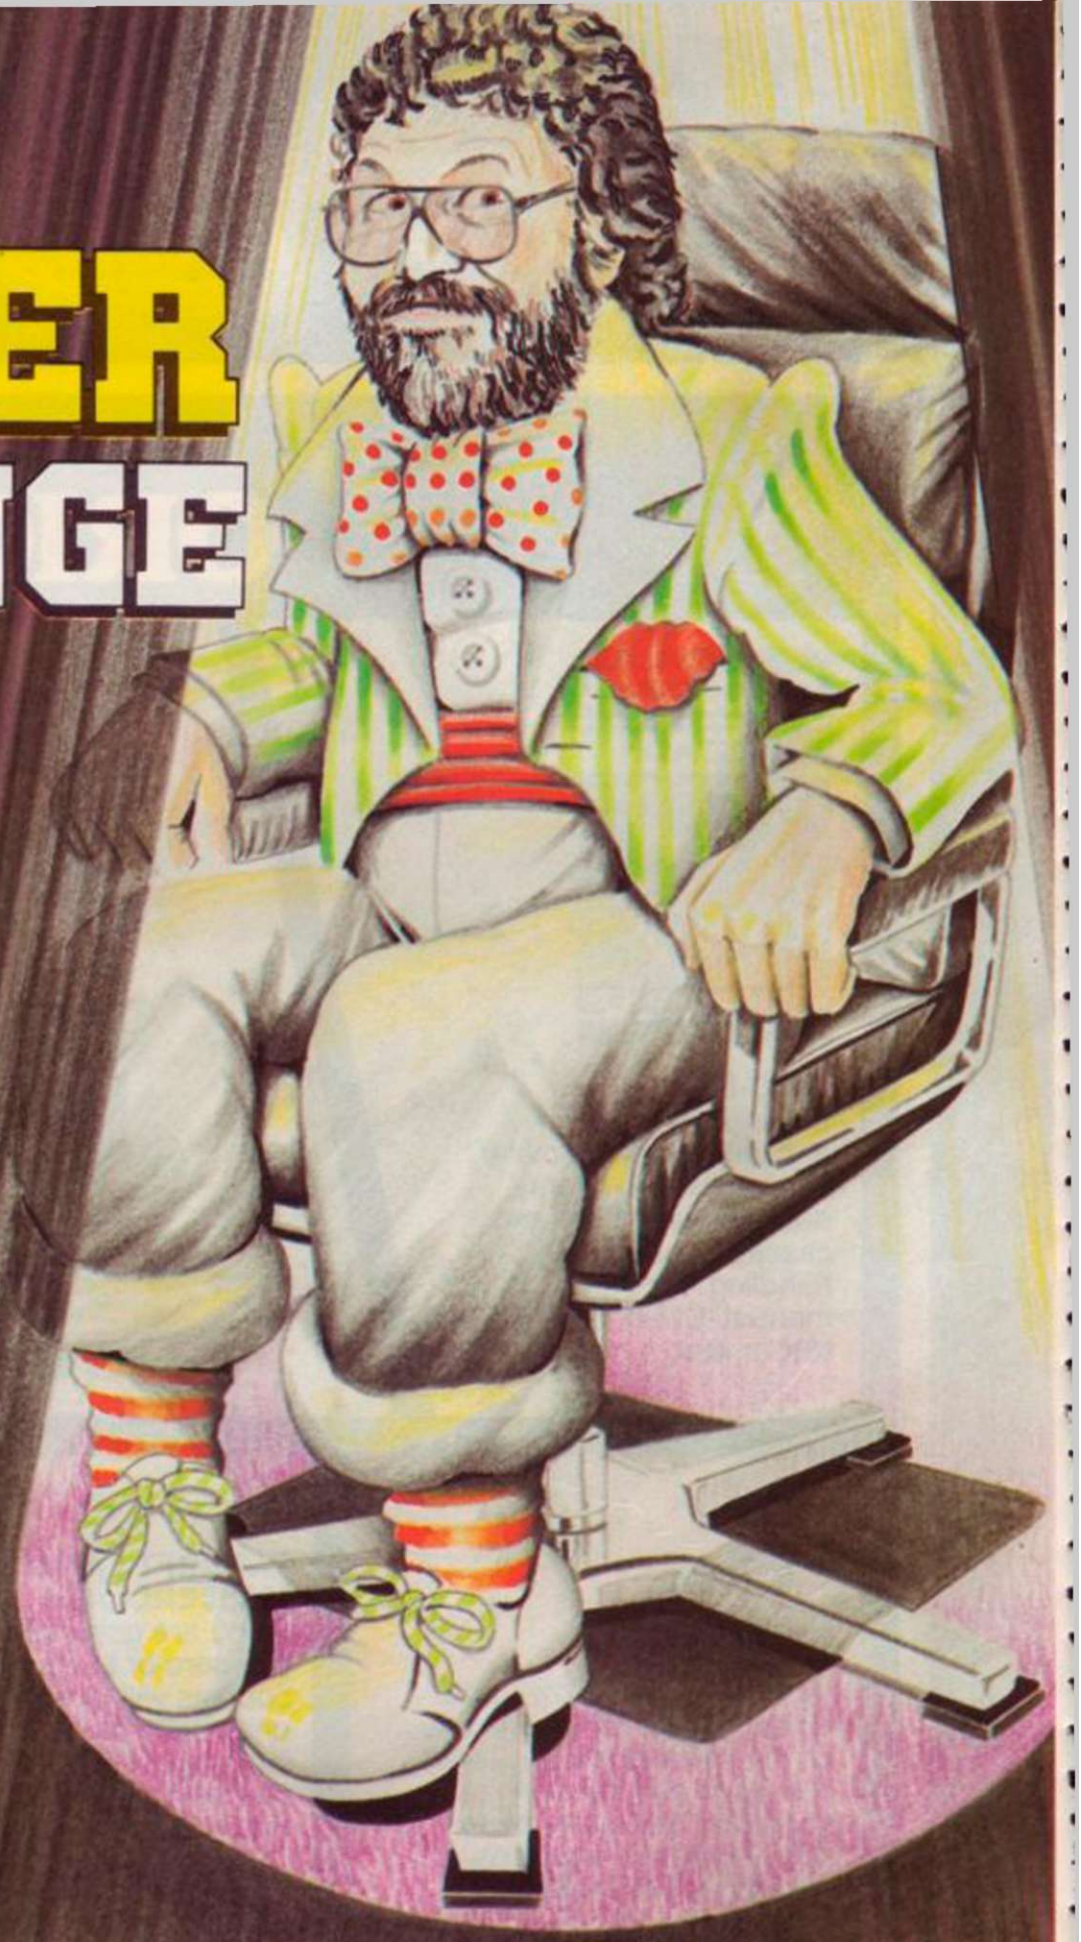
DLT's MONSTER CHALLENGE



USE YOUR NOGGIN AND WIN £10,000.

You might think you're a computer games wizard . . . I'm pretty good myself. But I've got news for you! I've discovered a second generation of computer games - and they're mind-benders. So if you're a spuddler you might as well turn the page now.

BECAUSE YOU WON'T STAND A CHANCE IN MY TEN-GRAND-SLAM.

If you can cope with a real challenge, try one of my suite of mind-stretching games. If you're really confident buy all six - it's cheaper.

All the games are independent puzzles but each has a clue. Unravel the clues and put them together to solve the riddle. The first 10 who can will be finalists in my

TEN-GRAND-SLAM to win a cool £10,000.

You'll have to be an all-rounder because some of the games will test your intellect, some your general knowledge and one your skill with computers. But they're all fun and I guarantee you've never seen anything like them before.

Games like:

A. Take the Strain - armed only with a compass and a map of Britain's railways, you must end up at the right section with a valid ticket.

B. Air/Sea Missile - taxes not only your usual video skills, but also your mind. Bomb the enemy fleet through thick cloud and shoot down missiles before they shoot you down.

C. Cambridge - take a trip around the city, punt on the Cam, stave off the pangs of hunger and try to reach your destination.

D. Othello - test your powers of logic with this ancient game, playing against each other or against the computer.

E. The Tower - escape from the perils of the tower and obtain the keys to escape from the dungeon.

F. The Quiz - test your knowledge of Britain, playing against each other or the computer in a battle to beat the clock.

TEN-GRAND-SLAM entry instructions will be enclosed with every game purchased.

All Games are suitable for BBC, Dragon and Sinclair home computers.

TO: TWIG SYSTEMS SOFTWARE, 6 HIGH STREET, WENDOVER, BUCKS. ENGLAND.

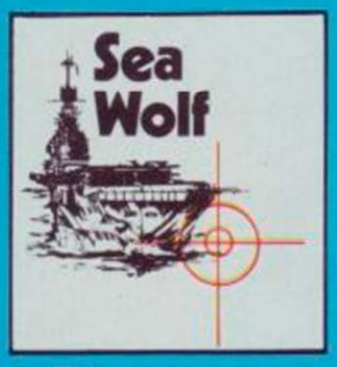
OPTIMA SOFTWARE

Atomic Protector
As a robot at a secret research establishment you are left in charge of the uranium deposits – your only means of life support. You have to defend the isotopes from the ruthless attacks of hostile infiltrators.

To add to your troubles, one by one the intruders begin to achieve critical mass – you must catch and deal with each as soon as possible if you're to survive.

£8.95

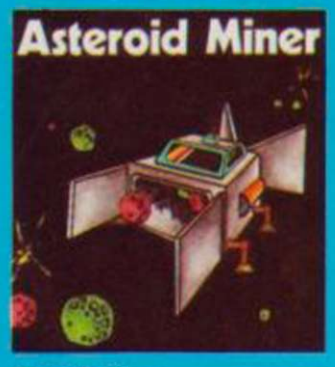


Sea Wolf
So far all has gone well. You have successfully guided your submarine safely through enemy controlled waters and you are beginning to relax.

Suddenly alarm bells scream in your ears – you are under attack!

Desperately you scan the radar screen. Should you try to get him within range of your torpedoes, or attempt evasive tactics? Can you lead your crew to safety?

£8.95

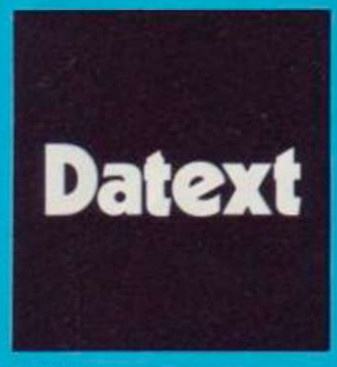


Asteroid Miner
A truly original all-action machine code game that will test you to the limit.

As you battle to harvest precious metal from the asteroid swarm, you have to combat an unscrupulous rival who stops at nothing.

Can you gather enough asteroids to survive? Are you skilful enough to avoid your opponent's neutron mines?

£8.95



Datext
A high-powered, easy to use teletext editing and library program.

With Datext you can create colourful teletext pages simply and speedily, storing them for later recall.

Uses for this versatile utility include shop window displays, school newspapers, personalised story books for children, and many more.

£9.95

Optimon
A full machine code monitor, designed to help the average programmer.

Its many features include two modes of memory dump, full disassembler with OS calls labelled, intelligent block memory moves, a speedy string and hex byte search.

Beginners will find Optimon's ability to display the opcodes for all 6502 mnemonics invaluable.

£9.95

YC 12

fantasy SOFTWARE

THE PYRAMID is an arcade style game which has a very adventurous feel to it.

The Pyramid contains 120 chambers on 15 levels. In order to get from one chamber to another you must fight off the indigenous aliens to collect an energised crystal which will neutralize the force field guarding the two exits.

The Pyramid is inhabited by a total of 60 wierd and exotic alien types, all of which are beautifully animated. You will meet a whole variety of demons, droids, insects and monsters, with a sprinkling of the more unusual, the extra-terrestrial tweezers, galactic strawberry, cosmic claw, mutant eye, plus a whole host of entities that defy rational description. You will no doubt invent your own nicknames.

You proceed to explore the Pyramid from top to bottom with the difficulty generally increasing with the depth of level. Depending on the choice of exit from each chamber you are likely to have a different game every time you play.

Apart from the challenge of trying to achieve the highest score possible the pyramid contains a number puzzle to solve. The more chambers you successfully visit the more information is gathered to enable you to discover the secret numbers of the pyramid. The puzzle won't take you a few days to solve, it will probably take you a few months.

This is "ZIGGY". He is shown above in his exploratory capsule and is a true representation of the on screen graphics. You have total control over his movements as you explore the many chambers of "THE PYRAMID".

FANTASY SOFTWARE is available from W.H.Smiths, John Menzies and Computers For All

THE PYRAMID

Compatible with all leading joysticks.

For 48K Spectrum

THE PYRAMID is available at £5.50 from

Give your children a Happy Christmas!

with these top quality educational games

- **TIME** — learn to tell the time with this simple step by step guide. Watch the mouse run up the clock when you answer correctly — educational fun for children of 3-8 years. (Spectrum 48K, BBC B/Electron).
- **IDENTIKIT** — choose from a range of features and build up a face on the screen. Then you can make the eyes wink, ears wiggle, mouth smile etc. — great fun for children of 2-8 years old. (Spectrum 48K)
- **MONEY** — an introduction to coins and notes and their use in shopping. Many detailed sections with excellent graphics and sound. 4-10 years. (Spectrum 48K)
- **MATHS INVADERS** — load your gun with the right answer, and fire it before the question lands on you — makes learning addition, subtraction, multiplication and division fun. 4-12 years old. (Spectrum 16/48K, BBC/Electron)
- **MISSING WORDS** — watch the train move forward when you type in the right word. Two entertaining sections teach reading and English comprehension. 5-10 years. (Spectrum 48K)
- **RAILROADER** — lay track on the screen in any layout you want. Then run the train around the track switching points as you go. Pick up extra carriages if you like — great fun for children of 4-10 years. (BBC B/Electron)
- **MICROS FOR CHILDREN—1.** Set of four educational games for children of 3-8 years old. Build a house, unjumble the words, guess the picture, find your way out of the maze — excellent value for money. (Spectrum 16/48K)

Spectrum program £6.95 BBC B/Electron £7.95 incl p&p
All programs come in attractive, colourful boxes and are ideal Christmas presents.

OMNICALC (48K Spectrum)
The best Spectrum spreadsheet you can buy. Written in machine code to be faster, to give you more space for data, and to allow more features to be included, it is guaranteed uncrashable.

- ★ 99 columns or 250 rows.
- ★ Fully prompted input.
- ★ Extensive repeat facilities.
- ★ Supports ALL Spectrum functions.
- ★ Unique iterative facility.
- ★ Totals/Sub-totals.
  + many more.

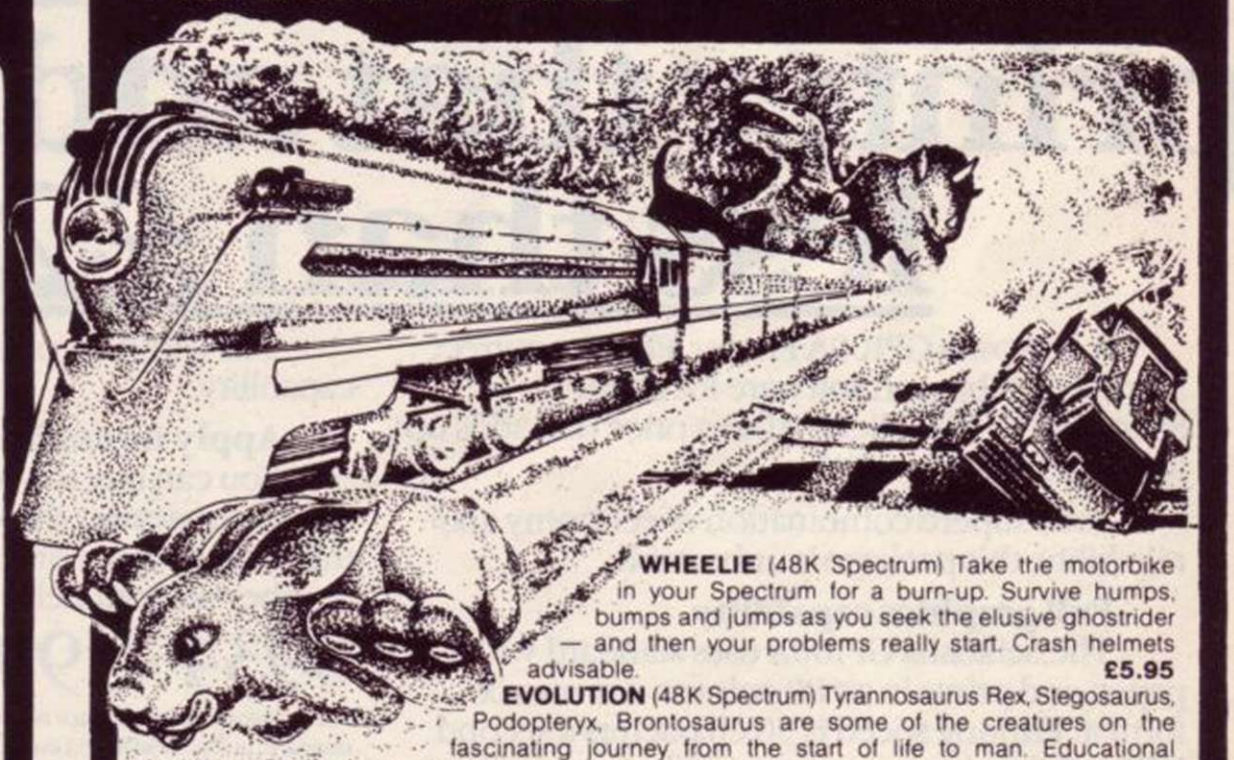
"If more programs shared the quality of OMNICALC then we might see more Spectrums in offices"
Home Computing Weekly 3/6/83

"It is ideal for someone who has just found the spreadsheet concept, but it is also a very powerful tool for anyone who has used one previously"
Sinclair User June 1983

Complete with comprehensive manual. **£9.95.**

MICROSPHERE

72 ROSEBERY ROAD · LONDON N10 2LA
TELEPHONE 01-883 9411



WHEELIE (48K Spectrum) Take the motorbike in your Spectrum for a burn-up. Survive humps, bumps and jumps as you seek the elusive ghostrider — and then your problems really start. Crash helmets advisable. **£5.95**

EVOLUTION (48K Spectrum) Tyrannosaurus Rex, Stegosaurus, Podopteryx, Brontosaurus are some of the creatures on the fascinating journey from the start of life to man. Educational and fun, this adventure took 3500 million years the first time it was played ... Can you do it quicker? ... — just **£6.95**

CREVASSE/HOTFOOT (Any Spectrum) Can you make it across the ice-cap whilst chasms open and close all around you ... or help a hungry rabbit in a hostile world ... 2 original games on one cassette — only **£4.95**

THE TRAIN GAME (Any Spectrum) The game that starts where model railways left off. Full graphics featuring passenger, goods & express trains; tunnels; stations; turntable bonus games; irate passengers; collisions; derailments; and everything else you expect from a major railway! — Superb value **£5.95**

Add on the printer that adds up to less than £230

A Seikosha GP100A Printer. Plus the correct interface*, cable and software for either a Spectrum or BBC Micro. All at a price that adds up to just £229.95 inc. VAT.

For a superb combination of economy and reliability, this package is unbeatable.

Full graphics capability

The Seikosha GP100A uses standard width paper, and prints in an 80 column dot matrix format. Printing speed is 50 characters a second (180 x 7 dots/sec).

The GP100A comes with a full graphics capability.

BRIDGE SOFTWARE

SPECTROGRAPHICS

(for Sinclair Spectrum 48k)
"A complete graphics toolkit...very easy to use... documentation clear and concise"
(Personal Computer World)

For Teachers For Games Enthusiasts For Artists For Everyone!

Exploits the Spectrum's superb graphics potential to the full:

- 11 graphics procedures
- Hi- and lo-res sketch pads
- 8 sizes of text
- a mini-text editor
- colour WASH and PAINT
- create your own UDG characters
- SAVE displays on tape or PRINT on ZX Printer
- RELOAD displays into your own programs

send £6.90 for cassette and manual
graphics software for ZX81 also available
send s.a.e. for our full list of games, statistics, graphics and scientific software!
Full money-back guarantee : Trade enquiries welcome

BRIDGE SOFTWARE
Dept , 36 Fernwood, Marple Bridge, Stockport, Cheshire, SK6 5BE, England.

METAGALACTIC LLAMAS BATTLE AT THE EDGE OF TIME

A fast and original game for the unexpanded VIC. Challenging and colourful, with good sonics and a unique game action and design, this promises to be the most exciting new 3.5K VIC game since the introduction of GRIDRUNNER nearly a year ago.

£5.50

LASER ZONE

Experience Laser Zone – an utterly NEW totally ORIGINAL masterpiece of Video games design. Learn to control two spaceships at once. Feel the EXHILARATION as, after long hours of practice, you control the two ships so that they function as a smooth, co-operative team! Feel the raw POWER as you lunge for the electro button and BLAST your enemies into expanding clouds of SPACE JUNK!! Feel the humiliation as a carelessly aimed BLAST slams into the side of your last remaining ship!! 8K expansion required.

Available for Commodore 64 **£7.50** and VIC-20 **£6.**

MATRIX

Jeff Minter has taken Gridrunner – the game that topped best-seller charts in USA and UK – and created an awesome sequel.

Graphically superb, it features multiple screens, new aliens and attack waves, mystery bonuses, renegade humanoids, deflexor fields, diagonal tracking, countdown/panic phase and much, much more...

Packed into 20 mind-zapping zones and accompanied by incredible sonics.

8K expansion required.

Available for Commoddre 64 **£7.50** and VIC-20 **£6.**

ATTACK of the MUTANT CAMELS

Planet earth needs you! Hostile aliens have used genetic engineering to mutate camels from normally harmless beasts into 90 foot high, neutronium shielded, laser-spitting death camels!! Can you fly your tiny, manoeuvrable fighter over the mountainous landscape to weaken and destroy the camels before they invade the humans stronghold! You must withstand withering laser fire and alien UFOs. Game action stretches over 10 screen lengths and features superb scrolling, scanner 1/2 player actions and unbelievable animation! Play this game and you'll never be able to visit a zoo again without getting an itchy trigger finger! Awesome m/c action!

Available for Commodore 64 **£7.50.**

HOVER BOVVER

A totally original arcade game for C64 featuring outstanding graphics and a sound track created by a professional Piano Wizard. Gordon Bennet has borrowed his neighbour's Air-Mo lawnmower. Mow your way through as many of the 16 lawns as you can before the pursuing neighbour retrieves his mower. Set your dog onto the neighbour to help you out of tight spots and don't annoy the gardener. Try not to plough through the neat flower beds or overheat your mower!

£7.50

ABDUCTOR

A classic new space game! ZAP the swirling alien hordes before they ram you – and abduct your humanoids! Survive the assault for long enough and you'll get an extra stage on your spaceship with double firepower! Awesome unexpanded VIC Action. **£5.00**

GRIDRUNNER

Finally true arcade quality on the unexpanded VIC! Shoot down the segmented DROIDS invading the grid. Beware of the pods and zappers! The awesome speed, sound and graphics gives you the best blast available for unexpanded VIC.

Available for VIC-20 **£5.00**
Commodore 64 **£5.00**
Atari 400/800 **£7.50**

All orders add 50p postage and packing

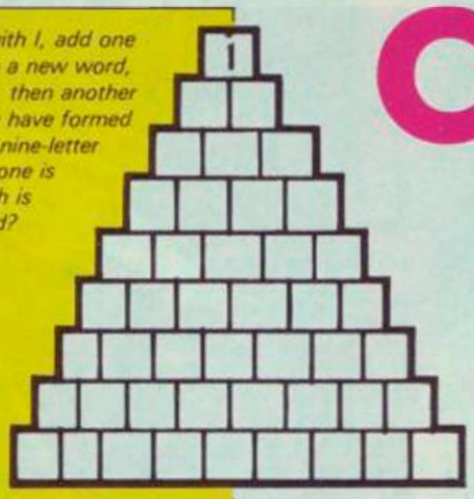
TELEPHONE: TADLEY (07356) 4478

LLAMASOFT GAMES NOW IN BOOTS, LASKEYS AND MANY OTHER RETAILERS.

COMPETITION of the year

The competition has to be tough when you're in the running for £2,000's worth of prizes. And this one certainly is, but with 25 prizes you have a very good chance of winning something if you can get the answers in the right order.

A *Starting with I, add one letter to form a new word, then another, then another . . . until you have formed one of these nine-letter words. Only one is correct Which is the final word? Appalling, Startling, Electrics.*



B *Which shape is missing?* ▲ ● ■

C *How many different eight-digit numbers can you put on the display of your calculator, using the keys 1 to 9, moving to adjacent keys either horizontally or vertically and without using the same digit twice in a number? Is it 64, 80 or 112?*

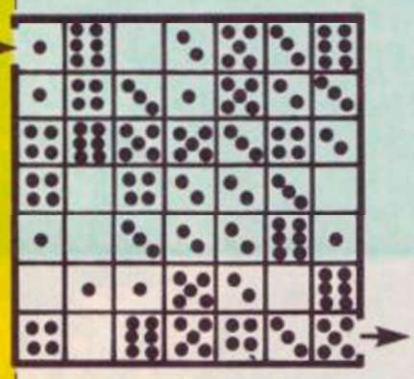
D *The first digit in this coded message is missing. What should it be? Is it 9, 8 or 7?*
? 7, 6 9, 8 2, 8 2, 8 9, 3 2, 6 7, 7 2, 8 2, 7 3, 8 3, 8 4, 7 7, 6 5, 8 3

E *What's next? Is it K or 19?*
5 A F 14

F *In the photograph at F, what is in Father Christmas's hand? Is it 1 A micro-floppy disc. 2 Micro-drive cassette. 3 ROM cartridge.*

G *This is one of those tile puzzles. How many moves to reveal what was before you all the time? Is it 20, 25 or 30 moves?*

H *Go through the grid moving one square up, down, left or right, never passing through cells with the same number of spots more than twice. Which number of spots do you pass through only once?*

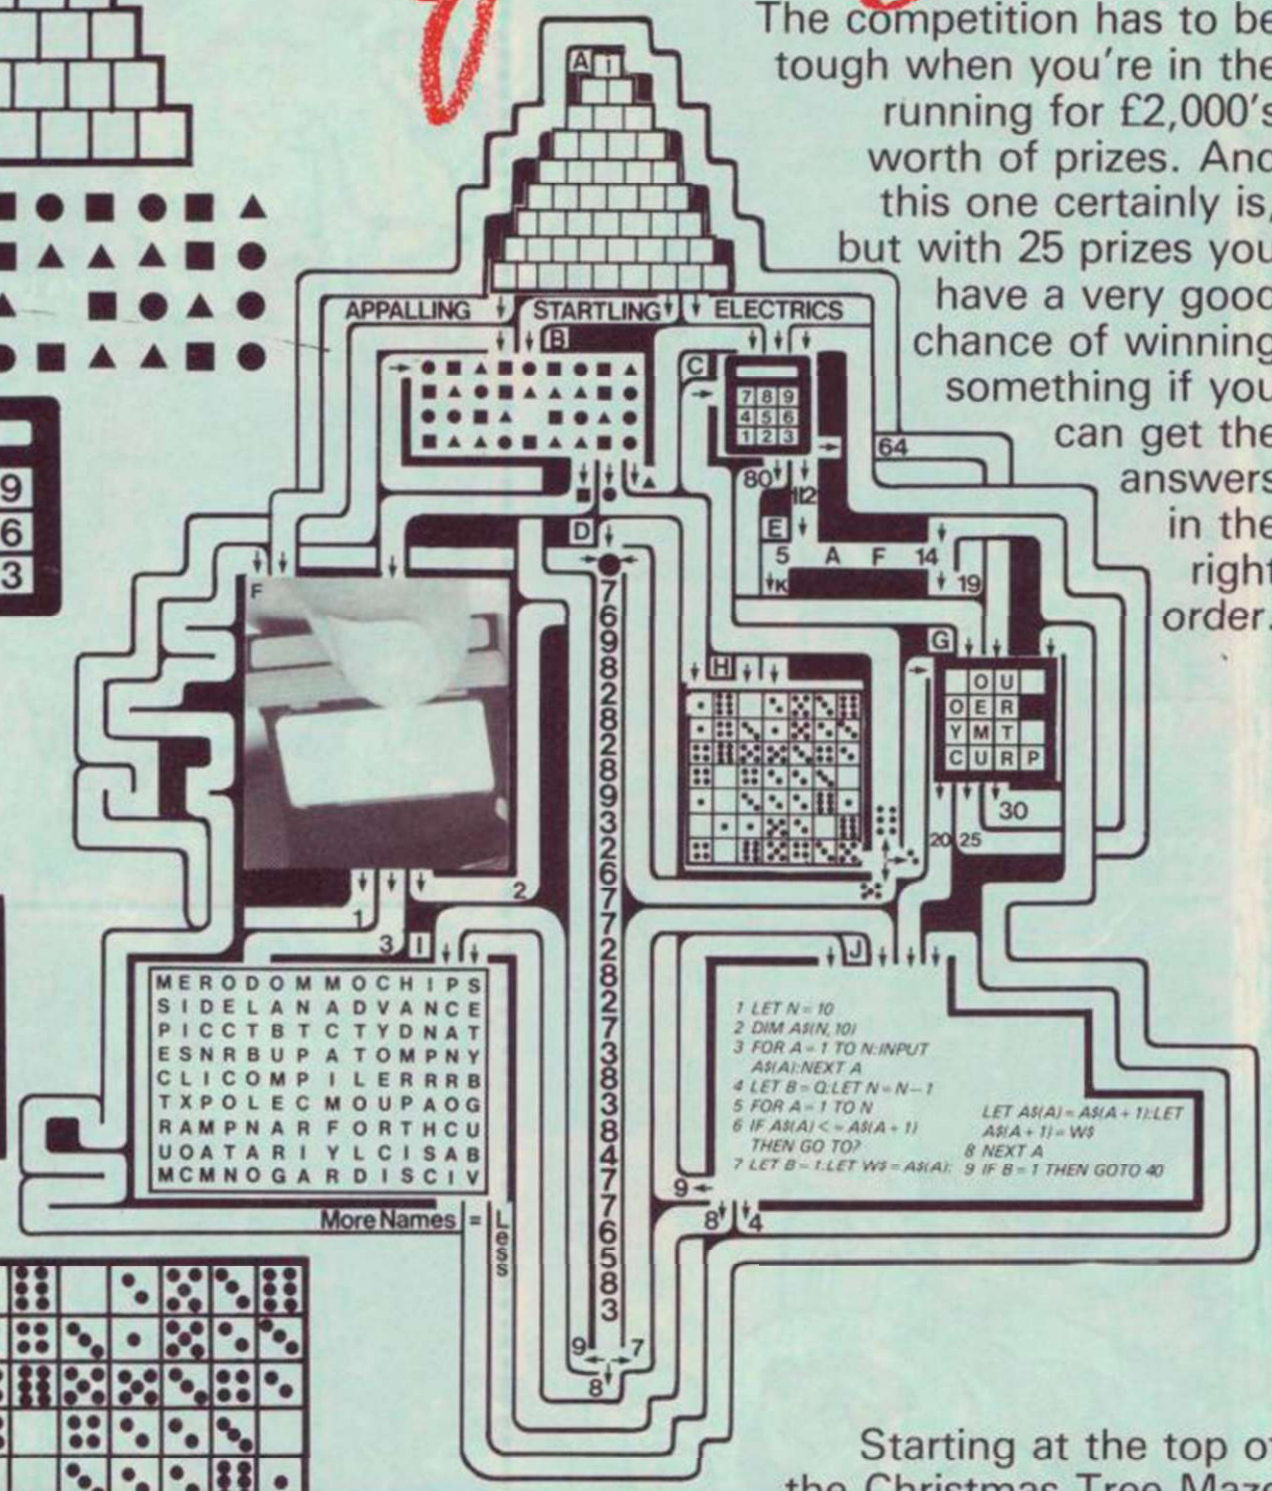


I Your Computer *together with a number of well-known brand names in the home-computer world are hidden in this grid. So are a number of hardware and software components. Which are there more of?*
More brand names Equal numbers More components

M	E	R	O	D	O	M	M	O	C	H	I	P	S
S	I	D	E	L	A	N	A	D	V	A	N	C	E
P	I	C	C	T	B	T	C	T	Y	D	N	A	T
E	S	N	R	B	U	P	A	T	O	M	P	N	Y
C	L	I	C	O	M	P	I	L	E	R	R	R	B
T	X	P	O	L	E	C	M	O	U	P	A	O	G
R	A	M	P	N	A	R	F	O	R	T	H	C	U
U	O	A	T	A	R	I	Y	L	C	I	S	A	B
M	C	M	N	O	G	A	R	D	I	S	C	I	V

J *The* Your Computer *Gremlin has struck again. What is missing at the end of line 6 of the program at J? Is it 9, 8 or 4*

```
1 LET N = 10
2 DIM A$(N, 10)
3 FOR A = 1 TO N:INPUT
  A$(A):NEXT A
4 LET B = Q:LET N = N - 1
5 FOR A = 1 TO N
6 IF A$(A) < = A$(A + 1)
  THEN GO TO?
7 LET B = 1:LET W$ = A$(A):
  LET A$(A) = A$(A + 1):LET
  A$(A + 1) = W$
8 NEXT A
9 IF B = 1 THEN GOTO 40
```

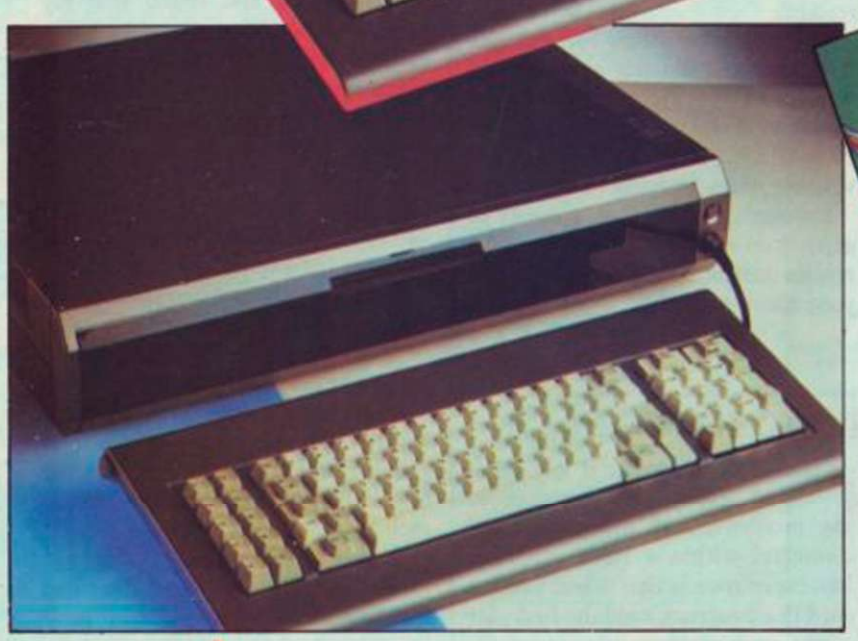


Starting at the top of the Christmas Tree Maze with question A, answer each question following the route through the maze indicated by each answer, until you have solved all the problems. When you have finished all you need to do is write the sequence you used on the card opposite, for instance A, B, C, D, E, F, G, H, I, J if you thought that was correct. Then complete the tie-breaker in 12 words or fewer.

PRIZES

1st £1,200 ADVANCE MODEL B

Two 320K disc drives are included with this 16-bit microcomputer, which has a 40K ROM and 16 graphics colours. Compatible with the IBM PC, interfaces include cassette port, light-pen, joystick, Centronics, RS-232.



2nd 128K ADVANCE A

The £405 little brother to the Advance B, without its disc drive. It still has full screen handling facilities.

4th TWO WEEKENDS

Practical instructions, projects and games. Anchor Hotels. 0252-517517.

3rd ACTIVISION GAMES AND ATARI VCS CONSOLES

Two sets of three Activision games plus two Atari VCS consoles.

5th 10 HAND-HELD CGL GAMES

The action is played on two screens which fold together to form a case. A quartz watch and alarm function are included with Mario Brothers and Donkey Kong II.

Plus 10 YC BINDERS

YOUR LETTERS

EXTRACTING THE BINARY

Here is an interesting one for all Spectrum and fake-Spectrum owners. Now, I am no wizard with electronics or computers, but I decided to build a synthesiser then produced its notes by binary code. Great eh? Well after two months of oscillators, shapers, filters, equalisers, and sample hold I finally got the thing going. Now for the easy part!

I'll write off to the nice Sinclair Research and find out what logical on's and off's come out the back of the mighty machine. Well three weeks later I was still playing synth by the boring old method of fingers instead of ins, outs etc.

Never been one to shy away from the Buzby I rang Sinclair and spent five minutes chatting to the telephonist who assured me that the technical dept did not reply by post and I had better speak to a technician. Ring back between 3 and 4 pm.

3.30pm: "Hello, I phoned earlier about some technical information."

"Oh yes! I'll just put you through." Healthy pause "Oh!"

"Good afternoon, technical department, can I help?"

"Oh yes please. Can you tell me if the binary code output from the output port is series or parallel?"

"Er. I don't really know. Have you not got any sheets or technical books on this?"

"Er. I don't really know. Is there anyone else slightly more technical there please?"

"Er. Not really were in a bit of a mess really I don't really know."

"Really. You don't know a lot do your?" "Er! not really."

"Can you connect me back to your switchboard please?"

"Hello! Switchboard here."

"Oh hello! can you give me the phone number of your head office please? Your technician doesn't seem to know a lot, maybe someone there who knows more" — delay.

"I'm sorry I don't have the phone number but this is the address. Oh by the way the letter you sent will be replied to by our technician."

Well next I rang head office and was partially helped by a nice young lady with a charming accent who, after phoning around, assured me the code went out in parallel — it's a start anyway — but she couldn't help as regards what went out of each pin connection.

Maybe you could suggest someone who would know what and how these binary get out of the back of our beloved Spectrum.

P. R. Robinson,
Nuneaton,
Warwickshire.

HARTNELL SLAM

Since its early days, your magazine has risen from poor quality to the very best, both in content and value for money. You publish more, and better, machine-code games than a certain games-only magazine which only produces poor Basic games. You cater for the game player and beginner alike, but one small alteration has yet to be made.

Many people have criticised your Response Frame for inaccuracy or being uninformed. Tim Hartnell's books contain many errors and the older books are filled with unnecessary pictures. Many times, in Response Frame he has answered questions wrongly or not even answered the question he was asked.

In the October issue he replied to Mr Hallam, "Unfortunately there is no way this — disabling the Spectrum Break key — can be done in Basic". Absolute rubbish! Having copied WH Smith's Spectrum demo while they were not looking, I discovered a method which is in fact obvious!

The method of Break proofing is as follows: As the first line of your program, have the following:

```
10 LET V1 = PEEK 23613-2:
    POKE 23613,V1.
```

Since this is sometimes restored by For . . . Next loops, Gotos and Gosubs the Poke 23613, VI may need to be repeated sometimes within the program. This can be determined by experiment. This works by dropping the error stack pointer, causing the computer to ignore any errors. This may lead to a crash if the program is not fully debugged before installing the Poke.

Also, Tim Hartnell gave a poor reply to D G Britton about tape recorders. He said that expensive tape recorders are good for high-quality Spectrum recordings. Expensive tape recorders have filters which often regard computer signals as noise and actually degrade them.

Thus, cheap recorders are best. My recorder is called a Comic, similar in appearance to Ferguson, but without pause control. It loads tapes, no matter how bad, make the most reliable recordings around and has tone control and tape counter at £19.95.

It is also available as Eurosonic or Lloytron, among other names, but all the same model. This is the best possible I have seen on the Spectrum, and better than a friend's Sony.

So much for expensive models. The examples I have given are from just one issue. Many mistakes are made in just about all issues, and it is a shame since this is the only flaw in your magazine, apart from printing many listings too small, but just readable.

In the October issue, I might add, Tim Hartnell did not answer what was asked on Vic memory by M Finch, and was even uncertain if New affected a certain Vic system variable when replying to G Ashton.

I would suggest that a panel of experts on each machine be used for replies instead. Response Frame is your main weakness.

Justin Keery,
York.

LOADED VIC

I would like to know if any other Vic-20 users have experienced any problems with using the Load command within a Basic program. My experience is that when Load is used in a program, only the first part of the next program is successfully entered into memory — using a tape recorder as the storage device.

If this problem is universal, and not some fault of my particular computer, I offer the following way around the problem:

The screen is first formatted with printed Load and Run commands, in white, on white so the user is unaware of the problem. Then the keyboard buffer is given two carriage returns — ascii 13 decimal — before terminating from program control. The effect is a valid Load and Run command automatically executed by the system software.

```
998 POKE 198,3:POKE 631,13:
    POKE 633,13:POKE 36879,25
999 PRINT"(clr home)(white)(3down)
    NEW(3down)LOAD(3down)
    LOAD(4down)RUN(3down)
    RUN(home)(blue)"
```

The instructions in brackets are cursor control functions and should be self explanatory. Load and Run must be typed twice to allow for the possibility that the Play button can be engaged or disengaged.

Archie Tuck,
Northleach,
Gloucestershire.

TV SPECTRUM

I recently bought an Amstrad colour TV and found that my Spectrum would not produce any colour on it. Having read in magazines like yours advice on how to cure the problem by lifting off the cover and having a twiddle with the potentiometers inside, I did so.

It cured the colour problem, but carefully lifting off the case had factured the keyboard ribbon cable.

I believe the ribbon cable had become brittle with age, possibly due to the excessive heat generated inside the case of the computer when used for any length of time. It is known that heat adversely affects plastics in this way even though the temperature is not great enough to melt it.

Now for the cruncher! Since I cannot hide the fact that I have had the top off my computer, I have invalidated the guarantee and so must pay Sinclair a minimum charge of £30 to have it repaired.

Please can you print a warning to all Spectrum users not to lift off the cover of their machines if they have

NO COMMODORE COMPATIBILITY

I have been following your magazine every month since I bought my Vic-20 last August. A few months later Commodore Business Machines had introduced its new mode, Commodore 64. With this improvement I am very disappointed that Commodore 64 could not run Vic-20 software because a different system had been used.

Compare other computers such as the Apple II and Apple II+ and Apple IIA; BBC Model A and Model B; Atari 400 and 800 for example. In these, software is compatible. Furthermore, Atari upgraded its 16K micro to 48K without any extra charge and the difference in price between a 16K and 48K Spectrum is small. How about Vic-20 to Commodore 64?

Another problem I would like to point out is that of method of payment for buyers outside the U.K. — whether Postal Orders or Bank cheques are acceptable. I could get software from my local authorised dealer, but it would take weeks or months to get the latest software shown in your advertisements.

Educational software seems thin on the ground. Why? It would be nice, for example, if Commodore could introduce engineering-language software.

Abdul Jabbar BS, Singapore.

had them for some time. On a brighter note though, I have been into WH Smith's and bought an issue 3 Spectrum which gives excellent colour on my Amstrad TV and still works well with all my extensive existing software with the one exception of DK'Tronics Light Pen.

Incidentally, this was typed on the new Brother EP-22 typwriter/pritner which takes full A4 size paper, works off four torch batteries, can use plain paper or thermal paper, has its own RS-232C interface and at £170 inc. VAT must be one of the best buys around.

M D O'Dea,
Lewisham,
London.

PLAY THE GAME

Having bought a 48K Spectrum it took only a week to realise I was not interested in games. I did want to use the computer in my business though. Sinclair's Small Business Accounts seemed the answer. It took five weeks to arrive and seemed just what I needed but within hours it failed and was returned.

After fruitless letters over another four weeks Sinclair offered me my money back — still not received at time of writing. Is there no-one that offers the small business man a program that makes the Spectrum worth owning?

G. J. Abrahams,
Birchington,
Kent.

There are several blunders to be corrected in the November issue. The first and most grievous one is that two bytes are missing at the end of each line in the Oric Invaders hex dump. Our apologies to those who have found this out the hard way. Send us your address and we will send you a copy of the correct listing.

The hex loader for the Scram-81 program works perfectly if you start off by typing GOTO 7000. You might however like to add line 50 which reads GOTO 7000.

I Brown's program Maze, in Software File is wrongly billed for the Dragon. It runs instead on the Spectrum.

The listing for Andrew Caple's Capman program in the October issue is correct. A number of people, however, have complained that when they run the program it stops with an error message at line 40. Almost certainly this indicates that they have made a mistake in keying in the Data statements in lines 110 to 242.

Line 40 reads in the Data: if it finds that the Data statement is one character too short or too long, or contains a letter outside the range A to F it will throw the message "nonsense in Basic" or "variable not found".

At this point type in directly from the keyboard, PRINT A$. This will allow you to track down the faulty Data statement. A$ should contain the string of hex numbers which is found between the quotation marks in each of the Data statements.

WHILE YOU ENJOYED an Indian summer of computer price cuts, manufacturers were already preparing for a bleak winter. They knew that some of their number would not make it to the shelter of the Christmas consumer spending spree.

With low micro prices paring profit margins down to a lean minimum — and beyond — it seems inevitable in retrospect that there would be casualties. A few companies have gone out of business altogether; others have decided to pull out of home computing before their losses become intolerable.

The move by one of the oldest names in the market, Texas Instrument, to abandon its home-computer operation came just two weeks after the U.S. toy manufacturer Mattel's decision to hand over distribution of the Aquarius to the builder of the micro, Radofin. That ends both companies' involvement in the production of fully-fledged home computers.

Atari, the company that offered Texas such stiff competition on both sides of the Atlantic, has also been bloodied by heavy losses. It was $180 million in the red on the last three months' trading.

Hopes of a return to better fortunes are pinned on Atari's new XL series — the first new machines from the company for four years.

In a market where there is major price warfare, you have to be big to sustain losses, and ideally have the support of a wide product range. Atari, Texas and Mattel are large concerns with considerable financial muscle. But two British producers, Dragon Data and Oric Products, have both been obliged recently to look outside for new investment to help them over liquidity problems. Incidentally, Dragon's founder Mettoy, which had gradually sold off all but a 15.5 percent stake in the computer company, recently went into receivership.

Dragon created most of its large user base by having machines available in volume for last year's Yuletide rush. It could only pull off a similar coup this year if Electrons, CBM-64s and Atari 600XLs are not around in sufficient numbers to satisfy demand.

Computer companies that fell by the wayside are Grundy Business Systems — the NewBrain's manufacturer — and now Jupiter Cantab which created the first and only Forth-based home micro. Even a price-cutter in the business portable market, Osborne Computer, has had to seek protection from its creditors under the U.S. Bankruptcy Code's section 11.

But how is it possible for a market as ostensibly booming as home computing to harbour so many financial problems? It is exactly because of the rapid expansion that firms have great difficulties in estimating growth accurately, and planning for it accordingly.

An apparently minor miscalculation at the bottom of an exponential growth curve can lead to a financially crippling error at the top. Add to that problem a savage campaign of price cuts and few companies can count themselves safe. The moment of truth will come for more manufacturers when we reach the 1984 side of Christmas. Until then, computer enthusiasts may sympathise with the plight of the companies, but they will be drinking festive toasts with the money the price war has saved them.

How to write for *Your Computer*

We called this magazine *Your Computer* precisely because we welcome your views, tips and hints and even your criticism of machines and software in general. If you would like to see your name in print, whether on a Software File program or a full-blooded article, here is how to go about it. Ideally, all articles should be typed double-spaced on one side only of uniform sheets of paper. If listings can be dumped directly from a printer — you can always use a friend's or user group's — this minimises the risk of error. In a perfect world a cassette would accompany the article. That considerably speeds up the checking process. Not only do you get to air your own discoveries and opinions, but we will even pay you for the privilege. We pay £35 per published page — that's as it appears in the magazine and includes illustrations.

Why not give it a try? You have nothing to lose but your postage.

How the Electron will grow: expansion boxes

WITHOUT DETRACTING from the many positive features of Acorn's new baby, it does lack the RS-423, user and printer ports of its big brother, the BBC Micro. While it is no secret that the Electron features a built-in connector for the addition of hardware expansion units, the first picture of such a unit is reproduced here — it is important to emphasise that this is just a prototype.

Each hardware expansion unit will have a certain number of functions built in, to allow users to customise their Electron for particular purposes. Definitely on the drawing board is a box containing not just a disc interface, but a complete disc and drive units as well. Acorn favours a proper 3 to 3.5 inch diameter disc, but is still deciding among companies like Sony, Winchester, Hitachi and others. It will plump for a manufacturer whose product is likely to become an industry standard. It is not clear if one of the expansion boxes will contain the 'missing' RS-423, printer and user interfaces of the BBC Micro, although a box containing an A/D converter, RS-423 and interface for ROM cartridges was one of the possible configurations under consideration.

The cartridge sticking out of the box in the photograph contains two 16K ROMs which would be able to provide the Electron with, for instance, View — the BBC's word processor, or programming languages like BCPL or perhaps Forth. Another feature not present on the Electron is the BBC's Mode 7 Teletext. This, together with the lack of an RS-423 hinders networking. Nevertheless, a box could be produced which would add these features.

It was recently claimed that 20,000 Electrons had been ordered by British Telecom for a new medical network accessed through Prestel called the Chain. This network enables doctors and nurses to get through administrative drudgery quickly on-screen, with the central computer at the hospital providing prompts. In fact, it seems unlikely that the order is for an Electron *per se*, or even for an Electron plus a magic box, but rather for a dedicated terminal using Electron components. Nevertheless, this indicates that the potential is there.

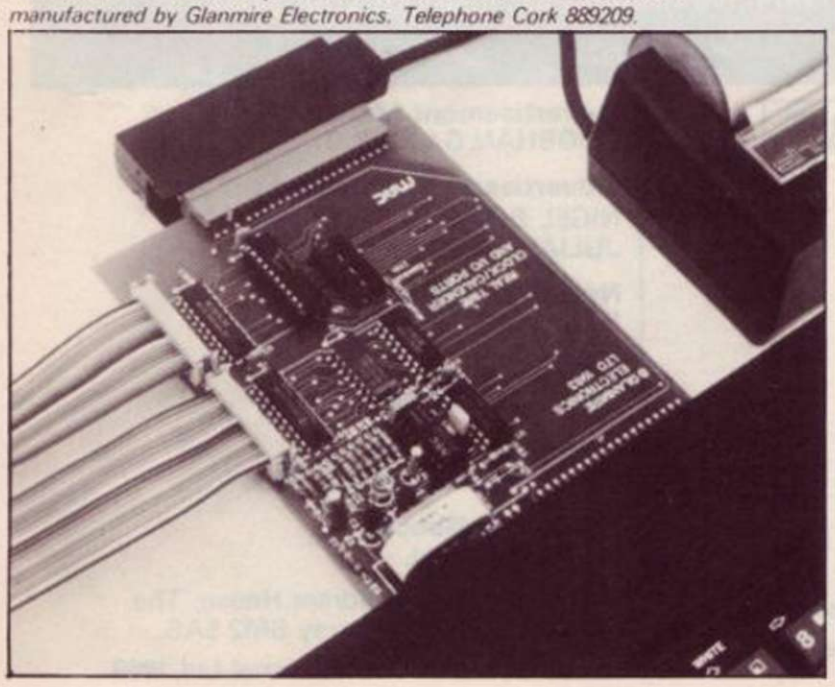
The potential is also there for the Tube — although, of course, we have yet to see it officially for the BBC itself, let alone the Electron.

However, Acorn has successfully used Z-80s and 6502s as second processors with the Electron, so it looks like the Tube will be in a box.

Things are still very much at the prototype stage for the expansion box; for certain applications it looks as though an intermediate expansion box may be necessary to obviate power feedback problems — the intermediate box would have to supplant the Electron's own power supply as well as powering the new peripheral.

An Electron with a difference.

This real-time clock/calendar with I/O ports has eight programmable inputs and eight programmable outputs. The battery-powered clock provides the computer with month, day, date, hours, minutes and seconds. So you could, for example use your Sinclair as an electronic diary; the clock would keep time while the ZX-81 or Spectrum was switched off. The clocks are manufactured by Glanmire Electronics. Telephone Cork 889209.



Companies may come and go but the microcomputer show goes on

EXIT TEXAS Instruments, Mattel and Jupiter Cantab stage left; enter IBM from wings stage right. The home-computing story-line is now incredibly complicated; the only thing stopping it from being a farce is that it is not funny.

With Texas Instruments' decision to pull out of the home-computer market, new machines like the TI-99/8 are being written out of the script before they have even put in an appearance.

Giant toy-maker Mattel has also concluded that now is the time to stop selling computer hardware, and early in 1984 it will be handing over distribution of the £50 Aquarius to Radofin Electronics U.K., the machine's manufacturer.

Big Blue's little baby

FLUSHED WITH its success in the personal computer market, IBM has decided to make its presence felt in the home. The U.S. giant broke the shell of secrecy surrounding its home-computer project to reveal not the Peanut, but the PCjr.

Apart from the novelty of the PCjr's cordless keyboard which uses an infra-red signal to communicate with the separate 8088-based, 16-bit computer from up to 20ft. away, this colour micro holds few surprises.

It comes in two versions: a $669 64K for the basic unit, or $1,269 for 128K and diskette drive — hardly the sort of prices that will put it in the mainstream of British home computing.

In any case IBM has no plans to bring the PCjr out in the U.K. yet, but when it does you can expect the cheaper version to sell for between £500 and £600.

The £90 Ace, the only Forth-based home micro, is now out of production. A meeting of creditors of the Ace's manufacturer, Jupiter Cantab, has been called.

But the long-expected twist to the plot is that IBM has launched itself into the home-computer free-for-all with the £500-plus PCjr. With that sort of price, Big Blue is clearly going for the more stable end of the market.

Texas — in 1979 the first company to produce a home colour micro, the TI-99/4 — has decided to call it a day after sustaining major losses in its home computer operation. According to a Texas spokesman the firm was "loosing money hand over fist in the home-computer market" — a fact which accounts for almost all of Texas' $230 million losses in the last six months.

The chip-making side of Texas' business is "going ahead strongly", and the company has no current plans to withdraw its popular Speak and Spell range of learning toys. Warranties on Texas hardware will be honoured.

Even though TI-99/4A production is ceasing, there should be no shortage of programs for the moment. The Texas spokesman says that there are "large inventories of software, and a certain amount of new stuff still in the pipeline".

Video teach-ins for serious programmers and games freaks

IF GUTENBERG had spread the word about printing by sending out hand written notes it would have taken the world a long time to find out about its advantages. So the argument goes you should not write books about computing but instead harness the television screen to teach people. Ideally you could put the lessons on a ROM cartridge but present ROMs do not carry enough memory. Both PolyGram and WH Smiths have done the next best thing by bringing out videos. Smiths has produced an own brand video — its first-ever — which is probably also the first Spectrum tuition video.

Called *Introduction to Programming*, the course presented by David Redclift comes in two parts costing £16.95 each. Level One teaches Basic programming, and contains four programs which can be downloaded from the video via an audio tape recorder into your Sinclair ZX Spectrum. More advanced programming is the topic of the Level Two tape. This tells you about string slicing, array handling and animation. Two programs are included for transference into your computer.

The videos will be on sale at 250 Smiths branches in the U.K. On a less eductional note, PolyGram Video has produced a trilogy entitled *How to Beat Home Video Games*. Presented by ace games player Philip Wiswell, games from stables as diverse as Parker Brothers, Apollo, Imagic, Activision and Atari are presented. As the techniques are explained, the game plays are shown.

The three cassettes cover different games for different systems. The first volume — entitled the Best Games illustrates classics like Frogger, Asteroids, Space Invaders, and Chopper Command. volume two deals with more recent games to appear, like ET.

The third volume is more hardware-oriented, dealing with new video games systems — the Vectrex, Colecovision and the Atari 5200 but it also shows 20 games.

Wiswell has endorsed the video approach not because he feels that his potential audience cannot read, but because it is difficult to visualise from the written word what he is trying to say: "When you see it happen on tape, it is no longer theory."

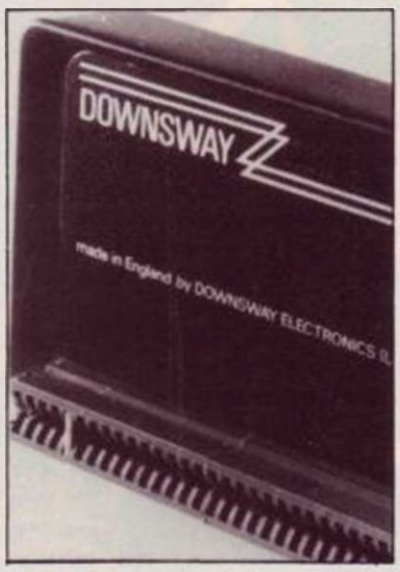
Floppy cuts on the horizon

NEXT YEAR you can expect to see floppy disc drives widely available in high street chains and at dramatically lower prices. One major source of disc drives, Taiwan, hopes to push its export price below $100. By the time they reach the shops here the drives could be selling for as low as £100.

WH Smiths already stocks 5¼ inch Cumana drives and 3 inch Hitachi drives for the BBC micro in 30 of its 250 branches. In these stores the normal computer departments have been expanded into "shops within shops".

Both drives have been packaged to allow the user to "plug in and go". They come complete with cables, a manual and a formatting disc. A single 100K unit from Cumana costs £250 while a 3 inch Hitachi drive with the same capacity costs £225.

For £329 Cumana also sells a disc system for the Dragon although this will not be available at WH Smiths.



To program this Spectrum joystick interface, just press the key to go left, for example and move the joystick left Any key specified by the games software can be "learned" by the interface — eight directions plus fire. The £22.95 Downsway interface is compatible with switch-type joysticks such as the Atari, Competition-Pro, Starfighter, Wico etc. Telephone Epsom 27222.

Kiss with confidence, thanks to your micro

LOVE IS the wisdom of the fool and the folly of the wise, they say. Foolish or wise, two new programs from Acornsoft deal with love's young dream.

The Dating Game, developed by Dr Glenn Wilson of the University of London's Institute of Psychiatry, comes in four units. The first, the Dating Game itself, enables you to enter data on up to 40 people and see who is compatible with whom. It is based on the same attitudinal testing used by big computer dating agencies.

The second section, Love Style, asks you incredibly personal questions to find out what sort of lover you are: fanciful or practical, serious or playful, cool or passionate.

The third segment, Relationship, figures out whether you are a giver or a taker, committed or free, 'boss' or slave, quiet or exciting.

The final section, Dating Skills, is lightheartedly aimed at discovering if you are approaching the object of your affections in the best possible way, or if you are just plain boorish and socially incompetent.

The other program, I Do, is based on the controversial Dr Eysenck's book *Your Guide to a Happy Marriage*. This is a bit more serious and is aimed at married couples with an eye to use by marriage guidance counsellors. It has sub-sections dealing with social attitudes, personality, marital satisfaction, feminism and anti-feminism, masculinity and femininity and sexual attitudes. Apparently marital breakdown costs the country around £1 million per year, so this is your chance to help with the national debt.

Hinged pop-up screen on Olivetti's new portable

Olivetti's M-10 portable computer.

OLIVETTI'S NEW portable computer, the M-10 is clearly intended to compete with the Epson HX-20. Like the Epson it is small enough to fit into a briefcase with a base area roughly the size of an A4 sheet of paper but provides a full-size Qwerty keyboard. Its distinctive feature is a hinged pop-up screen which offers eight lines of 40 characters or graphics in a liquid crystal display.

At a price which is expected to be between £400 and £500 it will appeal mainly to business users.

The M-10 comes with 32K RAM and 32K ROM. As well as the Basic interpreter the ROM contains a text editor, a terminal emulator, an address book and diary. The machine's interfaces include parallel and serial ports, a cassette port and a socket for a bar code reader. Olivetti is planning to support the M-10 with a battery-operated four-colour printer/plotter and an acoustic coupler.

CHESS PROGRAMS out of this world

NEW

48K Spectrum Chess II £9.95
Two years of research and development have produced the strongest chess game yet, with 999 levels of play.

48K Spectrum Voice Chess £8.95
This incredible program talks you through your game. It tells you its move, recommends a move and contains a range of facetious comments. The game is based on the highly acclaimed ZX Chess II.

1K ZX Chess ZX81 £2.95
A fantastic 1K chess game ideal for someone who wants a quick game without waiting for loading.

Non-speaking version. Spectrum Chess £8.45

NEW

16K/48K Spectrum Chess Tutor £6.95
Not only an excellent companion but also teaches the absolute beginner how to play chess.

ZX Chess II £9.95
A great game of chess for your 16K ZX81 or 48K Spectrum. Seven levels of play. Analysis and recommended move options.

ZX Chess I £6.50
Very popular machine code program, with six levels of play and analysis option.

CHRISTMAS FAIR Reward

Gifts galore

LUCKY NUMBERS will be the name of the game at our Christmas Fair. The Fair which runs from Thursday, December 15 to Sunday, December 18 is your last chance to see the pick of the year's software releases, with all the latest computers and add-ons, before Christmas. A different number will be printed on each catalogue sold and lucky numbers will be drawn every hour on the hour during the afternoon session of the Fair. The winners will receive gifts of software and add-ons — pocket calculators, Spectrum sound booster, mugs, tee-shirts and 1984 diaries.

Lots of choice

BE SPOILT for choice. That's the slogan of the first Computer Fair designed to appeal just to *Your Computer* readers. With 100 companies exhibiting everything for the home computer from joysticks and track balls to speech synthesisers and printers the Christmas Fair just will not have room for business machines. You can buy and try a wider range of peripherals for your micro than you could ever hope to see in one store. You can see all the rival games for your computer up and running on screen before you choose what you want to buy for Christmas.

YOUR COMPUTER Christmas Fair

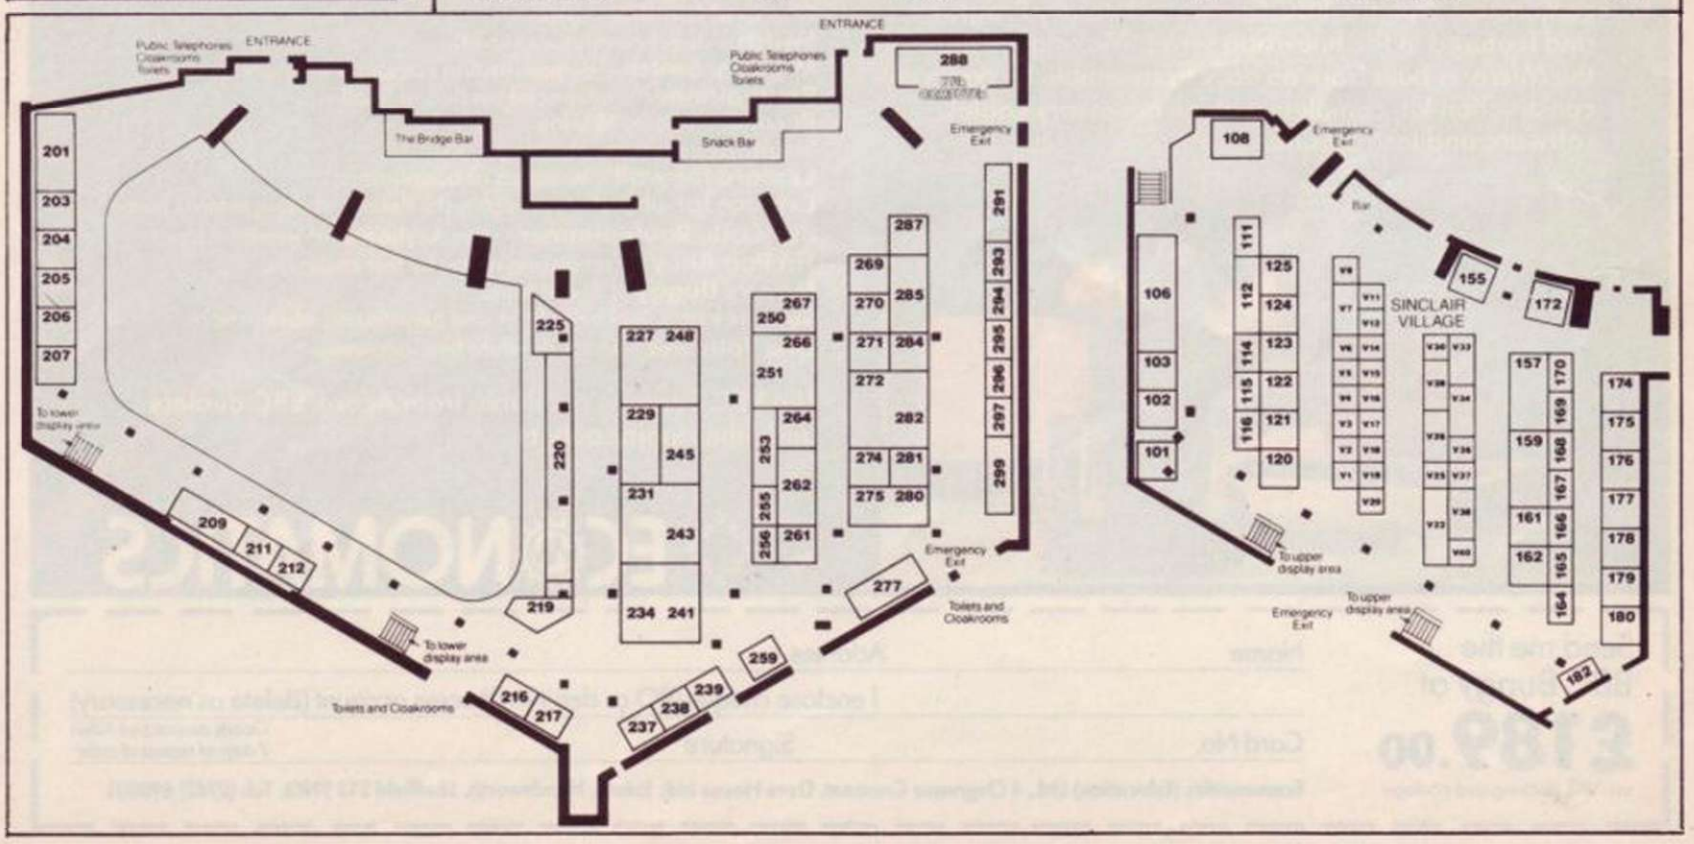
Your Computer readers will be able to use the voucher in this issue to enter the Fair for 50p less than usual. There are also special offer all-in travel and admission tickets from British Rail which can save you money. Full price admission is £2.50 for adults and £1.50 for children under 16 and pensioners.

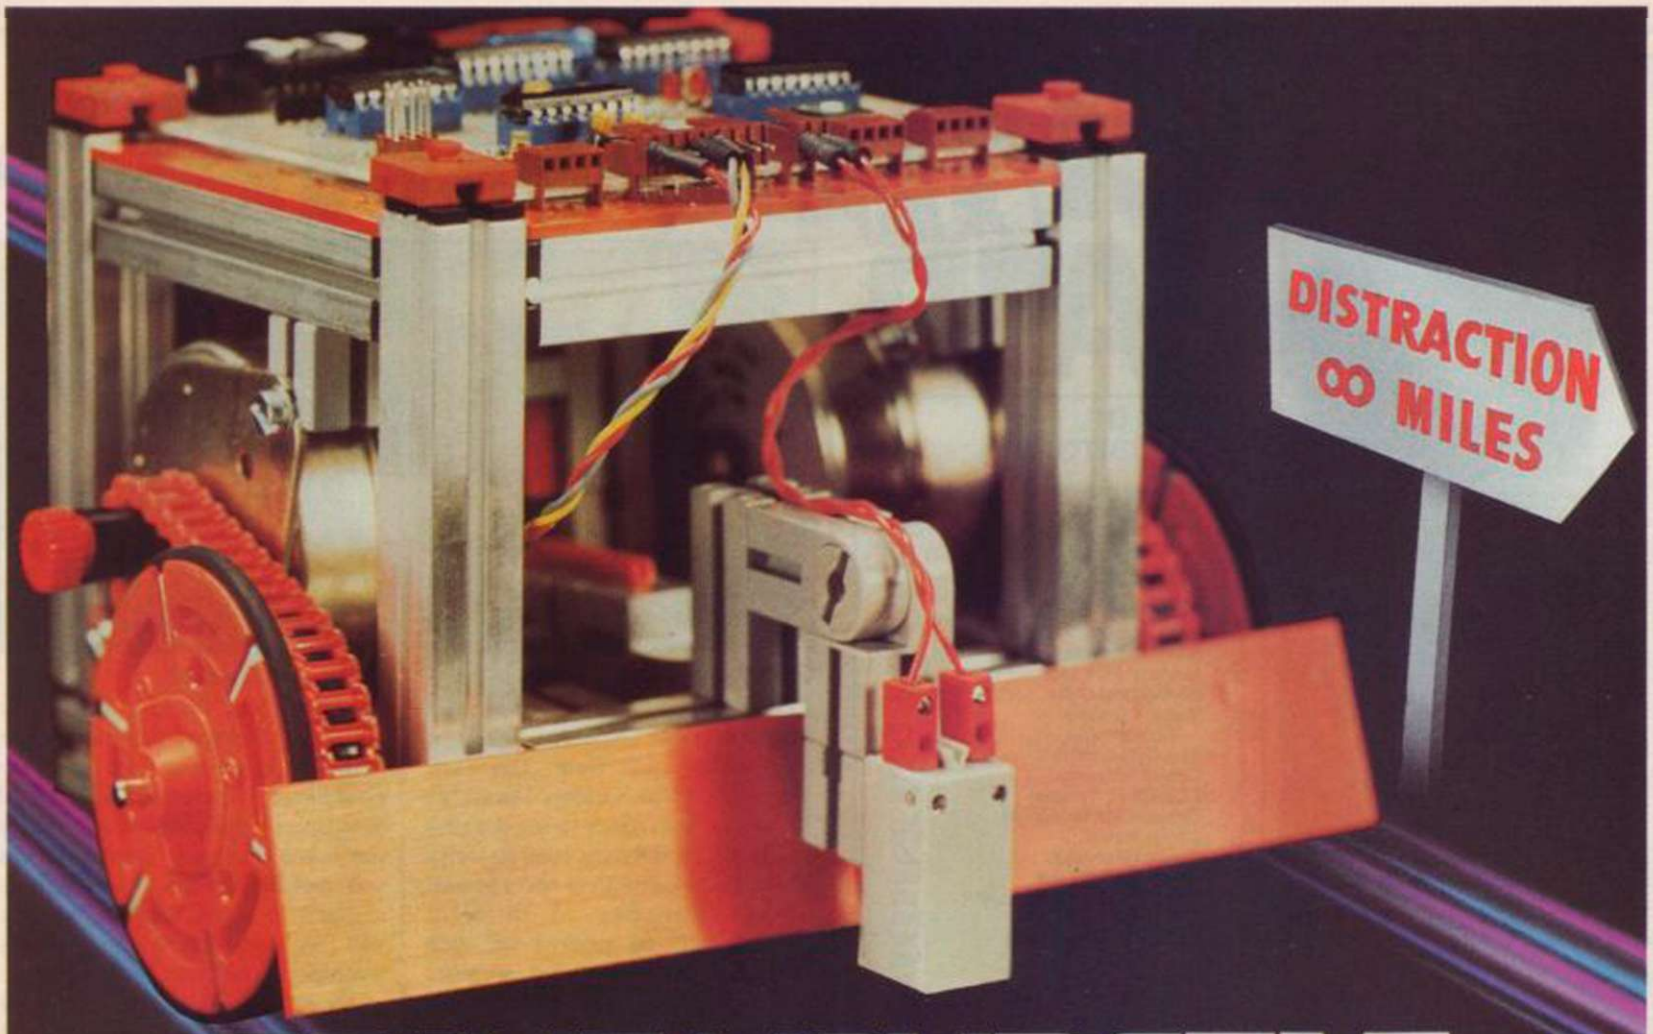
Special exhibition fares including rail travel to London and admission to the Fair starts at £4.50 for adults, £2.50 for children from anywhere in Greater London up to £13.50/£7.00 from Birmingham. These prices do not include tube travel to Wembley.

The easiest way to get to the Fair by underground is by Metropolitan line or Jubilee to Wembley Park or Bakerloo to Wembley Central. British Rail's Broad Street line also runs to Wembly Central and the 83, 92, 182, 18, 297, 245 and 734 Green Line buses all go near the Wembley Conference Centre.

By car, follow signs for Wembley stadium and then the Conference Centre where you will find a 5,000 space car park. The Fair opens each day at 10.00am and closes at 6.00pm except Friday when there will be late night opening till 8.00pm.

■ If you want to avoid the queue and buy your tickets before the big day, you can order them from Your Computer Christmas Fair Advance Tickets, Reed Exhibitions, Throwley Way, Sutton, Surrey SM1 4QQ, telephone 01-643 8040. Tickets cost £2.50 for adults and £1.50 for children. Special party rates are available on request. Remember that applications for the Super-Saver tickets must be in no later than December 5.





DRIVE YOURSELF TO DISTRACTION

WITH A *BBC* BUGGY

Trying to determine the limitations of the BBC Buggy is a task which will drive you to distraction. So sit back and accept the fact that your BBC Micro computer (Model B) controlled Robot will provide you with hours and hours of stimulating entertainment.

This rugged little vehicle which has been designed in conjunction with the BBC Computer Literary Programme and featured in the television series 'Making the most of the Micro' is built from an easy to assemble fischertechnik construction kit, complete with all necessary cables, software and instructions.

The Buggy's software which is based on the 'building block' principle consists of 12 robust application programs and one familiarisation program all of which feature full graphics.

Take a trip into the future without ever leaving your key-board – drive a BBC Buggy.

PROGRAMS
Test and familiarisation.
Switch – direct computer control.
Memory Switch – demonstrating computer memory.
Routeplanner – advanced version of Snail.
Recorder – route display.
Snail – screen route planning.
Explore for wall – mapping of boundaries.
Explore for object – seeks objects, defines shapes, returns home.
Bar Code Routeplanner – non-keyboard information input.
Tin Pan Alley – composing music by bar codes.
Man vs Buggy – 'Flying blind'.
Sunseeker – seeking a light and negotiating obstructions.
Line Follower – black or white line following.

The BBC Buggy is available from Acorn/BBC dealers and other major outlets.

BEGINNERS first bytes

Starting out in home computing? First Bytes is for you. Just write to *Your Computer* with any hardware or software problems, no matter how small or simple.

I could do that...

In the piece on sorting and searching, we mentioned the binary search. This month's challenge is to see which reader can come up with the most efficient program, judged by both speed and program size, to implement the binary sort.

Assume that you have an array with sorted data in it already, and try to make the routine as general as possible. Also try to explain as best you can what it is that you are doing. This should help other readers to understand.

Obviously the task set in October's "I could do that" failed to stimulate First Byters' interest or perhaps, proved too difficult.

Not a single entry landed on our desks before the closing date – so, no prize and no solution.

Let us hope this month's poser is less intimidating.

Read Piers Letcher's introduction to sorting first and then try your hand – there is £15 at stake.

Printing to the screen

"There appear to be several methods for printing information from a program on to the screen, but I do not know what they all are, or which to use. Can you help me?"

THE COMMONEST, and most well known method of getting information to the screen is by using the Print command, from Basic. There are an enormous number of different versions of this, not just on different micros, but within each machine. The Print statement comes with many parameters, and can tell the micro precisely where the next piece of information should be printed.

The micro keeps a count of just where on the screen the current position is, and at the basic minimum, using a Print statement will cause the micro to put the information at the beginning of the next line after this pointer. If the Print statement has a comma in it, that adds a tab's length to the pointer, and the next piece of information gets printed at the next tab marker.

The pointer that the computer

(continued on page 85)

Sorting – why bother?

"What is the point of sorting?"

IT IS NOT really until you start to use your micro as a tool, rather than a toy, that you start to see the uses for sorting. In fact, it is the close relation of sorting, searching, that is often the more useful of the two.

It is quicker and easier to find a piece of information if the data is sorted first.

If you typed in the data in order anyway, then you would save yourself the trouble of having to sort it out. A problem occurs when you find that you have to store new information. A short program to sort things for you means you can put it where you want.

If you have got a series of addresses in order say, then the most likely thing you'll want to do is to see one of them. This is where a searching routine comes in handy. You could list all of the addresses of people whose name begins with L for example. To do this you need a general search program.

This works on the following principle: Find out where in the address or record the information you are comparing is stored. For example, it might be in the 40th to 50th character positions in a string. Now look at each address, and see if characters 40 to 50 match Cardiff or London. Then if the match is true, print out that record.

Now if the addresses happened to be in alphabetical order of town names then you could start in the middle, see if the town you are looking for is lower down the alphabet or higher, and then look in the middle of the section you now know it is in, and keep going until you reach the bit you're looking for. This is known as a binary search.

The binary search above only works on sorted data, and so it's a good reason for getting your information in some order. Doing this is simpler than it sounds. If you have an array of 10 numbers, then you can sort it using the array, and just one temporary variable:

```
 10 REM SORT ROUTINE
 20 DIM A(10)
 40 FOR J = 1 TO 10
 50 FOR K = 1 TO 9
 60 IF A(K)<A(K + 1) THEN GOTO 110
 70 LET TEMP = A(K)
 80 LET A(K) = A(K + 1)
 90 LET A(K + 1) = TEMP
110 NET K
120 NEXT J
```

A very simple refinement to this puts in a count, so that you do not keep on sorting once the array is sorted, as this one does.

Pier Letcher.

NEW SOFTWARE FOR A NEW DIMENSION

Micromega · Personal Computer Division · Quantec Systems and Software Ltd 230 Lavender Hill London SW11 1LE.

(continued from page 83)
keeps is the key to all output to the screen. It is this that makes things like the Print Tab statement work, and it is this that you reset if you want to start a new page on the screen.

Setting a new page is usually done by a command like Cls. This wipes off the old screen, and sets the pointer back to the top left-hand corner of the screen. The Cls command is actually a way of sending the micro a control character.

Control characters

Control characters are much the same as ordinary characters. All characters are represented in the computer as numbers, for example, "A" is represented in the computer as the number 41 — hexadecimal, in ASCII, note that some computers use other codes. So if you wanted to print an A on the screen you could just type

```
PRINT CHR$(65)
```

The reason you used 65 not 41 was that the 41 was hexadecimal, so it needed converting to decimal:

$4 \times 16 + 1 = 65$

In the same way, all of the control codes have numbers.

The control code

The control code for Clear text screen — on the BBC — is given by Control and L, or the number 0C, so if you press Ctrl and L at the same time it should clear your screen. Unfortunately you cannot put Ctrl and L into a PRINT statement, so you have to tell the program to

```
PRINT CHR$(12)
```

instead. This has the same effect as typing Cls in a program.

Matters are further complicated, because most micros have two places in memory that you can print from. One is the graphics area, and the other is the text area. This gives you the text screen, and the graphics screen "windows". You can now print from either to the screen. Your normal print statement etc. will cause text to appear, from the text window. However, with a different command for every machine, VDU for the BBC, GET/ PUT/ SCREEN for the Dragon by way of example, you can now print user-defined characters from the graphics area.

These specialised commands are highly machine specific, since they rely on the way that the memory has been organised on that particular machine.

So, to sum up, it depends on what you are trying to do. Print is usually a perfectly sensible way of outputting to the text screen, and use of control characters, and the machine's own useful functions — like the Dragon's Print @ statement, which allows you to print at any position on the screen, are recommended. First, of course, you have to find out what is available. Again, your machine will have specific commands to deal with printing from graphics areas to the screen. Your manual should at least tell you what commands you can use.

Piers Letcher.

BEGINNERS first bytes

Can you do anything sensible with a home computer?

"Most people use their new micros to learn to program in Basic, and to run games. But can you do much else with a home micro — in particular can you do anything sensible?"

THE ANSWER IS yes — but there are obvious limits, otherwise banks and offices would all be using Spectrums. Software certainly exists for most home micros to at least let you try out word processing, electronic spreadsheets and database management. The limitations are usually imposed by limitations of the hardware.

Word processing is far superior to using a typewriter — once you are accustomed to it it is difficult to go back. The key advantage of a WP program is that what you type appears first on the screen, where you can correct it and manipulate it before finally committing yourself to paper. Most word processors let you move whole blocks of text from one place to another, and let you try out laying out your text in different ways — with wide margins, for instance, or double-spaced.

The main problem of doing practical word processing on a cheap home micro is that it soon gets expensive. Apart from the cost of the software, which may range from £10 to £50 or £60 but which is always more expensive than a simple game program, you obviously need a printer. This may cost at least as much as the micro.

You also rapidly discover you need a decent keyboard if your machine does not already have one. And then you start wanting discs — one of the convenient things you can do with a word processor is keep standard letters and then load them in for small alterations when needed.

Some WP programs will even automatically print out a whole batch of letters, merging a name and address file with your standard letter.

A less obvious problem you discover once you start using your micro a lot to look at text is the quality of the screen. Most home micros are plugged into colour TV sets, which give a less stable image than a monitor or even a black and white TV. Sometimes the display problem lies with the micros themselves, as they are very much designed down to a cost.

A few hours of word processing on the Dragon connected to a colour TV rapidly makes you realise why businesses are prepared to pay a lot more money in the first place to get a proper office system.

Until Visicalc came along no-one had thought of the idea of an electronic spreadsheet. This program was probably responsible for selling more micros than any other piece of software. Visicalc and the host of imitative calc programs let you work out calculations on the screen. You type numbers into boxes in a grid and then type in a formula saying what you want done.

So if you want to add up a column of figures you just type in all the numbers and then, at the place you want the answer to appear, type in the name of the boxes you want added up, for instance B1+B2+B3. Much more complicated mathematical operations are possible and you can work with complete rows and columns at a time.

The power of calc programs lies in the ease with which they let you answer 'what if...' questions. What if you just change that number there, what if you alter the formula slightly. You can try out a whole number of different approaches with very little effort.

Calc programs are quite suitable for use on home micros as you can

do a lot of useful work without discs and the quality of the keyboard does not matter much. Although home micros only display a small part of the calc grid you can quite conveniently work with much larger grids than will fit on the screen by scrolling. But it still helps to see as many rows and columns as possible at a time so 80 character by 24 line office machines still score for frequent use.

So-called database programs are the micro equivalent of a card index. The usual approach is for the program to display record formats on the screen, which you can type information into, Save and alter. You really need a floppy disc system.

Most let you select records on a number of different criteria — all people interested in the Oric living in North London for example if you are storing information for a computer club file for example — and some let you sort selected records into order. Unless the selection and sort facilities are good the database program probably has little advantage over a manual card index.

If you intend to do a lot of sensible-type things with your micro it helps to have chosen the right machine in the first place. Taking into account availability of software, quality of keyboard and ease of expansion to discs and printer, the BBC Micro and the Commodore 64 are probably the best home machines.

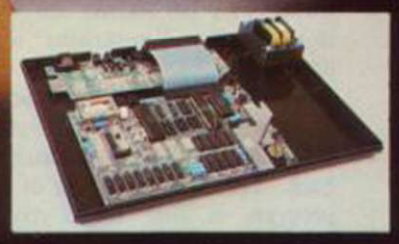
Next probably come the Vic-20 and Atari 800 and 600, which have proper keyboards and a reasonable variety of packages. The Dragon is let down by its display and machines like the Oric and Spectrum by their keyboards. When you count up the cost of all the add-ons you may end up buying, for serious use the more expensive machines may work out better value in the end.

Ian Stobie

Power to your Fingertips.

All keys on the FDS keyboard contain all the Graphic Characters of the ZX Spectrum

Microdrive interface 1 easily adapted to fit inside the case



Transform your Spectrum with the FDS Keyboard and feel the newly acquired power flow from your fingertips as you enter data with lightning fast accuracy.

The Fuller FDS Keyboard has been especially designed for the professional user. This elegant, slim line, desk top system has a keyboard that inclines toward you and contains all the graphic characters of the ZX Spectrum, plus, additional function keys, shift keys on either side and a space bar. With all the entry keys double size, lightning fast accurate data entry is now made easy. Other amazing features of the FDS include:–
Gold plated key switch contacts, guaranteed for 10^6 operations. 4 cursor control keys, 2 functions for direct entry into E mode.

Based on the popular FD42 system, the Fuller FDS is simple to install; it requres no soldering or technical knowledge. For the user who is reluctant to install his computer circuit board inside the FDS, a buffer is available (£8.75 + 80p&p) which simply plugs into the expansion port and connects directly to the keyboard.

Paul Bond visits Cambridge to see Acorn's technological hierarchy show off the Electron and really digs the "jazz concert" atmosphere.

CAMBRIDGE

CAMBRIDGE MICROCOMPUTER Club meets on the third Wednesday of every month at the Portland Arms in Milton Street. This worthy hostelry is set in a town that is renowned for far more than its dreaming spires — one club member estimated that there must be anything between 80 and 120 separate companies engaged in some aspect of microcomputer-related work in the area, whether it be design, research or manufacturing.

In the midst of all this micro-genesis, it is only to be expected that CMC itself would attract a rather high-flown or even esoteric following. The club secretary, Derek Tripp, is director of Herald Computers, a marketing company whose standard fare is machines in the £2000-£6000 range. He and his club treasurer had in fact come hotfoot from visiting two computer shows that day in Birmingham, IBS, and a show concerned with the use of computers in agriculture.

The club is now in its third year and thriving — perhaps partly due to the fact that its treasurer attended the same accountancy course at Cambridge Tech as Acorn supremo Hermann Hauser.

The sturdy facade of the Portland Arms, harnessed together with the English licensing laws provide an effective bulwark against microkids — viewed as a definite plus by some club members who feel that the more serious technical aspects of an evening, such as the one that *Your Computer* attended when Acorn's technological hierarchy were there in force, might not be fully appreciated by younger computerniks.

Whatever their feelings about the youth of today in general, the Acorn men were definitely proud of their new baby, the Electron, which is what they were there to talk about. Adrian Warner kicked off for the company, giving us his personal insight into the soul of a new machine. As the BBC project closed in November 1981, the early idea of a "baby to the Beeb" was conceived, but obviously the company had more pressing considerations of production and selling their main model.

In November 1982, emulation began with four double-height Eurocards full of TTL to model the OS and make changes to the ULA. Having one single, complex ULA which handles everything has slowed the Electron down by comparison with the BBC, and not just where processing is concerned. It provided plenty of development and production headaches too.

In April of the same year Alan Boothroyd designed the prototype casing which underwent changes until November. Little things, like ventilation holes underneath to stop the machine frying itself alive were added.

In parallel with the other works, Steve Furber was "doing wonderful things" with Feranti ULAs. While the first printed-circuit boards were ready in September 1982, it was the ULA that killed all hope of a 1982 Electron at Christmas. All the designs until the current Mark G flopped. As the deadline began to slip, a number of goodies were dropped from the specification, though Mr Warner was obviously reluctant to say exactly what they were. He pointed out that it was a 95 per cent density ULA which evoked rapturous cries of "Crazy!" from the audience. For a moment I thought I was at a jazz concert.

Much has been made in the advertising of the machine's environmental testing — "We have a quality manager who drives me mad" — but it makes sense that a machine assembled in Malaysia and airfreighted around the world should be subjected to drop testing and thermal shock. Still the tests have apparently convinced British Telecom's medical micro network, the Chain, that it is worth ordering 20,000 Electron-based terminals.

Which brings us to one of the main points of the evening — the unveiling of the first of a new range of expansion boxes which will instantaneously customise the machine for whatever purpose. Zahid Najan spoke about the expansion philosophy. "Whatever box we come out with has got to be very, very cheap." The box he showed us contained the minimum considered necessary and provided an interface for cartridges containing two 16K Eproms which would provide the Electron with BCPL, or View, for example.

Another project is a disc interface box which actually contains the disc and disc-drive as well. This would be quite different from anything available.

The club, which has around 50 members, publishes its own journal, *Don't Panic*, which is supposed to come out six times a year — things don't always go smoothly, hence the title. Past publications have included articles on baud-rate generation, matrix routines for the BBC Micro, and RS-232 driver and receiver. For further information contact Derek Tripp on 0223 315662.

cp software

Spectrum software

BRIDGE PLAYER

At last you can play Bridge against your Spectrum. Unlike other bridge type programs, Bridge Player does not use pre-dealt hands.
The Acol bidding system with a week 1NT opening bid is used and the Blackwood and Stayman conventions are accepted. The display shows your hand and dummy, which you also play, the current and last trick, score and contract. A replay facility and scoring with honours, slam and rubber points are included.
Makes an ideal combination with our Bridge Tutor.

48K Spectrum £8.95

SPECTRUM EXTENDED BASIC

Improve your programming. Add structure to your programs and take the pain out of debugging. Spectrum Extended Basic can help you do this by providing ten additional BASIC commands which are considered essential aids for most programming applications, so much so that many of these commands are standard features on other machines.
The program occupies less than 5K bytes, is user friendly, requiring only a two key entry and incorporates syntax checking.
The commands are: * Auto; * Clock; * Delete; * Examine; * Find; * Memory; * Renumber; * Scroll; * Trace; * Variables.

48K Spectrum £9.95

GOLFING WORLD

Choose a club and the direction, use your skill to miss the bunkers, trees and water, reduce your handicap and watch your game improve.
Handicap Golf, a 1 or 2 player game played on a randomly generated course wth a 'close up' of the greens for putting. Reduce your handicap below 12 and enter the Club Championship; win this to qualify for the Open. The Club Championship and the Open are one player games played on a set course modelled on Lytham St. Annes. Scoring card, hole details and leader board (Championship and Open) shown.

48K Spectrum £5.95

SUPERCODE

The ultimate Machine Code Tool Kit with 100 routines. Renumbers with and without go to's, go sub's etc; on break/on error go to; beep/sound generator; block inserts/deletes; REMKill; dozens of screen routines' random number generator; etc.
★ Index of routines ★ Call up details of each routine including information to tailor the routine to individual requirements ★ Repeatable demonstration of most routines, save and verify individual routines ★ Direct from the combined (48K only) Basic program, 16K version using printed instructions.

16K and 48K Spectrum £9.95

FLOATING POINT FORTH
WITH EDITOR

Supports Forth 79 structures, trig functions, logs, RND, square roots, etc., the ZX printer and access to I/O ports.
Has all the Spectrum hi-res colour graphics, plot and draw and beeper facilities. Allows direct entry of machine code. Up to 300 stock items, 117 UDG characters and 23 named variables are available Comprehensive User Guide supplied.

48K Spectrum £13.95

ZX REVERSI

When put to the test against other Spectrum Reversi programs, ZX Reversi was the conclusive winner. 10 levels of play (easy to expert).
Self play, player v. player and player v. computer, handicap system, set up a position, select the colour of the display, scrolling move history, scoring updated after each move.

48K Spectrum £6.95

SUPERCHESS II

One of the strongest Spectrum chess programs, beating Sargon II, whose features include:
· 7 level of play
· Plays a variety of openings
e.g. French Defense, Sicilian Defense, Ruy Lopez, Queen's Gambit etc. · Self play mode · Analyse mode · Enhanced end-game play · Recommended move option.

SUPERCHESS II

16K Jupiter Ace	£8.95
Lynx	£8.95

48K Spectrum £7.95

SNAIL LOGO

An advanced implementation to the Logo turtle type graphics. Uses the original style Logo instructions to control the movements of a graphical Snail around the screen instead of a mechanical turtle. Includes the following features: · Full operating system and Editor · Comprehensive user guide with sample programs · Multi-level Hierarchic Procedures · Procedures with Parameters · Recursive Procedures · Nestable repeat loops · Variables · Colour and wall bouncing controls · 25 Language Instructions, over 20 warning and error messages · Commands to control the optional ZEAKER turtle.

48K Spectrum £9.95

Star chart

Wild West Hero

48K Spectrum:
Shoot-'em-up:
Timescape Software:
£5.90

★ ★ ★

Like all good Westerns this has a good opening visual and the controls are clearly explained beneath the Wild West saloon bar-type writing. A brief kaleidoscopic display transports you to the Arizona desert where you are suddenly surrounded by tough gun-toting hombres and rather volatile cacti which blow up and kill you when you bump into them. You automatically shoot in the direction you are moving. Once you have made a name as a fast draw, more tenderfeet appear on screen.

The Ultra

48K Oric-1:
Shoot-'em-up:
Personal Software Services:
£6.95

★ ★ ★

A touch of nostalgia here for the heady days of 1978 when the first space invaders began to creep into local pubs and arcades suddenly took on a new lease of life. The Ultra, as usual, are an evil race of mutant aliens — anyway they come in 16 waves of increasing mutancy and you attempt to destroy them with your lone laser. Good use of the Oric-1's colour facilities and a quiet/loud option on sound effects. Since a quiet Oric is a contradiction in terms, you should be warned that option two is liable to induce shell-shock.

Tool Box

BBC Model A or Model B:
Utilities:
BBC Soft:
£21.00

★ ★ ★ ★

Over 20 programming aids in machine code and Basic, including a character definer, compacters, a program re-sequencer, variables dump and six sort routines, plus a fat ring-bound manual. A worthwhile collection, even if there are some items you do not need. But beware the Epson graphics dumps: they only work with the MX-80, and the disc version does not go at all.

SOFTWARE Shortlist

Bugaboo

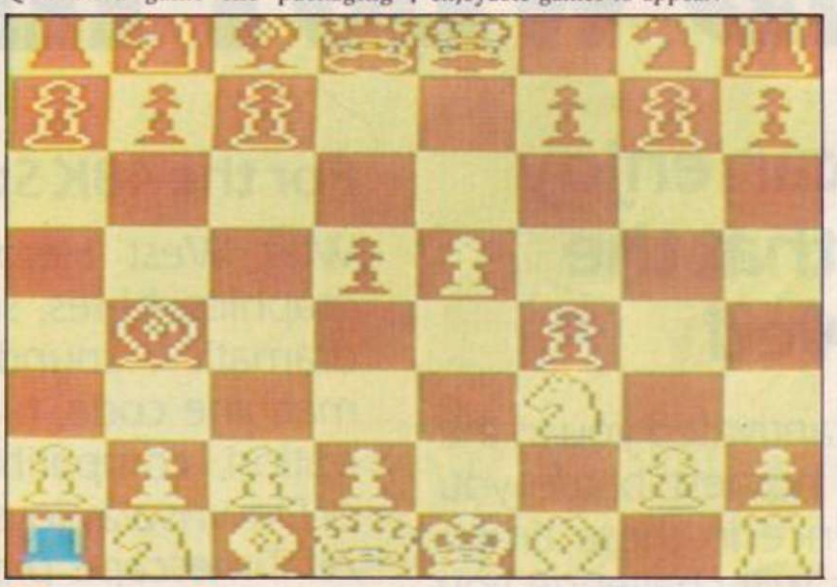
■*48K Spectrum*
■*£6.95*
■*Quicksilva*

★ ★ ★

IF YOU HAVE ever had a dog you will know how agile the flea is. Bugaboo is a highly original new program which features an athletic yellow flea of prodigious jumping ability. His task is to escape from the bottom of the screen to the exit at the top. Attempting to thwart his ambition is a vicious yellow pterodactyl which swoops around in menacing fashion.

One of the most attractive features of Bugaboo is its landscape; a multi-levelled collection of dark caves and jagged ledges, decorated with psychedelic coloured mushrooms and shrubs. Cursor keys allow you to scroll left and right, up and down, to view the prospects in store.

Controlling Bugaboo's leaps is a tricky business, not helped by the fact that the on-tape instructions are not very explicit. Since this is a Quicksilva game the packaging contains only a silly blurb, with possibly the most appalling rhyme ever written. Nonetheless, Bugaboo is one of the most interesting and enjoyable games to appear.



Cyrus Chess

■*Dragon 32K*
■*Cartridge*
■*£24.95*
■*Dragon Data*

★ ★ ★ ★

CYRUS CHESS, RELEASED on cartridge by Dragon Data, is a version of the program which won the 1981 European Chess Championship. It has been decked out with quite a few extra facilities. You can set up the board for a problem, run through an already completed game, or take back a move; and, if you wish, the program will demonstrate what it thinks is your best move.

Perhaps the most useful feature is the way it allows you to interrupt its thought-process. At any of the nine levels of playing strength you can force Cyrus to come up with the best move it has found so far. This is a blessing since chess programs can be infuriatingly slow at higher levels.

But all these options are incidential to the most important question one should ask of a chess program — how good a player is it? The answer is that for a home computer program Cyrus plays a surprisingly strong game.

Chess programs are notoriously weak at stategic play. Typically they will defend a pawn with tenacity while ignoring the build-up of a standard king's side attack. Cyrus, however, is rather better than most. It plays a highly agressive game, throwing its pieces forward and piling on the pressure early.

It is all too easy to underestimate the program's skill, especially if you play passively. Before you know it Cyrus has swamped your defences and you are about to be trounced. The best course here is to weather the storm with cautious play: if you are lucky it will then over extend itself.

737 Flight Simulator

■*BBC*
■*£9.95*
■*Salamander*

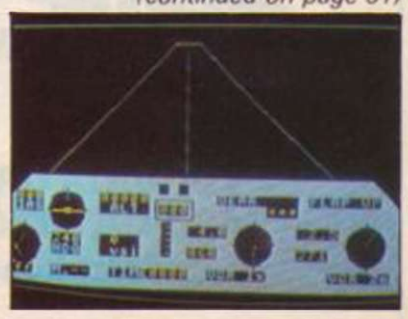
★ ★

THERE MUST BE people with more flying time in computer clubs around the land than British Caledonian's entire Hamble intake combined. The trouble is, every time we get real pilots behind one of these computer simulators they tend to say things like "This perpetuates the myth that flying is difficult", or "Last time I went to the Boeing facility all I had to do was push a button and the bloody thing took off by itself."

However this may be, if you can not run to a Piper Comanche at the moment, a flight simulator will give you a better idea of the theory and instrumentation and some idea of how various controls relate than just reading a book — but it is no substitute for the real thing, or even for a real flight simulator. As there is no similarity between the layout of your computer keyboard and the controls of a jet airliner. Salamander has, sensibly, not attempted to recreate the aircraft's control layout on the keyboard.

There is a pause during the loading procedure when you are asked if you want to define your runway — because of geographical features, restricted areas and air

(continued on page 91)



WHAT THEY SAID AT THE PCW SHOW...

"Very impressive graphics" — Tim Hartnell, author of many best selling micro books

"A blimmin' good mega zap" — Jeff Minter, top Vic 20 & CBM64 games programmer

"Very smooth...I'll have one" — Andrew Pennel, author of 'Mastering Your ZX Microdrive'

See us on Stand 216 at the Your Computer Christmas Fair — December 15-18

to name but a few who saw...

WILD WEST HERO

Now you can enjoy the game that the experts loved

Wild West hero captivated you in the fastest, meanest noisiest battle you will ever experience in these times. Up to 80 bandits will challenge you on each wave, all on the screen at once, all smooth, all in hi-resolution graphics, see the right hand column for full spec.

(continued from page 89)
traffic control requirements, no two runways are alike. You can even select a scale to suit the size of the chart so that it fits on the screen.

The controls which greet you when the flight deck is put up include compass heading, fuel gauge, DME — distance measuring equipment, artificial horizon, altimeter, gear position indicator, VSI — vertical speed indicator, and IAS — indicated airspeed indicator. It is worth it just for learning the acronyms alone. Future airline disaster movies might do well to feature a scene where, the crew having all been struck low by salmonella and the dipsomaniac conscience-stricken ex-flier having failed to make it up the steps, an unseemly brawl breaks out between owners of ZX-81, Atari and BBC flight simulation programs.

Documentation is excellent with a hardy labelled representation of the flight-deck instrument panel, a quick guide to control keys and a useful flying leson to familiarise yourself with the controls.

This said the visual display itself is not very impressive. There is no view from the cockpit when you take off — you are flying in "low cloud" — which is the computer version of the black square that is supposed to be a picture of a black cat in a coal-hole at night.

The instruments all work, and this is the sort of game that will appeal to people who like figuring out what is going on from instruments.

Groucho

■ *48K Spectrum*
■ *£10*
■ *Automata U.K.*

★ ★ ★

OURS IS A WORLD where people do not know what they want and are willing to go through hell to get it. Such was the lot of Pimaniacs, as the helpless purchasers of the last big piece of competition software from Automata became known.

The new mindbender from Portsmouth confirms T R Marshall's opinion that what this country needs is a good five-cent cigar. In fact, there was even one attached to the cassette box. This, and the "smash-hit disco track" on the flip-side, which is a curious fusion of Mark Knopfler vocals and Depeché Mode backing, with a Bonzo Dog Band play-out indicate the company's belief that Pimania and Groucho are not so much adventure games, more ways of life.

The prize you have to keep your eye on in this case is a trip for two to Hollywood to meet the star whose mystery personality is hidden within the program. The lucky duo will fly Concorde to New York then sub-sonic to Hollywood. They come back on the QE2, subject to availability.

An excellent loading graphic shows the immortal Groucho Marx with twitching eyebrows and his famous cigar. On following the first clue the program correctly deduced that I had never played Pimania and then conversationally asked me to wait a minute. Loading completed, I was plunged in the scenario of Metroville, Burger Valley, Tinsel Town and Indian Creek. Having lost quite a lot of my money in the local casino, I went into a bar where I met a Swedish actress whose name I had to guess from a number of clues.

But of course, I really cannot give too much away, that is the catch when reviewing this sort of game with a prize. Suffice to say the game is humorous and the graphics are excellent.

Chequered Flag

■ *48K Spectrum*
■ *£6.95*
■ *Psion Computers*

★ ★ ★ ★

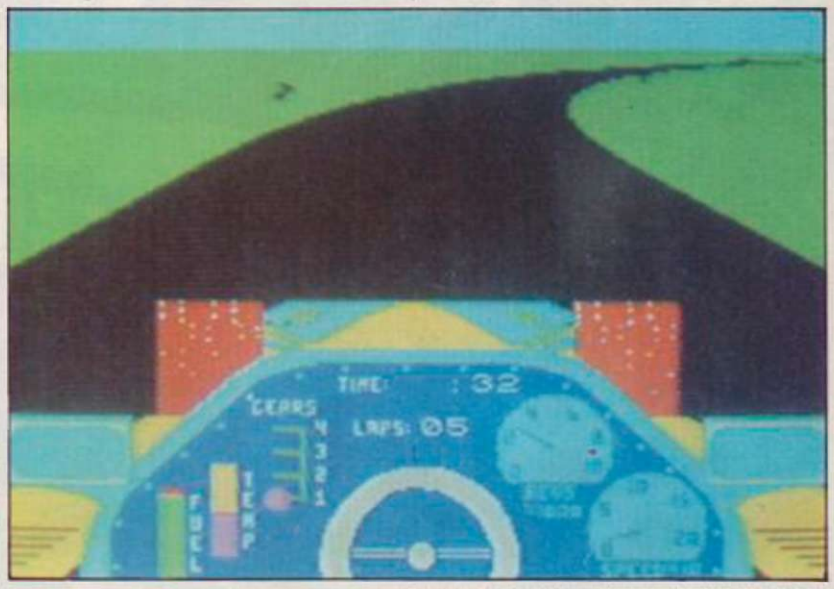
HUNCHED BEHIND the wheel of your Formula 1 racing car the endless ribbon of tarmac unreels towards you at an incredible rate — well, quite fast. This is an impressive simulation of Atari's Pole Position, although for some reason the trees appeared to be red. Perhaps it is autumn.

Rocks, warning arrows, lakes and other landmarks zoom convincingly towards you over the horizon. The engine strains as you go up hills. Instruments require careful monitoring to achieve maximum performance and avoid skidding or overheating. You also get a choice of cars. The Feretti Turbo, the Psion Pegasus and the McFaster Special. Each has its own characteristics — the McFaster has an automatic gearbox, so is ideal for beginners; the Feretti is turbocharged and develops 640 bhp between 8,000 and 10,000 revs per minute.

The dashboard display has fuel and temperature guages, a gear selection indicator, a rev counter, a lap counter and a full analogue speedometer. Real-life hazards such as skidding on oil patches and coming off the road are well-simulated. Running over glass on the road causes a tyre to burst. You wobble violently and the car slows till you can reach the pits.

Ten circuits have been programmed in: anywhere from Psion Park to Saturn Sands, or more terrestrial venues like Silverstone or Monza. There is even a circuit whimsically entitled Micro Drive.

An impressive array of keys are used to get the fine control required, at least eight for actual driving, plus a pause and an abort key. You can turn fast left or slow left for example by pressing different keys, which is great for your co-ordination; however, this is a game which cries out for a joystick option. Nevertheless, this is one of the most effective usages yet of the Spectrum graphics facility.



Free Fall

■ *Electron*
■ *£9.20*
■ *Acornsoft*

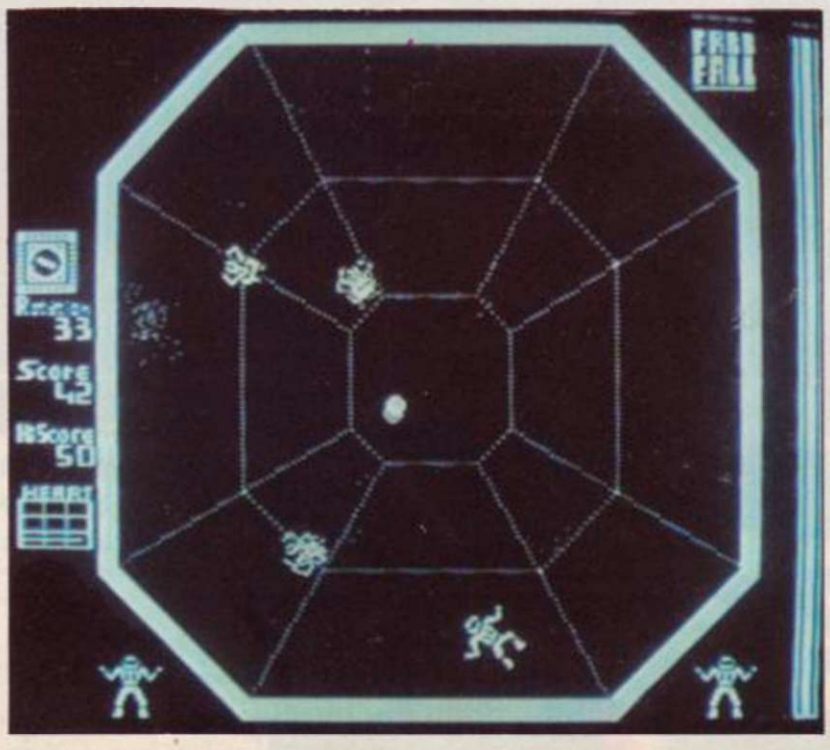
★ ★

A FAMILIAR EVENT in any space-station these days is invasion by alien life-forms. In Free Fall Alphoids have "infected your air supplies with their own cyanide-based atmosphere" and you are the only crew member to have got his space suit on quickly enough. Your task, obviously, is to survive and destroy as many of the Alphoids as possible.

The screen displays the octagonal station around which you float, propelling yourself with jets or pushing off from the side with your arms.

Methods of killing the Alphoids are quaintly old-fashioned; you can punch, kick or ram them. If you can grab hold of one you can use a bomb. The aliens themselves come in the rather terrestrial form of Craboids, Lobstoids and the particularly vicious Warpoids. They will attempt to pinch, sting or bomb you to death.

Free Fall is a monochrome game, Acornsoft having sacrificed colour for high resolution and, as such, is visually rather dull. There are also too many keys for comfort, although you might find it more manageable with a joystick.



Everyone wants to get their hands on The Fuller Gift Pack.

The Fuller gift pack has got to be the computer bargain of the decade; no wonder everyone wants to get their hands on one.

This super gift pack contains the fantastic Fuller Master Unit, the ultimate unit that provides all the requirements for the serious games enthusiast. The Fuller Master Unit incorporates both the Fuller Box and Orator; its amazing features include a speech synthesiser, an independent sound synthesiser, a joystick interface, an amplifier for standard Spectrum sound, a cassette interface and a hi-fi socket. The pack will also include a Master Unit demo tape and full documentation.

As well as the Master Unit this Gift Pack also contains a de-luxe Joystick, with suction adhesion, a firm smooth action and a moulded hand grip incorporating twin firing buttons.

Once your Spectrum has been added to the Fuller Gift Pack you will have an extended computer system that is second to none.

Now you can pit your mind against the four unique, exciting computer games included in the pack. These games have been especially adapted for this superb system and have added arcade sound effects and speech to bring out the very best in your Spectrum.

The Fuller Gift Pack saves you £20 on the purchase price of buying these items separately.

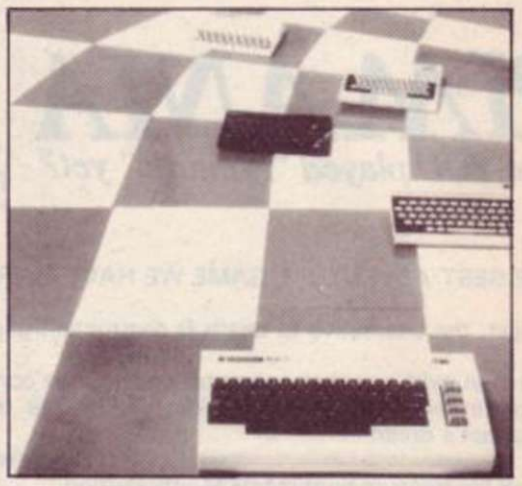
£100–£400 MICRO SURVEY

ON THE GRID



In the twilight zone between pocket money and a government enterprise loan there are several good reasonably-priced home computers. *Your Computer* assesses the advantages of the machines at the top end of the market and suggests points to ponder prior to paying a pretty penny.

THIS MONTH'S REVIEW covers the computers that cost over £100. The machines can be treated as more than just games players and have the ability to run some of the simple business-type programs. Because of the change of emphasis in use, the general criteria by which a machine is judged shifts as does the required quality of the product.

Last month's preamble regarding the requirements of games machines will obviously not be repeated, but it is necessary to discuss the long-term viability of some of the contenders for your money, followed by the requirements of a home computer being used as a business tool.

The long-term prospects for a number of computer suppliers is not good. There is a need for rationalising and a combining of resources if the U.K. firms are to withstand the imminent challenge of the Japanese and hold back the American push for further market penetration. Divided they will fall.

Design is second to none

The design of the computers is second to none; the problem arises in producing the range of peripherals and software at the product launch, necessary to sustain an initial market penetration with further developments of current and future products. It is no use coming up with a promised accessory a year later.

This requires extremely tight quality-control of the products and an overall discipline that may be lacking in some of the fledgling companies.

On the horizon are several computer systems which, on a computer head to head basis, are way below that of the best UK suppliers. But with huge resources available, the manufacturers are able to offer immediately those facilities which make the system cost effective and not just a technologically advanced toy, with a promised golden future.

The days of being able to market a sub-standard or half-developed product have gone and any manufacturer trying that now will get severely burnt.

Merely financing future developments at or just above existing levels is a recipe for financial disaster. The market is about to split into very low cost home/games computing and business computing. Low cost in the home computing market means very large overseas sales which no U.K. manufacturer has.

The business market is less likely to buy on sales hype and will be expected to take a look at the cost-effectiveness of computer systems, which means available hardware and software.

In the business field most of the manufacturers do not supply or support software, they might distribute the odd game but they are in the business of selling computers. The software houses are likely to be the only source of supported software.

If you know what you are doing, then you can write your own, otherwise the software needs support.

It pays to think of the consequences of hardware breakdown and of the software having a fault:

Are you automatically notified of software faults? — is this service available as an extra?

How long is support guaranteed in writing for your system?

If the computer breaks down, who will repair it? — how long? — will you be able to manage if all the information is now stored in the computer and you cannot get to it?

Do you require back-up facilities? Thus if you are computerising your stock control, what happens if the floppy with all your data on it gets accidentally damaged. How do you recover, not only from the heart attack but also recover the data which may have taken months if not years to accumulate.

At a local level, what about security? Can your computer or data be wilfully damaged?

It sounds a terrible situation to be in. But it is not really that bad, it just needs careful thought and planning to avoid possible disasters that are predictable. A car is not expected to work forever so why expect more from a computer?

Cassette tapes are the cheapest means of off-line data-storage but suffer from several major disadvantages. The data can only be accessed serially — first file first, then second file etc. Data in a cassette file cannot be changed; it is necessary to rewrite the file somewhere else. Getting a particular file can be very slow. The advantages other than that of cost are the general availability of cassettes and the very large storage capacity of cassettes.

Cassette data storage is only suitable in a small number of cases at present. This statement may be reviewed if sending electronic mail to answering machines is proved to be both cheap and reliable.

Microdrives or floppy tapes are a slightly more expensive means of data-storage using an endless loop of tape. The Sinclair Microdrives cost £50 each and can store approximately 90K bytes, the floppy tape drives expected early in 1984 will cost a little over twice that for an extra 50 percent storage.

This means of data-storage is relatively new and it is advisable to duplicate data in a drive until long-term stability is proven. The Microdrive and floppy cartridges permit files to be erased and then rewritten — quite slow of course but the ability to change data is available and that is what counts.

Disc drives and interfaces

More expensive at about £200 are the floppy disc drives, the cost may well be much more because of the need for an interface to control the transfer of data from computer to disc. These can store about 100K bytes of data in single sided format. Double density and double sided disc drives are available but at even greater cost.

There are currently two standard sizes of floppy disc, 8 inch and 5 inch. The 8 inch discs are becoming a bit dated but the 5 inch floppies are reasonably reliable and provide rapid random access to files and data.

Hard discs represent the top end of the storage market, capable of storing very large

PIMANIA

have YOU played "Pimania" yet?

£6,000 PRIZE!

Includes free hit single by Clair Sinclive and the Pi Men!

NO-ONE HAS WON "PIMANIA".....YET

"THE BEST ADVENTURE GAME WE HAVE EVER REVIEWED"
(Sinclair User)

"At last, the alternative to death & destruction games."
(Which Micro)

"The best evidence that computer gaming has come of age . . . the complete entertainments package. Pimania is an adventure enthusiast's dream."
(Computer & Video Games)

"A real life treasure hunt meets Monty Python." *(P.C.W.)*

"A real treasure, dripping with gold and diamonds."
(P.C. News)

"Health warning: this game can damage your brain. Try it, you'll love it"
(Personal Computer World)

"An all time classic. Automata must be congratulated for their fantasies."
(Dragon Byte)

"THE BEST ADVENTURE GAME EVER WRITTEN"
(The PiMan)

my name is Uncle GROUCHO you win a fat cigar!

Automata proudly presents its 1983 BIG PRIZE PROGRAM: starring Groucho, the PiMan and a galaxy of Hollywood Stars. With a free outrageous disco single on every cassette. If you thought "PIMANIA" was entertaining you ain't seen nothing yet! Discover the identity of the world-famous Hollywood personality that we have hidden in the program, and you can win a trip for two to Hollywood, to meet the star in person! Fly out on supersonic Concord, jet down to California to meet the Star, stay at the fabulous Waldorf in New York, then cruise back on the luxurious QE2, with £500 to spend along the way!!! Closing date: June 1st 1984. The winner to be announced on our regular back page in Popular Computing Weekly, on July 4th 1984 . . .

GO TO JAIL

We dare you to play GO TO JAIL against your computer – but BEWARE, it may well win! Rise to the challenge of GO TO JAIL from Automata.

"This excellent simulation of the famous board game is unique! There are other versions, but this is real fun. A triumph of the programmer's art. Full marks. Another superb game for Automata." (Personal Computer World).

"Smooth continuous display. Allows you to personalise the program." (Your Computer).

"The game has to be seen to be appreciated. My Spectrum outsmarted me!" (Personal Computer News).

"Up to five players, including your Spectrum, a large scale moving board display, honest banker. We dare you to play against your machine. But beware! It may well beat you." (The PiMan).

MORRIS meets the BIKERS

From the distant constellation of Morris Minor comes "MORRIS" the intelligent little car with a big problem: Morris suffers from claustrophobia! Abandoned in a multi-storey carpark, our tin-plate hero must get out fast, the problem is that PHANTOM KAMIKAZE BIKERS from the distant galaxy are after him, and he only has his Magic Horn to protect himself . . . ! Featuring worrying wheel clamps, penurious parking fees, treacherous tin tacks, problem petrol, hesitant hydraulic ramps, loony lift cages, creepy carbon monoxide, fastidious fuel gauge, and those fearsome phreaky phantom Bikers . . . !

Kempston Joystick compatible, machine code, 9 screens of play, with free tear-jerking record on the flipside "LEADER OF THE PAC", by Lady Clair Sinclair & the PiMen.

MORRIS MEETS THE BIKERS.....THE LEADER OF THE PAC!

PLEASE SEND ME THE FOLLOWING SPLENDID COMPUTER SOFTWARE, I enclose the right money: .....

Please leave the following space blank for DESPATCH NUMBER:

(continued from page 93)
amounts of data and providing almost instantaneous access to files. Winchester discs capable of holding over 6 Mbytes are available for approximately £450 plus additional costs for an operating system and interface.

A great deal depends on how much funding is allocated in the computerisation of the business. If you are not sure what to do, buy a cheap micro and play with it for two weeks and then ask your questions. If you dilligently work your way through the manual, there should come an understanding of some keywords being used and at least the user will know whether computing is the right thing.

There is absolutely no point in following the rest of the flock if the user finds it impossible to understand computing, that is just another way of spending money. Computing can bring efficiency, it can also bring incredible waste.

If the decision is to go ahead with computerisation then find the software first — that is the most difficult part — and then buy a computer which will run the programs.

An alternative approach is to use the training facilities offered by a number of the larger retail outlets. These classes are run on a country-wide basis by Tandy and in London by a few of the major stores.

As a guide perhaps the following advice may be of help:

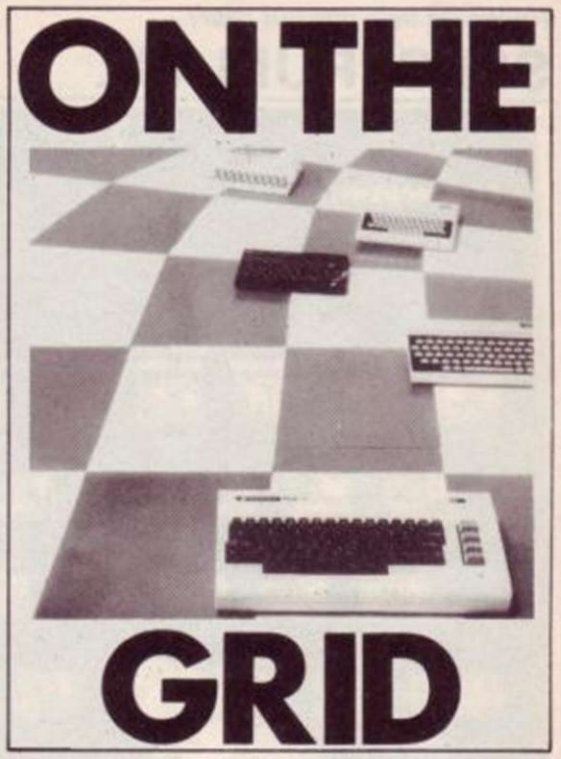
- Take your time and find the software package that suits your business, ask your association for guidance if you have one.
- You are looking for a system that suits your needs, that does not mean that you need the "best" computer.
- Colour may not be relevant in a business software environment.
- The software bought for the computer and the hours spent in setting up a computer operation will far exceed the price of the computer itself. Cost is a factor but in a business many other items contribute to the total system cost.

Home computing

Please bear in mind that with computers in the price range of £100 to £400 we are talking in terms of home computers providing some of the facilities of real business micros like the IBM.

This machine has a huge array of fully supported software available for almost any business activity, but they do cost money and require a financial commitment.

The choice of using what is effectively a home computer is justifiable, but only providing adequate software is readily available or the user has the inclination to invest a great deal of time and effort in producing the software. ■



SORD M5

Price	£179.95
Processor	Z-80A @ 3.6 MHz
Keyboard	Rubber moving key (55 keys)
Available memory	3K bytes
Operating system	Keyword or typed entry
Data correction	No syntax check on entry
Error format	Error codes
Editor	Screen editor (limited)
Cassette interface	250 baud
Display outputs	TV plus video
Basic	Very limited. Needs Basic-G
Expansion	Cartridge — Centronics type I/F
Graphics	16 colours 32 sprites
Pixel resolution	256x192
Colour resolution	256x192
Sound	Three channels plus noise through TV
Games	High quality software but expensive and in short supply.

● The Sord is purely a games machine and does not appear capable of interfacing into disc drives. The use of the cassette interface is likely to prove too slow. The amount of memory available is very small for a machine in this price range. The manuals do not explain clearly how to use the advanced graphics capabilities of the computer which includes two screens which may be alternated for animation.

TRS-80 COLOUR COMPUTER

Price	£179.95
Processor	6809E @ 0·9 MHz
Keyboard	Plastic moving key (53 keys)
Available memory	8K
Operating system	Typed data
Data correction	No syntax check on data entry
Error format	Abbreviations and error line number
Editor	line editor
Cassette interface	1500 baud
Display outputs	TV only
Basic	Extended Basic (Microsoft)
Expansion	RS-232 socket & cartridge port
Graphics	Nine colours
Pixel resolution	256x192
Colour resolution	128 × 128 (four colours)
Sound	Single channel through TV speaker
Games	Considering the computer age, the software is expensive and only average in performance.

● The color computer has been around some time now, and has all the peripherals necessary to make an elementary business machine. It is expensive compared to other machines of similar performance. A large machine which has a built in power supply. Software support is likely to be better than that available for any other machine.

MINIMUM BUSINESS SYSTEM

Colour Computer	£179.95
Disc Drive	£400
RS-232 Printer	£150

(continued from previous page)

SPECTRUM 48K

Price	£130
Processor	Z-80A @ 3.5 MHz
Keyboard	Rubber moving key (40 keys)
Available memory	41K bytes
Operating system	Keyword entry
Date correction	Each line syntax checked on entry
Error format	Full error messages
Editor	Line editor, very easy to use
Cassette interface	Reliable 1500 baud
Display outputs	TV Video from rear connector
Basic	Sinclair Basic
Expansion	Edge Connector, I/F1 & I/F2
Graphics	Eight colours – U.D.G.
Pixel resolution	256x192
Colour resolution	32x48 max.
Border	Eight selectable colours
Sound	Single channel beep
Games	Masses of high quality cheap games software

● The Spectrum has a moving key keyboard which not everybody likes. It is probable that your cost microdrive storage will bring about a large range of business software. The lack of descent sound from basic is unlikely to matter in a business context. The ability for several Spectrums to access the same database through Interface 1 is very useful in an educational environment.

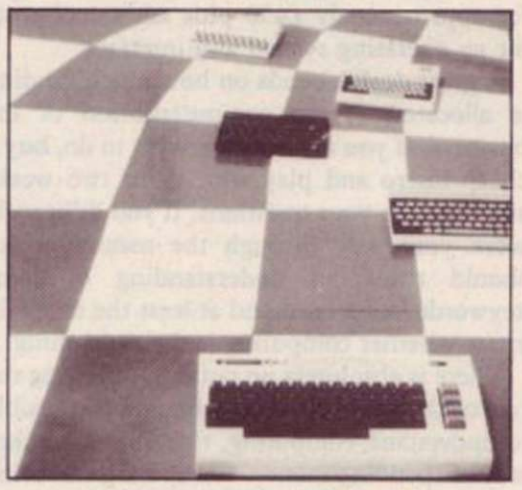
MINIMUM BUSINESS SYSTEM	
48K Spectrum	£130
Interface 1	£30
2 Microdrives	£100

MEMOTECH MTX

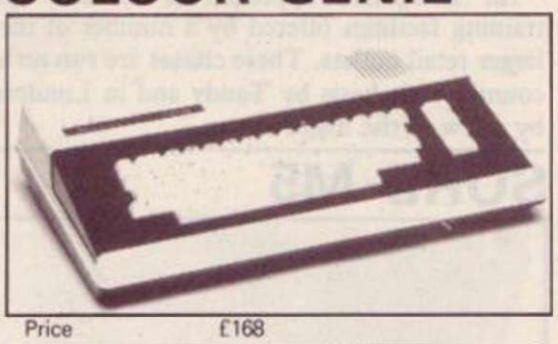
Price	£275
Processor	Z-80A @ 4 MHz
Keyboard	Real keyboard (79 keys)
Available memory	16K bytes
Operating system	Each line syntax checked on entry
Data correction	Fairly good editor
Error format	Full error messages (space sensitive)
Cassette interface	2400 baud – variable
Display outputs	TV and monitor
Basic	Comprehensive with built-in Assembler
Expansion	Centronics & expansion Skt
Graphics	16 colours
Pixel resolution	256x192
Colour resolution	256x192 (16 colours) – Sprites
Sound	Three channels + Hi-fi output
Games	Some games planned

● Again, it is hoped that this computer will be able to run CP/M software in the very near future.

ON THE GRID



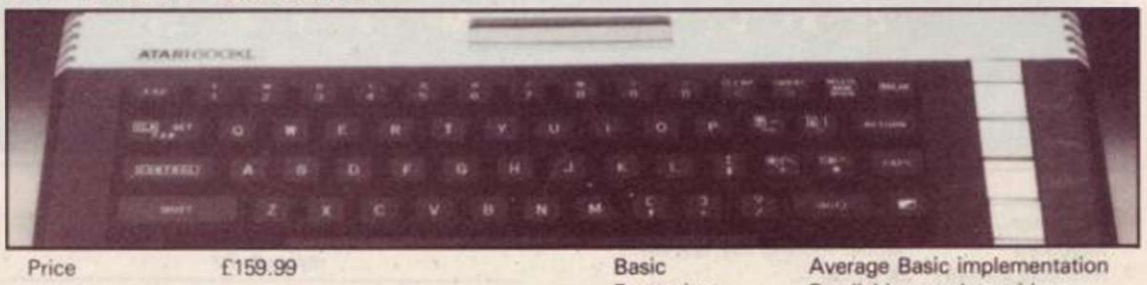
COLOUR GENIE



Price	£168
Processor	Z-80 @ 2.2 MHz
Keyboard	Real keyboard (63 keys)
Available memory	26K
Operating system	Typed entry with function keys
Data correction	No syntax check on data entry
Error format	Abbreviated error messages
Editor	Line editor
Cassette interface	—
Display outputs	TV and video
Basic	Average implementation
Expansion	Parallel interface & cartridges
Graphics	Eight colours
Pixel resolution	160 × 102
Colour resolution	160 × 102 (four colours)
Sound	Multi channel
Games	Not much software available for the games enthusiast

● The latest Colour Genies contain an enhanced ROM with several minor improvements. The inclusion of Integer, single and double precision does make the computer more suitable for business usage but the version of Basic implemented is a little dated. The picture stability on this model was not all that it should have been.

ATARI 600XL



Price	£159.99
Processor	6502B
Keyboard	Real keyboard (63 keys)
Available memory	6-13K bytes
Operating system	Typed entry
Data correction	Each line checked on entry
Error format	Error codes
Editor	Very good screen editor
Cassette interface	Requires an Atari recorder
Display outputs	TV plus video
Basic	Average Basic implementation
Expansion	Parallel bus and cartridge
Graphics	16 colours
Pixel resolution	320x192
Colour resolution	160 × 160 (four colours)
Sound	Four channels through TV
Games	Very high quality

● The Atari 600XL is a repackaged version of the Atari 400 with a smart new keyboard. Much of the published literature on the Atari 400 and 800 computers is the same.

Temptation
Software Limited

NEW

The 3 fastest playable 100% machine code arcade games for the VIC 20 unexp

SINCLAIR ZX 81 16K SPECTRUM 48K BARON
by Simon Mansfield

Baron is a complex simulation game for up to four players.
Step back in time when the country was divided into huge estates.
Could you accept the responsibilities of a Barony? Farm your lands, maintain workers, hire mercenaries, wage feudal wars?
Yearly analysis of success or failure of your decisions.
There are unexpected events in store for you – to find out, why not play the game?
Graphics

SINCLAIR ZX 81 16K SPECTRUM 48K ADMIRAL GRAF SPEE
by Simon Mansfield

An original game of strategy based on historically accurate records of the Graf Spee's formidable presence in the North and South Atlantic.
As her Captain use full graphic instrumentation to calculate speed, compass bearings, fuel, distance, ammunition states: locate and manoeuvre into visual range and destroy enemy ships which can also evade, seek and destroy you! Attacked targets can only be destroyed by the same number of salvos or torpedoes as were necessary for the tonnage during the original action.
7 levels of difficulty

SINCLAIR ZX 81 16K SPECTRUM 48K DUNGEONS OF DOOM
by Simon Mansfield

Two challenging adventure games – to travel through the labyrinths, descending to the lowest dungeons where the treasures are hidden or play "ESCAPE FROM THE UNDERWORLD" and save yourself from incarceration in the dungeons by fighting you way up the endless levels.
Graphics show your position – status reports – different layout with each new game – 4 players can search different levels – 400 rooms – 600 corridors – 1000 locations to explore.
Objective – to score highest points and STAY ALIVE

SPECTRUM 16K LAS VEGAS
by Neil Streeter

A Temptation games double.

1. FRUIT MACHINE – must be the best full feature "Pub" Fruit Machine. Spin the symbols, use the "nudge" "hold" "gamble" facility – win or lose with true percentage payouts.

2. BLACK JACK – break the bank with a five card trick. This game follows the rules of Pontoon. The Spectrum croupier deals the cards with skill and is after your stake money!

Superb graphics.

SPECTRUM 16K CHALLENGE
by Neil Streeter

A Temptation games double.

1. MASTER CODE DELUXE – all the features of the well known game 9 skill levels – any code or no repeated colours. Good clear graphics show the success or failure of your logic as the computer assesses each line.

2. HIGHER AND LOWER – skill hunches and sixth sense are needed to beat this fast dealing machine. Graphically as realistic as a certain television series. Will you be able to get to the end of the row of five cards, guessing whether the next card will be HIGHER or LOWER?

SPECTRUM 16K GODZILLA AND THE MARTIANS
by Neil Streeter

The Martians have invaded, destroying the molecular structure of earth's atmosphere to make it compatible with their own planet. "The girl of your dreams" is trapped at the top of a building site but for the moment protected from the evil invaders by a friendly Dinosaur! Leap over deadly Martian invaders – scale ladders – jump the man traps – rescue her before the oxygen is totally absorbed.
Kong type game for SUPERHUMANS.

ARCADE

VIC 20 unexp SWARM
by Andrew Hainsley

As a pilot testing the latest star ship breakdown in your guidance systems causes you to materialise in the breeding grounds of the Psigophorus, an unbelievably nasty insect life form which kills anything entering its space. Survival depends on destruction of the eggs before they hatch to form a SWARM. They can use your laser energy to mutate at an alarming rate and the only escape from the devastating attack of a Swarm is by destroying the Psigophorus in only one brief stage of its life cycle.
CAN YOU SURVIVE this high scoring game?

ARCADE

VIC 20 unexp ALIEN VORTEX
by Andrew Hainsley

It is the 23rd Century – unemployment 99.9% – due to 300% inflation, money replaced by credit discs – to relieve boredom the I.R.S.P. sets up huge gambling arcades – debts run high – inhabitants who cannot pay take part in "THE GAME". Transported to Launch Base 3 they are sealed into a Zelton Earth Defender and attacked by waves of mutant birds, specially bred on the Space Station Alien. Moneylenders bet on the length of the ill-fated player's survival, so recovering their losses.
SET your body modulator to HYPERDRIVE, PRIME your firing fingers and HANG LOOSE.
High scoring game.

ARCADE

VIC 20 unexp THUNDERFLASH
by Andrew Hainsley

The year 2500 A.D. has produced a problem: space Rats are using humanoids for experimentation! Their technical skills include impenetrable defence systems. A Royal Space Fleet Pilot sent to destroy them has been killed. YOU ARE INVITED TO TAKE HIS PLACE.
You will be bombarded by zig-zagging steel arrows – if not destroyed they turn into Thunderflashes which explode when hit. Being unstable they release sparks which you must destroy before they hit you. Your survival angers the Rats who increase the speed and fury of the attack.
High scoring game.

VIC 20 16K DRAGON 32K MICROPOLY
by Richard Fry & Simon Lacey

Play this version of the family board game with a competent and challenging microbanker and property tycoon. State of game and board on instant recall – or the game saved.
Game for up to four players AND the computer.

VIC 20 Unexp COBUS MAZ
by Dave Gibson

A series of ridiculously impossible layouts which our self-destructing Programmer has devised for VICtims! Just get from "A" to "B" without being blown up or eaten by a COBUS – simple? You are given five lives and five ZOGS to hyperspace a COBUS when you are cornered. Successful exit brings the reward of greater challenge with progressively difficult layouts and hidden complications.
Keys require collecting in a correct order to open the door, devilish invisible mines and

TI 99/4A Ext. Basic HOUSE OF BUGS
by Tony Frampton

The Bugs in this game will raise your blood pressure to the limits and drive spectators into a frenzy!
In this high scoring game killer bugs roam the top floors. Stay alive by clinging to the ceiling whilst they pass beneath, but you cannot seek refuge on that square again. BUNGE a Bug and gain 50 points, but he may return for his revenge – a vicious ritual followed by your paralysis and death!
WATCH the Bugs go hopping mad when target scores give you the services of a defoliater.
Fantastic graphics and sound.

TI 99/4A Ext. Basic TANK BATTLE
by Tony Frampton

Can you hold back a relentless army of tanks, sometimes in convoy but often slipping in under the cover of their barrage of gunfire as they try to penetrate your anti-tank barriers?
Manoeuvre your tank controlling its gun barrel for accurate range. WATCH your salvos disintegrate the enemy BUT BEWARE the deadly return fire.
Realistic graphics and sound. Five skill levels – strategy to desperation.

TI 99/4A Ext. Basic SPECIAL MISSION
by Tony Frampton

TOP SECRET – save the world from destruction – HOW? WHY? WHEN?
Your mission starts in a large briefing room: there is a door to the East. You can see a blood stained envelope and a cold strong box, you are carrying nothing at all! TIME is running out, the robots have been activated – WHAT ARE YOU GOING TO DO?
Only a T.I. trained special adventure agent has a chance of saving millions from annihilation.

NEW

DRAGON 32K SEARCHWORD
by Ian A. Macey

A WORD PUZZLER'S PARADISE!
CREATE your own word puzzles by the thousand.
An irresistible game for word puzzle enthusiasts, this program offers endless permutations. The computer will accept any list of words containing from 3 to 12 letters and conceal them within a letter grid until the player identifies them by giving the correct start position co-ordinates and direction. Program also includes two demonstration files and word save facility. Hours of enjoyment for one or more players.

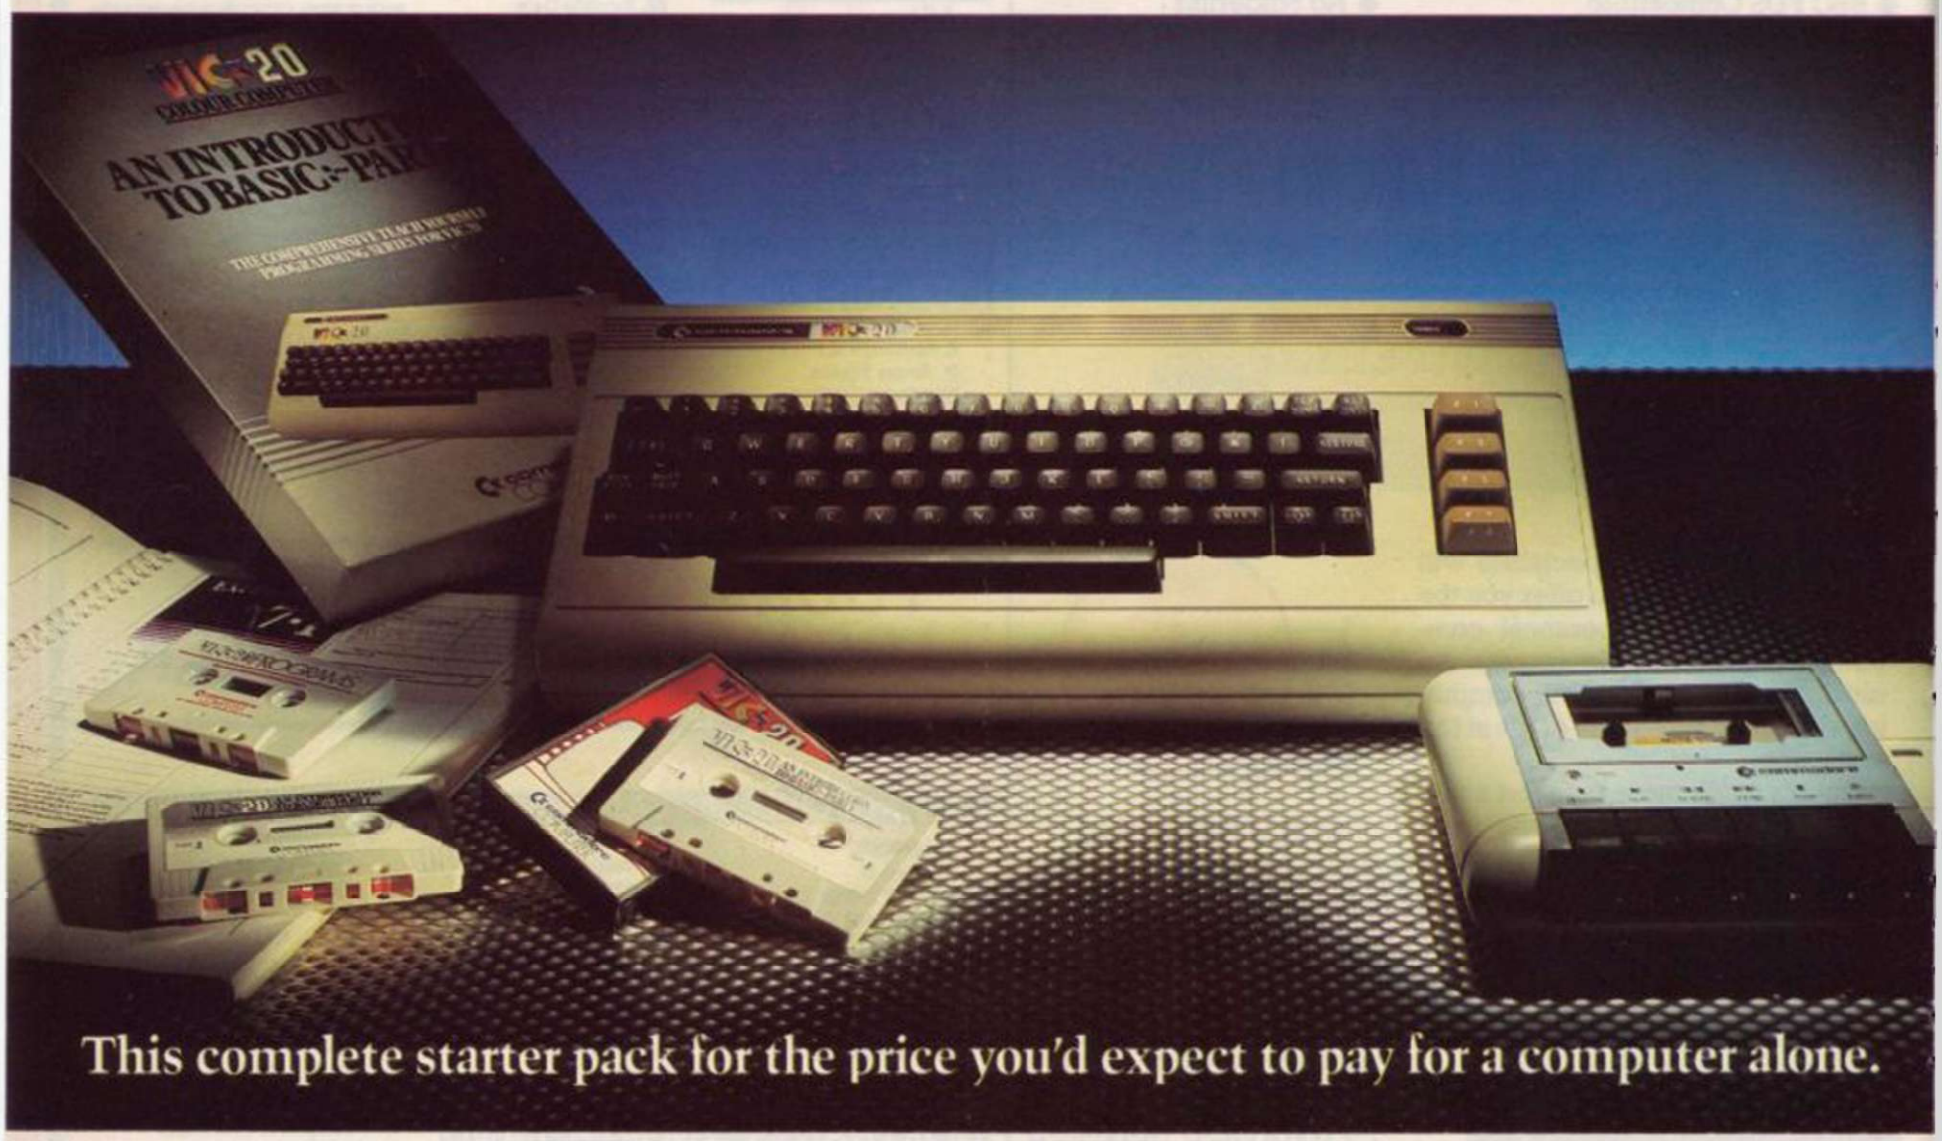
Your starter for £150.



This complete starter pack for the price you'd expect to pay for a computer alone.

It's a complete computer system: the Commodore VIC 20 computer, a cassette unit, a simple explanation of computer programming (called "Introduction to Basic Part 1"), plus an exclusive compilation tape of four computer programs (Blitz, Type-a-Tune, Race, and Hoppit).

And all for just £149.99 or less.

It's a terrific opportunity to introduce yourself, and all your family, to the exciting world of home computers – and with what has been described as the best home computer in the world.

The VIC 20 has educational programs for all ages (spelling, physics, arithmetic, etc.), plus music, typing, chess and home accounts.

There are special programs like Robert Carrier's menu planner and BBC 'Mastermind', and not forgetting, of course, lots and lots of wonderful arcade games.

You'll very soon be exploring new worlds of colour, animation, and sound.

Not just with a vast choice of programs, but with unlimited scope for expansion in the future.

The VIC 20 is the perfect computer to start with because you can keep adding to it, and so get even more enjoyment out of it.

There are printers, disk drives, memory expansion packs and many other peripherals to choose from.

Which means, as your confidence grows, so can your VIC 20.

Get the VIC 20 starter pack today, and we promise you'll never look back.

commodore
VIC 20

YOU CAN SEE THE VIC 20 STARTER PACK AT ALL BRANCHES OF DIXONS AND WALLACE HEATON, AND AT SELECTED BRANCHES OF BOOTS, RUMBELOWS, LASKYS, CURRYS, GREENS, ORBIT, MENZIES, LEWIS'S, MAKRO, TESCO, FINE FARE, WIGFALLS, SPECTRUM, COMET, JOHN LEWIS, WOOLWORTH, REDIFFUSION, CO-OP AND OTHER GOOD RETAILERS. ALSO AT BRANCHES OF A NATIONAL NETWORK OF COMMODORE COMPUTER DEALERS.

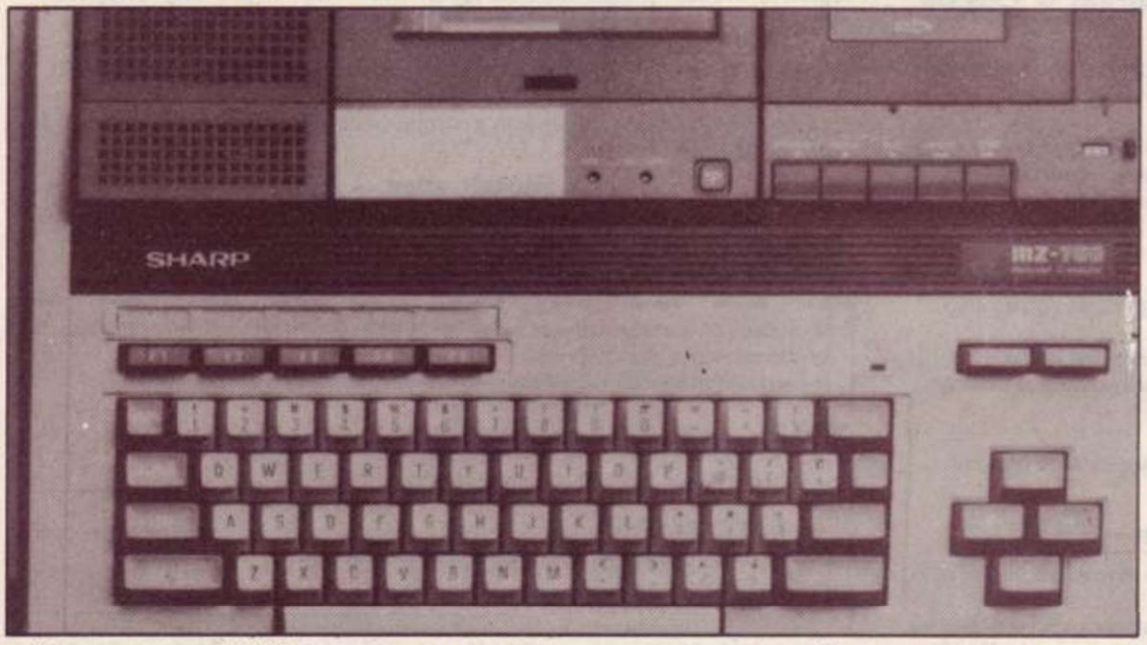
Colour resolution	128x128 (four colours)
Sound	Single channel through TV speaker
Games	As a games machine, definitely superior to the TRS color computer in quantity and quality of games

• The Dragon is based on the TRS80 Colour Computer. Being very similar, most written material is interchangeable. Support on the business side for the Dragon may be considerably below that of the color computer and whether the difference in price is sufficient to forgo such support is extremely doubtful.

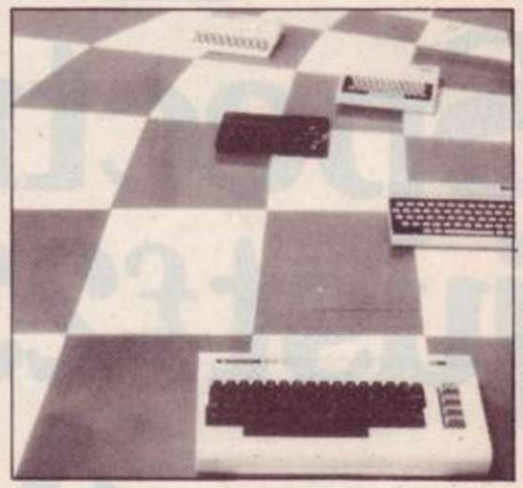
SHARP MZ-711



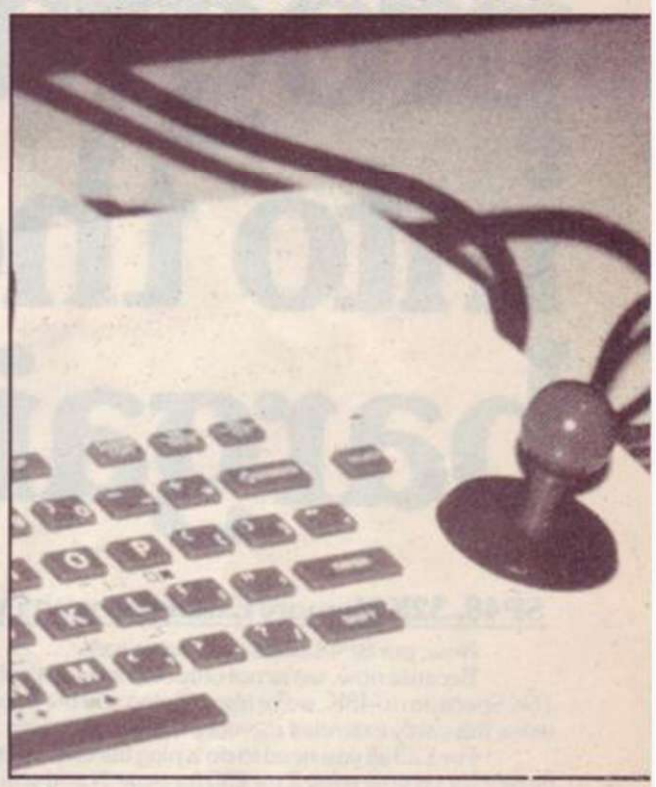
Price	£249.95
Processor	Z-80A @ 3.5 MHz
Keyboard	Real keyboard (69 keys)
Available memory	37K bytes
Operating system	Typed entry & function keys
Data correction	—
Error format	Full error messages
Editor	Screen editor
Cassette interface	1200 baud
Display outputs	TV video and RGB
Basic	Has to be loaded from tape (2-3 mins)
Expansion	Rear connector & Centronics I/F
Graphics	Eight colours
Pixel resolution	80x50
Colour resolution	80x50
Sound	Single channel
Games	The screen resolution is not sufficient for most arcade style games

• The MZ-711 takes a slightly different approach to the other computers and has a built-in printer and cassette drive. The printer is the popular 4 colour-pen drive mechanism, but unfortunately it does not test each pen on start up.

ON THE GRID



SPECTRAVIDEO 318



Price	£199
Processor	Z-80
Keyboard	Rubber moving keys
Available memory	13K bytes
Operating system	Single letter or typed keys
Data correction	Very good screen editor
Error format	Full error messages
Editor	Screen editor
Cassette interface	1200/2400 baud
Display outputs	TV and video
Basic	MSX basic
Expansion	Motherboard expander & cartridge
Graphics	16 colours
Pixel resolution	256x192
Colour resolution	64x48 (32 sprites)
Sound	Three channels plus noise
Games	A new machine with very little games software available in this country

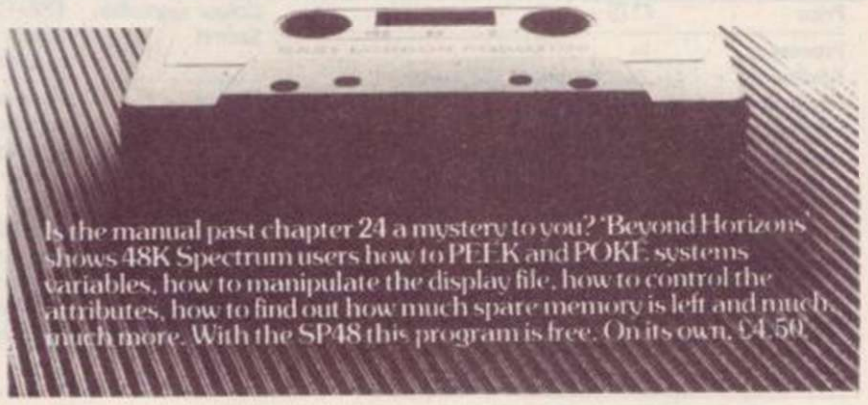
• This is the first machine to be sold in this country which uses the new Microsoft Basic MSX. It operates in default double precision numerals and aspires one day to be able to run CP/M software. With may of the major Japanese manufacturers about to jump on the MSX bandwagon. We expect the low cost 8-bit computer mass market to succumb by default.

(continued on page 103)

NEW PRODUCT 48/80 FORTH

Extend your 16k Spectrum to 48k for just £23·00.

And get a Free program worth £4·50 into the bargain.



Is the manual past chapter 24 a mystery to you? 'Beyond Horizons' shows 48K Spectrum users how to PEEK and POKE systems variables, how to manipulate the display file, how to control the attributes, how to find out how much spare memory is left and much, much more. With the SP48 this program is free. On its own, £4.50.

SP48, 32K Memory Extension with Program – £23.00

Now, our SP48 offers even better value.

Because now, we're not only offering you the facility to up-grade your 16K Spectrum to 48K, we're also offering you the opportunity to be able to utilise this vastly extended memory quickly and easily.

For £23 all you need to do is plug the chip-set into the sockets provided by Sinclair on your issue 2 (or £35 for issue 1) and you have a standard 48K Spectrum fully compatible with all Sinclair add-ons and very low in power consumption.

There is no soldering required.

Fitting and removal are easy.

And the SP48 carries our full warranty and is upgradable, on a part exchange basis, to SP80.

Then all you need to do is LOAD our specially written 48K guide program, 'Beyond Horizons', and your 48K computer will guide you through its memory.

With no need to labour through manuals.

This will save you time, because we all know how easy it is to get lost with memory maps.

SP80 Paged Memory Extension – £46

This ingenious device gives a 16K Spectrum two memory banks of 32K each and a massive total of 80K of RAM.

It can be used as a standard 48K machine, but pages can be switched by software instructions within your program. The SP80 is not recommended for absolute beginners unless used with 48/80 FORTH.

Fitting, power consumption and Sinclair add-on compatibility are identical to the SP48.

Fit and Test service at our premises £3, by registered post £7.

48/80 FORTH – £14.95

This new FORTH compiler/editor is the latest, best and most complete version of FIG-FORTH for the Spectrum. Each tape includes both a 48K version and an 80K version. (Don't forget that an SP48 can be part exchanged for an SP80)

48/80 FORTH gives you the speed of machine code with the programming simplicity of BASIC, and is ideal for games-writing. Unlike other FORTH versions, all the Spectrum's excellent graphics commands are retained, and sound is still available using BEEP. Cassette handling routines are also included.

48/80 FORTH includes a separate FORTH editor which uses part of RAM as if it were disc. The 48K version allows a 16K "RAM disc", and the 80K version a massive 32K "RAM disc".

48/80 FORTH comes with a comprehensive user manual covering both compiler and editor.

ZX Slowloader – £10

This classic piece of software loads ZX81 BASIC programs and arrays straight onto your Spectrum, ready for SAVEing and EDITing. It can do in a few minutes what would normally take weeks of keyboard time.

All products on this order form are in stock at the time of going to press. Same day dispatch for phoned Access and Visa orders.

EAST LONDON ROBOTICS

(continued from page 101)

BBC MODEL B

Price	£399
Processor	6502 @ 2 MHz
Keyboard	Real keyboard (74 keys)
Available memory	9-28K bytes
Operating system	Typed entry with function keys
Data correction	Simple to use line editor
Error format	Full error messages
Editor	Line editor
Cassette interface	— baud
Display outputs	TV video and RGB
Basic	BBC Basic with built-in Assembler
Expansion	Centronics, RS232, disc etc
Graphics	Eight colours
Pixel resolution	640 × 256
Colour resolution	320 × 256 (four colours)
Sound	Three channels
Games	A very large volume of quality software available

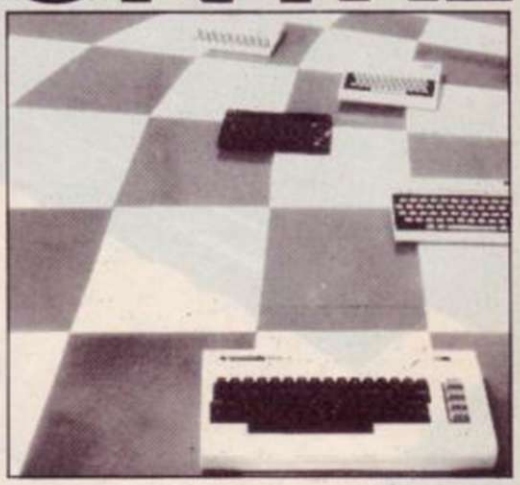
● The BBC computer has been with us for some time now and has made great in-roads into business use. Its use in the educational field is also pretty extensive. A very fast version of Basic with a built-in assembler. The machine to compare against for a low cost business machine. Will have extreme difficulty in holding that position in 1984.

CAMPUTERS' LYNX

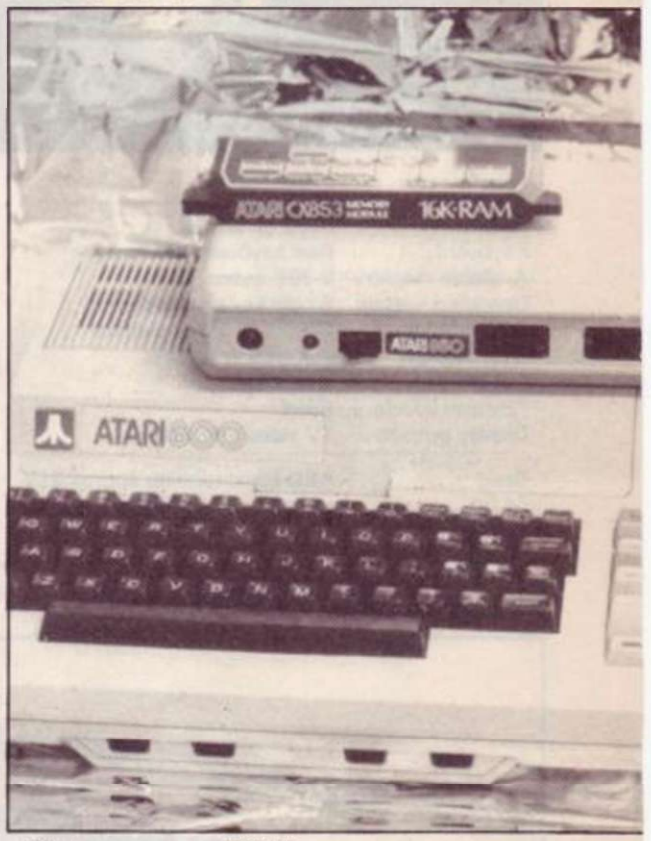
Price	£225
Processor	Z-80A @ 4 MHz
Keyboard	Real keyboard (57 keys)
Available memory	14K bytes
Operating system	Typed entry
Data correction	Found to be complicated
Error format	Full error messages
Editor	Line editor
Cassette interface	1200 baud
Display outputs	TV and RGB monitor
Basic	Well structured with built in monitor
Expansion	RS-232 & parallel expansion bus
Graphics	Eight colours
Pixel resolution	256 × 248
Colour resolution	256 × 248 (eight colours)
Sound	Single channel
Games	Not seen as a games machine and very little software available in this area

● The Lynx has, from its earliest days, held pretentions of being a business machine. When it finally can run CP/M software it will have reached its goal. Until then, the amount of software for business purposes is limited and expensive. For some unknown reason, this computer was felt to be more complicated in operation than the others in this review.

ON THE GRID



ATARI 800



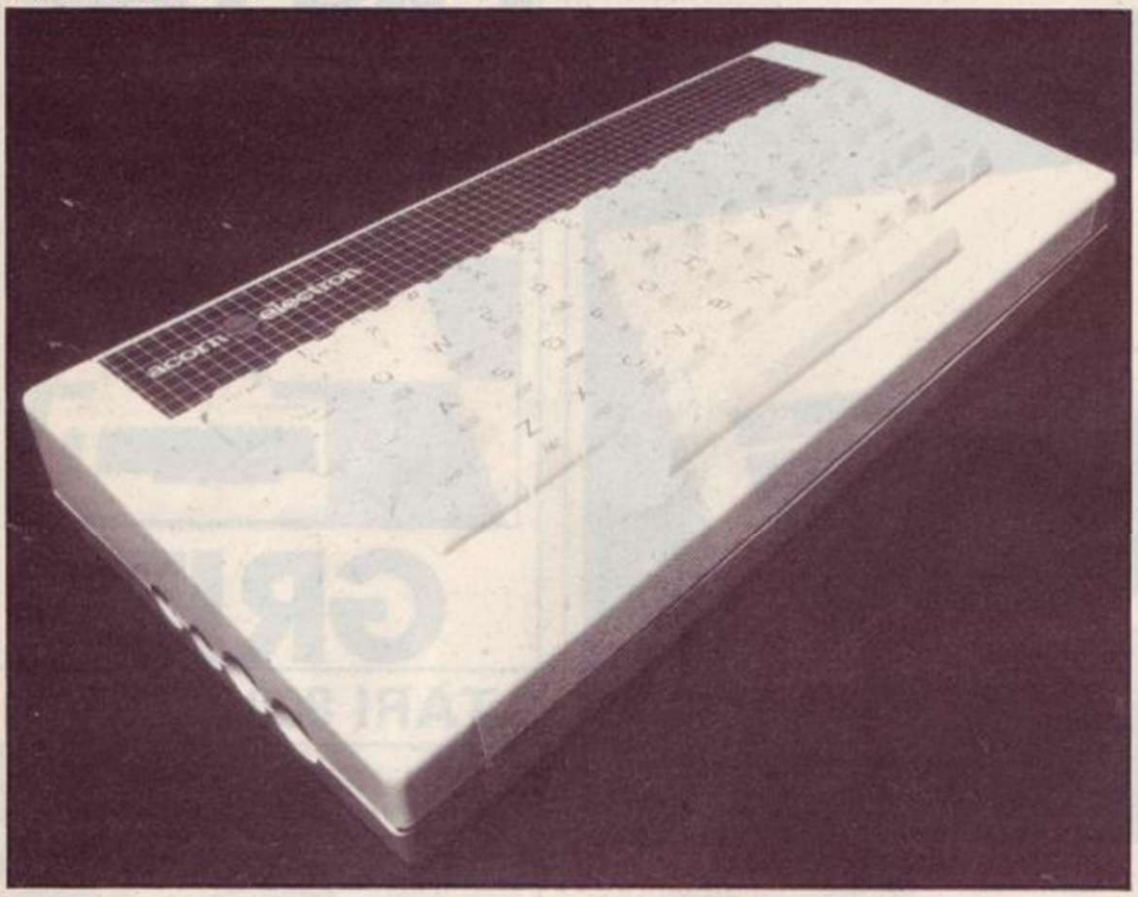
Price	£249.99
Processor	6502B @ 1.8 MHz
Keyboard	Real keyboard (61 keys)
Available memory	38K bytes
Operating system	Typed entry
Data correction	Each line syntax checked on entry
Error format	Error codes
Editor	Full screen editor
Cassette interface	Requires an Atari recorder
Display outputs	TV plus video
Basic	A very good implementation in its day
Expansion	Cartridge ports
Graphics	16 colours
Pixel resolution	320x192
Colour resolution	160 × 160 (four colours)
Sound	Four channels through TV speaker or Int
Games	Very high quality but expensive software

● The Atari 800 has been around a long time and will shortly be superceded by the 800XL. Whether under these circumstances the machine should be bought depends purely upon the level of discount available. Remember to add the price of an Atari recorder to the cost of a system.

(continued on next page)

(continued from previous page)

ACORN ELECTRON



Price	£199
Processor	6502 @ 2 MHz
Keyboard	Real keyboard (56 keys)
Available memory	9-20K bytes
Operating system	Single key or typed entry
Data correction	Simple to use line editor
Error format	Full error messages
Editor	Line editor
Cassette interface	Baud
Display outputs	TV video and RGB
Basic	BBC Basic running approx 2/3 speed
Expansion	50 way rear connector
Graphics	Eight colours
Pixel resolution	640 × 256
Colour resolution	320 × 256 (four colours)
Sound	Single channel
Games	As a games machine, this should challenge Atari in software quality

● A cut down version of the highly successful BBC computer. It operates slightly slower and with only a single sound channel. Cannot help but be a runaway success with the BBC badge behind it. Whether it would achieve such ascendancy over the opposition on its own is questionable. Will need interfaces for printer and disc drives.

COMMODORE 64

Price	£229
Processor	MOS6510 (6502 compatible)
Keyboard	Real keyboard (66 keys)
Available memory	38K bytes
Operating system	Typed entry
Data correction	Simple to use screen editor
Error format	Full error messages
Editor	Screen editor
Cassette interface	Requires a CAM cassette unit
Display outputs	TV and video
Basic	A rather limited version of Basic
Expansion	Serial port and cartridge port
Graphics	16 colours
Pixel resolution	320x200
Colour resolution	(sprites)
Sound	Three channels
Games	As the price of the '64 is lowered, it broadens its base and comes more into the games market

● The big brother to the million selling Vic-20 is let down by a limited version of Basic. Can be interfaced to a printer, disc drives and fitted with a CP/M option. The Commodore 64 is supported by a reasonable library of business software.

MINIMUM BUSINESS SYSTEM

Commodore 64	£229
Disc Drive	£229
Printer	£230

ON THE GRID

ORIC-1 48K

Price	£139.95
Processor	6502A
Keyboard	Plastic moving key (57 keys)
Available memory	37-44K bytes
Operating system	Typed data
Data correction	Mediocre line editor
Error format	Error messages
Editor	Line editor
Cassette interface	300/2400 baud. Temperamental
Display outputs	TV plus RGB monitor output
Basic	Average implementation
Expansion	Edge connector, Centronics I/F
Graphics	Eight colours – U.D.G.
Pixel resolution	240x200
Colour resolution	80x200 max.
Border	black
Sound	Three channels plus noise
Games	Quality software becoming available

● The Oric, like the Spectrum, does not have a propoer keyboard but does have a space bar. At launch several peripherals were promised which must soon be available? Speed printer – is this the MCP40 at 12 characters/sec max – Oric micro disc and communications modem. Rumour has it that Oric are about to relaunch with the original errors in ROM corrected. ■

DEATH CRUISER

AN ARTIFICIAL INTELLIGENCE GAME

"...you enter an alarmingly different world, in which the awesome new adversarial potential of true artificial Intelligence seeks to dominate."

£5.95
INC. VAT + P&P
For overseas orders, please add 50p
48K SPECTRUM

Scramble! – you're the Zarghat commander of a cosmic battleship of fearful power and destructiveness, the 'Death Cruiser'. You're entrusted with the task of defending the galactic corridors of your home planet against a new kind of alien invader – a **super intelligent** breed of biotechnical beings whose prodigious capacity for strategical logic make them potent adversaries indeed! 'Death Cruiser' is more than just a game. In it you enter an alarmingly different world, in which the awesome new adversarial potential of true Artificial Intelligence seeks to dominate.

SPECIFICATIONS: 48K Spectrum, 100% Machine Code, arcade action ★ Ultrasmooth hi-res graphic animation ★ Kempston Joystick compatible ★ Unique multimode intelligence routines; omnidirectional firing ★ Hi-score, on-screen display.

PRINTER REVIEW

David Horne with a quick guide to the best printers on the market.

THERE IS A VERY large and bewildering choice of printers available for the computer hobbyist and not a great deal of published work regarding the suitability of the machines for specific tasks. It is not possible to look at all the combinations of computers and printers but I hope to give a guide as to what can be expected from printers in each price bracket.

I have also highlighted the points that the user should evaluate when contemplating the purchase of a printer. The factors will be weighted differently depending upon whether the required use is business, educational or

hobbyist. For this reason I have simply stated the advantages and disadvantages of each approach.

The machines reviewed are all very good value for money and have been chosen on the basis of offering the most facilities within a given price-bracket.

As a general introduction it should be said that ideally a printer should have both Centronics and serial interfaces. It is logical that as the number of homes with more than one computer increases, whether it be one computer per child or just a spare computer, that each computer should be able to share the expensive peripheral devices that are used infrequently.

The annual/biannual cost of upgrading your system can be significantly reduced by purchasing a printer with the common interfaces — RS-232 and Centronics, although just as the last few years have seen an enormous expansion in the areas in which home computing is used, the same is about to happen to the printer.

What this actually means is do not buy a badge-engineered product if it has reduced facilities i.e., either the RS-232 or Centronics interface removed, unless there are overwhelming financial reasons for doing so. It could provide a limitation on your future choice of computers.

The two current main uses of a printer are to obtain listings of a Basic program and to perform word-processing activities. All the printers are suitable for producing listings. Some users may like wide listing paper so that comments may be added to the right of the relevant lines of Basic, but usually these would be added as Rem statements.

The reason normally given for adding comments separately from the listings is either

(continued on page 109)

TANDY CGP-220

A very high quality 7-colour ink jet printer capable of excellent text and graphics performance. Very easy to load and unload ink cartridges, which can quickly be set 'off' for long periods of no use. Quiet in operation. The character set is in two parts with the 'sign' in what is called the 'European set' at CHGR$ (163). Colour resolution is 320 pixels across the paper although the dot resolution is 640 because the colours tend to mix. Each ink cartridge is sufficient for about 8 rolls of paper. Centronics and serial interfaces.

(continued from page 107)

program security — it makes it easier for someone else to follow if a program is correctly annotated — or that the comments can be written in a different colour and therefore stand out much better, enabling the reader to gain a better insight to the workings of the program.

With the limited memory available on many machines, the use of valuable RAM working space on formatting neat program notes for easy reading — if it is not neatly tabulated it will not be very easy to see the remarks — is not something that the user will usually contemplate.

The advent of the very popular four-colour printer plotter enables the user to provide his own listings with remarks coloured for easy viewing. Inserting a pen which has run out of ink into the appropriate colour pen holder — you must not run the mechanism with a pen missing — will provide copies without visible remarks. It took me ages to think of this use for an old dried up pen. Waste not want not.

For word-processing the needs of the enthusiast are not the same as the small business. Generally speed is not that important as the quantity of processed text will be small. The requirement for an A4 print is also not quite such a necessity, as it is just possible to get away with less. For instance, sending text to a magazine in 40 column format will generally be OK as that is how we print it.

Accepting that narrow text is in certain cases permissible, it should only be considered as an interim solution until finances permit the acquisition of a A4, 8 inch wide paper, printer.

Another consideration for word processing systems is lower case descenders. This is the portion of the printed character that is below

A portable printer that can be used as a typewriter, a calculator and as a word processor, capable of storing approx one page of A4 text with the power switched off. Currently the cheapest 'wide' paper printer. I would have liked to use it to enter data into the computer but nonetheless a very good printer. The keys are a trifle 'light' with no audible feed back. The 16 character LCD display shows what is being typed in and allows a measure of text correction. This is a new concept in printers. There are no lower case descenders.

Probably the cheapest means of producing hard copy output from a computer. Special Sinclair interface prevents its use without an adaptor on other computers, at which price you should consider other printers. The metallized paper rolls are of variable quality and can produce faded bands of printing. The accumulation of particles inside the printer affect the drive logic leading to alternate line offsets and rather peculiar characters. The printer is also prone to become noisy after prolonged use. The solid bar roll holder is a useful accessory and helps in overcoming the initial sticking of the paper drive. Very fast COPY, LLIST and LPRINT. Plotting and user defined graphics available.

(continued from page 109)

the general base level of the printed capital letters i.e., the lower case letters g, j, p, q and y. If these sit up on a line the text can become difficult to read, with problems in differentiating between the g, q and 9.

All the printers will work within a normal office environment without creating a significant noise problem, but the dot matrix printers and the ZX printer can cause a disturbance in a domestic environment especially late at night.

In this respect the ink jet and thermal printers are the most suitable, but clearly do not have the capability of producing multiple copies from multi-part paper. I know it's obvious but with the colour matrix printer, only the original is coloured, the carbon copies are black and white.

One of the main uses to which printers will be put in the very near future is electronic mail. Messages can be transmitted to suitably equipped sites at 1200 baud, usually at less cost than posting a first class letter, which should arrive the next day, or of sending the message orally over the telephone.

Think of all the post that you send and how much of it could be serviced in this manner including the payment of bills using a credit card facility. It could be seen in today's climate as a way of greatly reducing costs in a very labour intensive industry.

The development of electronic mail is dependant upon the advent of very cheap Modems, which are also responsible for holding back the demand for access to large database networks. We really are very close to the electronic communications age, not just for big business but also the general public, with all its obvious advantages and sometimes not so obvious perils.

Currently the cheapest RS-232 printer on market. The quality is extremely good but limited to 4 inch wide paper and 32 chars. The printing is very quiet spoilt by a comparatively noisy line feed ratchet. Graphics capability is limited to quarter character cell blocks. There are no lower case descenders in the character set. Currently the best print quality for under £100.

Note that all examples are actual size. The cost of the Seikosha 700A featured on page 107 is about £440 and not £725 as indicated. Other prices should only be taken as a general guideline.

(continued from previous page)

I hate to think what is actually going to happen to the network when the 'enthusiast' gets hold of it with an intelligent terminal; with the new electronic exchanges I can not see how it will be stopped.

A printer uses what is euphemistically called consumables. These affect the ability of the user to actually print hard copy output. In an office, if the printer runs out of paper, either to to the stationery cupboard and get another botx or get some from a local stationery stockist.

It is not quite that easy in the evening at home, a hobbyist is unlikely to carry a large range of spares so it is worth considering what levels of spares is required. A ribbon can dry out if left for any length of time unused and exposed. In such cases, wind the ribbon back and forth to wet it from adjacent inked portions of the ribbon.

Always cap ink pens when not in use. If these run out then your stuck. Users of the four-colour printer mechanism may prefer to purchase replacement pens from a Sharp stockist who provides packs of four pens — one of each colour.

Ensure that if the equipment is battery operated, the batteries have sufficient charge to produce a clear print, otherwise use the main adaptor. As a general rule, roll paper as supplied is less likely to contain creases and is also less likely to jam. If you use fanfold paper, there may be a requirement for a form feed, otherwise printing over the perforated tear may occur, which besides being difficult to read, creates a lot of printing noise.

The space requirements of fanfold paper is much greater than that of roll paper behind the printer, think very carefully about how and where you intend to install your printer. It is not usually a problem. ■

YOUR PARENTS DID THEIR BEST FOR YOU...WILL YOUR CHILDREN BE ABLE TO SAY THE SAME?

"Now...I've got two oranges in my left hand and one in my right, how many oranges...?"

In the last five years, the microchip has extended its revolutionising influence to our schools. Today, even the youngest classes take computers as much for granted as we did our wooden rulers.

With these implications in mind, Good Housekeeping software was created; its aim being to develop a comprehensive range of carefully structured early learning software for your home computer.

A NEW WAY TO PLAY AND LEARN

Designed not just by software specialists, but also by educational experts, each package goes far beyond the popular image of computer assisted learning.

It provides a framework for you and your child to learn and play TOGETHER. It also encourages your child to discover the rewards of independence and concentration as he or she explores the program alone, or with a friend.

Each package includes games. But unlike most other software for children, these are neither trivial nor competitive. They are designed to encourage learning through structured play, colourful eye-catching graphics of the highest quality, and a variety of realistic sound effects.

You can also adjust the speed and difficulty of each game to suit your child. Or let the computer adjust itself automatically as your child progresses.

LEARNING WITH MR T

Mr T, Good Housekeeping's lively animated character, will help your children explore all sorts of previously difficult educational areas. Now they can learn to tell the time, or cope with real money, in an exciting and entertaining way.

Mr T will also help your children come to terms with the whole idea of computers as an integral part of their future lives.

THE PARENTS' HANDBOOK

A parents' handbook is included in each package, containing simple operating instructions and a step-by-step guide to help you and your child get the best out of each program. It also contains a wealth of follow-up activities for you both to enjoy away from the computer.

YOUR CHILDREN'S FUTURE BEGINS HERE

Put your home computer to work for your children now. Send for your Good Housekeeping early learning packages by cutting this coupon.

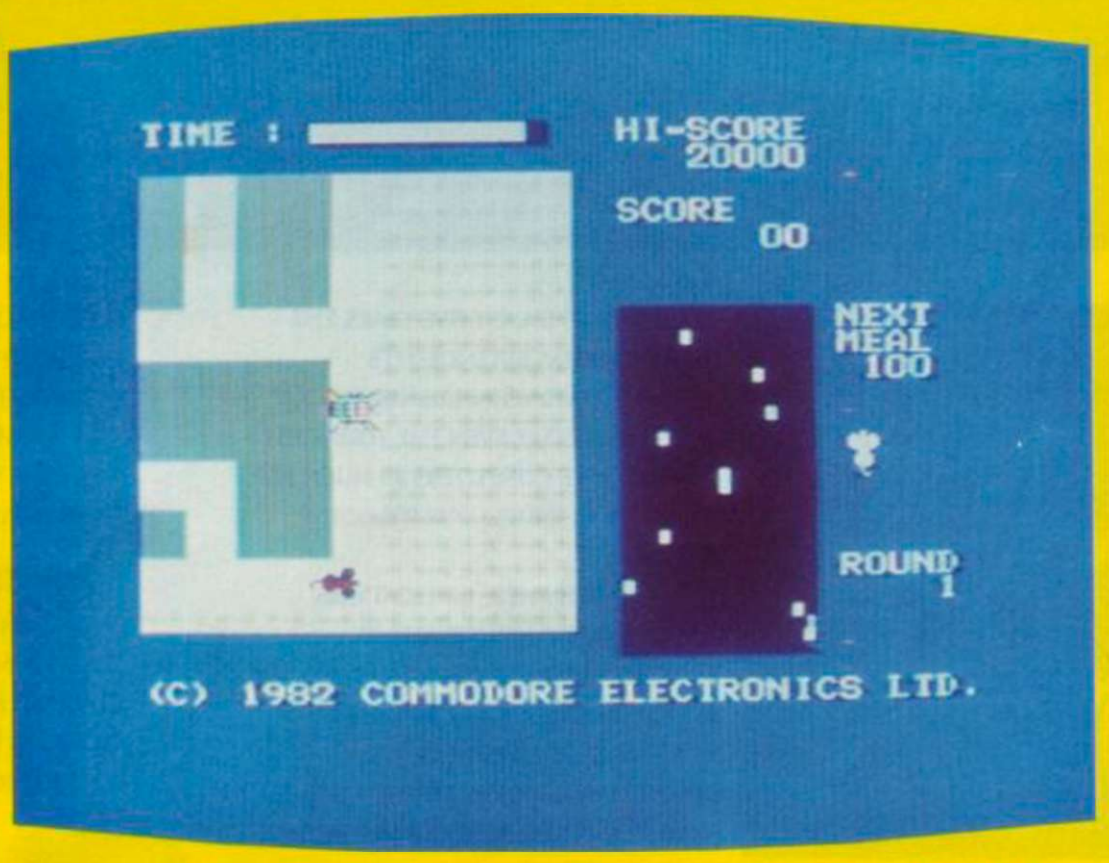
GOOD HOUSEKEEPING SOFTWARE · EARLY LEARNING

Published by Ebury Software (a division of the National Magazine Co Ltd) for Good Housekeeping, National Magazine House, 72 Broadwick Street, London W1V 2B



CBM-64/VIC-20 SOFTWARE

Pete Connors mows the lawn, battles with the CBM-64's Bits, helps Dicky the owl recover his diamonds, rescues Fay Wraye and puts England into the World Cup final — all from the comfort of his armchair.

ALL OVER THE COUNTRY this Christmas children will wake to find their stockings grotesquely bulging. Yes, Santa has brought them a nice Commodore 64 or a homely Vic-20 all the way from Greenland. Or wherever it is he lives. If they haven't been broken on the trip down the chimney, then those children — and adults — will need some software.

If they are lucky they will have been given some of the better programs from the wide range available for these two machines. But if the mere thought of Christmas depresses you and the thermal underwear is not keeping the mid-winter chill out of your bones, you might like to plug in a program that transports you to the balmy days of summer.

Hovver Bovver, from Llamasoft for the CBM-64, will do just that although, as the name suggests, there is not a lot of peace and goodwill around. The bizarre imagination of Jeff Minter has here turned suburban contentment into a screaming battleground of dogs, gardeners and ordinary old chaps.

As Gordon Bennett you borrow Jim's Air-Mo to do the lawn thinking that "Jim won't mind if I borrow his mower." Jim, however, minds very much and comes raging after you to re-posses his machine. As you try to avoid him you are helped by your local hound, Rover, snapping at Jim's ankles to keep him away. But Rover does not like the sound of the mower so you have to keep an eye on the Dog Tolerance and Dog Loyalty displays.

Horticultural holocaust

As you run away from Jim — or Alf or the others whose mowers you expropriate — you must be careful not to plough through a flower-bed; should you do so you will bring an angry gardener onto the scene and this makes your job all the more difficult.

Hovver Bovver's graphics are excellent but it is the sound that particularly impresses; barking, snapping, screaming and mowing are all cleverly imitated while in the background a manic version of "In an English Country Garden" remorselessly grinds away. This clever game features 16 different lawns, one of them with a llama-shaped flower-bed.

This strange obsession with llamas surfaces again in a Llamasoft game for the unexpanded Vic-20. This is an entry for the longest computer-game title of all time competition; Metagalactic Llamas Battle At The Edge Of Time — hereinafter referred to as Battle.

The extraordinary blurb rivals Quicksilva for absurdity; in the struggle against the evil empires of Irata and Zzyax only the "cerebrally-enhanced llamas" are holding out at the "edge of time". Their opponents are "cyborg arachnid mutants" — spiders to you and me. The spiders descend on strings while the llamas spit at them. Should a spider reach the ground it will turn into a "disgusting weeviloid".

If you move the force-field up and down "expectoration may be aimed at many parts of the screen from a static llama". Make no mistake, these beasts can really squirt it out and the game is very fast and quite exciting; it is certainly good value for the unexpanded Vic. After the shoot'em-up it's the age of the spit'em-up game.

There is no spitting yet from Virgin though. It has four new games out; Bitmania and Falcon Patrol for the CBM-64, Envahi and Creepers for the Vic-20. With Creepers Virgin seems, at last, to have produced a winner. The game induced in me some of the excitement and compulsion that Space Invaders once had.

It is essentially a very simple idea. At the top of the screen are the aliens who bounce up and down stealing your energy supplies at the bottom. Your ship is to the left of the screen and can move only up or down, thus making it harder to hit the aliens farther away. When an alien has collected five of your energy units it mutates into a vicious green projectile which comes weaving after you.

At the start the game seems a little bland, even dull, but as the aliens get more frenzied it really does become compulsive. The nerve-jangling sound effects enhance the appeal, as do the crisp and uncomplicated graphics.

Envahi is an interesting idea, but rather dull in the execution. You have a helicopter with which you must protect a city, and the dam which towers over it, from invasion. If the alien munchers get through the dam wall is eaten and the city is deluged. Other invaders, preferring terra firma, make straight for the city.

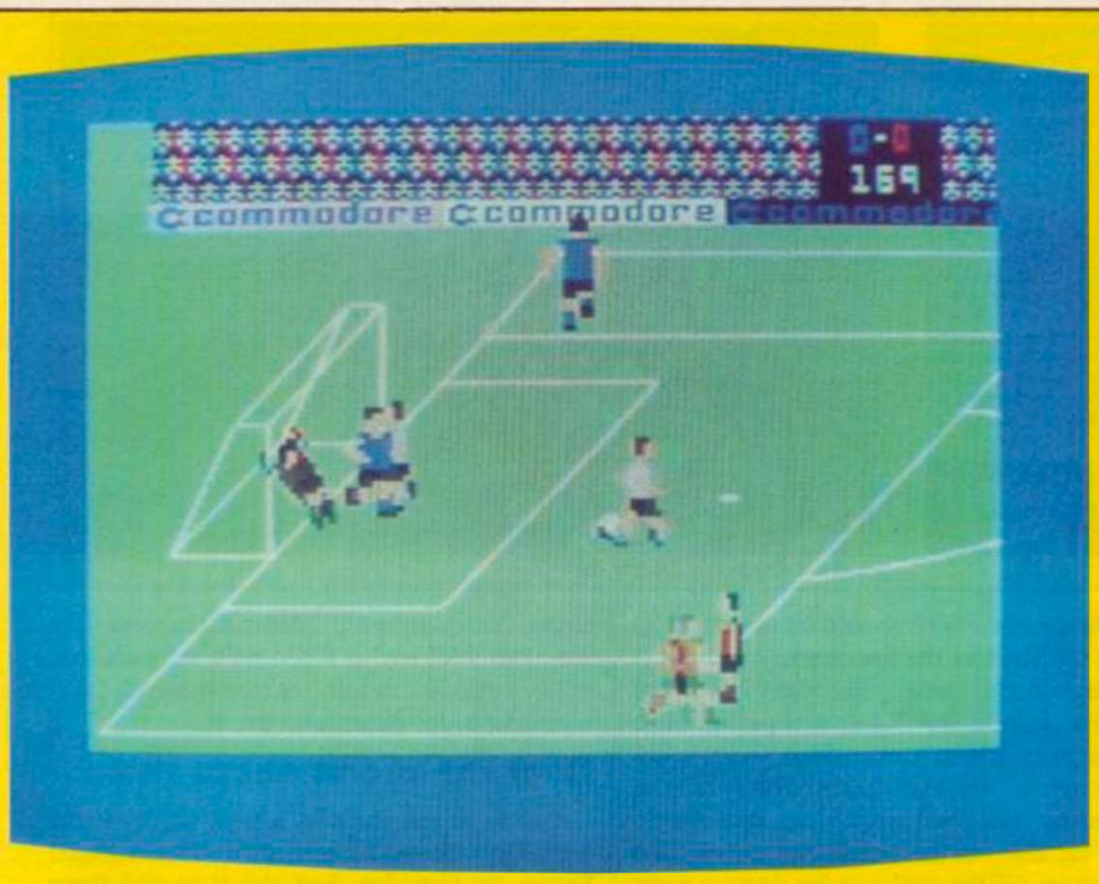
There is not quite enough going on or enough graphic interest to make Envahi a gripping game. Fed up with the helicopter? Then why not take the VTOL fighter for a spin? As in Falcon Patrol, where you have to protect your ground installations from attack by enemy aeroplanes.

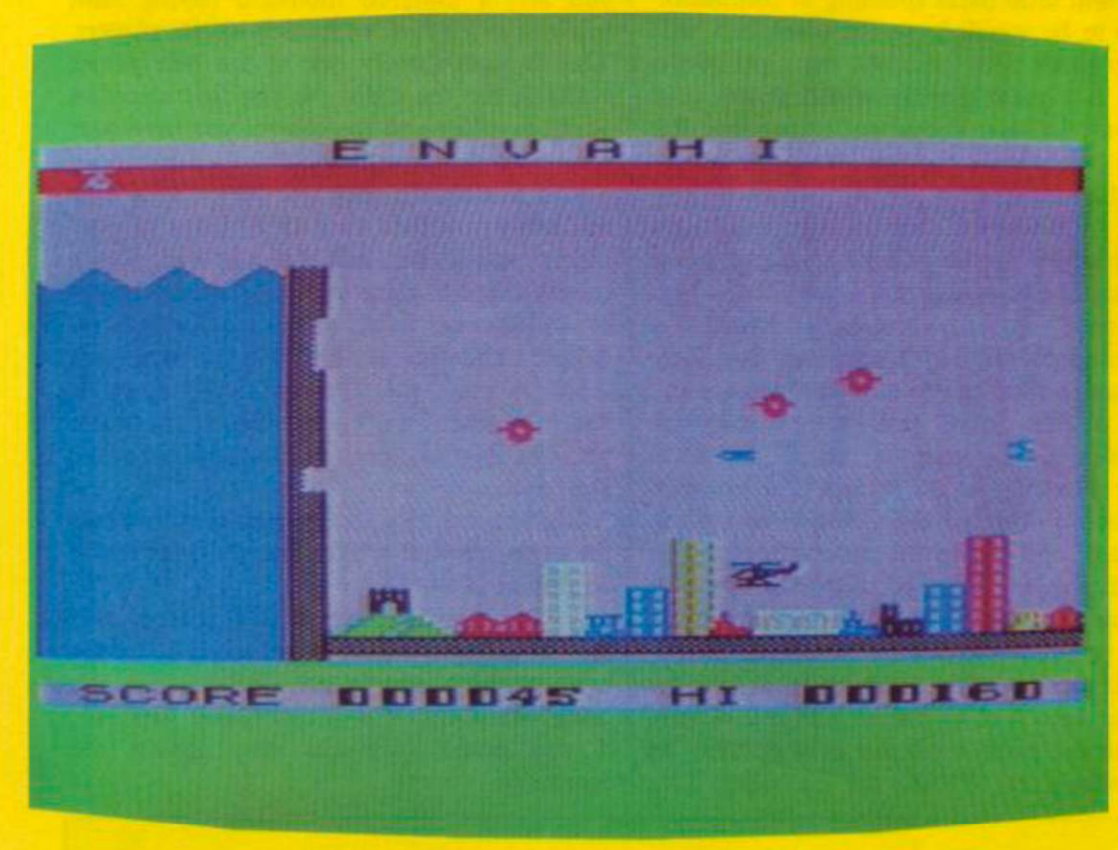
You have 100 missiles and a Defender-style radar at the bottom of the screen. Periodically you must do a vertical landing in order to re-fuel, a trick I never perfected as the enemy always comes at you just as you settle. The graphics in this game are good but the landscape is a trifle monotonous — palms, sand and flat-topped buildings. Falcon Patrol, though, is an enjoyable version of a familiar game.

At the heart of the micro

In Bitmania "you are inside a data-bus within the 64 and battling against the neuron flow". You must reach the central core, defending yourself against the CPUs armies of Bits. These are opponents looking like baubles falling off a Christmas tree. Bitmania features Centipede-like mutations and obstacles and is a colourful game, though its sound effects are feeble.

Imagine's Bewitched is a maze-type game although you would not realise it from reading the ridiculous blurb with its talk of death,





Top left: Rat Race from Commodore. Top right: International Soccer from Commodore
Above: Envahi from Virgin Software.

dungeons and famine. You have keys of different colours which you must match with a door of the same colour in order to escape, meanwhile avoiding the ghosts who resemble purpie tadpoles. Those who like maze games could find Bewitched, for the unexpanded Vic-20, worth an investigation.

The need to see what lies on the next screen is one that all games players must have experienced. Zorgon's Kingdom from Romik, for the 8K or 16K Vic, is a program which uses this need to the full. I will not attempt to convey the anguish I felt when I realised that to see screen two I had to get my man to the top of screen one not just once but two times.

Zorgon's Kingdom has five screens through which you must endure similar agonies of frustration. The first screen has ladders, walls, holes and rolling bombs; it is a mixture of Monsters and Krazy Kong. Screen two goes on to ropes, lifts and mutating octopi. And so on. The graphics are interesting but not particularly exciting, yet the game has an appeal which makes it fun to play.

Romik's Atom Smasher, for the unexpanded Vic, is Centipede for the nuclear age; you are in a "runaway nuclear reactor" and must shoot the protons building up around the central core. It is a fast and noisy game which I found difficult to control with joystick or keys. Melt-down was rapid.

Diamonds are traditionally a girl's best friend, but in an entertaining and witty game from Romik for the CBM-64 we see an owl and a spider battling for possession of the sparkling gems. Stephen the spider has stolen Dicky the owl's diamonds, and he does not want to give them back.

Stephen, in fact, is a curious spider since he seems to have only half the normal complement of legs. However, this does not prevent him from spinning a tricky web which Dicky has to penetrate to retrieve his rocks. Dicky's task is difficult and requires the player to have quick reflexes and use logical skills and to find the best way through the web.

If you are not a very wise owl, Stephen will come and poison you. Thank God I did not meet his pal Cecil who appears on later pages. The moral of Dicky's Diamonds seems to be that you should never trust an arachnid with your jewellery.

Behold the Pac-Man

Zappy Zooks, also from Romik for the CBM-64, is disappointing in comparison. It is a dull Pac-Man-style game with an uninteresting maze and fuzzy graphics.

Audiogenic's A Country Garden for the 8K Vic-20 takes us back to summer pastimes. It seems that the "future of English horticulture depends on you" as various mutant pests ravage your carefully tended garden. The game is, in fact, a good version of Centipede, very fast and with clear graphics. If mass murder is one of your hobbies, then this game will appeal to you.

Amok, for the unexpanded Vic from Audiogenic, is a rudimentary game in which your little man must shoot or avoid the nasty green robots who have gone berserk. It is not the most exciting of games, but if you haven't got any extra RAM, what can you expect?

Anirog has three new games for the CBM-64; Skramble, Kong and Hexpert. The first has all the usual features; the rugged landscape, the cavern, with yo-yos, the firstballs and skyscrapers. The graphics are well up to standard and the sound is very good, especially when your ship is blown up, but sadly the game is terribly slow.

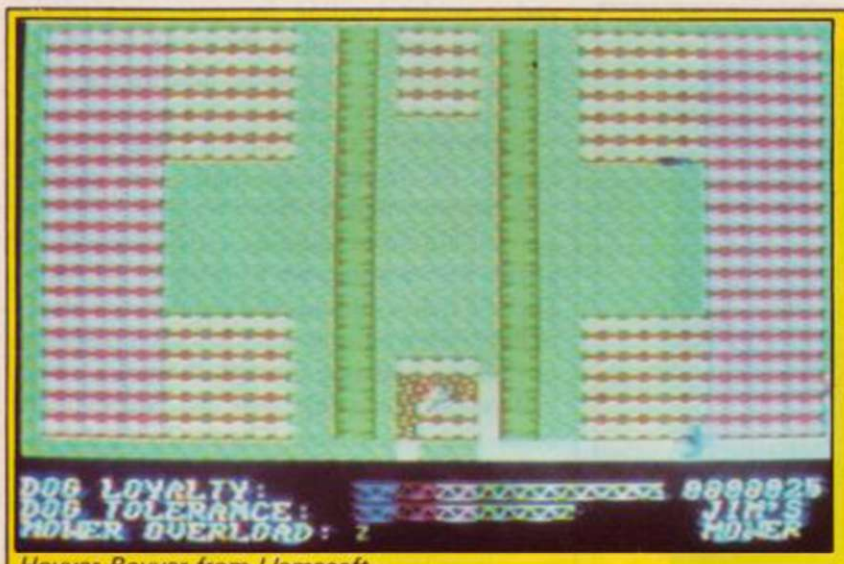
Kong, too, is a familiar game. To Rescue Fay Wraye from the nasty gorilla you must climb to the top of the screen avoiding barrels and monsters. Later screens offer lifts, girders and conveyor belts. Your brave little man is a funny creature with a long wobbling nose like an anteater's proboscis. This is an adequate version of an old favourite.

Hexpert is not nearly so effective. Here your man Bert must paint each block of a 3D pyramid made of hexagons, avoiding the rubber balls and Coily the snake. The graphics are rather ghostly and Bert is sometimes hard to spot in this dull game.

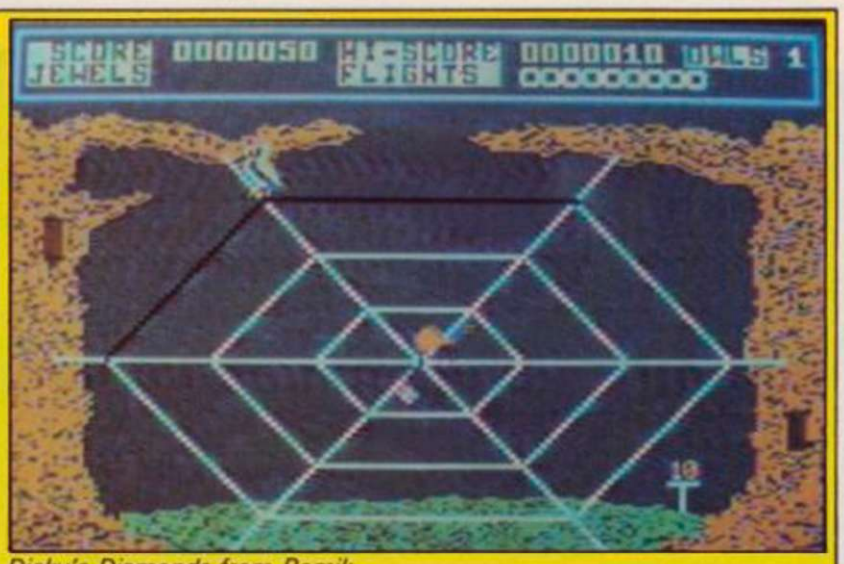
Quintic Warrior for the CBM-64 is from Quicksilva and, of course, comes with a silly blurb, this time about the sixth sense, sinister crabmen and mangled mutants. The game itself is similar to Gridrunner. Mutants rise from the bottom of the screen and must be zapped. Along the sides are two lasers; if you are caught in their fire, then the game is up. Quintic Warrior is an enjoyable fast game despite the ordinary graphics and weak sound.

From AVS comes a flight simulator for the unexpanded Vic, Flight Zero-One-Five. The

(continued on next page)



Hovver Bovver from Llamasoft.



Dicky's Diamonds from Romik.

(continued from previous page)
program requires lots of information to be keyed in and, therefore, lots of keys to be used. It lacks a good display of the horizon and does not seem to be worth the time it takes to really master the controls.

The road goes ever on

The Hobbit is one of the all-time best-sellers for the Spectrum, and now Melbourne House has produced a version for the CBM-64. Not surprisingly, it is virtually identical to the original. Based on Tolkien's famous book, the Hobbit allows you to assume the role of the diminutive, but charming, Bilbo Baggins. Your task, while looking after Thorin the dwarf, is to find the evil dragon and recapture the stolen treasure. En route you will encounter opposition — the evil Gollum, trolls and suchlike.

Help might be available from the magician Gandalf, though you must be careful as he is a testy old wizard.

Each different location in the adventure has its own clean graphic representation. Melbourne House claims that characters in The Hobbit interact with each other and, therefore, that no two games are the same. I never got far enough to really test this claim. Commands can be entered with more flexibility than is usual in adventures, due to what Melbourne calls "Inglish".

If you want to succeed it does help to have read the book. The Hobbit is a superior adventure game which should be as successful on the CBM-64 as the Spectrum.

Commodore's new cartridges for the CBM-64 include Rat Race, a superior maze type game in which your mouse — or is it a rat? — must find the cheese. He or she is pursued by nasty red opponents who would rather eat him, or her, than the cheese. To throw them off the trail you lay down a scent which will send them spinning in confusion.

Also to be avoided are the black cats who smugly block your path. At the right of the screen is a radar display which shows your position relative to cheese and opponents. Rat Race's graphics are good and the game is very enjoyable.

The CBM-64's sound facilities are acknowledged to be the best among home computers. Surpassing even the BBC. This difference can be clearly heard in Commodore's Music Composer cartridge. The sample tune can be altered to feature any three of the nine instruments that are available. As the tune is played the notes appear on staves on the screen. The program will allow you to use the CBM-64 as a piano keyboard, again with the notes appearing as you play them. Creative users will want to compose, and this is one of the main purposes of the program.

Unfortunately, you must enter a tune by pressing keys A to G, rather than just playing it in on the piano keyboard as is possible on Quicksilva's MU-PROC for the BBC. This slight criticism apart, Music Composer is a welcome addition to CBM-64's software and will provide much entertainment, and instruction, for those who use it.

Over the moon about this

And so to the choicest morsel on offer this Yuletide, Commodore's own International Soccer on cartridge. Just slot it in and there you are; a hundred thousand baying fans, luscious green turf, supremely skilful players. This is undoubtedly one of the best games available for the CBM-64; the sophistication of the graphics and the control you have over your players are remarkable.

You manoeuvre only one player at a time but when you pass control switches to your player nearest the ball. So you can play a robust long ball game as if you have a soupcon of continental flair, one-touch football of delicacy and finesse. Either way, when you score a goal the joy of the players is heartwarming. They bounce back to the centre circle in slow motion jubilation, Match of the Day style.

Goalkeepers, too, are impressive as they leap for a stinging shot or dive bravely at the feet of oncoming forwards.

International Soccer gives 100 percent over the full ninety minutes, Brian, and is by far the best speaking simulation available for the home computer. It is a two player game or, if you prefer, you can play against the computer.

OFFER ENDS DECEMBER 31st

For some time a specially formulated professional quality data tape has been available to software producers and duplicators. This high quality tape has been specially formulated for micro based data storage systems. With the rapid growth of home computers and the unsuitability of most audio tapes used in short lengths, it has been decided to make this tape available to the general public under the name of PIRANHA.

The PIRANHA computer tape will soon be obtainable through selected retail outlets, but to give you a taste of the PIRANHA's astonishing data performance we are launching a short mail order campaign in the leading Micro magazines where we are offering a limited number of PIRANHA computer cassettes at an amazing price.

THERE'S NO PRESENT LIKE THE FUTURE.

THE WORLD'S FINEST PROGRAMMING TUTORIAL FOR ONLY £12.95.

Thousands who own, or would like to own home computers have yet to experience the feeling of discovery that comes when you write your own programs. Yet learning programming can be easy.

'Learn Basic' from Logic 3 is the ultimate development of the method first devised at Strathclyde University – a straightforward, easily understood tutorial written by Professor Andrew Colin and Veronica Colin, authors of Britain's best-selling tutorial package.

Using the method tested by university students and used successfully by over 200,000 home computer users, 'Learn Basic' runs on your own computer and explains everything in clear non-American English without jargon or computertalk. In a matter of hours, you will be writing programs that work.

Essentially, 'Learn Basic' and the rest of the 'Learn Computing' Series that will follow soon are designed for people who want to keep abreast of the computer age. For people who realise that understanding computers is the key to future success, at school, at work and as a parent.

Make your future, and your family's future, richer this Christmas.

Get 'Learn Basic' by Logic 3 – two tapes and a full-size manual for Spectrum or Dragon (others soon) at just £12.95.

At that price, it's a gift.

Buy the Logic 3 'Learn Computing' Series at computer shops and major retail stores all over Britain. In case of difficulty, write to Logic 3 in Windsor.

TO: Logic 3 Ltd, Mountbatten House, Victoria Street, Windsor SL4 1HE.

If you would like to know more about using and programming a computer in your home, send this coupon for your free copy of our 16-page explanatory booklet "100 things you wanted to know about computers."

It will help you cut through the jungle of computer jargon, and give you news about software developments – even games. ☐

Or send for our software catalogue (tick either or both). ☐

LOGIC 3

– THE KEY TO THE WORLD OF TOMORROW.

THE SPIRIT OF CHRISTMAS TO COME

A STRIKING microcomputer industry trend in 1983 was the continuing fall in retail prices. Traditionally Christmas is the time for the biggest price cuts, but since prices have been dropping ever since micros appeared, how much longer and how much further can they go? In the video cassette recorder market, by comparison, prices have already stabilised, and will probably increase slightly, but with accompanying improvements in facilities.

Most computer companies will be looking for record sales this Christmas, and an increased market share. But quantity commitments to factories are usually needed almost 12 months ahead. In other words, by the end of January this year, the major retailers had already decided how many machines they could sell this Christmas.

After deciding the right quantity, they just have to sit back and wait. By August, some forecasts can be reviewed, but it is already too late to change the numbers; by now the factories have already made the majority, and have bought parts for the rest.

The sales potential of any home microcomputer is inversely proportional to the price. By September, the Christmas selling prices must be determined. Brave — or blinkered — companies stick to the regular price; nervous ones start hacking the regular price down. Provided the dealers now buy all the manufacturer's stock everyone's happy. If they do not, some drastic steps are needed. First off, the high-turnover operations are approached; people like Boots, WH Smith and other multiple chains will often respond to discount offers. The second step is to beef up the advertising campaign. The fastest reacting method is TV, but the price has to be paid, and £250,000 does not go too far these days.

Commodore U.K. reckons it is heading for 35 per cent of the British market this Christmas, and has projected over £7 million on advertising/PR to achieve it. With a market estimated at £500 million, Commodore targets retail sales at over £150million, with about 5 percent going to the advertising campaign. In practice when dealer discounts are considered, actual sales are nearer £100 million, and the advertising portion is relatively higher.

(continued on page 123)

We're not quite sure whether the World's ready for these games . . . but we've released them just the same.

VOYAGER SOFTWARE

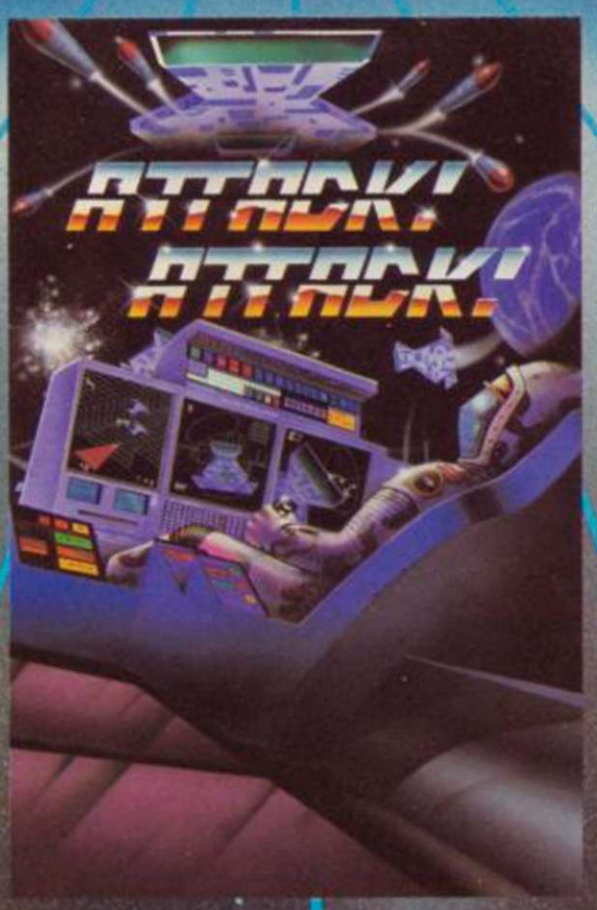
The Marcon Empire have invaded Earth and enslaved the population. An endless stream of stellafreighters now plunder the earth's mineral wealth, draining the very lifeblood of the planet.

A small band of freedom fighters are still operating from an abandoned mining station on the Moon; one of them is you.

As you set out from your secret base your first objective is to manoeuvre through the barrier of lethal space mines to one of the enemy re-charging stations to re-charge your neodymium lasers; then you will be able to carry on with your mission of destroying the marauding stellafreighters.

There is rumour of a Marcon munition station near by, heavily defended by missiles. If only you could locate and plunder it; your heroic band of avengers would then have enough fire power to strike a massive blow for freedom . . . or die in the attempt . . .

Avenger is for the Dragon 32.



Tension mounts as your Stratofighter enters the patrol area. Enemy Skyfreight Convoys are increasing as their need for freedom dies grows in the arms race against you.

Your raydon missile sight picks up an enemy convoy entering your quadrant. You select hyperdrive and are slammed back in your seat. Fingers hover over firing buttons as enemy fighters peel away from the convoy to engage you. As your epic battle begins the enemy Skyfreighters unleash wave after wave of air to air missiles against you. The battle rages on and your will to survive and determination to win increases. The convoy must be destroyed: your people are depending on you.

Night falls and glaring explosions fill the sky; don't let your concentration wander. If the convoy gets through your people are doomed, you must succeed, you must.

Attack Attack is for the Commodore 64.

Your mission: destroy the Etron rocket base on the planet Hagon.

Against the most sophisticated space fighter yet conceived you know that if your mission fails the awesome Etron rocket ship will destroy your galaxy.

Entering the luminous space furrow, the first of Hagon's many sophisticated defence systems, every fibre of your being is filled with dread.

The Hagon fleet have been alerted and wave after wave of Astrofighters come hurtling toward you. As you battle your way to the end of the tunnel you begin to realise just how suicidal this mission could be.

Zooming through Hagon's defensive asteroid belt your concentration intensifies; you have only a fraction of a second to differentiate between asteroids, space mines and Etron rockets as they flash toward you.

Hugging the planet's surface, dodging defence poles and trying to deal with everything else the Hagon's throw at you, you remind yourself that the fate of an entire galaxy rests on the outcome of your mission; you must succeed . . . Quasar is for the Commodore 64.

Any of these games for just

£5.99 each

(continued from page 121)

Anyway, by Christmas Eve it is all over and some manufacturers should live to see another year. For many this price war will be the last, and not enough fat will have been stored away to see them through the lean months. The casualties can usually read the writing on the wall by mid-November, but will still go down fighting.

There have already been some signs as to how tough the fight will be; Dragon Data has recently raised £2.5 million, reducing, Mettoy, the parent company's stakes, to around 8 percent. How many more hard times can they survive?

Once this Christmas is out of the way, we can all look forward to next. I will try a few predictions, but in this business any form of forecasting is usually inaccurate.

For Christmas 1984 many of this year's micros could be half-price. The Commodore 64 could be £99.95, the Tandy Colour around the £100 mark. Sinclair's Spectrum will not reduce much, say to £69.95, with Oric following. The BBC Model B must have some price cuts, though I am surprised it has held for so long. While the big school purchases are still there, maybe it will stay at £399. Who knows? What of the Electron? It ought to share its big brother's success, although the investors seemed cautious when Acorn's share issue was undersubscribed.

Many computers introduced

Many of this year's favourite computers will continue through to next year, but numerous others will be introduced for next Christmas. However many new micros are launched, there is sure to be another offering from Sir Clive. What will it be? Oft has the Sinclair Business Computer been suggested, but unless the price-point is right, he has little chance of churning out the tens of thousands needed to ensure success. Business users do not buy mail order, or wait months for delivery. The actual specification of the business machine is still not officially released, although many have published their predictions. If it is to be aimed primarily at the business market, it must include disc drives and a monitor as standard.

Even Sir Clive did not rate his new flat-screen TV as a computer monitor. Unless colour is required, liquid crystal displays have a number of advantages over the flat screen, but no doubt Sinclair can reverse this status. For disc drives is he thinking of the Spectrum Microdrives? If he wants a 16-bit micro to compete witht he IBM-PC, he will have to use more conventional drives like the Sony 3.5 inch units. For the home market, the Spectrum could be upgraded to include the cartridge and joysticks option as standard, with probably 64K of RAM.

Many of the existing micros wil see a new lease of life with some of the latest peripherals coming next year. One of the most interesting from the enthusiast's point of view will be the micro-disc drive, although prices and capacities of the 5.25 inch drive will improve. I would still favour the regular mini-disc drive for a couple of years yet, although by then the "micro-Winchester" may be the norm. A combination 3.5 inch fixed hard drive and floppy microdisc seems like an ideal combination for the business machine.

Some machines will be expanding their RAM complement as the 64K-bit chips become cheaper. Surprisingly there is a shortage of many types of integrated circuit right now, with a potential supply crisis early next year. In the long term the situation will improve, but until then, most chips will hold their price, which will keep manufacturing costs up slightly, and encourage some designs into custom chips rather than standard components.

One market sure to expand in the next year is portable computers. This year saw the introductuion of the Tandy Model 100, a revolutionary device with its built-in software and 40-character-by-eight-line liquid crystal display, and all working off four penlight batteries.

A number of other manufacturers will follow Tandy's lead, with other devices from the same stable and surely prices will fall. The liquid crystal displays will become larger and cheaper, maybe up to a full screen size of 80 by 24. This type of product is exactly what the Japanese manufacturers need. Taking existing technologies and making it cheaper, smaller and more reliable is their forté.

The factory where the Tandy Model 100 is made is one of the most up-to-date in Japan, with almost total automation. Small unmanned trolleys move components and finished items around the factory by sensing wires in the floor. All the components are automatically inserted, and then solder-dipped, before being 100 percent tested. Further stages of manufacture are totally automatic, leaving the employees to do only jobs robots can not do — yet. Nearly 300 staff produce the equivalent of five computers each per day.

Telecom Gold Service

The liberalisation of British Telecom might help promote the underutilised communications capabilities of modern microcomputers. The introduction of the Telecom Gold service will give the business user freedom and security in setting up a system, and the private user a chance to use a nation-wide network for the cost of a local call and minimal rental for his mailbox.

Telecom Gold is a service offering the basis of a sophisticated electronic mail network, for very moderate cost, and allowing various levels of communication outside the user's network.

Each user is allocated a user identification — ID — password. To log in, the user calls a local number, and an auto-answer Modem answers. When the carrier tone is heard, the user switches to data, or inserts the telephone handset into the acoustic coupler. From now on it is all keyboard stuff; after entering the ID and password, the system prompts if any mail has been received since the last log on.

"Mail" is messages sent from one user to another, or from one user to a whole group. Each message is time and date stamped, and can be coded for "acknowledge receipt" or "reply requested". After mail has been read and answered, it can be either deleted or stored appropriately. Many other features are available, but this is the basic concept.

All that is required to use an electronic mail system is a computer and an acoustic coupler; a device that usually connects to the computer's RS-232C port and fits into the phone handset, so that tones produced by the coupler can be transmitted down the lines. Unlike the acoustic coupler, the direct-connect Modem actually links on to the telephone wires, and can also offer auto-dialling and auto answer.

These Modems, with the auto-dialling and auto-answer facilities will soon be sold for around £100. In fact, if the Japanese were allowed a chance they could be £29.95. There is nothing inside a Modem to make it £400, it is just quantity production that is required.

An unpublicised set of conditions for BT — British Telecom — approval of integral Modems — actually it is BABT not BT, but same controls — means that after a sample has been technically approved in the UK, BABT has to send one of its engineers to inspect the supplier's factory. If this happens to be in Japan, the cost can be quite extortionate. Considering the high-quality standards of manufacture in Japan, they do not have any problems convincing the BABT safari man!

Over the past few years various types of alternate input device have been introduced, but none is a real threat to the Qwerty keyboard. There have been bid pads; a type of writing pad that can decode characters written on it, the Microwriter; a one handed keyboard which uses combinations of five keys strategically located under each digit, and the latest one to crawl out of the skirting board; the mouse.

Mouse on the way out?

None of these devices has been particularly successful, so why should the mouse be any different? Who is likely to pay around £6,000 for the Apple Lisa and use only the mouse? It is far easier to press one key to indicate the desired function, then it is to locate it with the mouse. On a cheaper machine which could justify its price for one unskilled user, maybe the mouse has a valid purpose, but I believe after a short while the mouse user would prefer to learn to type. The mouse cannot be used to enter strings of text so the user must resort to the keyboard for word processing anyway. I think that the mouse will become extinct in 1984, but what new gimmick will replace it, who knows?

For some time now, there has been talk of standards for hardware specification of home

(continued on page 125)

£1000 TO BE WON!

SOFTEK
MASTERS OF THE GAME

SEARCH FOR THE UNIVERSE'S WHIZ KID & VID WHIZ

Softek are scanning the known Universe for the greatest Whiz's, both at programming a popular micro and acheiving the highest scores ever on a Softek game.

ARE YOU THE GREATEST WHIZ KID?

Rumour has it that this Universe's greatest programmer resides on planet SOL 3, sometimes known as "Earth". Can you prove that it's true? Between now and Dateline 31.12.1983 A.D. Softek are hunting for this planet's greatest. If that's you then send us proof! We'll consider any evidence of your supreme ability! Send that brilliant new program you've been working on, or the groundwork of it (which of course still shows its greatness quite clearly!). Softek will guarantee you 100% ASSURANCE that your copyright will be observed and confidence maintained. In January we will announce in the Micro-press who the Softek Whizz Kid is. If it's you then you can expect to be signed up by Softek to publish your wonder works. Even if it is not you, then there's a chance that you'll be offered a contract to write for Softek anyway - incorporating the highest royalties of any Software house together with worldwide distribution which is second to none!

The Softek Whiz Kid will receive £1000 of equipment or software of his/her choice!

ARE YOU THE GREATEST SOFTEK VID WHIZ?

We are also on the hunt for the Galaxy's greatest players of Softek games. Have you got the highest score on a Softek game? Up to Dateline 31.12.1983 we'll be keeping track of the scores you send in and if you've got the highest score on a Softek game then we'll publish your name in the New Year's Micro-mags and you'll get a complete range of Softek Software too!

SEND YOUR ENTRIES TO:

SOFTEK INTERNATIONAL LTD.
12/13 Henrietta Street, Covent Garden, London WC2E 8LH
Telephone 01-240 1422

Softek reserve the right to determine that submissions to the Whiz Kid competition fail to meet a minimum quality, in which case the competition will be voided. The judges decision is final. The above competitions are not open to employees of Softek International Ltd. or any under contract to them. No correspondence shall be entered into regarding the results of the competition.

(continued from page 123)

computers, giving the opportunity for software compatibility between different manufacturers' machines. Some may doubt the advantages for such a move; any constraints on the specification of a new model to ensure compatibility with the standard could mean that the new machine has no advantages over its predecessor, except perhaps on price.

But do we only want cheaper computers? It stands to reason that any form of standard to be introduced by the big manufacturers will have to be flexible enough to allow unfettered evolution, but retain a common core to use the software developed *en masse* for the whole range. If the standards concept is thrown out of the window — which I feel is unlikely — the format of the next generation of micro computers will go the way the strongest muscle decides. By muscle I mean manufacturer's muscle, not consumers' muscle. The consumer has a track record of trading machine performance for value for money, and often ignoring value for money in favour of lowest price.

In the business end of the marketplace, we have already seen the might of IBM enter the ring with its personal computer.

Nobody invited IBM. No. They simply put millions of dollars into developing a new 16-bit micro, sought the co-operation of software giants like Microsoft, and then used their considerable marketing clout to launch the product.

When the machine was first announced, many declared the hardware specification too unconventional, and with a new species of operating system to overcome, the IBM was often dismissed as a non-runner. More like a one-horse race. IBM needed penetration of the marketplace, and software is the key in business computer marketing. Quantity production is the key to software marketing, so with promises of huge sales of the IBM PC, software houses could not afford the risk of missing out on this sector of the business.

But the race is still on. Now that so much software has been developed on the IBM and its MS-DOS operating system, — called PC-DOS on the IBM — other manufacturers are seeing the light and switching research and development funds to IBM look-a-likes. Even some of the biggest names in the business have conceded that they must marked an IBM-like machine in their range. But IBM must not wait around too long, either, now that others are on their bandwagon, and if they want to stay ahead of the rest, they will quickly move on to greater things and lead the industry to the next horizon.

New Japanese standard

On the personal computer front, and by "personal computer" I mean "home or enthusiast computer", there is a move afoot to settle a new Japanese standard known as MSX. The main point being to standardise the software and minimum hardware configuration so that there will be compatibility of software between many different home computers made by a range of manufacturers. This would suit the oriental producers because they could concentrate on churning out more and more micros at lower and lower costs. If lower costs mean lower shop prices, and software compatibility gives a huge range of packages, then what has the consumer to worry about?

We have welcomed standards in audio records and tapes; selecting the best and discarding the rest. Even though the 33 rpm record has been in use over 20 years, considerable technological improvement in both the "hardware" and "software" has been achieved without changing the basic configuration.

The consumer can still buy the *el cheapo* record player for a few pounds or spend a four-figure sum on high-fidelity stereo equipment. Until the compact digital disc arrived on the scene, the record was considered by most to be a suitable medium for their music.

When the compact cassette drove the eight-track cartridge out, few tears were shed. Many advancements have been seen since in cassette technology, for instance, Dolby noise reduction, chrome and metal tapes, without leaving the original hardware owners out in the cold, or incompatibility of the latest machines with the earliest tapes.

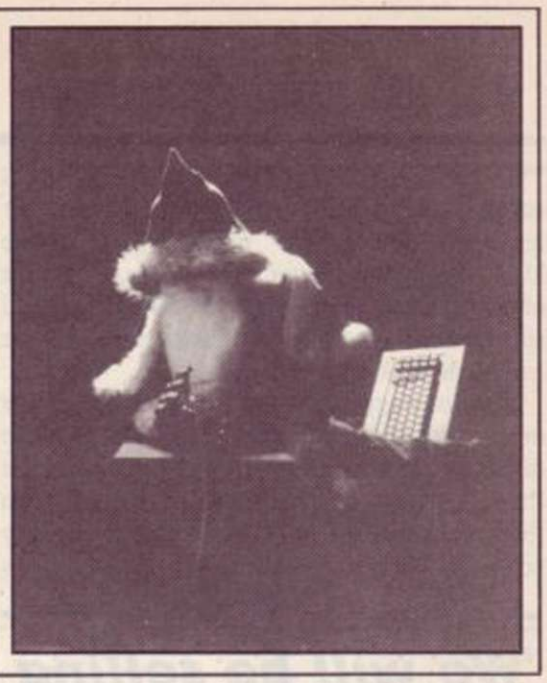
Some competition in standards can be a useful ally of the consumer, as has been seen in video cassette recorders, with the two main standards; Betamax from Sony, and VHS from JVC, Hitachi *et al.* Both systems have quickly evolved to a degree now that not much change in hardware configuration is expected in the next year or so.

If Japan succeeds with the MSX generation of microcomputers, what will we expect to see for next Christmas? Not all the big Japanese names are yet convinced about MSX, and two of the existing computer manufacturers, Casio and Sharp have decided to go their own ways. One of the first into the MSX arena will be Matsushita, followed closely by Sony. Also expected to join in are; NEC, Sanyo, Toshiba, Yamaha, Pioneer, JVC, Hitachi, Fujitsu and Mitsibishi. Retail prices for the MSX standard machines is projected to run from about £130 up to £300.

Surprisingly, the Japanese government is not supporting the MSX system, as it feels there is still room for technical innovation, and setting standards now will inhibit further advances.

Digital Research, founder of the world famous CP/M operating system for floppy-disc computers, has suggested to some of the Japanese manufacturers not already on the MSX road, a different set of standards, but keeping very quiet about it.

Some of the software products available for the home computer range are now so diverse, any form of standardisation of hardware must help to increase the software library for each machine. The greater compatibility of each program over a range of computers, the higher sales can be expected. As most of the cost of a program is in the initial development, the retail price of any package will be reduced when quantity sales can be realised. The pirate-to-legal copy ratio is inversely proportional to the selling price, so lower prices mean higher sales again. Unfortunately, the high number of illegal copies of any program encourages suppliers to distribute their software on ROMs. These cartridges have many advantages with their instant



loading and stability. More important, for many of the small memory micros, as a cartridge is memory itself, it needs less RAM to run a program. By not making the program relocatable, even if an unscrupulous user does manage to read the ROM, the code is unlikely to run in the RAM portion of the computer. Even using complicated colour graphics, some excellent cartridge programs can run in 16K RAM devices that would need 48K to be RAM-based. Until the standard memory of home microcomputers is up to 64K, cartridge programs will be an important medium for software distribution.

Europe in the lead

Business software suffers less from illegal copying; it often requires regular updating, and business users are less amenable to the cost savings of pirate copies against the support and assistance provided to *bona fide* users.

Europe has always lead the application software market. The Americans may have the upper hand in system software, with companies like Microsoft and Digital Research, and systems such as CP/M, MS-DOS and Unix to their claim, but it is in Europe and Britain in particular, that the application software expertise lies.

On the hardware side, considering that the U.K. is one of the major design centres of new computers in the world, we do not always seem to bring the innovative products to fruition, especially at the low end of the market. So often British companies develop systems, only for the financially rewarding production to end up overseas.

One new business computer to emerge this year was the Apricot from ACT, which will surely be one of the top sellers in 1984. With its IBM compatibility and new micro-disc drives, it bridges the gap between latest generation hardware and existing software, but leaving room for new programs that would use the full capabilities of the hardware.

To predict what the future generations will have to offer the user is difficult. There will have to be a point where the rate of technological advancement slows down but only for commercial reasons, and consolidation of the existing models is the main concern. The major manufacturers must all find their niche in the marketplace and develop it. There is no reason to believe that the computer industry will not develop as the motor industry has, but in a considerably shorter time. ■

THE FUTURE OF THE MICRO INDUSTRY

"WE WILL BE SELLING a very powerful computer with more than 256K of memory for less than $50 by 1986" predicts Commodore U.K. chief John Baxter confidently. But what of next year, what sort of machines and software can we expect and how much will we hve to pay for them?

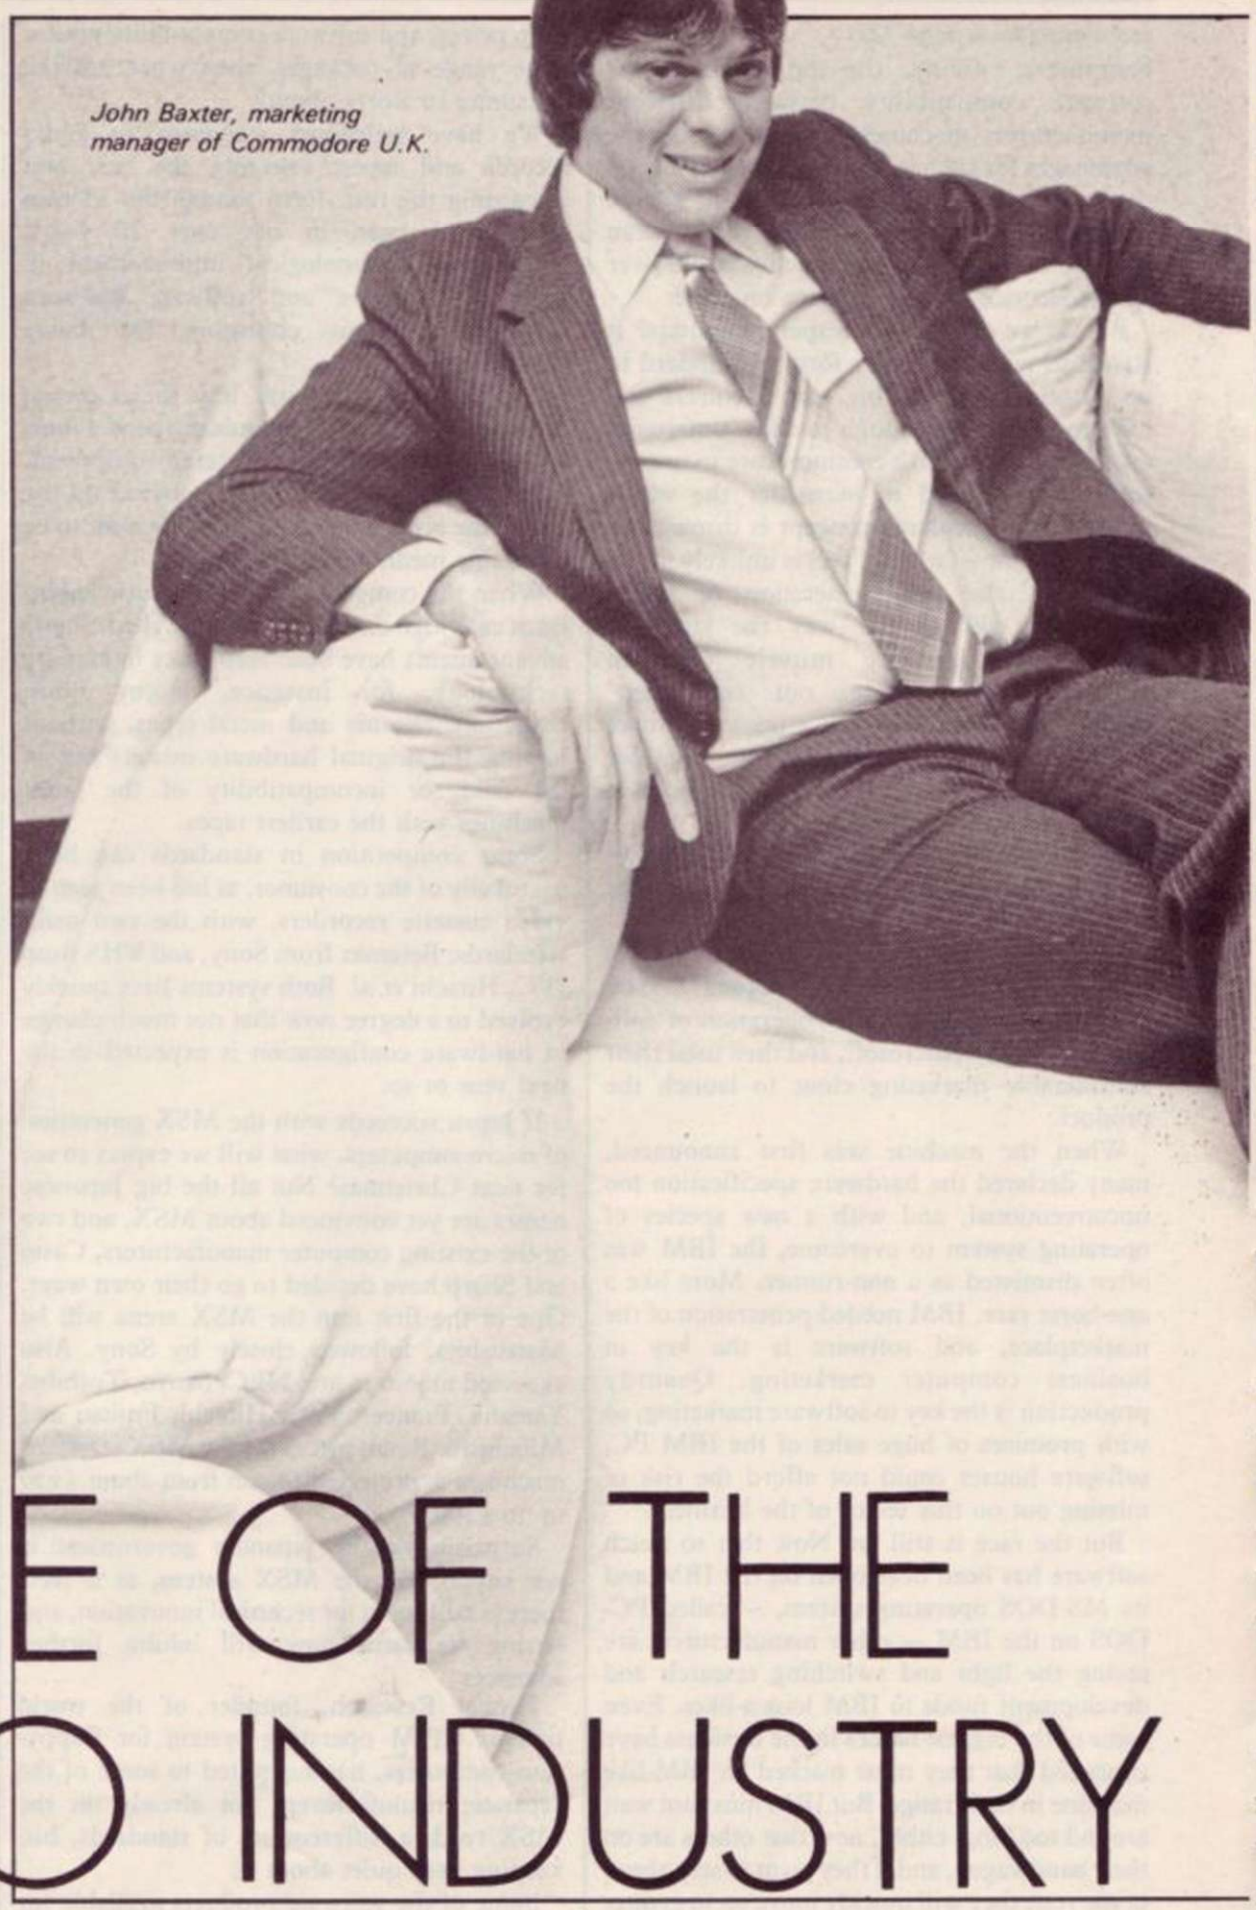
Everyone agrees that you will be able to buy more performance for less money but there are disputes about which routes to take to get there. Firms like Sinclair and Atari are known to be working on 16-bit machines to eventually replace the eight-bit ones they are selling now

'We will be selling a computer with 256K bytes of memory by 1986'

and Acorn is even attempting to skip that stage and move straight form the eight-bit BBC Micro to the 16/32-bit Gluon unit.

Some software houses are confident that by next Christmas "16 bits are going to be standard" as Imagine's Bruce Everiss believes. On the other hand John Baxter thinks that "16 bits are irrelevant as far as home computers are concerned."

Elan director Robert Madge is so confident that eight-bit machines will still be to the fore that the high specification Elan Enterprise which will be launched in March is designed around the Z-80 chip. If the Japanese finally make the impact long predicted on the British computer scene it will be with Z-80 based machines sharing the MSX standard.



John Baxter, marketing manager of Commodore U.K.

'16 bits are going to be standard'

Despite the fact that many British companies believe that MSX is a "low performance standard" as Robert Madge puts it the specification of some of the MSX machines recently unveiled in Tokyo is quite impressive.

The Japanese think that people are beginning to treat home computers a bit like hi-fi or televisions and so long as a unit produces reasonable sound and pictures and looks neat they do not care whether it contains state of the art electronics or not.

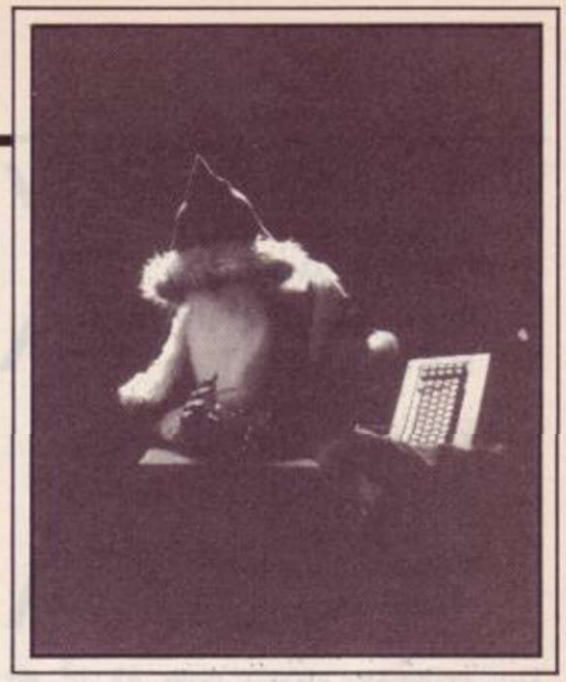
One trend among the Japanese machines is greater integration with other domestic appliances. The Sanyo NPC series micros for instance can connect up to a video recorder or television and take still pictures from there to use as the raw materials for computer manipulation on screen.

Yamaha has even incorporated the MSX specification into something which looks and behaves like a cross between an electronic organ and a home micro. But while the Japanese seem to think that the recipe for success in 1984 is to use a proven but old-fashioned design and then embroider it with gimmicks like built in light pens, and take

'Commodore never looks to the past'

Meirion Jones corners some of the leading lights of the microcomputer industry and presses them for their views on possible developments both in hardware and software. How will the market change in the new year?

Bruce Everiss, general manager of Imagine Software.



advantage of a potentially huge common software base to all MSX machines Robert Madge believes in greater sophistication.

He believes that the natural point to standardise will be when home computers have reached the limits of the other equipment you can find around the home. There is no point in making computers with better resolution than the average television unless you think people will go out and buy purpose built monitors. John Baxter thinks that falling computer prices will cut the costs of peripherals including monitors and, of course, disc drives.

He predicts a price of £120 for a good 64K computer this time next year with disc-drives costing £100 and full colour monitors also around £100.

"Commodore never looks to the past," quips John Baxter, and indeed Commodore has a new home computer on the stocks for 1984 but first glimpse of that will not be until the American Consumer Electronic Show next year.

The failure of MSX or any other standard to establish itself internationally means that the traditional problem of the software industry — lack of portability between machines — will not be solved in 1984.

Whether games will be as important next year as they were this is a moot point. New programs like International Soccer for the Commodore 64 — reviewed in this issue — are taking computer games beyond the two-dimensional arcade and maze formats yet many people believe that games will decline in importance compared with educational and home control and planning software.

MSX: 'A low performance standard'

The Elan, for instance, will come with 80-column display and a built-in word processor. Bruce Everiss of Imagine believes that the market for games will at least double next year: "It's the mass market. Games playing is here to stay". At the same time he sees a narrowing of the gap between business and home micros which perhaps explains his enthusiasm for 16-bit computers with colour and sound.

Everiss expects to see the first million-seller program early in 1984. Although bubble memory and monster RAM chips are beginning to drop in price no-one expects to see them displacing disc drives as a means of mass storage for home computers by next Christmas. However, there seems general agreement that the drives themselves will be down to the £100 mark by then. Outside of Sinclair and Coleco there seems little enthusiasm for fast tape storage systems.

'We're going to get some viable competition from record companies'

John Baxter points out the rapid progress educational software has made this year "whoever thought you could sell Physics O level revision." A point echoed by Robert Madge who says that by next Christmas "homework will naturally be done on the computer". Although he still believes that "games will be dominant".

Everiss sees the in-house software companies — Sinclair, Acornsoft, Commodore continuing to do well but thinks that there will be a thinning out of the ranks of the smaller houses leaving a few big independents.

"In the long term" Everiss believes "we're going to get some viable competition from the big record companies." Among the hardware manufacturers everyone is expecting a shake out with some companies going to the wall or stopping making home computers.

After all the predictions that 1983 was going to be the year of the Modem there is bound to be some cynicism at predictions that by this time next year a lot of the Christmas cards will be sent by electronic mail. Nonetheless, Modems have now been completed for most of the major home computers and some companies like Oric and perhaps Sinclair are considering building them. ■

While shepherds watched the box one night, Andrew Bindon plugged in his BBC Micro.

XMAS CAROLS

THE PROGRAM LISTED plays 19 of my favourite Christmas carols in three-part harmony. At the same time it displays each note on to a normal musical score individually as the note is sounded. The clever part is that the program composes its own musical harmony to go together with the melody.

To understand how the auto-harmonisation works we must consider the way in which simplest musical harmony is composed. As an example let us use the key of G major. Using the common name-note notation together with pitch numbers this runs from octave to octave:

G	A	B	C	D	E	F#	G
81	89	97	101	109	117	125	129

If we start at any note on this scale and take three alternative notes we form a triad. Basic musical harmony uses three of these triads beginning on the first, the fourth and the fifth note of the scale. These are called the primary triads. For the key of G major they are:
G 81; B 97; D 109; C 101; E 117; G 129; D 109; F# 125; A 137.

We see that using these triads we have encompassed every note in the scale. The same chords will also map on to notes an octave away, or two octaves. These triads have a particularly pleasant musical sound. By selecting one of them to play with each note in the melody we can obtain an interesting and pleasant-sounding harmony backing.

The melody itself is read from data statements at the end of the program. These may be replaced in your preference. There is nothing new in reading data for music in this way but perhaps something which is new is the way in which the data is stored. Each of the single individual melodies are stored as three lines of data. The first line gives the number of rhythm units/bar, the position at which the bar is, the time signature, and the best way to display the music respectively.

The second line then gives the pitch of each note in the melody. The third line then gives the length of each note in the melody. All three lines are read at the start of a piece. The procedure Procdata then picks out the character from the data string and converts them to pitch and duration numbers.

In this way a great saving on space is obtained and also this opens up the way for future enhancement of the program.

The code for this data storage is d for Do up to t for Te in the first octave and then the same for the next but in capitals. The range could be extended if needed. The rhythm is c for crotchet and so on. Dotted notes are then represented with capitals. Both of these codes can be understood clearly by examining the relevant lines in the Procdata routine.

The data conversion process may be fully understood by typing in the following lines.

```
DtDRDFFMltDlsssDtDRDFFMltDlsss
MRDMSFMltDFMRD (RETURN)
```

the computer will respond with Mistake but this does not matter,

```
REPEAT: char$ = GET$:posit = INSTR("drmfslt
DRMFSLTa",char$):pit% = VAL(MID$
("033041049053061069077081089097101109117
7125129",(posit-1)*3 + 1,3)):SOUND1,-15,
pit%,2:UNTIL FALSE (RETURN)
```

Now move the copy cursor up to the line of characters which you have typed above, think of the rhythm of the carol As With Gladness Men Of Old, and start tapping the copy key.

The process of transferring the notes to a musical score takes up a good part of the program. Each duration note is a character defined in procvdu. The score is displayed in Mode 4 with a yellow score background and a red foreground. At the beginning of each piece four lines of score with treble and base and key signature are constructed. Then as each note is played it appears on the score.

It is my experience that a program is never finished, merely developed. You start with an idea and develop it more and more until it becomes so huge that you scrap it and start again. It is thus that the listed program is open to enhancement. One thing you might like to try is changing the following lines thus:

```
770 pit% = VAL(MID$("033041045053061065
077081089093101109113125129",(posit-1)
*3 + 1,3))
2340 DATA33,45,61,53,65,81,61,77,89
1950 key = VAL(MID$("1432505234161",
pitch/4 + 4 + 12*(pitch >= 40),1))
1960 flat = VAL(MID$("00-100-100-1-100-100-
10000",pitch/2 + 7 + 24*(pitch >= 40),2))
```

This causes all the melodies to be played as if they were written in a minor key, although the score as shown does not allow for the raised 7th and the minor key is a rather crude versions.

The program was developed on a 32K machine — Model B, OS 1.2. It will run on any 32K machine, but will not fit into 16K as memory for the Mode 4 screen. The program Saves in 20 blocks — that is 5K. 16K users could try leaving out all the graphics score routine, meaning variable names, the title list, or the input procedure. I have not included in the listing a profusion of untidy Rem statements. The meaningful variable and procedure names and the colon spacing between each procedure attempt to make the program readable.

To help your understanding of the program and debugging your typing errors the following may be useful:

PROCinput — inputs choice of melody, the key, speed and envelope selection.
PROCread — reads data into the arrays.
PROCfirst — sets up variables at the beginning of each melody.
PROCdata — converts data to pitch and duration numbers.
PROCplay — sounds melody together with harmoney syncronised, and checks for first beat of bar accent.
PROCchoosecord - selects harmony to accompany melody.
PROCenv — defines envelopes.
PROCtoscore - puts note onto screen.
PROCvdu — turns off cursor, defines colours and note characters.
PROCscore - sets up screen.
PROCclef — draws base and treble.
PROCbar — draws barline.
PROCsig — draws key signature.
PROCtotrep — selects random keys, speeds and envelope selections.

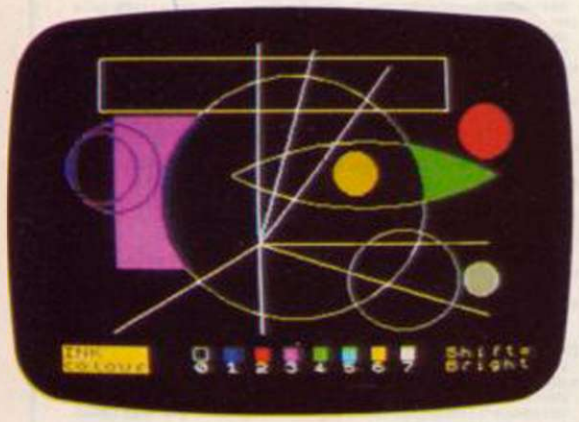
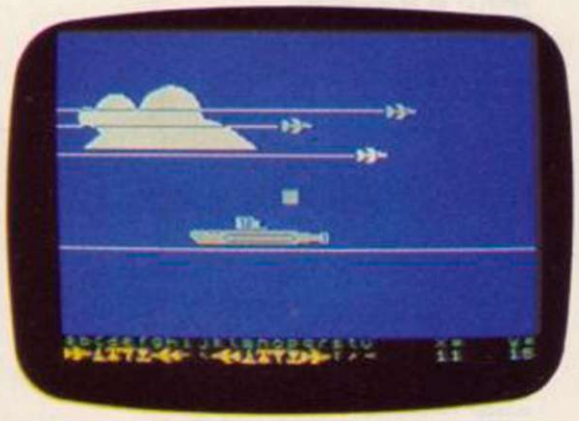
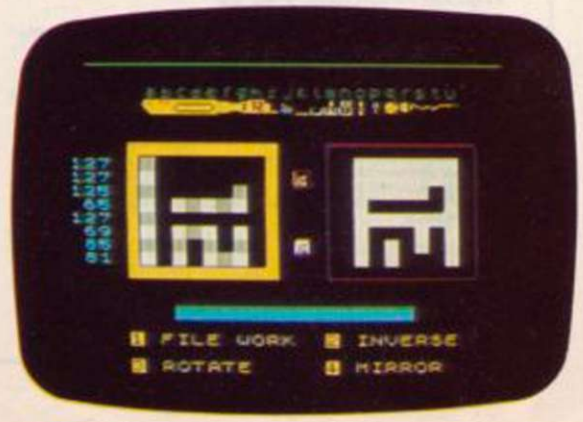
THE MOST IMAGINATIVE GRAPHICS PROGRAMMING SOFTWARE FOR YOUR SPECTRUM.







There's now one piece of software that's a *must* for every 48K SPECTRUM owner.

It's called "PAINTBOX".

If you wish to exploit the full graphics capability of your machine, you can do so . . . simply and easily with "PAINTBOX".

"PAINTBOX" is produced by Print 'n' Plotter Products — the company that has pioneered (and led) the field of graphics aids for ZX Computers.

With our name and reputation you are assured of quality and immense graphics capability!

Take a look at the actual screen prints opposite. They are the sort of thing you could produce on your SPECTRUM.

With a little practice — and "PAINTBOX" — you could be planning, producing, and utilizing these sort of graphics in your programs — producing software that will come alive with originality!

Just look at some of the facilities available from "PAINTBOX":

UDG EDITOR:

Giving you the facility to define (and re-define) up to 84 graphics characters which can be held in memory, stored in your BASIC programs for instant recall from its own built-in machine code!

UDG DRAWING BOARD:

A fully integrated UDG Planner for up to 4 Banks of user-defined characters. Planning facilities include MIRROR IMAGE, ROTATE, INVERSE, and FILE.

SKETCHPAD:

An experimentation "window" that allows you to try-out your UDG ideas during development of the 84 graphic character set.

PRECISION PLOTTER:

An amazingly versatile high-resolution drawing board which includes PAPER choice, INK choice, PLOT, DRAW, DRAW RADIALLY, CIRCLE, ARC, OVER, FILL, instant change of INK colours (including BRIGHT), ERASE, and STORE in permanent memory during development!

All cursor movements can be controlled by Joystick or Keyboard operations, with choices which include FAST or SLOW movement and "Crosswire" or single Pixel cursor!

SCREEN PLANNER!

Combining the best of both worlds! PRECISION PLOTTER **and** UDG Characters! For complete screen planning of graphics. A multi-purpose graphics facility to enable you to produce screen graphics that are the equal of those seen in best-selling software!

All graphic results can be sent to the Printer, saved as SCREEN$ or SAVED as CODE with its built-in machine code routines for instant recall from BASIC.

"PAINTBOX" is such a comprehensive graphics toolkit that it is impossible to describe it all in one advertisement!

The program comes complete with a cassette demonstration of what you could produce with "PAINTBOX" including a 28 page booklet describing in easy-to-understand language how to use it for best results and many tips for storing and using your graphics in BASIC programs.

Of course, "PAINTBOX" is ideally suited for use with Print 'n' Plotter's other great graphics aids.

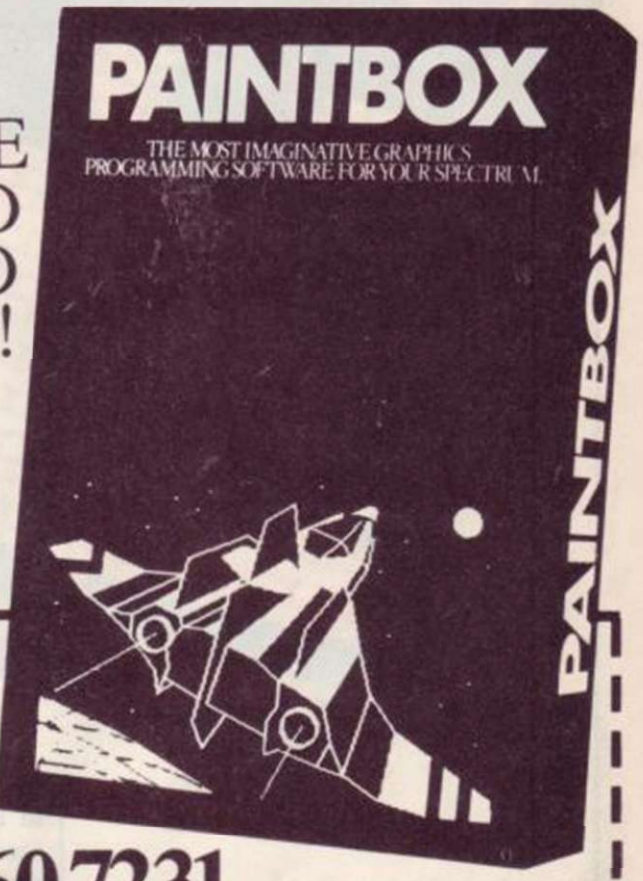
The dedicated programmer will want to use it in conjunction with our ZX SPECTRUM JOTTER PAD — THE ORIGINAL (AND BEST) GRAPHICS PLANNING PAD!

So why not place your order today?

Write now. Phone your Credit Card. Ask at your local computer shop.

At only £7.50 (plus p&p) it's a marvellous investment for all ZX SPECTRUM owners . . . of all ages!

SO SIMPLE A CHILD COULD USE IT!



01-660 7231

24 HOUR CREDIT CARD ORDERING

Post to: Dept YC Print 'n' Plotter Products Ltd., 19 Borough High Street, London SE1 9SE. Please send me:

. . . . "PAINTBOX" SOFTWARE @ £7.50 (+75p p+p total £8.25)

. . . . SPECTRUM JOTTER PADS @ £7.50 (£1.50 p+p total £9)

. . . . SPECTRUM KEYBOARD OVERLAYS @ £2.60 (35p p+p total £2.95)

. . . . 5 ROLLS ZX PRINTER PAPER @ £11.55 (95p p+p total £12.50)

. . . . SELF-ASSEMBLY CONSOLE (SPECTRUM) @ £4.50 (75p p+p total £5.25)

☐ I enclose remittance in full

☐ Please bill my Access/Barclaycard/Visa/Mastercard No:

Overseas orders please add 25% for additional surface mail rate.

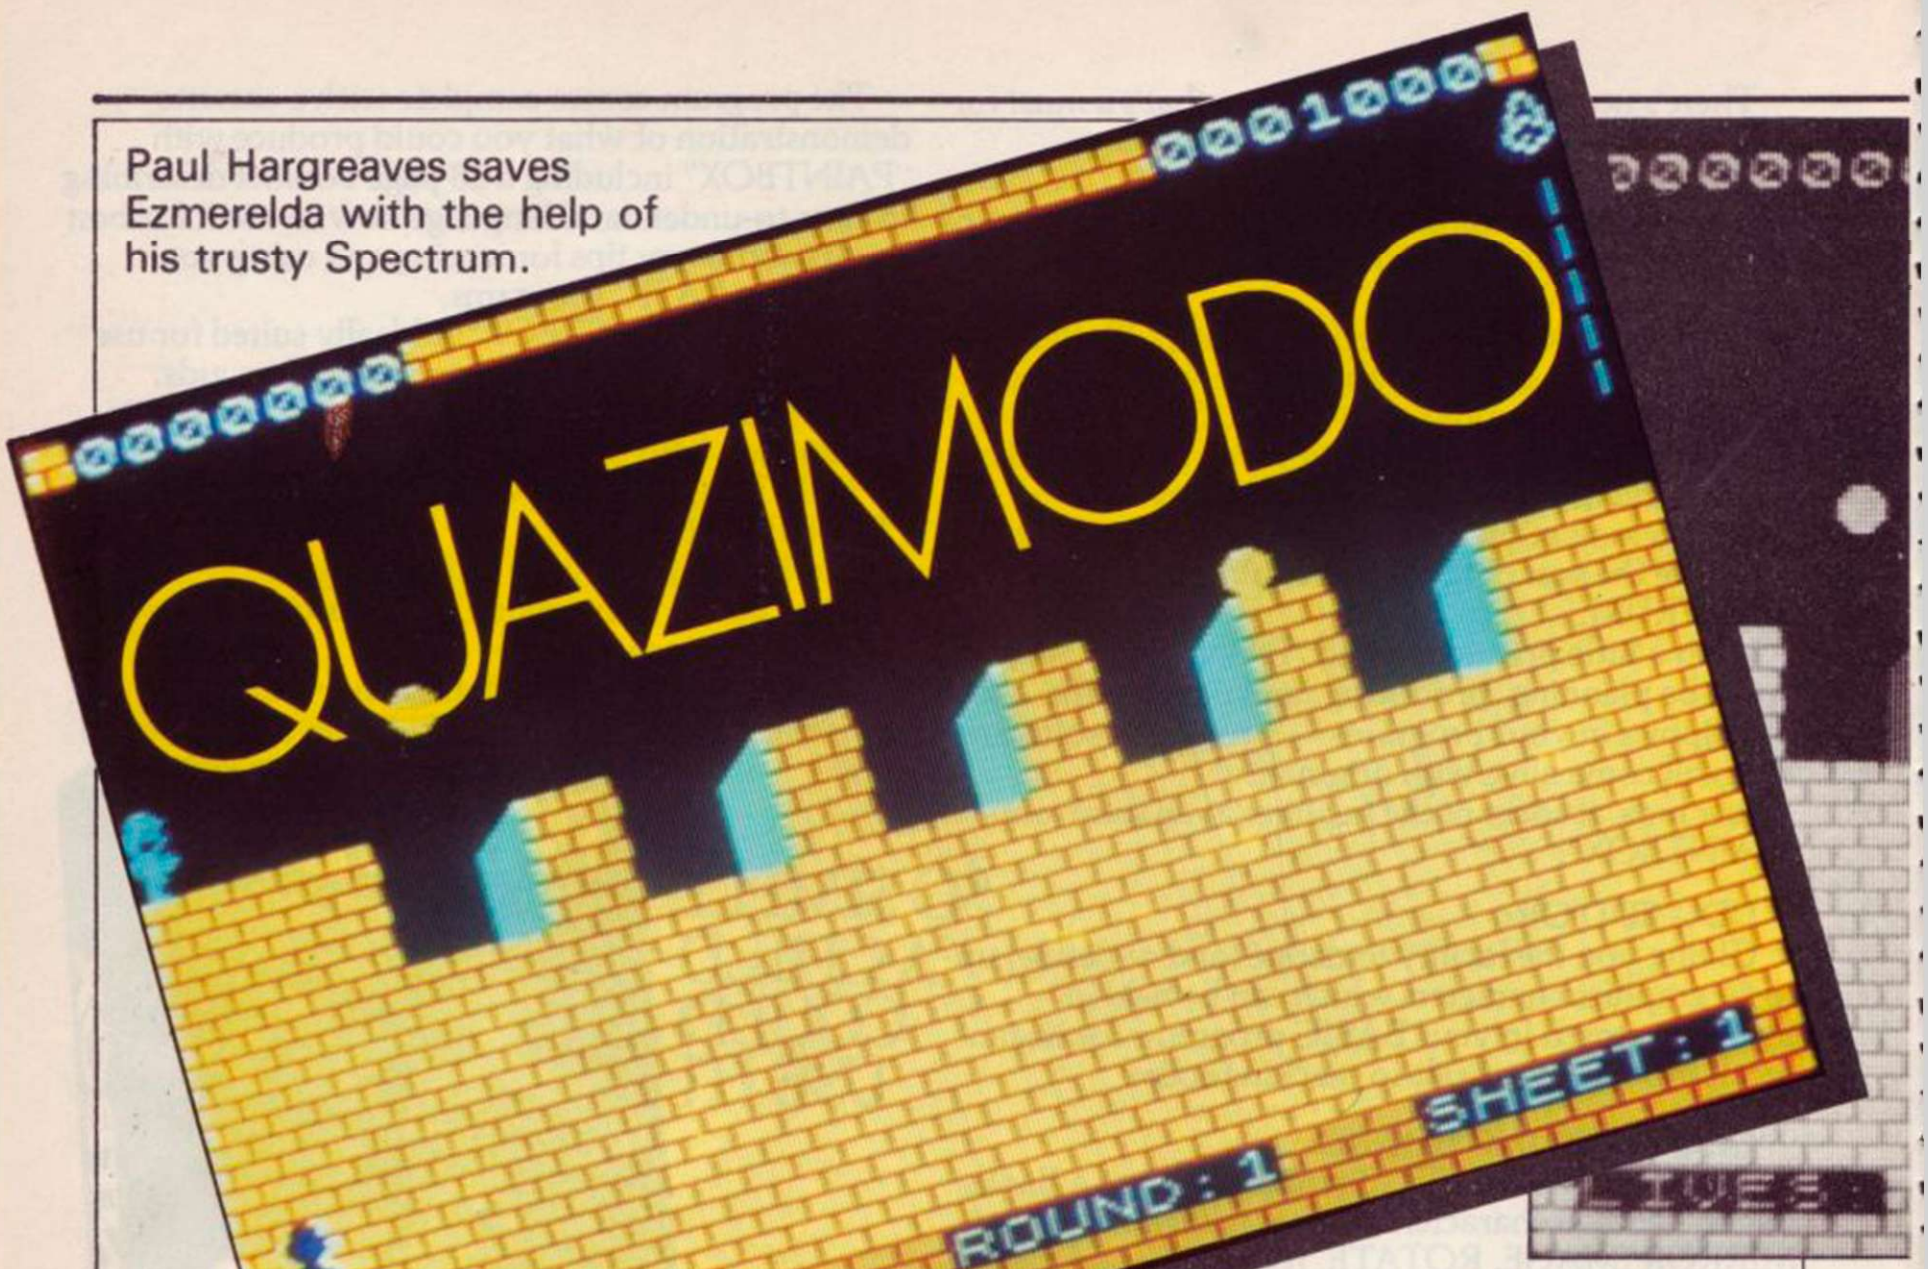
Print 'n' plotter Products

Paul Hargreaves saves Ezmerelda with the help of his trusty Spectrum.



THE PROGRAM IS IN two parts so that it can fit in 16K. The first one is for graphics and the second is the game. The graphics program should be Saved first before typing in the game.

Once the game is running the object is as follows:

To reach Ezmeralda you have to go through five screens. To clear a screen you must reach the bell rope at the far side of the screen. Beware of the sniper scaling the wall. If you take too long he will reach the top and after a while, shoot you with an arrow.

By the way, he gets faster each round, up until the fourth one. If you manage to save Ezmeralda without losing a life then a super bonus is awarded.

PRODUCTS FOR THE VIC-20 + SPECTRUM

SPECTRUM OWNERS! NOW AVAILABLE

THE ULTIMATE IN JOYSTICK INTERFACES

THE FOX PROGRAMMABLE INTERFACE — AN INTERFACE WITH:

- ★ Complete compatibility with all programs.
- ★ In-built memory to store up to 16 different games keysets at one time.
- ★ Battery back-up so no loss of memory after power off. (Battery recharged during use so no replacements are required).
- ★ One switch only for simplicity of use.
- ★ Full casing.
- ★ Through port for further expansion.
- ★ Proven compatibility with the microdrive
- ★ Built-in pseudo Rom facility with room for personnel tool kit.
- ★ Compatible with all Atari-type joysticks.

The superior interface without awkward trailing leads, just plug in and start your game.

LAUNCH PRICE ONLY **£28.50** INCL

SPECTRUM UPGRADES

ONLY **£21.00**

INCLUSIVE (Issue 2 machines only)

FOX ELECTRONICS LTD. **FOX ELECTRONICS LTD.**

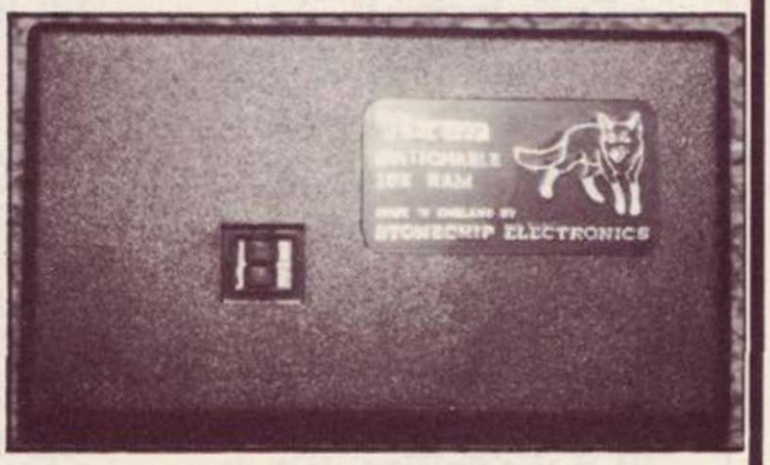
A high quality kit at a new low, low price which simply plugs into existing socket within your Spectrum, no soldering is required and step by step instructions are supplied. Takes your 16K to 48K in simple steps.
PROBABLY THE BEST KIT AVAILABLE AT DEFINITELY THE LOWEST PRICE

AND FOR THE VIC-20

Vixen RAM Cartridge
Switchable between 16K or 8K + 3K.

Gives you the option of full 16K RAM or 8K and 3K RAM in one package. When added to a standard VIC-20 gives 16384 bytes of extra memory in memory blocks 1 and 2 or 3092 bytes of extra memory into the 3K memory block AND 8192 bytes of extra memory switchable between memory blocks 1 and 3

- Fully compatible with available motherboards/modules.
- Simply plugs into the rear expansion port of computer.
- No re-addressing of existing BASIC programs needed.



Only £34.95

SKY SHIELD

Who will stop the rain in Alan Richards' Dragon 32 program?

DEADLY MISSILES are tracking inexorably downward, threatening six cities which it is your job to preserve. You do this by placing your sight at the base of the thread-like vapour trails which are weaving the delicate but deadly tracery of death in the skies above the stricken settlements. Press the fire button and the incoming bombs will be neutralised. You have only a limited amount of energy, so restrain the impulse to pepper the sky with upper atmosphere detonations as you will be left to watch helplessly as your beautiful home planet is pounded into rubble.

Begin by typing in

PCLEAR 8

THE ULTIMATE NAME IN VIDEO GAMES

"YOU REALLY DO LIVE UP TO YOUR BOAST OF SAME-DAY DESPATCH"

(W. A. HACKETT, Harborne)

SOFTWARE SUPERMARKET

At Software Supermarket, we play all the programs we can get for the Spectrum and BBC micro and put just the best of each type into our ads and catalogues. We don't have the biggest list of Spectrum and BBC programs, just the best - from many different program companies, large and small, famous and just-about-to-be-famous. We produce no programs ourselves, so our choice is completely impartial.

We quote reviews from all the magazines to help you decide and, of course, we tell you if your joystick will work! We choose the best programs - which saves you money. And we send them fast - which saves you time hunting round the shops. From over 40 countries you write praising our same-day despatch. But mail order or phone credit card orders only please.

You can now phone VISA or ACCESS credit card orders to us at any time, from anywhere in the world. (ACCESS includes Eurocard and MasterCard.)

32K BBC ONLY

DOGFIGHT *"The most original and entertaining program I have seen for a long time...the graphics and sound effects are excellent." (HomeCompWkly) "An impressive choice of options and difficulty levels." (AcornUser)* World War 1 air battle. Choose your planes and fight your friends(?) to the death. 8 difficulty levels: amazing options. Get it for the graphics and music: play it for the sheer skill! Raves everywhere. Joysticks O.K. (Opus) 32K BBC: £9.95

TRENCH Probably the least exciting name we've heard for one of the most exciting games we've played. Remember the end of 'RETURN OF THE JEDI'? Well, how about flying your Beeb/X-Wing Fighter down the 3D Trench towards the Death Star-style target, dodging the tie-fighters as they attack. 9 skill levels: sensational graphics. Joysticks O.K. (Clares, too) (Virgin) 32K BBC: £7.95.

ROADRUNNER *The graphics are excellent and sound is used effectively...I enjoyed the game very much." (HomeCompWkly)* Race around a racetrack instead of the Galaxy! Very superior graphics and amazing sound. Avoid the cars and obstacles and collect points for checkpoints. 6 skill levels: bonuses: Hall of Fame with name: very catching. (Superior) 32K BBC: £7.95.

747 FLIGHT SIMULATOR *"The best flight simulator around that runs on the Beeb...a must for all budding pilots." (PersCompNews)* By Captain Roger Selby of British Airways. You're in charge of a 747 which you may choose to land at either Heathrow or Gatwick. 11 control keys: clear instrument display: good runway view as you approach: 8-page on-screen flight briefing. The crashes are very realistic! No joysticks. (Dr Soft) 32K BBC: £8.95

48K SPECTRUM ONLY

GROUCHO Find the Hidden Star - and win a trip to Hollywood! A mad adventure with lots of good tunes and great cartoon-type animation. Follow Groucho and the Piman around the USA. Discover the 22 clues, name the Hidden Star, and win the Trip. (Closes 1/6/84) A brilliant follow-up to PIMANIA. No joysticks. (Automata) 48K SPECTRUM: £10.00

GAMES DESIGNER No expert programming knowledge needed to create your own SPRITE-BASED MACHINE-CODE ARCADE GAMES with this program. EIGHT DEMO GAMES included: 4 written by amateurs! Clear 20-page manual. Design your own aliens, backgrounds, sound, quickly, easily - then save the joystick-option games you've made! (Quicksilva) 48K SPECTRUM £14.95.

MANIC MINER *"Certainly the best arcade game around for the Spectrum." (PopCompWkly)* Based on the USA arcade chart-topper 'MINER 2049er'. Superb graphics and sound as you search through 20 screens - each one a different arcade game. 20 screen demo mode: good jokes. Kempston joysticks. (Bug-Byte) 48K SPECTRUM: £5.95.

HALLS OF THE THINGS *For me this is THE game of '83... hours and hours of sheer pleasure." (ZX Comp)* Explore an 8-storey maze, find treasure, avoid nasties. BUT this time you can see exactly where you are and what you're doing: the maze scrolls as fast as you can move. Brilliant graphics (try waving your sword about!) and 19 command keys. No joysticks. (Crystal) 48K SPECTRUM: £7.50.

GO TO JAIL *"Excellent graphics are used to make a very impressive display indeed...highly recommended." (ZX Comp)* The best computer version of the famous game we've ever seen. From 2 to 5 players (including the Spectrum at last!) Every original feature is faithfully reproduced and the screen display is miraculous. No joysticks. (Automata) 48K SPECTRUM: £6.00.

E.T.X. *"Must be at the limit of the Spectrum's capabilities...must rank among the Spectrum classics" (HomeCompWkly)* Enchanting graphic adventure 16 full-screen scenes: 1400 power power zones! 4 skill levels. and, in 48K, E.T.X. speaks to you as well! KEMPSTON, JAGF, QUICKSHOT Joysticks. (Abbex) 16/48K SPECTRUM: £5.95.

32K BBC/48K SPECTRUM ONLY

THE HOBBIT *"Superior to any other game available (Yr Comp) "Takes first place...for quality and value for money." (S. User)* The adventure that made 1983 famous is now alsoavailable for the 32K BBC. Free 285-page illustrated book with clues to this unique real-time adventure. 80 locations: massive vocabulary: 16-page manual: it took 4 people 18 months to write! No joysticks. (Melbourne) 32K BBC/48K SPECTRUM: £14.95

JOHNNY REB A new full-screen graphic battle game: NOT an arcade or adventure game. You fight out a struggle for a river crossing during the American Civil War. 1 or 2 players. Choose your side, equip your army and fight the battle: great battlefield display. Fight to the death or within time limits as you wish. No joysticks. (Lothlorien) 32K BBC: £6.95 48K SPECTRUM £5.50

3D DEEP SPACE **WITH FREE 3D GLASSES!** *"Not just a game with a new gimmick, it's also a classic game in its own right." (Comp&VidGames)* The first ever true 3D program. To destroy the enemy, you must move IN and OUT as well as normal 2D moves! No joysticks. (Postern) 33K BBC/48K SPECTRUM: £7.95.

DICTATOR *One of the most original games I have seen...an excellent game not exhausted by even dozens of plays." (PopCompWkly)* As a banana republic President, you aim to rule as long as you can, while filling your Swiss bank account. Play off the Great Powers as they threaten to Aid you! Escape assasination (it's very noisy.) No joysticks. (dk'tronics) 32K BBC/48K SPECTRUM: £6.95.

David King illustrates a draw and undraw routine for the ZX-81. It is similar to that provided on the Spectrum.

WHEN THE ZX-80 first came out in 1980 with its 4K Basic ROM, Sinclair announced it would soon be producing an optional 8K drop-in replacement chip, which would give moving graphics, trig functions, all keywords direct from the keyboard, plus inverse graphics, and 8½ digit floating arithmetic. However it also would have Read, Restore and Data, plus Draw and Undraw, and a number of other features.

Very soon after Sinclair launched the new 8K ROM, it decided to delay introduction of these features and design a printer. The new printer routines necessitated the space the extra facilities took up, and so when the 8K ROM finally came out Draw and Undraw were not there. In addition, Sinclair designed a completely new computer to go around the 8K ROM, which it called the ZX-81. It had a steady display which was sadly lacking on the ZX-80 with 8K ROM.

I decided it would not be all that difficult to give the ZX-81 Draw and Undraw facilities like those on the Spectrum. Useful routines which I might want to include in Basic programs I find easiest to place in Rem statements. This Draw routine draws as straight a line as possible in pixels from the last point plotted to a relative position indicated by the Vectors Poked into addresses 16507 and 16508. There are only two USR addresses to remember, one for Draw and one for Undraw, just as there are Plot and Unplot.

Type the Hexloader into your ZX-81, line 1 contains 120 full-stops.

Then type Run Newline and enter the 120 Hexcodes in figure 1. You can enter them singly, followed by Newline, or enter them in batches, then Newline. Try not to make any mistakes, even one mistake may make the routine crash.

When the report code 0/90 appears type 10 Newline. Line 90 ensures that when you type 10 Newline, lines 10 to 90 are all deleted, we no longer need the Hexloader part of the program. You should now have an uneditable line 0 which looks like that in figure 2 — chaos.

Line 0 contains the Draw routine, the characters you can see are the equivalent of the hexcodes you entered. At this point Save the Rem statement on tape.

When you have checked that it has Saved properly add lines 10 to 40 to your Rem statement, and type Run Newline — see figure 3.

If all is well a diagonal line will be drawn from the bottom left-hand corner of the screen to the top right-hand corner.

Notice that the numbers in a Draw statement can be negative, although those in a Plot statement cannot. If x (16507) is negative the finishing place will be x pixels to the left, instead of to the right. If x is zero the line will be vertical. If y (16508) is negative the finishing place will be y pixels down, instead of up. If y is zero the line will be horizontal — see figure 4.

One thing to ensure is that x and y are not both zero, this causes the Draw routine to get a bit muddled, however Break brings it out of its misery.

(continued from previous page)

Try the short programs for a demonstration of the ease with which graphics can be created.

If you do not get the required result — or the program crashes, you have probably made a mistake in entering the Hexcodes. Use the program in figure 6 to check through the Hexcodes. If you want to change an entry type in the correct Hexcode, then press Newline, otherwise press Newline on its own.

If you understand vector drawing, ignore this section. The statement Draw to draw a straight line on the Spectrum takes the form:

DRAW x,y

Using this program you have to Poke x and y into memory locations, in addition the Rand USR 16514 command does not set the Random seed. You could equally well use Print USR 16514 or Let A=USR 16514, and neither a number would be printed nor a value assigned to A; control is passed to the next line.

The starting place of the line is where the last Plot or Draw statement left off — this is called the Plot position; New resets it to the bottom left-hand corner (0,0) — and the finishing place is x pixels to the right of that and y pixels up. Notice that Draw on its own determines the length and direction of the line, but not its starting point.

You can experiment with a few Plot and Draw commands — see figures 7 and 8.

Figures 9 and 10 make use of the interference patterns between the individual pixels of lines to create interesting patterns.

Figure 11 draws a number of random direction lines, each leaving off from where the last ended.

As I mentioned earlier, it is also possible to Undraw as well as Draw lines. To Undraw lines use Rand USR 16520. The program in figure 12 illustrates this.

NEW: Speech & Music for ZX81 & Spectrum!

ZXM SOUND BOX

ZXS SPEECH SYNTHESISER

£29.95

only £24.99

- 3 channel sound chip gives a huge range of possible sound effects. Programmable pitch, level, envelope and noise source.
- For the ZX81 or Spectrum - no adaptor needed.
- Just plug it in. Other peripherals or Ram Pack can be plugged into the ZXM.
- Built in amplifier and loudspeaker.
- Audio in out socket, can be used to amplify the Spectrum 'beep'.
- 9-pin I/O socket can be used with cheap Atari/ Commodore type joysticks.
- Comprehensive manual includes many example routines.

- For the ZX81 or Spectrum - no adaptor needed.
- Let your computer talk back!
- 'Allophone' synthesis gives an unlimited vocabulary.
- Active filtering for improved speech quality.
- Other peripherals or RAM Pack can be plugged into the ZXS.
- Output to normal audio amplifier or to our ZXM Sound Box.
- Manual gives full details on how to use the ZXS, with many examples.

And Don't Forget Our Books;

EXPLORING SPECTRUM BASIC: £4.95. The book of answers. Explains Spectrum BASIC programming techniques in more depth than was possible in the Sinclair manual, illustrated by over 50 full programs. 192 pages.

THE EXPLORERS GUIDE TO THE ZX81: £4.95. The book for the ZX81 enthusiast. Games, application and utility programs plus much useful information on machine code and hardware. "Immediate and lasting value" (PCW).

All prices include U.K. carriage and VAT where applicable. Overseas customers add £1.50 per item for surface mail.

timedata

ZX 81 Spectrum Hardware

KEYBOARD FOR USE WITH ZX 81 SPECTRUM

Our cased keyboard has 52 keys, 12 of which form a numeric pad. This enables you to cursor with one hand — a boon for anyone entering large amounts of numeric data. The 12 keys comprise 1-9 numeric plus full stop and shift keys, all in red, to distinguish from the main keyboard keys which are in grey, the keys contrast with the black case to form a very attractive unit.
The 15" x 9" x 2½" case has been designed to take a ZX 81 or Spectrum computer. Simply remove it from its original case and screw the fitted bosses into the marked screw holes. 16K, 32K or 64K can also be fitted to the motherboard inside the case (81 model only). All connectors are at the rear i.e. Power, Mic, Ear, T.V. and the expansion port. The case is also large enough for other add-ons like the power supply to be fitted, giving a very smart self-contained unit with which other add-ons e.g. printer etc. can still be used.
Our ZX Professional keyboard offers more keys and features than any other model in its price range making it the best selling best value keyboard currently available and comes complete with simple fitting instructions.

SPECTRUM MODEL

Supplied with Spectrum legends, and a slightly different base for fitting the Spectrum, again all connectors are at the rear and there is plenty of room for the power supply (and other add-ons). Please specify on your order whether you require the ZX81 or Spectrum model.

LIGHT PEN

The LIGHT PEN enables you to produce high resolution drawings on your own TV screen simply by plugging into the ear socket of your Spectrum. The controlling software supplied with the light pen has 16 pre-defined instructions, chosen from a menu positioned at the bottom of the screen next to the pen.. You can change colour (Border, Paper, Ink), draw circles, arcs, boxes, lines, fill any object with any colour, and insert text onto the screen at any chosen place, you can also draw freehand. There is a feature to retain the screens and animate. On the 48K Spectrum you can retain 5 screens. You can also use the machine code on its own in your own programs, for selecting out of a menu etc. The software provided will return with the X,Y, cords for it's position on the screen. The LIGHT PEN is supplied with a control interface, to adjust the sensitivity/pen alignment. Should you require further details please send a S.A.E.

£19.95

16-64 MEMORY FOR ZX 81

16K Memory £22.95
64K Memory £52.95
16K (Uncased) £19.95
64K (Uncased) £49.95
SPECTRUM Memory MKII £30 / MKI £30

4K GRAPHICS ROM

This module unlike most other accessories fits neatly inside your computer under the keyboard. It comes ready built fully tested and complete with a 4K graphic ROM, giving an unbelieveable number of extra pre-programmed graphics and turns the 81 into a very powerful computer with a graphic set rarely found on larger more expensive machines. In the ROM are lower case letters, bombs, bullets, rockets, tanks, a complete set of invaders, graphics and that only accounts for about 50 of them, there are still approximately 400 left (that may give you an idea as to the scope of the new ROM). It also has a spare holder on the board which will accept a further 4K of ROM/RAM. This holder can be fitted with a 1K/2K/RAM and can be used for user definable graphics so you can create your own custom character sets.

NEW LOW PRICE £19.95

WINNING IS WITHIN YOUR GRASP

Joystick and Interface for Sinclair Spectrum with these features to give you endless hours of enjoyment.

1. Super positive response fire button.
2. Firm suction cups for stable one hand operation.
3. Snug fit hand moulded grip.
4. Additional fire button.
5. Extra long 4ft lead.

The interface supplied with the quick shot TM has the facilities for two Joysticks to be connected.

The first port simulates 6789 & 0 keys. The second port simulates in (31) command. It will run any Software.

1. Using keys 6, 7, 8, 9 and 0
2. Having redifinable key function.
3. Using in (31) i.e. Kempston.
4. Any Software you write yourself.

INTERFACE AND ONE JOYSTICK
£22.95

SPECTRA-SOUND

The so-called speaker in your Spectrum is really on a 'buzzer'. With the DK Tronics "SPECTRA SOUND" you can generate fully amplified sound through the speaker on your TV set. SPECTRA SOUND is a very simple but highly effective add-on. This means that you no longer have a faint beep but a highly amplified sound, which can be adjusted with the TV volume control. The SPECTRA SOUND fits compactly and neatly inside the Spectrum case and is connected by three small crocodile clips.

NEW AT ONLY £9.95

FLEXIBLE RIBBON CONNECTOR

If you have ever had white outs or system crashes this could be the answer. It stops the movement between the computer and the RAM expansion, it is supplied with a ribbon 6 inches long, with a male connector at one end and a female at the other.

ONLY £10.00

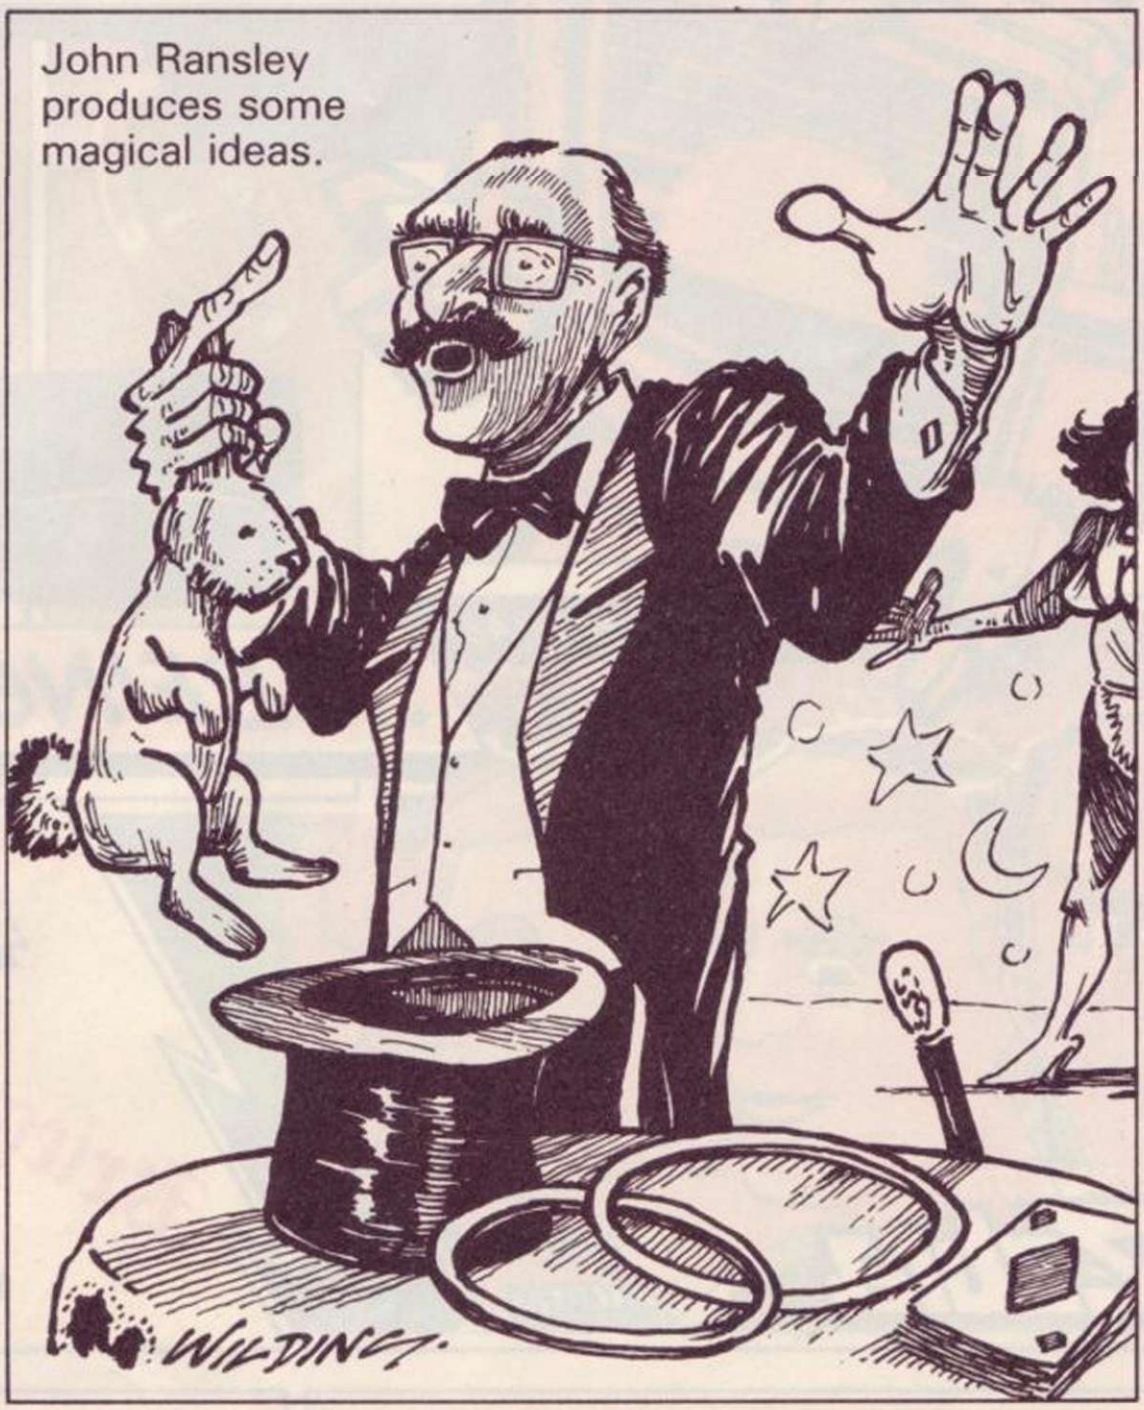
TRICKS FOR YOUR VIC

John Ransley produces some magical ideas.



IF, LIKE ME, YOUR ownership of a Vic-20 is now into the second honeymoon stage, you will probably share my view that Commodore probably produces the best home computers in the world and definitely produces the worst documentation. So once you have recovered from the user's manual and have come to realise that there is more to Vic's life than jerky seagulls and a lot of bouncing balls, it soon dawns that Vic has some great little side orders if only you can find them on the menu.

The following collection comprises orginal thoughts and ideas I have culled from various sources and tailored to fit the Vic. I make no claims for the profoundness of these routines; but I believe many of them will hold a few surprises for you.

Nothing up my sleeve

■There is a way of losing the ubiquitous question mark — and accompanying blank space — generated by use of an Input statement. It not only makes for tidier screen displays but also overcomes what is often an inappropriate character — for input screen prompts do not always take the form of a question. Here is one example of the technique:

```
10 OPEN 1,0:PRINT "TYPE YOUR NAME:";:
   INPUT #1, N$:PRINT
20 PRINT "THANK YOU "N$:CLOSE 1,0
```

■Both Tab and SPC functions can be great timesavers; they do away with many of those cursor-right and cursor-left keystrokes for a start! But one of Vic-20's quirks is that it will not allow you to use either Tab or SPC as the *first* item preceding a Print statement. If necessary, introduce a dummy statement — such as a screen clear or cursor home — before calling Tab or SPC.

■Could you use a random number generator that you can still influence to some extent? Try this:

```
10 X=INT(RND(1)*TI/200)+1
20 PRINT X
30 GOTO 10
```

This routine produces three-digit numbers, using Vic-20's clock as a source of true randomisation. But change the divisor in line 10 to any lower than 150 and four-figure numbers will start to occur. Progressively reducing the divisor will relatively increase the chances of a four-digit result, which could be a useful quality in some games of chance. Similarly, a divisor of 1800 or more will produce only two and single digit random numbers.

■When you are working on long programs — and particularly those involving a lot of text or figure work — it helps to introduce some blank spaces between significant blocks of the program, which will make for easier reading on screen or printout. The traditional way of doing this is to use one of the following forms:

```
10 REM
10 :
```

In other words, a Rem statement or single colon. Neither look particularly elegant, specially if you want to introduce several blanks at a time. But here is a routine that produces a line which is truly blank except for its number.

```
10 A LINE OF LISTING
20 """(DELx2) (CTRL) (RVS ON) (SHIFT) -
(SPACE) (RETURN)
30 A LINE OF LISTING
```

This may seem a little complicated, but it soon becomes second nature. In case line 20 fazes you, tackle it this way. Press the quotes key twice; press the Delete key twice — thus cursoring back over the quotes you have just entered; hold down the Control key and press Reverse On; hold down the Shift key and press the minus sign key; finally, hit Return. When you come to List these lines, only the line number will appear.

■Remember the byte-saving — but often overlooked — value of using the integer qualifier % whenever setting up DIMs and arrays. For example, the following single line gobbles up no fewer than 637 bytes:

```
10 DIM A (10,10)
```

but squeeze a % after the A and this statement will then occupy just 275 bytes of memory. Prove this to yourself by Running both versions of the line and typing in direct mode ?FRE(X) and Return each time.

■The Super Expander is one of the first add-ons the Vic-20 owner usually buys — not least because it is excellent value with its 3K of extra memory in addition to 27 new commands for handling hi-res graphics, music, joystick and other input values, and function key operations.

Before your very eyes

Although the Super Expander does not shift Vic's significant memory locations, there are times when you will want to take it out of service. But frequent removal and refitting won't do the delicate cartridge slot contacts —

or your temper — any good. There is an easier way. Simply typing, as a direct statement,

SYS 64850

disconnects the expander and returns Vic-20 to normal working. To re-enable the Super Expander, type

SYS 41031

Incidentally, it is sometimes important to remember that Vic's screen shrinks from 22x23 characters to only 20x20 when using the Super Expander's Graphic command.

■Here are two ways of thwarting the pirates — more about others later. Location 775 usually holds a value of 199; so enter Poke 775,198 or Poke 775,200 as a direct or program statement and it becomes impossible to List any program in memory.

Better still, Poke 818,32 corrupts the Save operation; the screen prompt refers only to the data cassette's play key and even pressing record as well will not transfer the program. Remember to Poke 775,199 and 818,133 to restore the List and Save commands respectively.

■Dim and Data statements are among the most common causes of bugs — and Vic's apparently imprecise error messages do not always help to pinpoint the real root. It helps to remember that an out-of-data error will misleadingly blame and identify the line containing the relevant Read statement.

Almost always, however, the real fault will be found in the Data line or lines; a comma missing or replaced by a full stop, an absent digit, or some other discrepancy between the number of items the Read statement states should be taken on board and the total making up all the Data lines.

Likewise, if a string is wrongly Dimensioned, the error prompt will cite the first line to call the variable concerned and not that containing the DIM statement itself.

■Still on Data statements, some Vic programmers get annoyed at Vic's apparent inability to accommodate punctuation within them — a facility that is often useful when, say, constructing multi-clause sentences in adventure programs.

Data items can include punctuation — and can even take the form of a single comma or colon — provided each is enclosed in quote marks. Try this example:

```
10 READ A$
20 PRINT A$
30 DATA ",",".",":"
40 GOTO 10
```

■The way program lines whizz by when you List, even when the Ctrl key is held down, it is no wonder that debugging the Vic can be an even more brain-blustering experience than ever. You can watch your program lines building before your eyes with the direct mode statement Poke 37879,0 and Return before Listing.

Holding down the Ctrl or Shift key slows the scrolling speed even more. Poke 37879,69 restores normal operation.

■Have you ever envied those colourful title screens used in commercial programs and thought to yourself, "There but for my 3.5K . . ."? Then you must have overlooked Vic's ability to generate and hold a display on your TV or monitor screen even when you have executed a New statement and wiped memory clean. Type this:

```
10 PRINT CLR
20 PRINT SPC (200)"YOUR TITLE SCREEN"
40 NEW:END
```

Type Run and hit Return — now List and you will see that memory is empty, ready for the main program, perhaps, which can be Loaded in the usual way.

Only, did you notice how the Ready prompt spoiled the display generated by line 20? You can lose it by adding the following line:

30 PRINT " CTRL WHITE "

Hit Stop and Restore to return normal visibility.

■The potential of Vic's graphic set is easily underrated and under-utilised; it is difficult to imagine how they can be used to construct anything more than a square-eared cat or cuboid loco. The following little routine may help to set your imagination alight:

```
10 POKE 36879,25: PRINT "CLR"
20 CH=INT(RND(1)*254)+1
30 POKE 3687,CH
40 S=7678:C=INT(RND(1)*128)+1
50 P=INT(RND(1)*255)+1
60 X=INT(RND(1)*10)+1
70 N=INT(RND(1)*44)+1
80 FOR J=O TO 506 STEP N
90 POKE S+30720+X+J,C
100 POKE S+X+J,P:NEXT J
110 FOR D=1 TO 600:NEXT D
120 GOTO 20
```

Complex magical images

You can freeze any character/colour combination you particularly like by hitting the Stop key, then Run and Return to continue. If you are fortunate enough to possess a VCR, you can also videotape the effects this program fleetingly displays and view them again later, as many times as you like.

■Like to hear some alien vibes? Lay this on your Vic:

```
10 POKE 36878,15
20 FOR X=1 to 18:POKE 36874,252-X
30 NEXT:POKE 36874,0:GOTO 10
```

Or, to back up that brilliant Chopper program you are just about to write:

```
10 POKE 36878,15:FOR X=255 TO 128 STEP
-12
20 POKE 36877,X:NEXT:GOTO 10
```

TO save you the chore of updating the colour code location every time you Poke a character into screen memory, set up these variables at the beginning of any program needing them:

```
10 SC=7680:CC=SC+30720
```

The number 30720 is, of course, the difference between the first screen location — 7680 — and the first colour memory map position — 38400.

■Another wheeze to give those pirates problems; drop this line in early in your program:

```
10 POKE 808,PEEK(808)+2:POKE 37150,
PEEK(37150)AND 127
```

This serves to disable the Run Stop and Restore keys, thus making List and Save impossible to execute. To restore normal operation, enter this line:

```
90 POKE 808,(PEEK)808-2:POKE 37150,PEEK
(37150)OR 127
```

■The only trouble with Pokes which disable certain keyboard functions in a bid to combat plagiarism is that they can be identified and wiped by simply Listing the program before it is Run. There is a much better way of safeguarding your programming secrets — remembering that just one line of novel or ingenious technique can have a value much greater than its application is just one particular program.

First, List the program you want to protect and select the first line for attention; perhaps one containing some crucial Peeks and Pokes or formulae. The only qualification is that it must contain fewer than 17 characters — including the line number and any spaces. At the end of the existing line, add exactly this:

:REM""

That is, a colon hard up against the final character of the existing line followed by Rem in capitals and two quote marks. There should be *no* spaces between these six new characters. Now hit Return.

Next, cursor back to the space immediately following the new line ending and hit Del once to remove the second quote marks. Now hold down Shift and press the Inst key precisely 22 times. Release Shift and press the Del key precicely 22 times. Now hit Return.

That's all there is to it. Clear the screen and List the program again. You may see your newly-protected line appear for a fraction of a second and then vanish. The same will occur whenever it is Listed — even if this doctored version of your program is Saved and Loaded again — so do not forget to keep your own copy of the unexpurgated Listing.

You can, of course, repeat this procedure with as many more lines as you wish — provided none of them exceeds 17 characters in length.

■Wait is a much less long-winded version of Get, with its emply quotes and all the rest, but it works with only a couple of keys. One is the Commodore flat key, as in this example:

```
10 PRINT "TOUCH C= KEY TO CONTINUE"
20 WAIT 653,2:WAIT 653,2,1
30 PRINT "OK — CONTINUING"
```

Substituting 1s for the 2s in line 20 will allow you to use the Shift key instead — so alter line 10, too.

Touching any other key when this routine is called — including Run Stop — has no effect — a built-in mug trap.

■Some more keyboard tricks worth keeping up your Qwerty. Poke 808,100 not only disables the Run Stop key but also makes your program indecipherable if Listed. Restore with Poke 808,112. Knock out the keyboard completely with Poke 649,0 and make it live again with Poke 649,10. If you want a cursor flashing with Get statements the way it does with Input, Poke 204,0. The usual value is 1.

Poke 211 with any number between 0 and 22 to set the cursor's column position, and 0 and 23 if you want to Poke 214 with a new row location. Only the space bar and cursor controls offer auto repeat the way Vic comes out of the box. But Poke 650,255 will make every key repeat faster than a bowl of radishes; Poke 650,0 disables this facility.

■Start enjoying some screen acrobatics with the locations which control Vic's display area. Location 36864 usually holds the value of 12. Try this:

```
10 FOR L=12 TO 65
20 POKE 36864,L :NEXT
```

The screen's vertical position is normally

(continued on page 151)

PROGRAMS WANTED

SPECTRUM DRAGON
BBC ZX81

WORK FORCE

THE BIGGEST LITTLE SOFTWARE HOUSE AROUND

THE WINGED AVENGER

Fast and furious. Two versions of the same game on the SPECTRUM tape,, the original and the NEW VERSION. SOUND, GRAPHICS, SEVEN SKILL LEVELS. Full ARCADE ACTION including THREE WAVES OF ALIENS, HIGH SCORE, REFUELLING, RAPID REPEAT FIRING, SMART BOMBS and LASER SHIELD. P.C.W. "ONE OF THE BEST SINCLAIR GAMES YET". HOME COMP WEEKLY "FOUR STAR WINNER". 16k ZX81 VERSION "PROBABLY THE FASTEST ZX81 GAME". NOTED as EXCELLENT by the INTERNATIONAL BUREAU OF SOFTWARE TEST. 16k ZX81 & 16+48k SPECTRUM VERSIONS AVAILABLE. **NOW £5.00.**

DO NOT PASS GO

Now the SPECTRUM VERSION IS READY D.N.P.G. is a complete simulation of THAT BOARD GAME you know PARK LANE and all that. Up to SIX PLAYERS can compete with the MICRO doing all the work. Acts as DICE THROWER, BOARD, RENT COLLECTOR, UMPIRE, BANK, RULE BOOK, ACCOUNTANT, ESTATE AGENT and ASSET RECORDER. SUPERB GRAPHICS by GARRY KENNEDY (thanks mate). GAME SAVE with winner so far report. Complete with full instructions. The ULTIMATE in FAMILY GAMES. DON'T MONOPOLISE YOUR MICRO. AMAZE your friends and family. (Can you imagine your GRANNY on a MICRO?). A 16k ZX81 version also available. 48k SPECTRUM or 16k ZX81 versions **ONLY £6.95.**

YAHTZI 48K

48k SPECTRUM. All ELECTRIC VERSION of the classic dice game of STRATEGY. More CHUNKY graphics from GARRY KENNEDY. No extras required up to SIX PLAYERS can compete, or practise if you wish. SPECTRUM acts as UMPIRE, SCORE SHEET and DICE THROWER. Update your games cupboard for just **£5.50.** 48k only.

UP TO 6 PLAYERS **£5.50**

STOP PRESS
MORE SPECTRUM MAGIC

No time for the pictures all ready now!!!!

DOOM BUGS

We vote this game as the best arcade game submitted. REMEMBER that comfortable feeling when "IT ALL FELT RIGHT" and that ANTICIPATION before each NEW GAME. Well IT'S BACK and it really does FEEL GOOD. Trapped in GRUBBER'S LAIR the aim is to escape to the next level by eating your way through the trapdoor whilst being pursued by BUGS. BUBBERGRUBBERS and GRUBBER HIMSELF. GREAT GRAPHICS, AGF JOYSTICK COMPATIBLE, FAST, TWO LEVELS and you are not going to believe how much fun it is. PRO-ARCADERS ONLY £5.50 for 16-48k version. ABSOLUTELY MAGIC!!!

TRIPLEX

Our CONTENDER for BEST PROGRAM GRAPHICS of the YEAR. TRIPLEX a 3 part game featuring the BEST GRAPHICS YET!!! MOONSHINE ALLEY, a LOW gravity ASTEROID belt in HIGH RES SPLENDOUR. CAKEWALK a SLICE through a RAINBOW VORTEX. ALIEN ALLEY a fight to the DEATH with the HUNTER KILLER SHIPS. A PRO-ARCADE game with a difference. MORE skill than PACE. STATE OF THE ART GRAPHICS. £5.50 for FREE VIEWING.

ENIGMA

This one's for THINKERS ONLY. Based on the BLACK BOX principle a game with PURE RULES and requiring a high degree of REASONING and DEDUCTIVE SKILLS. Each game lasts HOURS and becomes PROGRESSIVELY more DIFFICULT. It's a PUZZLE why it's so CHEAP at £5.00.

PIRATE ISLAND

WANTED ADVENTURE FREAKS. Join forces with THE PIRATE and search the ISLAND for the TREASURE. A FAST RESPONSE program ABSOLUTELY NO RANDOM FEATURES. Can you trust a PIRATE. There's BUT ONE WAY to FIND OUT. FOR £5.50 you get a whole ISLAND full of TREASURE, TRAPS, RED HERRINGS and many hours of FRUSTRATING FUN. A TRADITIONAL ADVENTURE. 48K ONLY.

NEW RELEASE
"JAWS REVENGE"
48k SPECTRUM

Disappointed with his box office returns JAWS brings his GORY EATING HABITS to the SPECTRUM in his very own ARCADE GAME. JAWS eats his way through a mixed diet of DIVERS, BOATMAN, JELLYFISH, SWIMMERS and FISH. You control JAWS in this FAST MOVING trail of carnage. Avoid DEPTH CHARGES, EXPLODING JELLYFISH, HARPOONS, ARMED SCUBA DIVERS and EAT everything you can. 5 LIVES, SCRAMBLE type SEA BED, current and HIGH SCORE. ALL MACHINE CODE and FAST, DEMO SCREEN. BONUS LIVES, FASTER GAME FOR 10,000 POINTS. WREAK HAVOCK ON THE HUMAN RACE. "THE BEST GAME YET" ANIMAL RIGHTS MOVEMENT". 16 & 48k SPECTRUM **£5.00.**

MATCALC
16 & 48k SPECTRUM

This is our SPREADSHEET PROGRAM with a difference. This ONE has the option of the standard display or a 64 CHARACTER per LINE display or printout. Ideal for WHAT IF, CASH FLOW PROJECTIONS, and analysing related figures. FORMULA may be MATHEMATICAL or LOGICAL. MENU DRIVEN. SAVE and LOAD to TAPE. FULL instructions and TWO matrices on TAPE with a full explanation of their formation. P.C.W. "MORE FLEXIBLE overall than . . . ". Both the 16k & 48k versions on ONE TAPE. SIMPLY HUNDREDS OF USES. **JUST £7.00.**

"SHIFTY" 48k SPECTRUM

A WORD PROCESSOR FOR THE SPECTRUM. "SHIFTY" was designed to overcome the limitations of the standard SINCLAIR HARDWARE, specifically the PRINTER. Using the STANDARD PRINTER all output over 32 CHARACTERS PER LINE is PRINTED SIDEWAYS allowing pages to be formatted from the printer paper. Any width from 20 to 80 characters per line may be specified. Text can be viewed prior to printing and can be JUSTIFIED to the RIGHT MARGIN. SHIFTY will WORD SEARCH, MOVE PARAGRAPHS, SPLIT PARAGRAPHS, APPEND PARAS, SAVE and LOAD from TAPE, INDENT PARAS and allow standard PHRASES to be STORED and accessed from DATA STATEMENTS using DEFINED KEYS. EDITING is ON SCREEN using 4 way CURSOR MOVE. SHIFTY comes complete with a sample letter and full instructions. Requires ZX printer. **ONLY £7.50.**

JAWS REVENGE!

PROGRAMMERS DREAM

16k or 48k SPECTRUM.

An advanced SPECTRUM TOOLKIT. Comprised of just 1450 BYTES of POSITION INDEPENDENT MACHINE CODE. RENUMBER lines or blocks. Allows START, FINISH, INCREMENT and new START to be defined. BLOCK or line MOVE including RENUMBER to fit available GAP. RENUMBER will renumber ALL GOTO, GOSUB, LIST etc without further action. CHANGE strings (NAMES or CONTENTS. DUMP VARIABLE NAMES and CONTENTS to DISPLAY PROGRAM SIZE with or without VARIABLE SIZE. This package is FAST, CLEAN, PRODUCES ERROR MESSAGES and is WELL DOCUMENTED. S.USER "WORKS LIKE A DREAM" SPECTRUM ONLY **£6.95.**

WORK FORCE GIVE-AWAY

3 WELL REVIEWED MACHINE CODE ARCADE GAMES on one tape as a SAMPLER. HIGH NOON and BASE INVADERS were rated as the best versions available and SCRAMBLE even beat the reviewers when they tried it.

BASE INVADERS
THREE SPEEDS the fastest INVADERS. HIGH SCORE and SHIELD AVAILABLE if you CAN'T HANDLE the ACTION.

HIGH NOON
SMOOTHIE GRAPHICS, FAST ACTION and GOOD SOUND. The best COWBOY SHOOT OUT.

SPECTRUM SCRAMBLE
EIGHT DIRECTIONAL MOVEMENT. LASERS, BOMBS, ROCKETS, INSTANT RESPONSE, CONTINUOUS SCORING, SOUND, FUEL DUMPS, RED METEORS, DEFENDER CRAFT and HIGH SCORE. Classic arcade action.

Three PRO-ARCADE GAMES worth £13.95, yours for £6.50. LESS THAN HALF PRICE. THE BEST VALUE EVER FOR 16 & 48k SPECTRUM.

CLONE

"CLONE" is probably the BEST BACK UP TAPE around. We are confident it will make BACK UP COPIES of your current SOFTWARE. CLONE will COPY both HEADERLESS and STANDARD TAPES. CLONE will PROTECT your SOFTWARE INVESTMENT by ensuring you have BACK UP. All PROTECTION routines are COPIED and a description of FILE TYPES is GIVEN. If you want a COPY TAPE then BUY the BEST. CLONE is AVAILABLE on the STRICT UNDERSTANDING THAT IT WILL NOT BE USED TO INFRINGE COPYRIGHT. TAPES up to 38k can be copied, COPIES are made of each program as it appears on tape. UNLIKE SOME COPY TAPES "CLONE" DOES NOT NEED TO BE RELOADED AFTER EACH SAVE. CLONE copies TAPES that can't be BROKEN INTO. USE our knowhow for just **£5.00.** ALL SPECTRUM. P.S. CLONE WILL COPY MOST COPY TAPES SHOULD YOU WISH.

DISPLAY

How would you like 273 different USER DEFINED GRAPHICS on a 16k SPECTRUM or a FULL 336 on a 48k. All can be displayed on screen at the SAME TIME. U.D.G's are stored as PAGES and any two pages may be EXCHANGED in MEMORY. FILES may be SAVED or LOADED from TAPE at a USER specified location. TURN a UDG one quarter or half turn. FLIP a UDG over, REVERSE a UDG, EXPAND a quarter UDG into a FULL CHARACTER. MOVE a UDG one PIXEL at a TIME, UP, DOWN, LEFT or RIGHT. FIVE complete TAPE FILES are INCLUDED on tape ONE CONTAINING a 64 CHARACTER DISPLAY. DESIGN GRID for constructing CHARACTERS and SHAPES. FULL INSTRUCTIONS and ANIMATED DEMO SCREEN. **£7.00.** 16 & 48k SPECTRUM.

ZX-81 16K USERS IMPORTANT ANNOUNCEMENT

WORK FORCE now appointed as U.K. distributor for VENTAMATIC SOFTWARE of SPAIN. 6 of the BEST PRO-ARCADE games LAUNCHED NOW!!. SPECTRUM FOLLOWS. "STATE OF THE ART" for PRO-ARCADERS ONLY. Special launch offer each TAPE contains 2 MACHINE CODE MASTERPIECES for JUST £4.50. NO RUBBISH.

DANGER TRACK

RACE a CAR through a maze 30 times larger than screen. Collect 10 FLAGS. BEWARE 5 ATTACKERS, THROW SMOG BOMBS. ON SCREEN RADAR MONITORS WHOLE MAZE. SPECIAL RESOLUTION.

AND

BUMPER THUMPER

PURSUED by the CHASER you have to PUSH the THUMPERS off SCREEN. All BLOCKS are SLIDERS but don't go near the CHASER or you get "YOUR BUMPER THUMPED" GOOD GRAPHICS.

PHANTOMS

PHANTOMS a HAND CRAFTED version of "...MAN" TWO LEVELS of PLAY, THREE MAZES, ENERGY DOTS, POWER PILLS, FRUITS, FOUR GHOSTS, ESCAPE CORRIDORS, and GREAT GRAPHICS. PRO-ARCADERS only NO FUMBLERS.

AND

CASHBOOT

A MANIC BOOT driven relentlessly by MACHINE CODE. LEAP from square to square knocking out FLAGS. BEWARE the BOOT crashing around. One false move and it's "cobblers" for you. SPECIAL GRAPHICS, HIGH SCORE and several screens.

SPACE BATTLE

PURE MAGIC. Complex 3D GRAPHICS. Unlimited galaxy: STARFIGHTERS attack at SPEED in 3D. 3 Keys GIVE 8 directions. 4 to 6 IMAGES per SECOND. 9 to 10 depth PLAINS. The BEST RESOLUTION at THIS SPEED. YOU HAVEN'T SEEN A PROGRAM THIS GOOD.

MOONLANDER

CLASSIC ARCADE GAME only this one's for PROS ONLY. 2 STAGES of RESOLUTION. SELECTABLE LEVELS of GRAVITY. MACHINE CODE gives instant CLOSE UP of LANDING. PRECISE CONTROL AND FINE GRAPHICS. The HARDEST YET. NO BEGINNERS PLEASE.

Adams World

We are appointed RETAIL SALES DISTRIBUTORS for WORK FORCE software.
VISA & BARCLAYCARD WELCOME. POST is included for WORK FORCE programs.
OVERSEAS ADD 75p per PROGRAM.
We also stock over 2000 software programs for BBC, COMMODORE, DRAGON, ORIC, SPECTRUM, ATARI, T.I. at our SHOWROOMS in EDGWARE.
NEXT TO EDGWARE TUBE.

(continued from page 149)

Poke 36866,150. Tinkering with this value will also produce some interesting effects.

■Introducing a reverse field character or string is an easy matter within Print statement; just a question of holding down the Ctrl and Reverse On keys. But when you are Poking characters into screen memory, simply use Poke 199,1 to get into reverse; Poke 199,0 to get out of it.

■It is often reassuring if responses to Input, Get or Wait statements are acknowledged with a satisfying bleep. It is easy to add this facility — preferably in the form of a subroutine, if it is to be used several times in the course of a single program:

```
10 IF PEEK(197)<>64 THEN POKE 36878,15:
   POKE 36876,232: FOR D=1 TO 10: NEXT
```

Add another colon and Return if used as a sub-routine.

■Using Peek(197) to test keyboard input from any of the four function keys has one big disadvantage; the value returned is the same whether the key is Shifted or not — that is, f1/f2 answers Peek(197) with 39; f3/f4 with 47; f5/f6 with 55; and f7/f8 with 63. The way round this snag, so you can make sure of all eight keys, is a different form of statement using the keys' ASCII values, like this:

```
10 PRINT "(CLR)":GET K$:IF K$=CHR$(133)
THEN 30
20 GOTO 10
30 PRINT "YOU PRESSED KEY f1":END
```

You can test for any number of function keys in the one statement, using the appropriate ASCII value for each. These are: f1, 133; f2, 137; f3, 134; f4, 138; f5, 135; f6, 139; f7, 136; and f8, 140.

■One simple Poke will put some speed onto your programs, let you zoom through screen editing, and allow you to build graphic displays much quicker than usual. Location 37159 normally holds a value of 72.

Slowing down the clock

Anything below this, down to Poke 37159,10, speeds Vic's internal clock and everything governed by it — including the cursor flash rate. Conversely, Poking this location with values up to 255 will slow down all the complementary processes.

■When studying or keying listings reproduced in *Your Computer* and other publications, do not make the mistake of confusing the proper statement CLR with the abbreviation for a screen clear properly shown in square or curly brackets — that is, [CLR] or {CLR} — and which appears on-screen as a heart shape.

The *statement* CLR is something else altogether; it serves to wipe any variables, to restore the Data pointer to the first item in the queue, and to 'unDimension' any arrays; all functions which are automatically performed also whenever Load, Run or New is executed.

■Direct mode statements or functions can be useful during program development — for example, to test the value of a particular location in a program temporarily halted with a Stop.

Better still, you can string several direct mode statements together in one line using a colon to divide them, just like you would with a conventional numbered program line. Here is a simple example:

```
10 POKE 36878,15: POKE 871,0: POKE
3687,1.
```

Hit Return, Run and Return again. Now type — with no line number — ?PEEK 36878:?PEEK 871:?PEEK 3687 and hit Return once more. The new screen display will confirm the values you Poked with line 10. Do not underestimate the value of this facility. You could, for example, use it as a kind of What If . . .? statement in concert with an offbeat line whose effects you wish to test.

■Try experimenting with Vic's screen width and height to produce interesting graphic variations. Poke locations 36866,16 and 36867 with values from 16 and 32 upwards respectively; the proper values are 150 and 174. You will have to execute a screen clear, too.

■As a fundamental step towards faster program execution, use Print statements wherever possible in preference to Pokes, avoid If Then . . . Gotos, and never type the superfluous Let prefix when labelling variables.

■Numbering your lines from 100 and thereafter in increments of 10 may look and seem neat, but it is a practice that gobbles up bytes. A program of 100 lines numbered in that fashion will occupy 301 bytes in line numbers alone. But using simply 1 to 100 instead will take just 189 bytes.

■Another use for that rarely used Wait statement is in programs, and particularly games, using a joystick. Given that it is used to move your craft or whatever around playfield, and to zap away at all those lovely user-defined invaders, it seems rather clumsy reverting to the keyboard to call another game. Instead, add these lines:

```
2000 PRINT "PRESS FIRE BUTTON TO PLAY
AGAIN"
2010 WAIT 37137,32
2020 WAIT 37137,32,32
2030 RUN
```

■If you are working on a household management or similar program, you may like to know about this easy way of persuading Vic-20 to display neatly whole numbers and/or decimals; it otherwise ranges them all to the left, which can be confusing and anyway looks ugly. Here is a simple demo of the technique:

```
10 PRINT " {CLR}"
20 INPUT "NUMBER?";N
30 IF N=>1 THEN PRINT TAB(15-LEN(STR$(
INT(N))))N
40 IF N<1 THEN PRINT TAB(14)N
50 GOTO 20
```

■There is a method of changing by direct statements the colour of your working screen if the standard — and rather insipid — combination of blue on white with a cyan border — Poke 36879,27 — does not suit your taste or your eyesight.

To ring the changes, choose a new combination of screen and border colours; the 127 combinations possible with their relevant values are shown on page 134 of the user's guide. For example, Poke 36879,104 generates a deep blue screen with a black border. Ooops! — lost your cursor?

Just hold down the Ctrl key and press Wht or Yel. Experiment to find the mix that you find most restful and legible. Incidentally, the Rev keys will continue to function, and your new screen/text colour will stay put as you type and enter program lines, List and edit them.

Only pressing Run/Stop and Restore will bring back the original.

■One more way of seeing for yourself the fabulous patterns and effects which Vic's graphic characters can generate so easily. Here's a sample:

```
10 POKE 36879,24:PRINT "{CLR}"
20 FOR L=1 TO 505:X=RND(1)
30 IF X<0.75 THEN PRINT "/";:GOTO 60
40 PRINT "+";
50 NEXT
60 GOTO 60
```

Using any combination of graphic characters within the quotes in lines 30 and 40 — and note that the closing quote marks in each case must be followed by a semi-colon — will produce a limitless range of effects; and the randomiser ensures that a different pattern is generated every time the program is Run, even if you leave the characters the same.

Now add some colour to the Print statements too, as well as Rvs On variations and you could come up with the design for Kraftwerk's next album cover.

■When exploring Vic's music-making capabilities, you will doubtless use Data statements to store both tone values and note durations. But what yardstick should you use when, say, copying from sheet music? A fairly accurate base for music in 4/4 time is, one whole note = 120 jiffies.

Keeping in tempo

Use a larger number to slow the tempo, a smaller one to quicken it. But make sure that the base number you adopt is easily divisible into values for half, quarter and eighth notes at least — and remember to alter these proportionally when you tinker with the whole note value for tempo changes.

■This five-line program will produce an electronic colour swatch which presents every possible combination of screen/border colours and pauses at each; a useful utility when designing games screens:

```
10 PRINT "{CLR}"
20 FOR A=0 TO 7:FOR B=0 TO 15
30 POKE 36879, 8+16+A*B
40 FOR D=1 TO 800:NEXT D
50 NEXT B: NEXT A
```

■You may be used to constantly checking the screen for a refreshed display incorporating a new prompt, but it is easy to forget that others may not be. And when any screen starts filling up with text and graphics, it always helps to highlight the latest prompt in the same way that the cursor draws attention to itself — with a quick flash, if you will pardon the expression. There are a dozen variations on the following utility; type and Run this version and then improve upon it yourself.

```
10 PRINT "{CLR}"
20 PRINT SPC(200)"FLASHY, AREN'T I?"
30 FOR D=1 TO 800
40 PRINT "{CLR}"
50 FOR D=1 TO 400
60 GOTO 20
```

These are just a few of the ways in wich you can harness Vic's sometimes idiosyncratic but always fascinating logic to bring extra value, visual appeal and entertainment to your programs; I hope they will stimulate you to devise some original programs. ■

martech games ...a spectacular range of software

BLASTERMIND!

SPECTRUM 48k £5.50

At first glance this might seem to be just another version of a very popular game. How wrong can you be!!! True, the start is simple enough. The Spectrum picks a code of numbers or colours with a selection of levels of difficulty — and invites you to do the same. You then take it in turns to guess each others code from the clue supplied after each guess. An extremely well written, fast and very clearly displayed game, with almost inevitable defeat.
This was exactly as intended but unfortunately *something went wrong*. During the programming strange uncomplimentary messages began to appear on the screen. At first they were so few they were not taken too seriously, but soon they could no longer be ignored. Somehow the Spectrum had been given a personality — a rather devious, supercilious, dislikeable, hateful, horrible mind.

Side B contains a version of the game compatible with the excellent Currah µSpeech unit — even worse!!

The Quest of Merravid

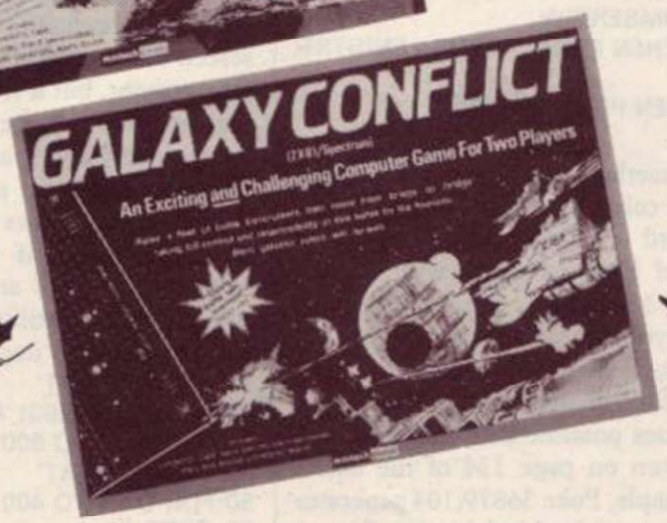
VIC 20 (16k) £7.95 or Commodore 64 £7.95

A really challenging and enjoyable adventure, written by a confirmed adventure addict who grew tired of the ease with which he solved other adventures himself. Will accept and act on sentences containing up to nine words.

The adventurer becomes Merravid, charged with the task of finding, taking and then returning the magic Firestone of the Dwarves. However, overcoming the many novel and original hazards is no easy matter. Careful and imaginative thought is required if progress is to be made and the Firestone tracked down to the lair of the Dragon of Thargon. Even then the Dragon has to be defeated and the stone retrieved. A compulsive, extremely enjoyable and very user friendly adventure.

COMPUTER MODERATED BOARD GAMES

The original and completely unique two player games of cunning and strategy, strictly for more demanding games enthusiasts.



- **CONFLICT** — a full scale military and economic battle demanding clear thought and decisive action.
- **GALAXY CONFLICT** — a complex battle for control of the Universe.

Each game:—
ZX81 (16k) and SPECTRUM (48k) **£11.95**
BBC 'B', CBM-64, ATARI 800 **£14.75**

Attractively boxed containing cassette, full size board, pieces, maps, and full instructions.

Ideal Christmas Gifts!

Most games available from leading retail outlets.

DISASSEMBLER

THIS PROGRAM of a 6502 machine-code disassembler for the 48K Oric takes 2K of user program memory so a Basic or machine-code program can still be loaded. It can disassemble machine-code programs or ROM and is written in machine code for speed. It will disassemble considerably faster than many of its commercial counterparts. Type in program 1 — you can load it with CLOAD "Program", S then Run and New followed by:

OHIMEM# 8FFF : INK7: PAPER0:CLOAD""

CSAVE"DISASMBLR1",A# 400,E# 518...

Press play and record and New. Type in program 2 — you can load it with CLOAD"Program 2",S then Run and New.

Type in program 3 — you can load it with CLOAD"Program 3",S then Run and New followed by:

CSAVE"DISASMBLR2",A# 9000,E# 97FF

The computer must not be turned off in between the last two stages as the code from both is Saved with the final command. To use the program rewind tape and type: New and:

CLOAD "DISASMBLR1"

and press play. The computer loads first stage. Then Run and press Play. The computer loads second stage. Then

CALL# 9144

and stop tape. Contents of the cassette are

(continued on page 157)

Program 1.

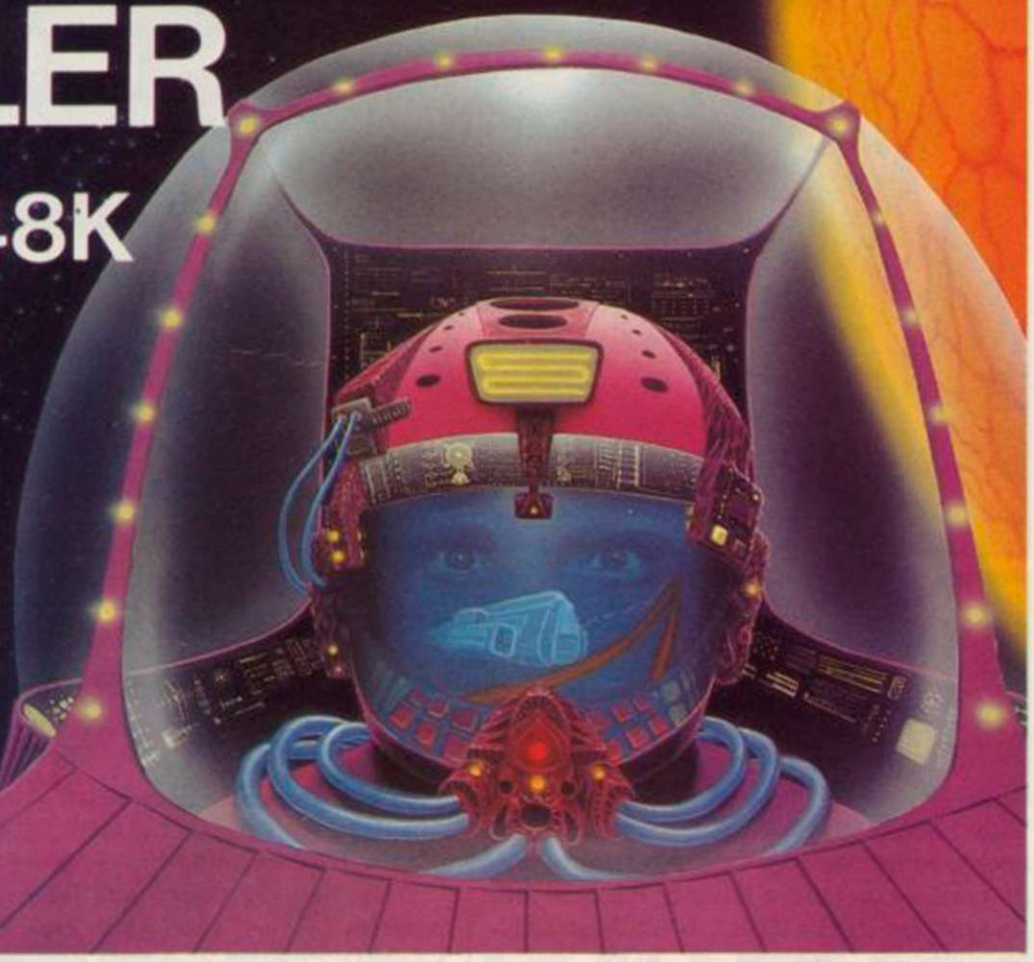
SOFTEK

MASTERS OF THE GAME

Finally!... A Full Floating-Point COMPILER

For The 16K/48K ZX Spectrum

(and a Super New Integer Compiler)



SOFTEK FP COMPILER

This amazing product is the first and only **full** Floating Point Compiler for the ZX Spectrum. It will handle all but a few commands on the Spectrum, which is approximately twice the capability of any Integer Compiler. It will handle full Boolean logic, strings and non-multidimensional arrays. With this, the only true full compiler for the ZX Spectrum, you can now convert all your favourite BASIC programs into Machine Code. An unbelievable product at the unbelievable price of just **£19.95** (16K and 48K versions on one tape).

SOFTEK IS COMPILER

June's PCW review of Compilers raved about our previous Super C but put a new product from 'Wye Valley Software' top of its list of recommendations. Softek are proud to announce that their new Integer Compiler was commissioned from Martin Lewis of Wye Valley, having gained exclusive rights to their Integer Compiler.

The Softek IS Compiler is the ultimate in Integer Compilers for the ZX Spectrum. Following the immense success of our Super C Integer Compiler (it is **still** the only utility to have made it into the 'Top Ten' charts) , the IS Compiler is even better. It has full string handling and string slicing capabilities (unlike its competitors) and full INPUT facilities, exactly as you enjoy in BASIC. Our famous 'REM' statement enhancements to BASIC are in the IS Compiler too, allowing such features as Hi-Res graphics and the entry of Machine Code subroutines. Like,the FP Compiler the IS copier will compile subroutines, can be used easily alongside BASIC, and can compile code to virtually any given start address in RAM. Unlike Super C, both of our new Compilers will allow up to 16K of BASIC to be compiled in a 48K ZX Spectrum.

For the fastest, most feature-laden Integer Compiler on the market it has to be the Softek IS Compiler at just **£9.95**. (16K and 48K versions in one tape).

THE SOFSYS SYSTEM

Our raved-about Sofsys System of utilities, is now complete with the addition of SOFSEM, our superbly well-designed Editor/Assembler for the Sinclair Spectrum. It features fantastic 'user friendliness' (with full error reports), 42 or 32 column screen format, HELP facility, extensive labelling features, and super fast assembly. Unbeatable at only **£6.95**. Super Monitor, SOFMON, still only **£5.95**.

Our superb Toolkit, Graphics Kit and remarkable Masterkey (user defined keys program) are still available for just **£5.95** each.

WARNING: CONDITIONS OF SALE

All Softek Software is sold strictly according to our terms and conditions of sale, copies of which are available upon request.

Softek Compilers are sold on the condition that, if they are used to create a product sold commercially for financial gain, then the fact that the product was created with a Softek Compiler must be accredited clearly in both advertising of the product and on the exterior of the packaging of that product, start screen, promotional materials, etc.

We give a no-quibble guarantee that should you have any problems with any software, it will be replaced by return of post.

All you have to do to take advantage of this fantastic offer is to select three tapes for your machine from those shown on this page and complete the coupon. Please don't send any money now — we want you to evaluate the software in the comfort of your own home before you decide.

We only offer genuine manufacturers tapes and would like to inform you that copying in any form is illegal.

To: The Software Club, Salisbury Square, Old Hatfield, Herts. AL9 5AD

Please accept my application and enrol me as a member of The Software Club and send me the introductory tapes whose numbers I have written in the boxes below, for which you shall charge me in due course, should I decide to keep the software (plus a total of £1.03 for postage & packing*). If I am not completely satisfied, however, I may return the tapes intact within ten days, my membership will be cancelled and I will owe nothing. As a member, I need not take a tape every month (or if I want no tape at all), I can say so on the form provided. I will, however, choose at least six tapes in the first year. All software is described in advance in the free monthly "Software Club Review" and is offered at a discounted price. I am over 18 years of age. (This application must be from your parent or guardian if you are under 18 years old.)

(continued from page 153)

shown on the cassette — use the slow side as this is more reliable. To make a slow copy use pencil corrections.

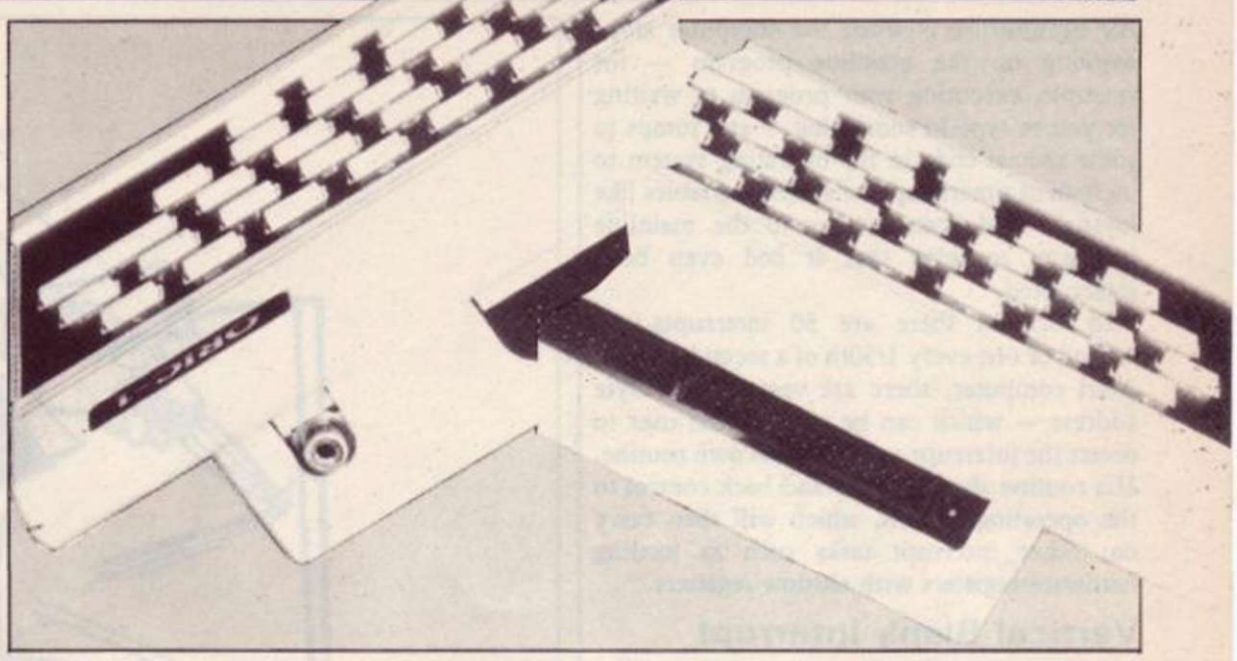
After call #9144 a prompt appears at the bottom left of the screen as >. Then type in the hexadecimal address for disassembly:

```
>0400
0400 TAX
```

The first line appears automatically. To advance line by line press space-bar for each line. For rapid disassembly hold down space bar.

If you wish to disassemble another address press D, a prompt will appear as above and the same procedure is followed. If you try to disassemble 0300-0400 — inclusive — strange results will be obtained as this is the location of the physical I/O address.

To exit from the program type X.



Program 2.

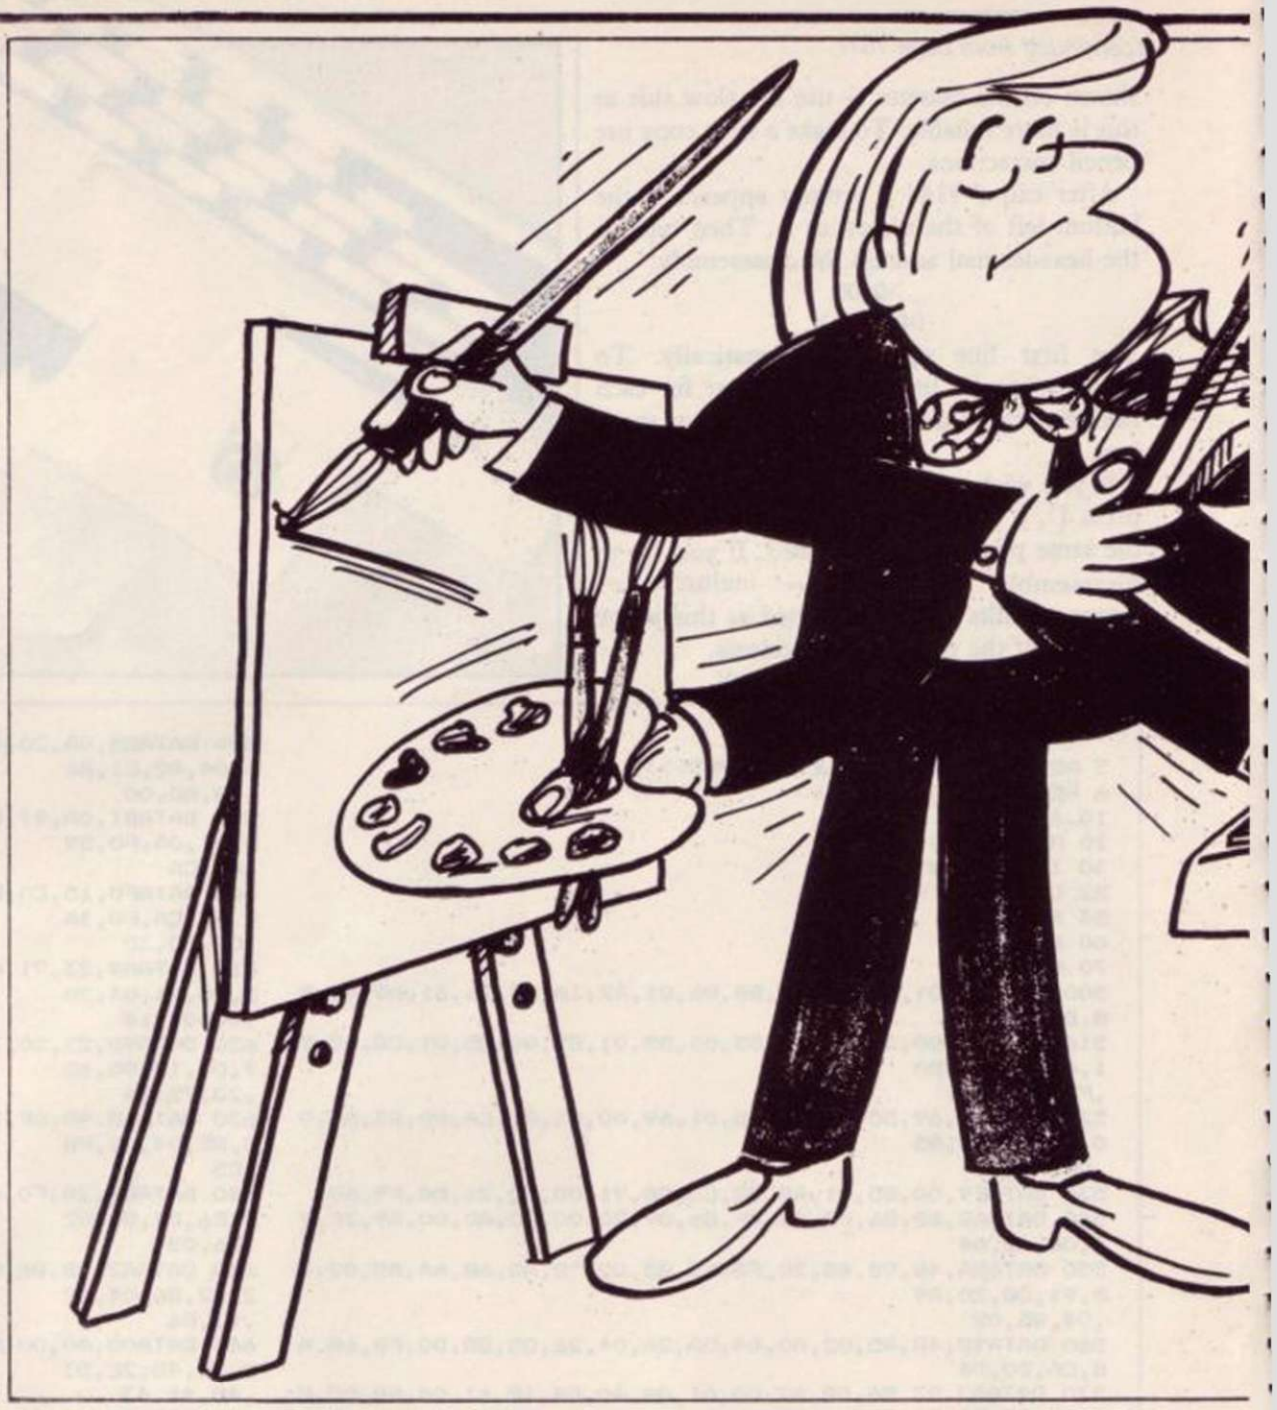
INTERRUPTS

ATARI



AN INTERRUPT IS when the computer stops working on the mainline program — for example, executing your program or waiting for you to type in something — and jumps to some special code in the operating system to increment timers, update system variables like joysticks and then returns to the mainline program, unaware that it had even been interrupted.

In Britain, there are 50 interrupts per second or one every 1/50th of a second. On the Atari computer, there are vectors — 2 byte address — which can be used by the user to divert the interrupt routine to his own routine. His routine should then hand back control to the operating system, which will then carry out other interrupt tasks such as loading hardware registers with shadow registers.

Vertical Blank Interrupt

The Vertical Blank Interrupt — VBI — is so called because this interrupt occurs just after the computer has drawn the screen. The screen then goes blank ready for it to be drawn once again. To create an interrupt you first have to have your machine-code routine somewhere in memory, for instance Page six — 1536 to 1791. Your code can consist of anything but should not be too long as the computer might start getting impatient by shaking up the screen display. Do not end it by putting a RTS but instead a JMP $E462.

You have to enable it

Now you have to enable it. Unfortunately, you cannot just Poke the address of your routine into its appropriate vector — $224,5 — since there is the risk of an interrupt vectoring through that vector after you have changed one byte but before you have changed the second. The result will probably send the 6502 into a totally confused piece of memory.

```

Luckily for us, there is a special routine to Poke two bytes into a vector without the risk of an interrupt; it is called SetVBI and is situated at $E45C. Register A should hold a seven, X should hold the high byte and Y the low byte. Y*256+Y should point to your routine; the 7 in register A tells the operating system where to put X and Y.

Type in program 1 and study the two sections of code needed to get it going. The second program is rather more elaborate. After entering it, turn up your TV speaker and Run it. Past ZX Spectrum owners will no doubt recognise it. Just one more point on VBI's. There are, in fact, two types of VBI — deferred and immediate.

Deferred addresses

The addresses I have mentioned up until now refer to the deferred type. The main difference is that the immediate one is executed before the operating system updates anything and the deferred afterwards. You usually use a deferred if it affects the screen, e.g., colour changes but there is no reason why you can't have both working at the same time.

Chris Law takes you through Vertical Blank Interrupts — what they are and how to use them on the Atari.

The instructions for immediate VBI are:

- Terminate routine with a SMP$ E45F
- Its vector is $ 222,3
- Make register A hold six.

The Display List Interrupt or DLI is very special. Whereas all computers have something similar to Atari's VBI, the DLI is unique. Again, as with fine scrolling and display lists, all credit goes to Antic. In the Display Lists article in *Your Computer*, you will have seen that the most significant bit of a byte enables DLI. Well, what exactly is a DLI?

The DLI enable

DLI is an interrupt executed while the screen is being drawn. Therefore, when Antic comes across a DLI enable, it will freeze the 6502 and send it, through a vector — $200,1 — to your routine. Actually, how far down the screen it is executed depends on how far down the display list the DLI enable(s) are.

```
0 REM ATARI INTERRUPTS:PROGRAM3
1 REM BY CHRIS LAM
10 FOR N=0 TO 15:READ A:POKE 1536+N,A:NE
XT N
20 ST=PEEK(560)+PEEK(561)*256
30 POKE ST+3+3+11,130
40 POKE 512,0:POKE 513,6
50 POKE 54286,192
1000 DATA 72,141,10,212,169,0,141,24,208
,169,6,141,1,212,104,64
```

If you have a DLI enable with Antic Mode 2 — Graphics 0 — right after the IMS operaids, then the interrupt is called while the second GR.0 line is being drawn. As a result the changes made by the interrupt will not be seen until the third line is being drawn.

The structure of your routine should be kept to four stages:

- The saving of all registers, whose values will be altered during the DLI.
- Wait for Antic to finish drawing the current line.
- Change appropriate locations.
- Restore all registers and leave the interrupt.

Type in program 3 and study the appropriate code listing. In this program, we have inserted the DLI enable half down the display list and consequently it was executed half way down the screen. This time we are free to poke in the address of our routine as long as we enable the interrupt — Poke $4286,192 — afterwards.

No unsightly border

STA WSYNC ($4282) will freeze the 6502 until the current line is completely printed. This is so that we do not have unsightly border where the changes take place.

Although we have only one DLI vector to use, it is not difficult to achieve many. To do this, make your first DLI Poke the address of the second DLI into $200,1. Then the next time it meets a DLI enable, it will vector through to your second routine and so on. Make sure that the last DLI pokes back the address of the first DLI into $200,1.

DLIs must be kept very short and should only affect registers related to the screen e.g., colour changes. Anything else can be done with an ordinary VBI.

The next example — program 4 — demonstrates Atari's trump card, the ability to put dozens of colours on to the screen at once; two dozen in this case. All the Antic modes in the display list have been enable. Have a go at converting it to display 192 colours in GR.8 — normally only two colours.

Program 5 will show you have to combine GR.9-11 with the other modes. The secret is that with GR.0-8, location 623 (GPR1OR) holds 0 but GR.9-11 will hold 60, 128 and 192 respectively. In figure 1 you will see the set-up on the screen.

Write to hardware register

You should always write to the hardware register. Each hardware register has a shadow register from where data is moved from to its hardware register every 50th of a second. Therefore if we write to the shadow register it is permanent since that value will always be located to its hardware equivalent. We have to write to hardware registers instead and the OS interrupt will reset them.

For even deeper information, obtain a copy of *De Re Atari* (£17) and/or a copy of the *Atari Reference Notes* (£17) and perhaps even an assembler/editor cartridge (£40) which is essential to understand Atari's hidden powers. Note that $ denotes hexadecimal numbers.

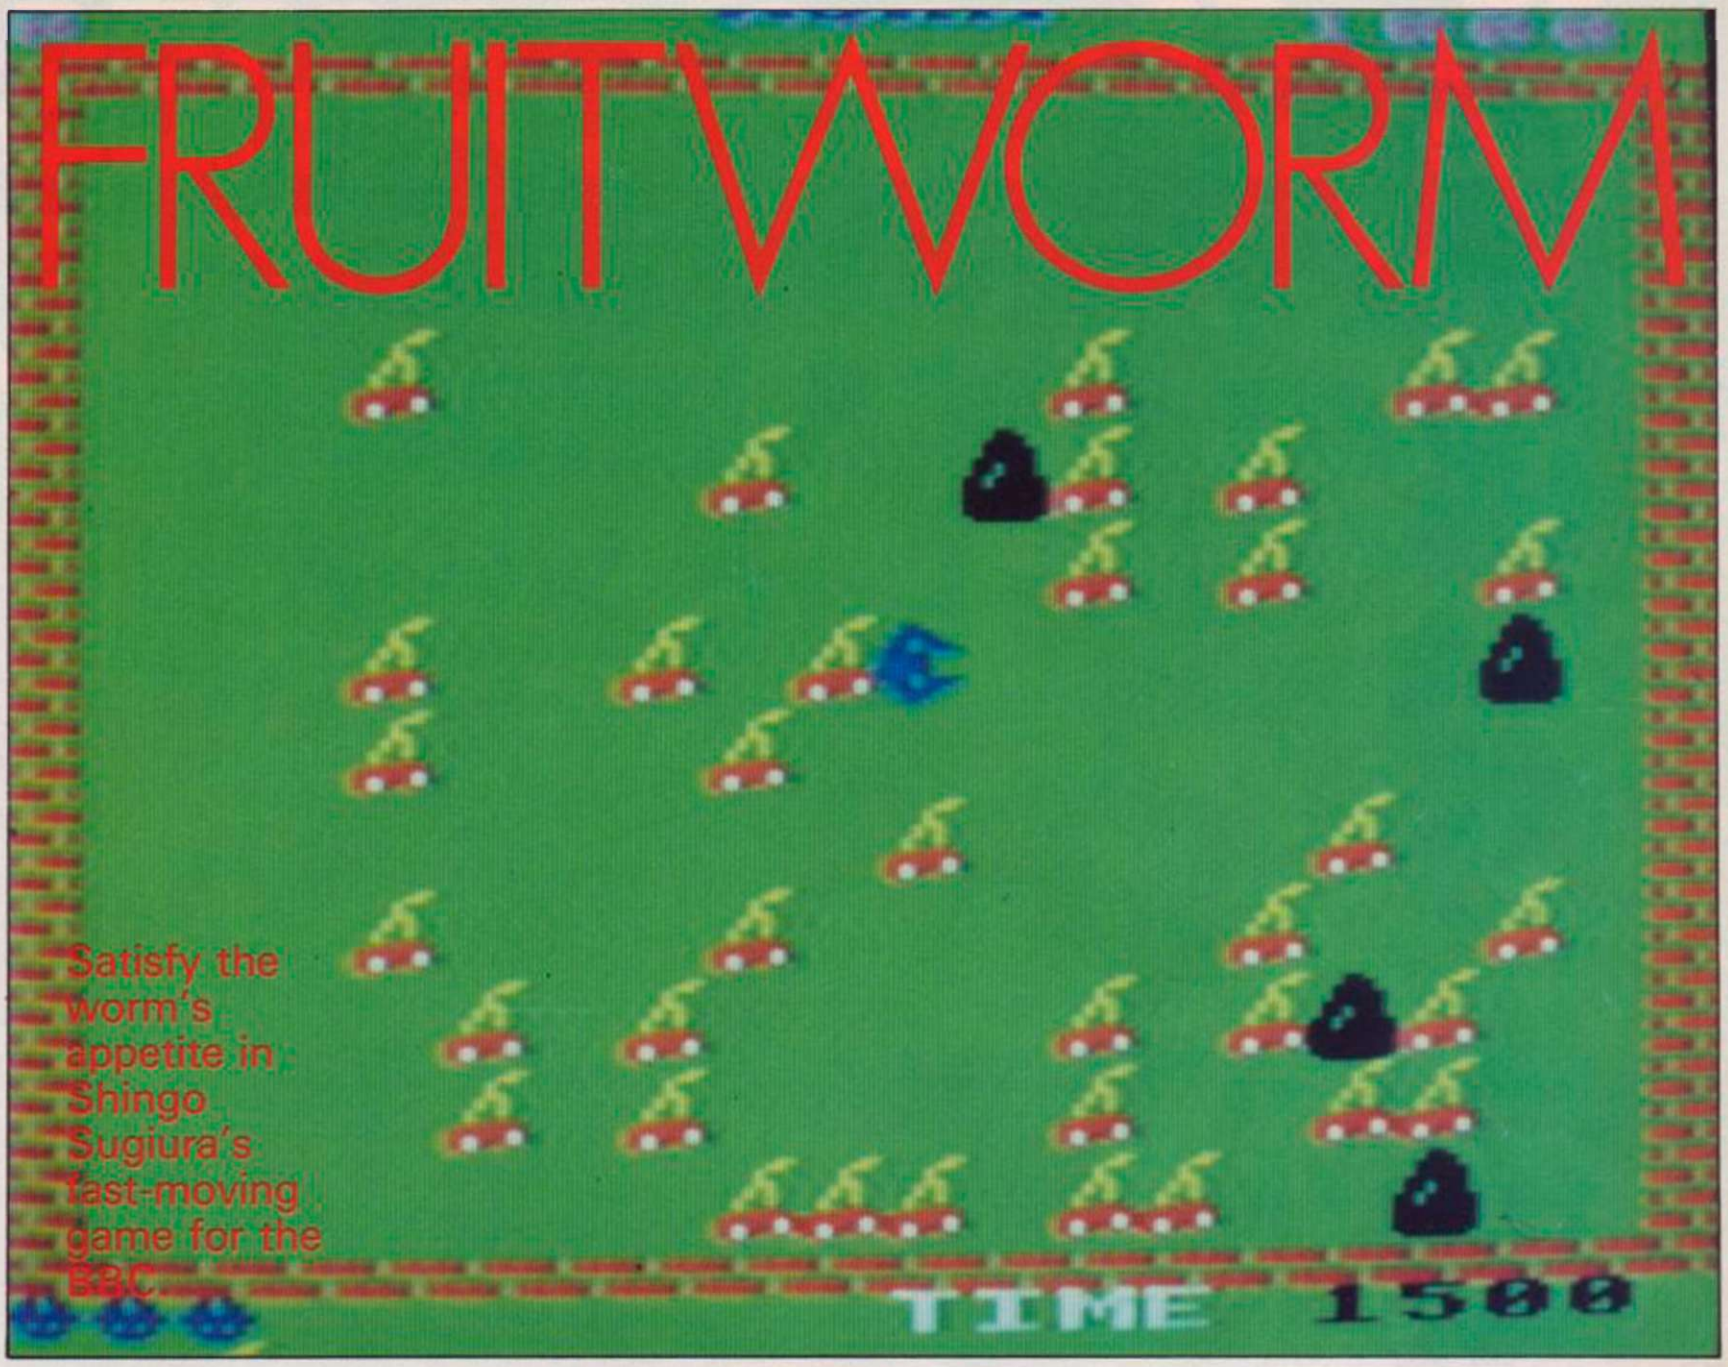
FRUITWORM



BBC

IN FRUIT WORM your task is to move a hungry worm around the garden which is full of fruits. You have to guide him so that he can eat the fruits and grow to be an adult worm, but the trouble is there are rocks and the brick wall to be avoided and the task of keeping your wary eyes on the time which is constantly ticking away.

Save sections of memory

First type in listing 1 and Save it under the name of 'INIT', then type in listing 2 and Save it under the name of 'BFRUIT' on a different cassette. Run listing 2 and the cursor should reappear in a few seconds. You must now Save the sections of memory which contains the data for the multi-coloured characters i.e., the fruits. To do this type

*SAVE "FRUIT" 2D00+550

wind the tape containing 'INIT' to just after 'INIT' and press Return. After this type in listing 3 and Save it after 'INIT' and 'FRUIT' before you run it.

All this must be done because the program contains quite a bit of machine code and thus could crash the machine if there is a mistake, probably resulting in Bad Program. Those fortunate enough to have disc drives won't have to go through all this but must make sure not to insert any extra spaces in the third program otherwise they will probably get a No Room message.

Now rewind the tape to the beginning and Chain the program. When 'INIT' is loaded the title page will appear. Press Stop on tape unless you have motor contol facility or have discs — in which case the first program will load the main program at &1100. When the title page appears you can press Q if you do not want any sound otherwise press the space-bar to load the rest of the program.

The game will begin

When 'FRUIT' and 'WORM' are loaded, the game will begin. In the middle of the screen you will see the worm's head for a while before it starts moving — in the first screen there is a short burst of music so if you have the sound off nothing will be happening for a while. This can look as if the machine has crashed so resist the temptation to press Escape. In fact, this precaution applies to various other points in the game where there is music.

You control the movement of the snake with Z, X, : and / to move left, right, up and down respectively. If you manage to make the worm gobble up enough fruits before the time runs out, the remaining time will be added to the

THE BBC MICRO USER SHOW

The show that attracted record attendances in Manchester and Nottingham now comes to the heart of London – with a fabulous pre-Christmas bonanza of all that's best for the BBC Micro. There are lots more exhibitors, who will be using the show as a launching-pad for the very latest software, plus many hardware devices that are rapidly making the BBC Micro one of the most versatile computers of them all.

- ★ ASK the experts – free advice on all aspects of computing from people who know the BBC Micro inside out.
- ★ CALL in to one of our highly successful walk-in seminars, at which all the famous names from the world of BBC Micro computing will be taking part. Whatever your interest – graphics, machine code, interfacing, education – there will be a top expert speaking on it. *(Saturday and Sunday only)*
- ★ TRY OUT for yourself the games that will be the top sellers this Christmas – and well into next year.
- ★ FIND out about all the new peripherals for the BBC Micro – disc drives, interfaces, ROM boards, robots and second processors.
- ★ DISCOVER why the Electron – the baby brother of the BBC Micro – has been hitting the headlines and why all the experts are tipping it to be the big seller of 1984.

Organised by Database Publications

Westminster Exhibition Centre

(formerly the Royal Horticultural Halls)

Greycoat Street, London SW1

Thursday to Sunday, December 8 to 11

Exhibitors include:
Acorn Computers, Akhter Instruments, Advanced Memory Systems, BBC Telesoftware, Bradford Office Supplies, Bucon Ltd, Computersolve, CJE Microcomputers, C-Tech, C W P, Clwyd Technic, Clares Micro Supplies, Cumana, Commotion, Deskflair, Economatic, Educational Computing, Eltec Computers, Electronequip, Educational Software, Glengary Soft, Golem, Kirklands Computers, Kansas City Systems, L C L (Ludinski Computer-Assisted Learning), Lowland Designs, Logic Sales, Micro Aid, Micro Power, Master Class, Microvitec, M W Systems, Miniature Tool Company, Opus Supplies, Oakleaf Computers, Proteus Computing, Pace Software Supplies, R H Electronics, Superior Software, SYSTEM, Twillstar Computers, Viglen Computer Services, Watford Electronics.

GROUP BOOKINGS

Schools can obtain additional tickets by sending a stamped addressed envelope to: BBC Micro User Show, Europa House, 68 Chester Road, Hazel Grove, Stockport SK7 5NY.

£1 *off normal exhibition admission price of £3 (adults) and £2 (children)*

The BBC Micro User Show

10am - 6pm, Thursday, December 8
10am - 6pm, Friday, December 9
10am - 6pm, Saturday, December 10
10am - 4pm, Sunday, December 11

Westminster Exhibition Centre, Greycoat Street, London SW1.

£1 *off normal exhibition admission price of £3 (adults) and £2 (children)*

The BBC Micro User Show

10am - 6pm, Thursday, December 8
10am - 6pm, Friday, December 9
10am - 6pm, Saturday, December 10
10am - 4pm, Sunday, December 11

Westminster Exhibition Centre, Greycoat Street, London SW1.

(continued from page 161)

score and you will get to control another worm in another garden with another type of fruit. There are nine kinds of fruit and if you do not kill all four of the worms before this a bonus of 2000 will be added to your score and you will also receive an extra life, then you go on to do the whole thing all over again, but I doubt if many people could even get to the ninth screen very easily let alone do it repeatedly.

When you kill all four worms and the score is in the top eight you will be asked to input your name. This can be anything up to 14 characters long then the top eight scores, together with the names of the scorers will be displayed. At this point if you have the sound off but would like it back on, press S if you have the sound on but want it off press Q, if you like the sound as it is simply press the space bar to replay.

My high-score is 16380 but I am sure many of you will beat that.

The programs are long and typing them in — especially listing 2 — will be a long, boring and an arduous process. If you do not have the time or the energy for such a task send a cheque or a postal order for £3.50 made payable to Shingo Sugiura to the following address:

42 Landford Road, Putney, London SW15 1AG.

I will send you a copy of the game on a high quality C15 cassette.

SPECTRUM

Elephant Software.

41 Haymill Rd Burnham Berkshire SL1 6NE

SOFTWARE

for BBC Micro, Acorn Electron, ZX Spectrum, Dragon 32, Atari, ZX-81.

Education, Utility, Adventure and Games.

Reader – for young children learning to read, this program uses colourful ladybird graphics to stimulate the child's imagination and increase concentration to improve reading fluency. It encourages speed and accuracy by giving graphic rewards as well as Hi-score record. It is Menu driven to allow parent to choose one word, one sentence or one paragraph of the story to be displayed on the screen. Printout of word incorrectly read can be given, if required. There are four stories on the tape, suitable for 4-10 year olds. You can also enter your own or your child's favourite story soon with currah speech synthesizer. For 48K Spectrum.

Simon Games 1-8 – exciting and addictive space & adventure games including Vampire, Bizzaro, Merchant, Frankenstein, Pyramid, Lander, Racetrack and Bombcity. For any Spectrum.

Speckfile – file information on cassette in three sections. It is Menu driven and will search for data in any section. It allows output to screen or printer. Also Cave Adventure game where you collect certain coins to allow you to exit from the cave. For 48K Spectrum.

Dragames – 5 exciting and addictive space & adventure games including D.Star, Staroids, Revenge, Noman and Forest Adventure. For Dragon 32.

Maths 1 to Maths 5 – 5 tapes with 10 programs on each tape provide a complete Mathematics course for 6 to 16 year olds. Each tape contains a TEST and GAME program. For BBC, Electron, Spectrum, Dragon, Atari, ZX-81(1K) and ZX-81(16K).

Educate 1 to Educate 3 – tapes 1 and 2 contain Physics, Chemistry and Biology programs and are suitable for 11 to 16 year olds. Tape 3 contains word games and would be suitable for any age. For any Spectrum.

Education 1 – includes MAPDRAW which allows you to draw maps/diagrams in 3 colours, with or without grids. It has a Rubout command and titles or text can be added. Can be SAVEd at any stage. Also HISTOGRAM which allows up to 21 data entries, add titles and scale. Bar chart is drawn across the screen in three colours and shows numerical values of data. Finished graph can be SAVEd. For BBC B (32K).

Cassettes cost:
BBC, Atari or Dragon – £6.95
Electron or Spectrum – £5.95, ZX-81(1K) or ZX-81(16K) – £4.95
Booklet containing 50 Maths programs for BBC, Spectrum, ZX-81(1K) or ZX-81(16K) – £2.45
Send cheque, P.O., requisition order to:

Simon Software

FREEPOST, New End, Redditch, B96 6NE

BOOST the sound of your SPECTRUM computer

SOUND AMPLIFIER. Enhance the quality of your Spectrum programmes and games with the Pinnacle Sound Amplifier. This battery powered amplifier/speaker simply connects to your micro, producing good quality sound necessary for the full enjoyment of music programmes and games with sound effects.

FEATURES:

- Simple to connect – no internal connections
- Self powered by standard batteries – eliminates additional cables
- LED Indicator
- Two output levels
- Provides audible response when inputting from keyboard
- Independent from video signal – does not affect receiver tuning

AROUND £7.99

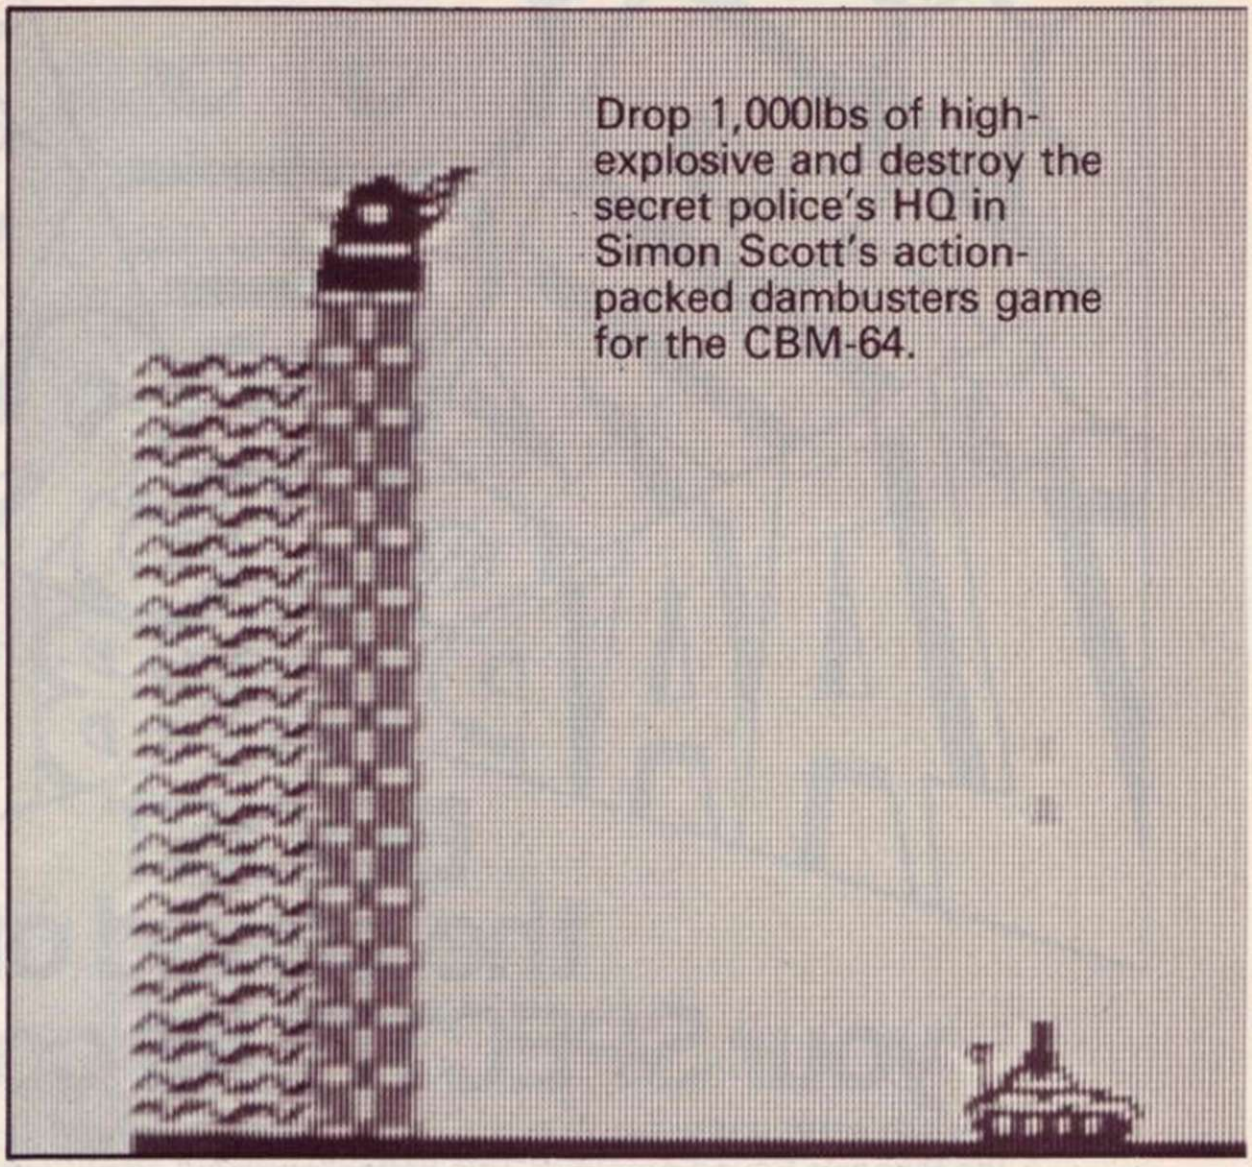
AND OTHER LEADING HOME COMPUTER SHOPS



DAM SPLAT

YOUR MISSION is to destroy the headquarters of the secret state police and the suggested method is to fly over in an aeroplane and bomb the nearby hydroelectric dam. Since you have an unlimited supply of 1000lb bombs on board, this should be a cinch; however, it is not a perfect world, a machine-gun emplacement defends the dam itself and, at the base of the dam, a tank patrols the gorge.

Dam Splat is for the Commodore 64 microcomputer. When Run you see the title page. There is an option of instructions. The game starts with you at the highest altitude towards the right of the screen. As you progress hitting the dam it will slowly erode away and eventually spill its contents. When this is achieved, you are given the option of carrying on at a harder level. This will result in the machine gun and the tank firing more rapidly and, in some cases, the dam becoming thicker. You are continually graded throughout the game and are given a grade from erk — new recruit — to Air Marshal depending on your performance. All controls are given in the game. Note that when typing in line 4034 the graphics symbols represent the message GOOD LUCK ... YOU WILL NEED IT when typed in lower case.

Line	Function
1	set variables: disable Runstop/Restore keys: disable Basic List
2	jump to title page
3	lower memory pointers
4-10	set user defined graphics mode: POKE DATA into memory
20-56	*Data for graphics*
60-63	set strings
80-99	set up screen ready for game
100-140	main loop
200-220	bomb drop routine
230-245	dam erosion routine
250-260	dam spilling water routine
275-340	mission complete message and rank
400-440	final rank and cold start, resets the computer using SYS 64738
900-920	planes height
930-995	machine-gun fire routine
1000-1010	tank move routine
1100-1150	tank fire routine
2000-2021	plane fall after a hit
2030-2070	explosion and message
3000-3014	title page
3100-3121	instructions option
3130-3150	instruction print-out routine
4000-4045	Data for instructions
4050-4055	wait for a key
5000-5010	set up an array containing ranks

The SLICKER Challenge

BBC

THE SLICKER PUZZLE

Spectrum

THE SLICKER PUZZLE

To the few that succeed through skill or luck and out slicker slicker by solving Level 8, the ultimate prize, free membership of the Slicker Champions Club.

We challenge you to beat SLICKER the new totally original puzzle game that has been designed to test your micro games ability to the full.

THE SLICKER PUZZLE

VIC 20

commodore 64

THE SLICKER PUZZLE

Simply write the code number on the inside of the card cassette cover and send it to us with your name and address and we will send you by return a FREE GAMES CASSETTE and your Slicker Champions Club Membership (Applications must be received by Jan. 31st 1984).

To order Slicker see order form on page 224

AND NOW FROM LOTHLORIEN

ACTIONMASTER

Get some real action out of your computer this Christmas with ACTIONMASTER, a new range of superior arcade games from Lothlorien – the people who brought you ROMAN EMPIRE, JOHNNY REB and other famous WARMASTER titles.

Look out for the ACTIONMASTER green striped cassettes at leading software specialists, or buy direct by post at no extra cost. Send the coupon TODAY to ensure delivery before Christmas

NEW **MICROMOUSE.** At last educational arcade action! Fight off the software bugs and help Micromouse de-bug his programs. Datakill available. Fight through the levels to the highest score.

BEDLAM. An asteroid explosion has catapulted you to the asylum planet BOVRYLL where you are under attack from waves of loathsome creatures – each more vicious than the last. Your only hope of survival is to kill each wave with a twin-firing photon bolt, but just when you think you're winning you encounter the sorcerous guards. Can you kill ten to win another life?

BEETLEMANIA. Trapped in a maze with four giant green beetles you are desperate to get out. You can find a way but the lock can only be opened with four giant beetle eggs. Naturally the beetles go berserk when their eggs are stolen. Higher levels offer more complex mazes and fast-moving spiders.

TWO-GUN TURTLE. In the middle of winter a turtle is defending his strawberry patch against a variety of marauding bugs... some go for strawberries, some go for you... some don't go for anything unless they're accidentally attacked. But remember this is winter and you never know when it might snow!

ALL ACTIONMASTER games are 100% machine code and are available for any Spectrum unless otherwise stated.

NEW ADVENTUREMASTER SERIES. First title—The Stolen Lamp BBC-B

Damian Clancy shows you 17 routines to pep up your Dragon's screen.

SCREEN KIT

HERE ARE 17 routines to enhance the screen of the Dragon 32 and add better sound effects to your progams. The routines will scrool the high resolution or low resolution screens in all four directions, invert either screen, fill the whole low-res screen, the foreground or the background with a specified character, draw a border of a specified character around the screen, and produce two different sound effects.

When the printed program is typed in and Run, it will Poke the routines into memory from address 32000 onwards. The program should then be Saved and all the routines tested.

Each time you wish to use any of the routines in your own programe while the program is under development the routines must be loaded separately before loading your own program. Before loading the routines using CloadM you should type

```
CLEAR 200,32000
```

When your own program is finished, before Saving it type:

```
POKE 27,&H7F : POKE 28,&HFF.
```

This will allow the routines to be Saved together with the Basic program using the CSave command. However, it will stop you from editing the program and so should only be used when you have finished the program. The routines available are listed in table 1. Type Exec followed by the start address.

When all the routines have been tested and when they work they can be Saved using

```
CSAVEM "SCREEN",32000,32600,600.
```

They can be loaded again using CloadM.

```

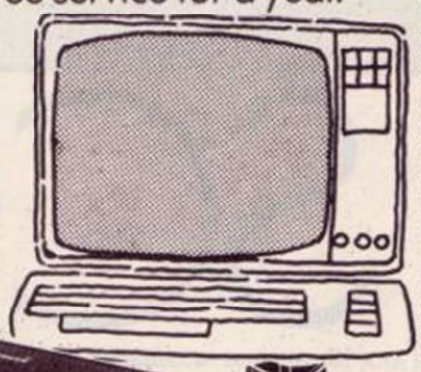
YOUR LOCAL COMPUTER SHOP

OFFERS 30 DAY MONEY-BACK GUARANTEE

Whether you're shopping for a home computer or software for your existing machine Rumbelows are the only shop to let you try it at home and, if it's not exactly what you want, to return it for a full refund. Not only that but we offer free insurance and free service for a year.

ORIC 1 – Home Computer **16K** 57 typewriter like keys. RGB monitor socket.
PRICE WINNER £139·99 Easy terms available.

COMMODORE 64 Home Computer. **64K** memory capacity. Built-in synthesizer and hi-fi output. 16 colours on screen. High resolution graphics.
PRICE WINNER £199·99
Easy terms available.



WIDE RANGE OF SOFTWARE AVAILABLE IN STORE

COMMODORE VIC 20 Home Computer. Easy to operate with a wide variety of programmes available. Simple connection to TV set via aerial socket.
PRICE WINNER £139·99 Easy terms available.

FREE STARTER PACK
WORTH OVER £70
IDEAL FOR BEGINNERS
- Cassette Player
- Introduction to Basic part 1
- 4 game cassette

SINCLAIR Spectrum **48K** Ram Home Computer. Life action keyboard with silent moving keys. Includes free demonstration cassette with 14 pre-recorded programmes.
PRICE WINNER £129·99
Easy terms available.

ALSO AVAILABLE
SINCLAIR Spectrum **16K** Ram.
PRICE WINNER £99·99
TEXAS 16K Home Computer TI994A.
PRICE WINNER £99·99

UP TO £750 INSTANT CREDIT
SUBJECT TO STATUS. TYPICAL APR 41.2%. ASK FOR DETAILS.

DETAILS AND WRITTEN QUOTATION FOR CREDIT TERMS AVAILABLE FROM ANY RUMBELOWS BRANCH. OFFERS SUBJECT TO AVAILABILITY. PRICES CORRECT AT TIME OF GOING TO PRESS. REDUCED PRICE ITEMS ARE LOWER THAN OUR NORMAL PRICE BUT MAY NOT HAVE BEEN SOLD AT A HIGHER PRICE FOR A PERIOD OF 28 CONSECUTIVE DAYS IN THE PREVIOUS 6 MONTHS. HEAD OFFICE: TRINITY HOUSE, TRINITY LANE, WALTHAM CROSS, HERTS. EN8 7EQ.

Table 1. High-resolution routines

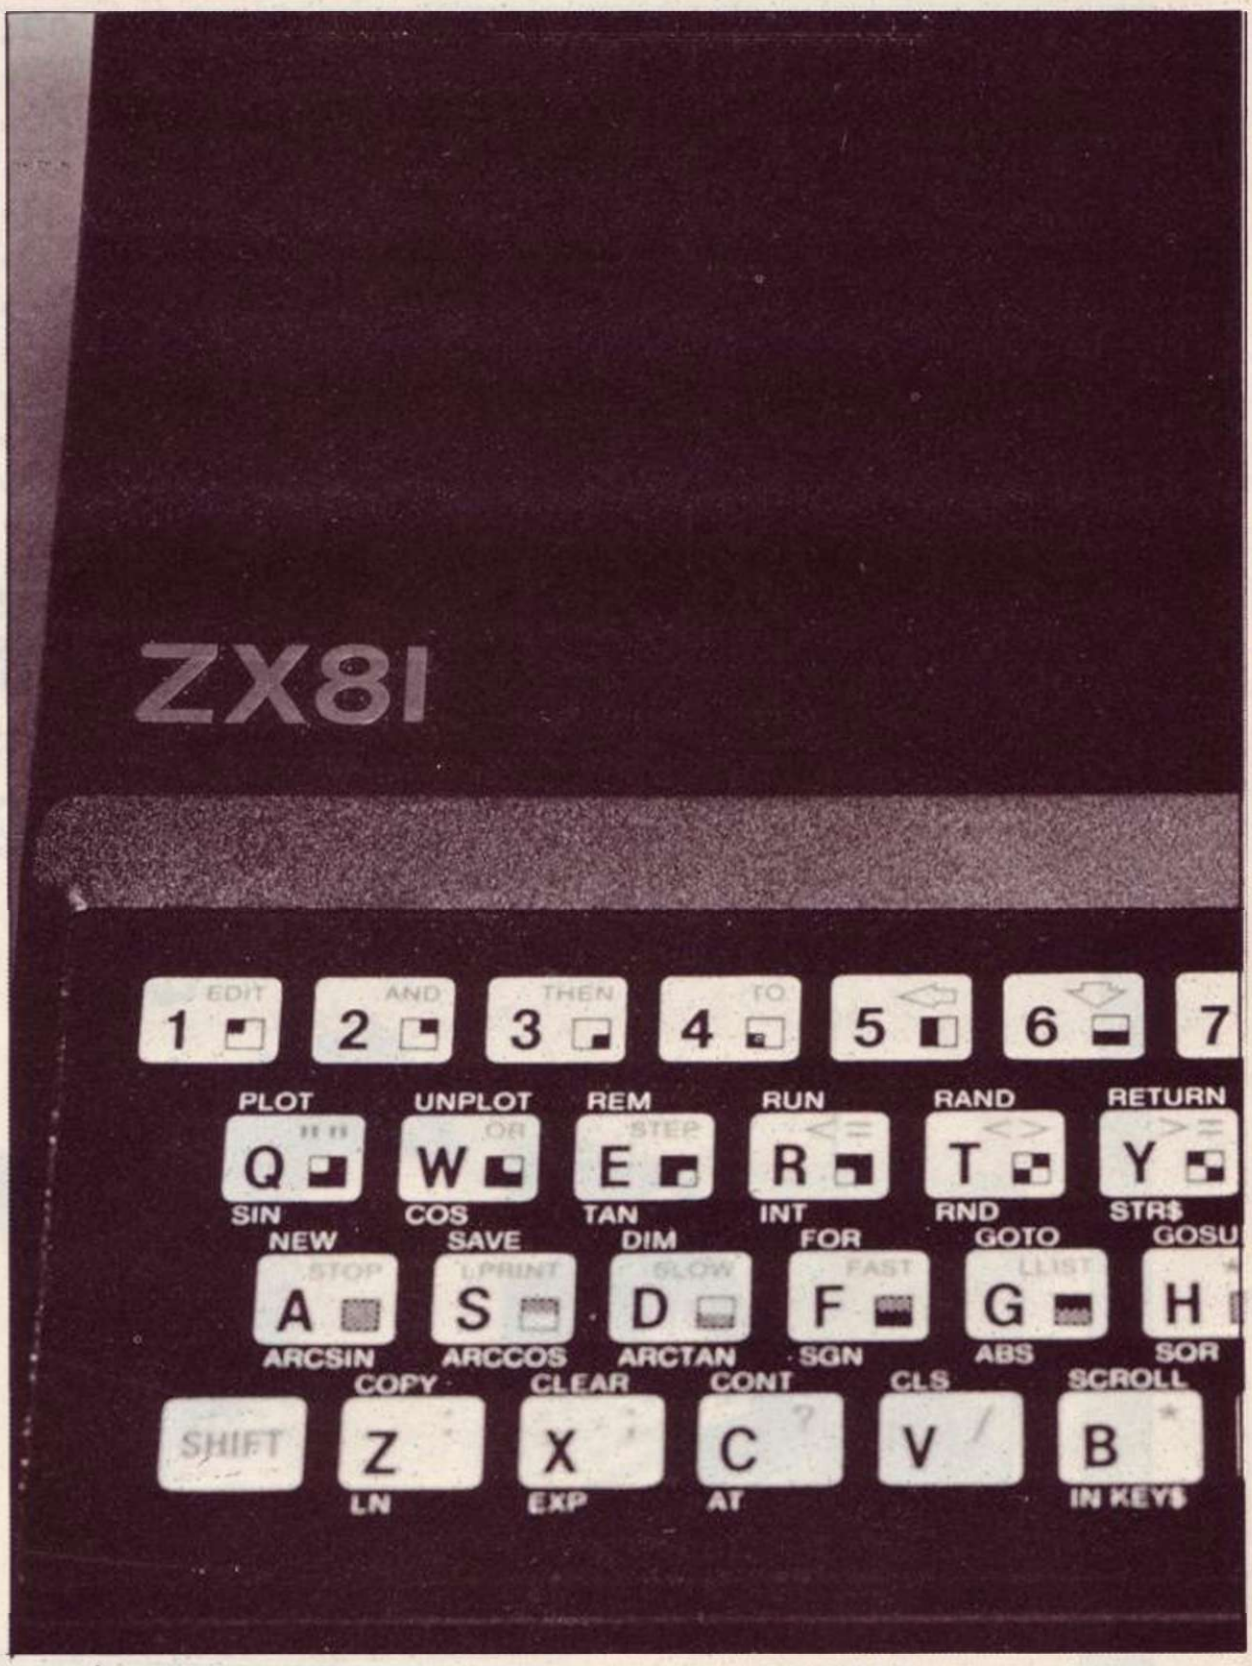
Start address	Routine
32000	Scroll the hi-res screen one byte to the left — eight pixels. This routine is for use in Pmodes 1,3 and 4 and works on the first four hi-res pages.
32028	Scroll the hi-res screen one byte to the right. This also scrolls the first four pages in Pmodes 1,3 and 4.
32058	Scroll the screen down one pixel. This routine scrolls the first four page and works in all modes 0 to 4.
32086	Scroll the screen up one pixel. This also scrolls the first four pages in Pmodes 0 to 4. However, when used in Pmodes 0,1 and 2 the Exec command should be followed by the command line (0,191)-(255,191),Preset.
32109	Invert the hi-res screen. This inverts the first four pages in all modes. Green pixels and buff pixels turn black, black turns green or buff depending on whether you are in Screen 1,0 or screen 1,1. Red turns green, Blue turns yellow and vice-versa. Orange and buff swap over and cyan and magenta switch.
32123	Scroll the screen left one bit — one pixel. This is for use in Pmodes 0 and 2 and affects the first two pages. It is smoother than the byte scroll used in the other modes but slower.
32163	Scroll the screen right one pixel. This also affects the first two pages in Pmodes 0 and 2.

Low-restext routines

Start address	Routine
32205	Invert the screen.
32255	Scroll the screen left one character.
32283	Scroll the screen right one character.
32313	Scroll the screen down one character. There is no routine to scroll the text screen up as this can be done with the simple Basic command Print at 480.
32341	Draw a border of a specified character around the screen. The poke code of the character used should be poked into location 32342 before calling the routine using Exec. The Poke codes are slightly different than the ASCII codes listed at the back of the manual. To find the Poke code of a character with ASCII code X, use Print at 0,Chr$(X);:Print Peek (1024)
32370	Fill the screen with a specified character. The character's Poke code should first be Poked into address 32371.
32383	Fill the background with a character. All the spaces on the screen are filled with the character whose Poke code is in address 32384.
323406	Fill the foreground with a character.

Sound routines

Start address	Routine
32429	Laser/Phasor/Zap
32474	Swanee whistle. When used several times at once produces a siren noise.



AUTO-COPYING

M C Evans with a routine to enable you to run ZX-81 programs on a Spectrum.

THIS PROGRAM, WRITTEN for the 48K Spectrum, will load ZX-81 program tapes and transform them so they are able to run on the Spectrum.

After the Basic program has been typed in from the program listing, which should not present any problem, run from line 9900 which will Save and Verify the program on tape.

When the Basic program has been Saved run from line 10. First the C() array will be filled with the Spectrum codes in the ZX-81 position, and the machine-code programs will be Poked into the correct location. All this information is held in data statements from line 9000 onwards. At the end of each data line there is a check-sum digit for the line. If an error occurs when the offending line will be listed ready for editing. After the line is corrected, restore the data and Run the program again.

Once the data has been loaded correctly you will be asked to insert the ZX-81 program tape and press enter. The first time you try to run this program I would suggest that you use a tape that you have purchased, since the quality of the recording is probably better than you are able to achieve. Start the tape as close as possible to the beginning of the program, this is to avoid the loading of lots of noise from a poor recording.

If the tape is noisy the solid border colours will change. Generally immediately prior to the start of the program there is a silent area; if necessary stop the tape recorder at this point and press Break on the Spectrum. To restart the program type Goto 500 then restart the tape recorder. I find that to load normal ZX-81 and Spectrum tapes that the volume on the tape recorder is set to about 75 percent. To load ZX-81 tapes on the Spectrum I have to use about 80 percent volume for tapes that I have purchased and about 95 percent volume for my own recordings.

The correct volume setting will have to be found by trial and error. If you listen to the noise made by the Spectrum when loading programs this will give a good idea of the volume required.

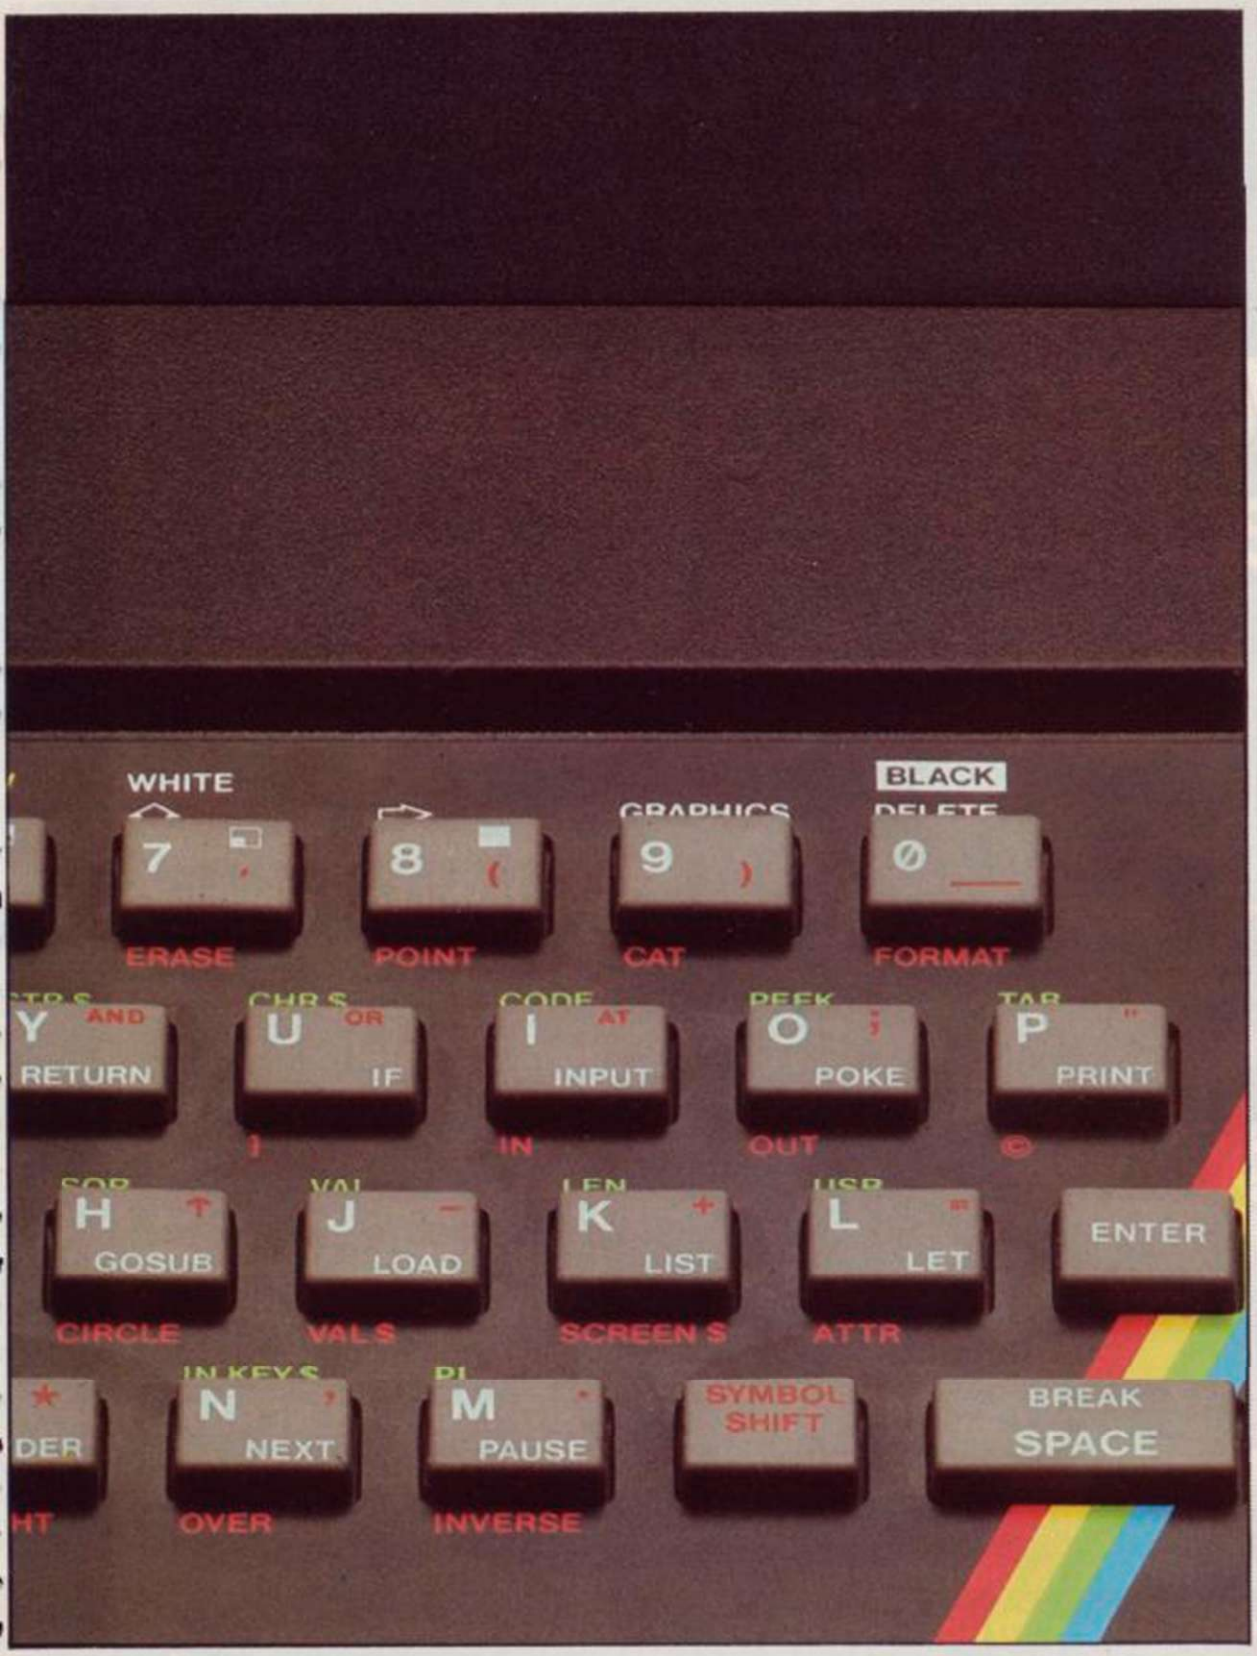
When the end of the ZX-81 program has been reached the border colours will revert to the solid changing colours. At this point press the Space-key — not Shift space or Break. The Basic program will then continue by asking for the name of the ZX-81 program that you have just loaded. The Basic program will then proceed to try and find the name among the information it has read from the tape.

When the ZX-81 program is being loaded, all the information that comes from the tape recorder is stored as it is received. This may mean, if the tape was noisy prior to the start of the program, that the program name is not at its correct position. The Basic program therefore looks at the first few storage locations to see if it can find the name.

If it cannot, it will then shift each bit along one position and repeat the search up to eight times for the program name. If the program name is not found, change the tape recorder settings and start the program again from line 500. If you still fail to find the program name then it will be necessary to re-record the ZX-81 program taking great care to produce the best quality recording you can. If you entered the wrong program name, then restart the Basic program from line 1000 and enter the correct name.

If you still fail to find the program name then it will be necessary to re-record the ZX-81 program taking great care to produce the best quality recording you can. Alternatively it may be possible to transfer the program directly from the ZX-81 to the Spectrum using a tape recorder and amplifier from an audio system. To do this, first load the program into the ZX-81. Then connect the Mic lead from the ZX-81 to the microphone input of the tape recorder, if it is stereo remember which channel you are using.

Connect the headphone output of the amplifier to the Ear lead of the Spectrum; if it



is a stereo amplifier turn the balance control so that only the correct channel is being used. Put a tape in the recorder and start recording, this will link the tape recorder and amplifier. Start the Basic program in the Spectrum from line 500 and finally instruct the ZX-81 to save its program.

This causes the ZX-81 program to be simultaneously recorded on tape, which can then be discarded, and lay the recording signal directly to the Spectrum, which thinks it is reading a tape. I found that the best results were obtained when as few as possible modifications were made to the recording signal, i.e., no Dolby, peak noise filter, bass, treble and other sound enhancements. Despite the number of leads and power supplies required, I found this method to be the most trouble-free. It also works Spectrum to Spectrum.

Having found the name of the ZX-81 program, the rest of the program is then converted so that it is able to run on the Spectrum with the following differences to statements.

Slow, Fast, Poke and Usr are replaced with Rem to stop the converted program accidently crashing. Unplot is replaced with Plot and the shaded ZX-81 graphic characters are replaced with Spectrum's user definable graphics — which you will have to define later.

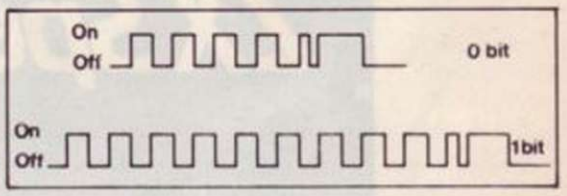
If a legitimate Rem statement is encountered, you are asked if the line contains machine code and, if so, if you want to Save the machine code on tape.

After the ZX-81 program has been converted you are prompted for a program name so the converted program can be Saved on tape. The Saved program can then be loaded back into the Spectrum as a normal Spectrum program. Most programs that are free of Peek, Poke and User statements are then able to run without any further modifications.

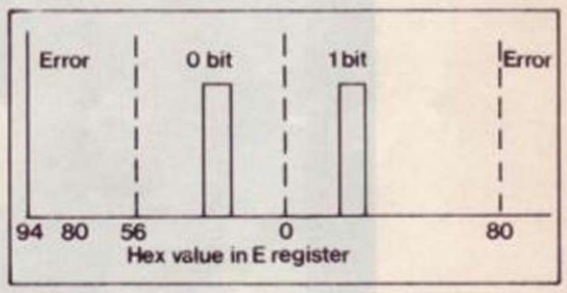
If having found the name an error occurs during the conversion, you will be prompted to Save the program, so far converted, on tape.

After the program has been Saved an attempt is made to find a new entry point into the ZX-81 program. Thus several sections of the ZX-81 programs can be Saved on tape and later using the Spectrum's Merge command, the programs combined together into one program, plus a few gaps. If errors do occur it is indicative of wrong volume setting or a poor recording.

There are also four machine-code programs used by the Basic program during the course of loading and converting the ZX-81 program. The first machine-code program interprets the ZX-81 tape signals and stores each bit of information as it is received. The signal on a ZX-81 tape has the following form:



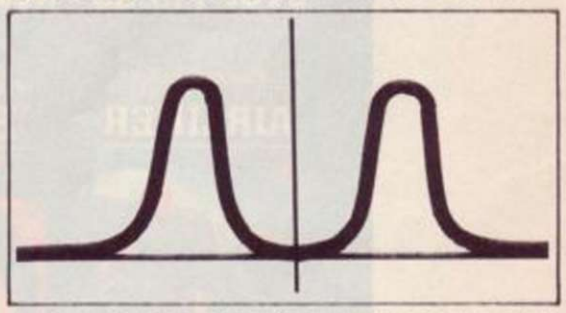
There are four or nine regular on and off signals — indicating 0 bit or 1 bit respectively — followed by a short on and off followed by a long on and off — which indicates the end of the bit. In the ZX-81 these signals are decoded by counting the time between reaching the start of the long off signal, from the previous bit, and deciding that the long on has been reached. The distribution of time taken to decode a bit looks like this.



The E register is used as a counter and starts with the value Hex 94, decreasing by one each time it passes through the loop. A long on signal is deemed to have been reached when the signal has been on for 26 loops.

If the long on is reached prior to the counter reaching Hex 56 then an error is assumed to have occurred and the counter starts again from Hex 94. If an error occurs anywhere else but the first bit, then the program will not load correctly. If a valid long on occurs before the counter reaches Hex 00 then the bit is an 0, otherwise the bit is 1. The grouping of time for the 0's and 1's is very compact and the ZX-81 seems difficult at interpreting the signal.

If the same procedure is followed on the Spectrum the following distribution occurs:



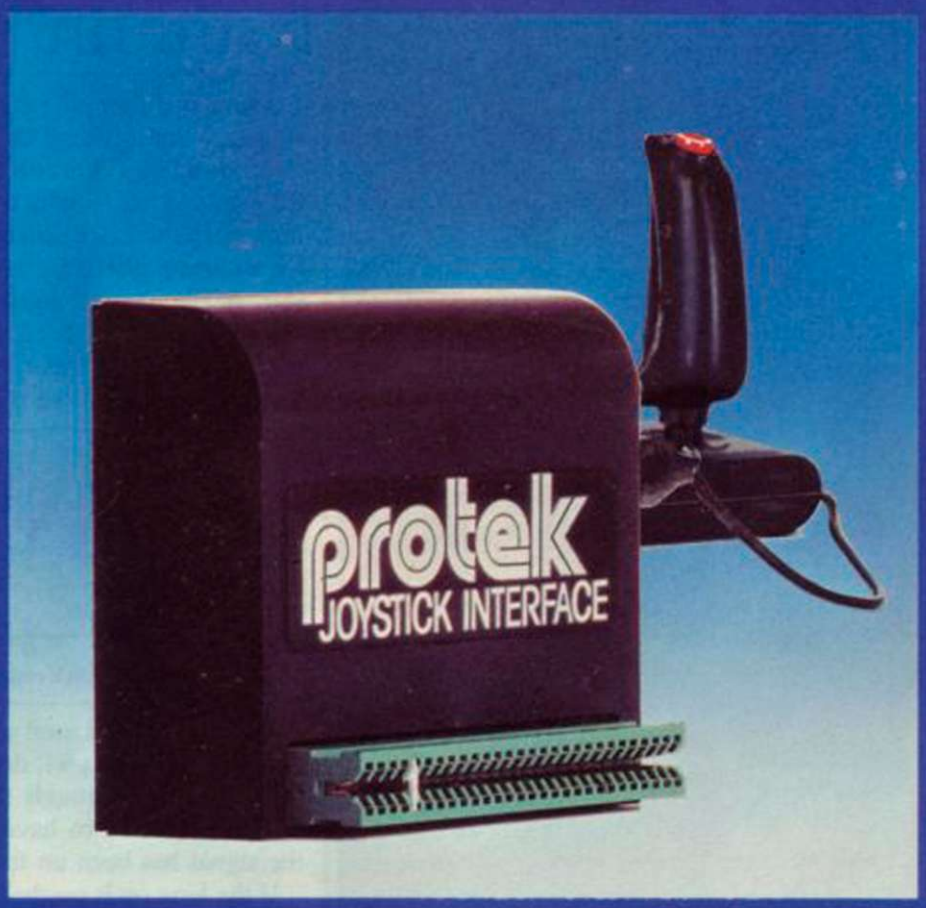
Instead of the grouping being compact, they appear like the statistical normal distribution with the accompanying tails. To get the distribution into the same form, the setting of the volume and tone controls on the tape

(continued on page 181)

PLAY TH

Arcade Action For The ZX Spectrum

SPECTRAVISION JOYSTICK
£9.95
(arcade action, pistol grip, ATARI® Compatible)



If you want Arcade quality control for your Sinclair ZX Spectrum, you'll find the Protek combination hard to beat. The interface is compatible with a range of software including a number of titles from: ULTIMATE, SILVERSOFT, RABBIT SOFTWARE, QUICKSILVER, QUEST, PSION, NEW GENERATION SOFTWARE, IMAGINE, OCEAN, plus many more.

The protek joystick interface is simple to use. It just plugs in at the back of your Spectrum and is compatible with any "Atari type" Joystick Connector. We recommend the Spectravision Joystick at only £9.95 for Pistol Grip Joystick with a top and base fire button plus specially contoured shape and rubber suction cup footing for single hand operation.

Protek JOYSTICK INTERFACE
£14.95

STOP PRESS * Now compatible with Zzoom * Jet Man * Kong * and Grid Runner

HUNTER-KILLER

For the 48K ZX Spectrum

Can you Captain a World War II submarine, hunt the enemy then destroy him with your torpedoes?
Realistic simulation including:

- ★Four high resolution screens
- ★18 control functions
- ★Solo or dual computer option
- ★Quick-kill practice features
- ★Asdic, radar and depth sounder
- ★Accurate and realistic chart
- ★Visible torpedo tracks
- ★Periscope with raise/lower option and 360° view
- ★Seabed, destroyer and mine hazards
- ★3D view of the target
- ★Enemy air attack
- ★Live target

YC 12

(continued from page 177)

recorder are critical — which is not the case on the ZX-81 — otherwise the distribution looks rectangular.

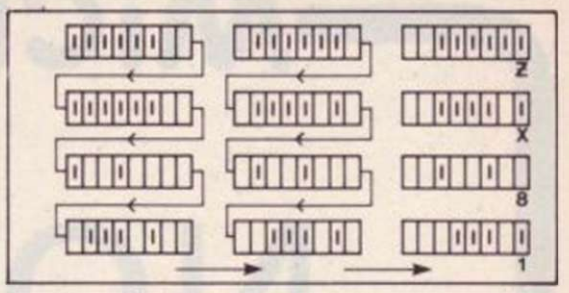
The next problem is that different tape recorder settings cause the peaks, and more importantly the tails, of the distribution to move. This then leads to the tail crossing the boundary between a 0 and 1 bit.

These differences between the ZX-81 and the Spectrum mean that it is not possible to use the ZX-81 method of decoding the tape signal and this is why greater care has to be taken when recording the ZX-81 programs to avoid the square shape of the signal becoming unduly rounded thus making it difficult to pick out the long on signal correctly.

The problem of knowing when the end of a bit has been reached is overcome by going back to first principles. By counting the on signals and looking at the long on signal to see if it occurs roughly on the fifth or 10th signal. The loading routine is the first of the machine-code programs and is very straight forward and simply reads the tape and stores each bit as it comes from the tape for interpretation later.

This leads to the problem that if there is any noise on the tape prior to the start of the program then the program itself will not be at the start location and each bit of data may not be at its correct position in the byte.

After a program has been loaded into the memory the next problem is to get each bit into correct position within the byte. This is done by the second machine code program trying to find the name of the ZX-81 program somewhere within the first few storage locations. To do this the Basic program first asks for the name of the program already loaded, then looks at about the first twenty locations to see if the name occurs, if it does not then each bit is moved one place, as shown below, until the name is found.



The third machine-code program is used to find a new entry point into the ZX-81 program by looking through the 16K storage area to see if it can find a code 118 (NEWLINE).

MICRO ANSWERS

NOW OPEN IN VICTORIA

ON DEMONSTRATION

BBC, DRAGON, SPECTRUM, ZX81, COMMODORE 64, VIC 20, ORIC, ATARI, T199/4A, LASER 200

- Over one thousand different software programmes in stock.
- Large range of peripherals, books and magazines.
- Two minutes from Victoria Station.
- Staffed by helpful experts.
- Open Monday to Saturday 10am-8.30pm.

MICRO ANSWERS

70-71 WILTON ROAD,

BUBBLE SORT

Andy Scott shows you how to rearrange numbers or strings.

MOST DATA-PROCESSING programs usually require the use of a sort at least once; for instance, the arrangement of a register of people's names into alphabetical order, the arrangement of football league tables into order according to the number of points accumulated . . . the list is endless. As can be seen by these examples, a sort is the rearranging of numbers or strings into ascending or descending alphanumerical order.

The main problem with sorts is that the more items that are required to be sorted, the longer the sort takes — but on a timescale increasing by the square of the number of items. Larger sorts require very sophisticated algorithms to keep this time down.

One of the most popular and easily understood sort algorithms is the bubble sort. Although not particularly efficient above about 50 items it is still nevertheless a good general-purpose sort. Also, since the sort described here is in machine code, its operation time is faster than a Basic counterpart.

It was decided to take the general case of sorting strings as opposed to numbers — it is comparatively easy to convert numbers to strings by using, for example, STR$ 1234. In the example described by the flow chart, the data items are stored in a string array A$(B,C) consisting of B strings, each C characters long. In practice, any name can be used for the programme to work, for example Z$(B,C).

The routine can be used with any sized ZX-81. Reference to page 174 in the Sinclair manual explaining how string arrays are stored within the ZX-81 may be necessary for complete understanding of the machine-code listing.

Note that the USR entry point is at hex 4090. One problem was how to tell the routine which string array it had to sort. This needed to be put into a Basic programme without affecting its operation and without creating a syntax error during entry of the Basic line. It was decided to call the routine by:

RAND USR 16528 + LEN A$(1)

where A$ is the name of the string array — it could equally be called S$,Z$, etc. Of particular interest is the use of the IX and IY registers which, according to the Sinclair manual, are banned from use for fear of crashing. After studying Sinclair's use of these registers, it can be assured that the sort programme has no adverse affect on the operation of the ZX-81. The two Halt instructions at the beginning of the listing are there to prevent the characters within the Rem statement from being listed onto the screen.

Use program 1 to load the machine-code programme. The machine code will sit in the Rem statement in line 1. After typing Rem, follow it with 258 characters — I usually use

(continued on next page)

Table 1.

No. of items	Length of strings	Possible number of different characters in strings	Machine-code programme		Basic (Fast)	
10	25	6 (2)	<0.5sec	(<0.5sec)	4.5sec	(8sec)
20	25	6 (2)	<0.5sec	(<0.5sec)	17sec	(33sec)
50	25	6 (2)	1.5sec	(2sec)	2m 5s	(4m 53s)
100	25	6 (2)	6.4sec	(7.7sec)	12m 11s	(>20m)
225	25	6 (2)	42sec	(53sec)	—	
100	10	6 (2)	3.5sec	(4.6sec)	11m 16s	(—)
255	10	6 (2)	23sec	(32.5sec)	—	
10	255	6 (2)	<0.5sec	(0.8sec)	6sec	(6.6sec)
10	1	6 (2)	<0.5sec	(<0.5sec)	3.3sec	(1.7sec)
100	1	6 (2)	0.8sec	(0.7sec)	5m 12s	(4m 4s)
255	1	6 (2)	4.7sec	(3sec)	—	

Machine-code listing.

(continued from previous page)

0's. Note that this will severely limit available memory on 1K ZX-81s. When running programme 1, enter the code in hexadecimal, either as a single byte plus Newline — for example 76 N/L — or as a block at a time — for example 76760000 N/L.

Make sure each byte consists of two digits — for example 00 and not 0. On completion of loading the machine code, enter S plus N/L. Delete lines 10 to 90. Do as a direct command Poke 16510,0. This changes the Rem line number from 1 to 0 and will thus prevent deletion of this line. Now, as a direct command, do a Clear. This will clear the variables area. Now Save on tape and, to be on the safe side, do a backup copy.

How is the program used? Program 2 is useful in that not only does it illustrate the implementation of sort, but also it can be used to ascertain the sort speed under various conditions. It asks how many strings are required to be sorted — I — of what length — J — and how many different letters in the alphabet are to be contained within the strings.

The requisite number of strings are then randomly made up from the number of letters chosen. The programme then Stops itself with report 9/290. If a report of 4/170 is received, the ZX-81 has tried to create an array which was too big for the memory available — reduce the size of I and/or J to compensate. The Stop is there to enable timing of the sort; press Cont then Newline and a stopwatch at the same time. As soon as a display starts to appear, stop the watch. The speed of the sort has now been

Program 1.

```
1 REM (fill this with 256 characters)
10 LET X=16514
20 LETA$=""
30 IF A$="" THEN INPUT A$
40 IF A$="S" THEN STOP
50 POKE X,16*CODE A$+CODE A$(2)-476
60 PRINT AT 11,7;X;" ",A$(1 TO 2)
70 LET X=X+1
80 LET A$=A$(3 TO)
90 GOTO 30
RUN (in FAST)
```

timed. The critical line is 300 — this is where the sort routine is entered.

Obviously, to use the sort in a Basic programme, the Rem line with the machine code must be Loaded from tape first. If any null strings are within the array to be sorted, that it those that have been Dimed but have not been defined with characters, these will

Program 2.

```
0 REM ...the machine code sort programme (258 bytes)
100 CLS
110 PRINT "HOW MANY STRINGS REQUIRED ";
120 INPUT I
130 PRINT I
140 PRINT "LENGTH OF EACH STRING ";
150 INPUT J
160 PRINT J
170 DIM A$(I,J)
180 PRINT "HOW MANY DIFFERENT LETTERS REQUIRED ";
190 INPUT D
200 IF D>26 THEN GOTO 190
210 PRINT D
220 FAST
230 FOR N=1 TO I
240 FOR L=1 TO J
250 LET A$(N,L)=CHR$ INT (D*RND+38)
260 NEXT L
270 NEXT N
280 SLOW
290 STOP
300 RAND USR 16528+LEN A$(1)
310 FOR N=1 TO I
320 IF PEEK 16442<>2 THEN SCROLL
330 PRINT A$(N)
340 NEXT N
```

appear at the beginning of the sorted list — actually these will be filled with Char 0 or spaces. To avoid this, do not Dimension the array more than is going to be used.

To increase the speed of the sort, Dimension the string array as early in the Basic programme as possible. This will reduce the time taken to find the relevant string in the VARS area. Note the sort returns in Slow mode. If an array has been defined, the format Rand USR 16528+LEN A$(1) can be used as a direct command, as well as in a Basic programme.

During the running of sort, two types of error could occur:

2:— no such string array exists (standard Sinclair definition)

E:— relevant array has more than 2 dimensions, or at least 1 dimension >255

Using the example program, table 1 was created. This indicates average times of the sort under different conditions.

The timings very clearly show the huge advantage of the machine-code version. Where a dash occurs, no timings were done due to their inevitable extreme length — hours in some cases! Even in machine code, the influence of number of, length and contents of strings is clearly seen.

Users of old Sinclair ROMs note the following changes to the machine-code listing:

4090-4092	CD200F
40A8-40AA	CD280F
40C2-40C4	CD280F
4146-4148	CD280F

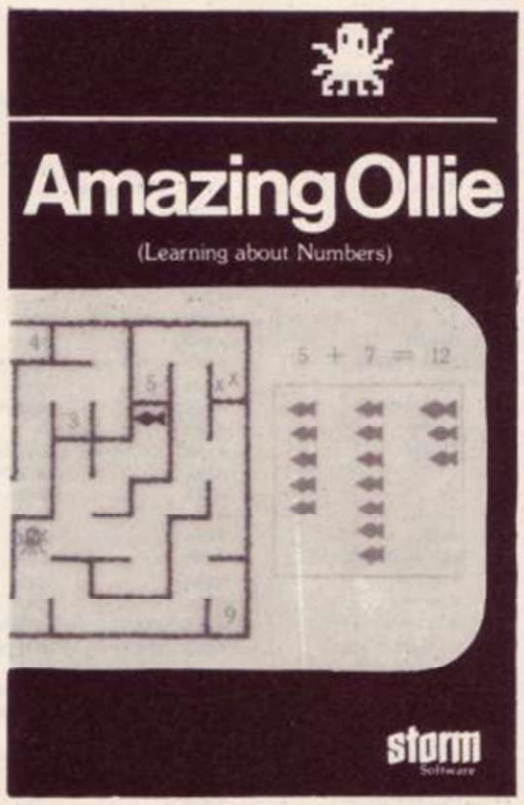
Brainstorm!

Widely used in schools

4–8 year olds

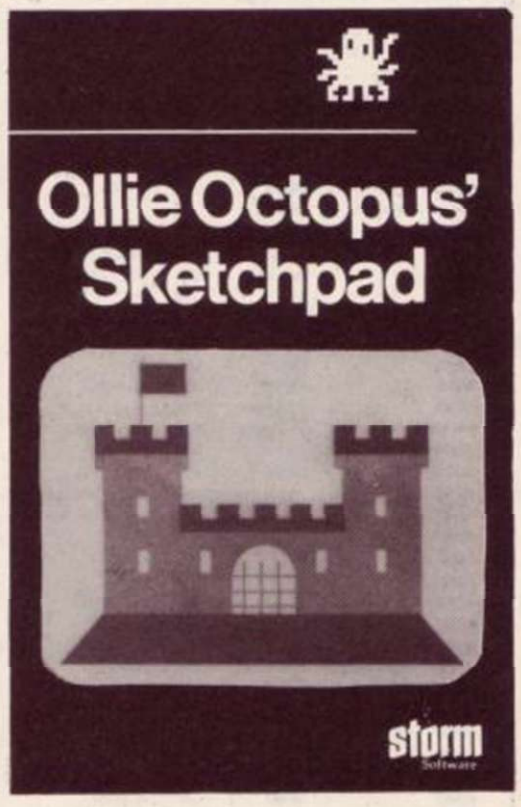
Free Ollie Octopus badge with each program

Ollie the Octopus must be moved around different undersea mazes to catch fish for himself and his hungry children! AMAZING OLLIE introduces children to the exciting new world of numbers (with options for basic number recognition, counting and adding), whilst providing a fascinating program for the whole family to enjoy.



storm

OLLIE OCTOPUS' SKETCHPAD is the program for young children and adults alike. Its easy to use manner lets you create an imaginative picture from a blank computer screen, with no trouble at all. Making full use of the colours, you can draw lines in 8 different directions, or build circles, squares or triangles, which can then be made bigger, smaller or shaded in.



BBC Model B 16K and 48K ZX Spectrum

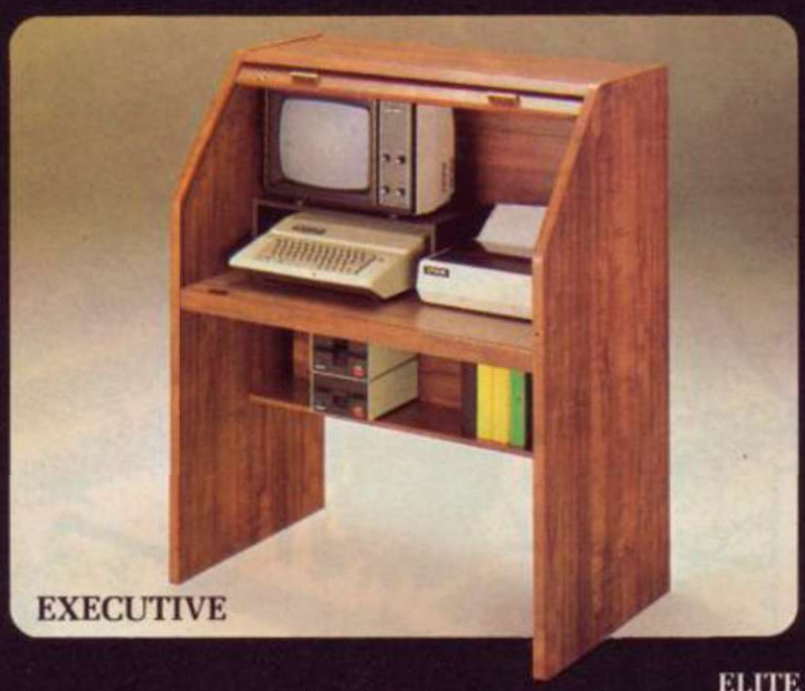
GIVE YOUR COMPUTER A FIRST CLASS HOME

ELITE

Colvin are pleased to introduce this new range of Computer Furniture.

Each unit is designed and constructed to accommodate computer equipment and provide stability and durability, preventing sway and shake.

Give your computer a truly professional base.



EXECUTIVE

AMBASSADOR

ELITE
Featuring a spacious drawer and large storage area for accessories, the Elite comes complete with sturdy black, dual-wheel castors which make for easy moving.
SPECIFICATIONS: Overall: 25¾" H. 19¾" D. 32¾" W
Platform: 6⅛" H. 9¾" D. 19¾" W

EXECUTIVE
With sturdy roll top, brass finished handles and key lock assembly, the Executive would not look out of place in any study.
SPECIFICATIONS: Overall: 46⅛" H. 23¾" D. 37½" W.
Platform: 6⅛" H. 9¾" D. 19¾" W.

All items delivered flat-packed, easy to assemble with full instructions provided.

AMBASSADOR
Plenty of work area combined with ample storage space are features of the Ambassador computer work centre.
SPECIFICATIONS: Overall: 32¼" H. 23½" D. 51¼" W
Platform: 6" H. 13" D. 24" W

SAS ASSAULT

As an SAS officer you must fight to the death in defence of your stronghold in P. Brabbins game for the Vic-20

SAS ASSAULT IS DESIGNED to work on an unexpanded Vic-20. It uses a short machine-code routine and high-resolution graphics.

As a soldier it is your duty to defend your stronghold until death. While you are guarding the wall, the enemy attacks. You alone have to defend the wall. Your only weapons are some large rocks which you hurl down on to them.

The longer you survive the more adversaries join in and you slow down as you start to tire. You receive three points for every second you survive and bonus points for each adversary you hit. You cannot drop a rock on an enemy soldier who is holding on to the top of the wall or on one who is walking along it. You control your man with keys:

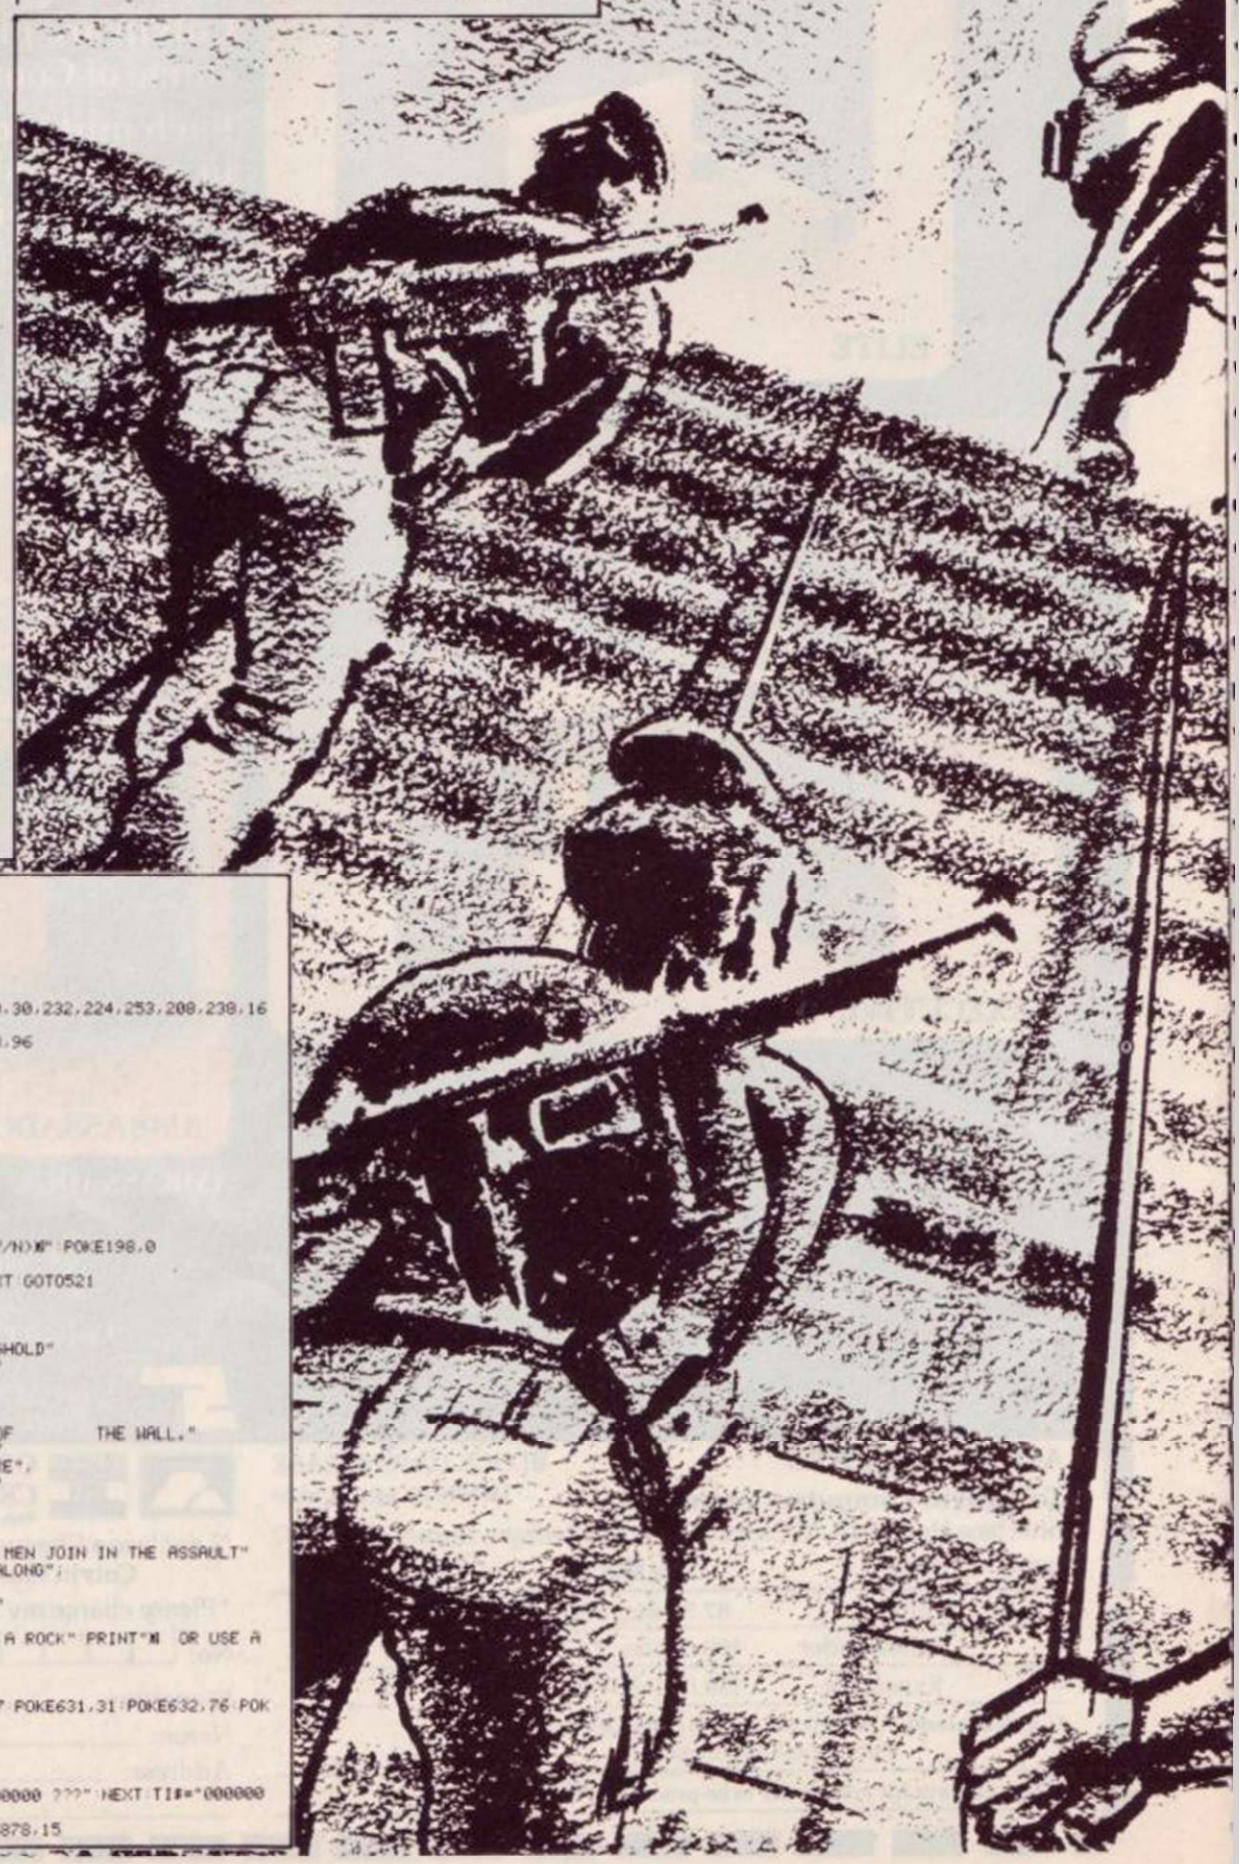
Z — Left C — Right
F1 — Drop a rock

The program also lets you use a joystick.

The high-resolution graphics and machine code are Poked into memory in program 1 which is also where the instructions are situated. The rest of the program comes in program 2. Type in program 1 and Save it on tape. New the memory and then type in program 2. Save this after program 1 and then it is ready to re-load program 1. After running, program 2 Loads and Runs automatically. The machine code only sets up the screen.

If the game is left as it is, you probably will not get past level 8. To make it easier change line 860 to:

```
FW=INT((A+7)/4):IFT=FW OR T=FW*2 OR
  T=FW*3 OR T=FW*4 THEN GOSUB 996
```



Program 1.

ZX MICROFAIR

More Sinclair Computer games, goodies and presents than in Santa's grotto.

GREAT TWO DAY SHOW AT ALLY PALLY DECEMBER 3rd & 4th

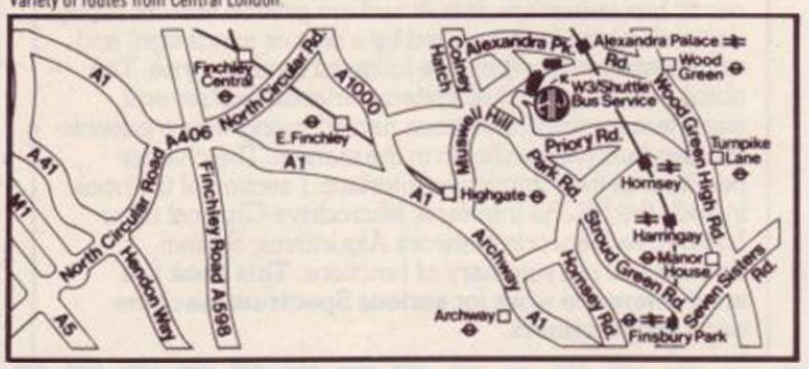
There's more to see, more to play with, more to experiment with and more that's NEW for Sinclair Computers at the great **TWO DAY ZX MICROFAIR AT ALLY PALLY!**
Come along and see for yourself.
It's the BIG SHOW for ZX enthusiasts, plenty of room, bars, refreshments . . .
in fact the ideal opportunity to pick up that last-minute Christmas present!
So, whether you're looking for a Sinclair Computer, hardware, software, peripherals, books or anything that's new . . .
. . . there's everything from GAMES to GIZMOS at the BIG ZX MICROFAIR!
More than there is in Santa's Grotto!

GET YOUR ADVANCE TICKETS NOW!

SATURDAY 3rd DECEMBER and SUNDAY 4th DECEMBER 1983
ALEXANDRA PAVILION, ALEXANDRA PALACE, WOOD GREEN, LONDON N22. Open: Saturday 10am-6pm, Sunday 10.30am-4.30pm.
Advance Tickets from: Mike Johnston, 71 Park Lane, Tottenham, London N17 0HG.
Prices: Adults £1 Kids (under 14) 50p. Parties of 10 or more at 10% discount!
Please make cheques payable to ZX MICROFAIR and enclose S.A.E.

CUT OUT AND KEEP

By Road
Follow signs from the A1 (Links with M1 and North Circular). Plenty of parking space available!
Variety of routes from Central London.

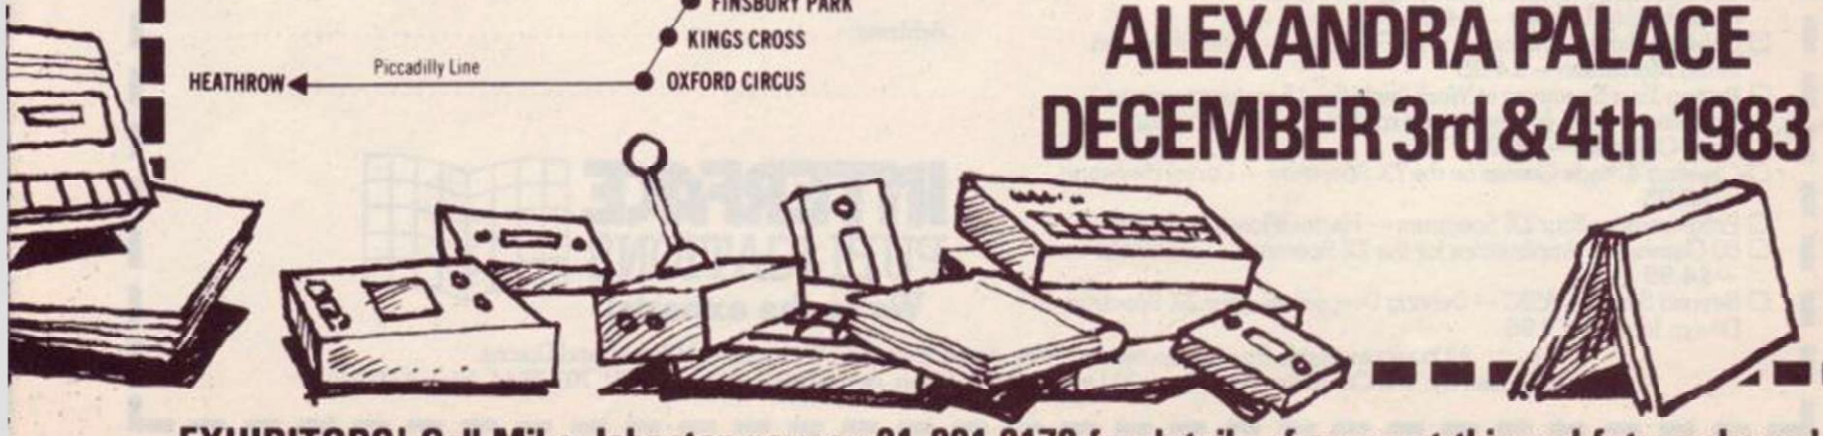


By London Transport
Underground: Victoria Line from Victoria (also Oxford Circus, Kings Cross/St Pancras) to Highbury and Islington — change (cross platform) to BR Suburban Service to Alexandra Palace — free shuttle bus or 5 minute walk from there!

Alternative: Piccadilly Line (from Heathrow etc) to Finsbury Park or Wood Green — Link with W3 bus service to the fair.

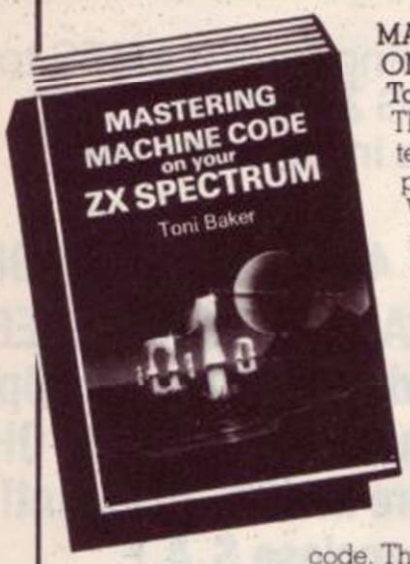
By British Rail
From London (Kings Cross or Moorgate) — about every 10 minutes to Alexandra Palace station — free shuttle bus or short walk from there!
From any part of the U.K. enquire from Kings Cross Travel Centre, London N1 9AP (phone 01-278 2477) about special day trips to the ZX MICROFAIR!

9th ZX MICROFAIR
ALEXANDRA PALACE
DECEMBER 3rd & 4th 1983



EXHIBITORS! Call Mike Johnston now on 01-801 9172 for details of space at this and future shows!

At last!
MASTER MACHINE CODE on your Spectrum



MASTERING MACHINE CODE ON YOUR ZX SPECTRUM
Toni Baker £9.95

This 315-page book is designed to teach you the essential elements of programming in machine code. Written by Toni Baker, author of the highly successful 'Mastering Machine Code on the ZX81', this new book assumes absolutely no previous knowledge of machine code whatsoever, and yet promises to take you to a level of proficiency beyond your wildest dreams. Starting with simple addition and subtraction you'll be slowly guided through the entire subject of machine code. The book explores and utilises the incredible speed of machine code, giving you real time graphics games like BREAKOUT and leads you up to a full working DRAUGHTS program. Among other useful skills you'll acquire the ability to create music in real time (impossible in BASIC) and to plot in high-resolution graphics faster than you would have believed possible.

SPECTRUM MACHINE CODE MADE EASY
Volume One — James Walsh
Volume Two — Paul Holmes

These two books provide a graduated course in machine code programming on the ZX Spectrum. Book one starts off with the basic concepts of machine code, followed by an explanation of binary maths, hexadecimal and base conversion, leading as quickly and painlessly as possible onto the rules and types of addressing the Spectrum's powerful Z80 microprocessor. Book two is designed for those who already understand the rudiments of machine code programming, and now wish to increase their skills.
Each book is just £5.95

THE SPECTRUM MACHINE CODE REFERENCE GUIDE
Microdrive, Interface 1, and ROM Disassembly
Richard Ross-Langley £4.95

This 170-page reference work for Spectrum machine code programmers contains a full disassembly of the Spectrum ROM, with details of the Microdrive and Interface 1.

Features of the disassembler include: Zilog mnemonics are used, eg LD A, (HL) instead of MOV A, M; relative jumps show the signed decimal offset and the result; hex values are default and are printed without suffix; decimal values are preceded by a plus or minus sign; and some restart instructions are followed by data bytes. The absolute addresses of all system variables and several important routines have been named, using where possible the standard names shown in the manual. The chapter headings in the Microdrive/Interface 1 section of the book include the RS232 Interface; Microdrive Channel data; Local Area Network; Network Algorithms; System Variables; and a summary of functions. **This book is a must reference work for serious Spectrum machine code programmers.**

Interface Publications, Dept. YC, 44-46 Earls Court Road, London W8 6EJ

Please send me the following books. I enclose £_____

- ☐ Mastering Machine Code on your ZX Spectrum — Toni Baker — **£9.95**
- ☐ Spectrum Machine Code Made Easy, Volume One for beginners — James Walsh — **£5.95**
- ☐ Spectrum Machine Code Made Easy, Volume Two for advanced programmers — Paul Holmes — **£5.95**
- ☐ The Spectrum Machine Code Reference Guide — Richard Ross-Langley — **£4.95**
- ☐ Creating Adventures on your ZX Spectrum — Peter Shaw and James Mortleman — **£4.95**
- ☐ Putting Your Spectrum to Work (includes 15 major programs, including a word-processor and spread-sheet calculations) — Chris Callender — **£4.95**
- ☐ Creating Arcade Games on the ZX Spectrum — Daniel Haywood — **£3.95**
- ☐ Programming Your ZX Spectrum — Hartnell/Jones — **£6.95**

SCRAM-81

ZX-81

Philip Harwood completes his Scramble-type game for the ZX-81 with details of aircraft movement and firing systems.

```
133 POKE F,22
134 POKE F + 1,3
135 POKE F + 2,0
136 LET F = F + 3
137 NEXT G
138 POKE 20488,185
139 POKE 20489,2
141 POKE 20480,0
142 POKE 20486,21
143 POKE 20487,3
155 RAND USR 21331
170 RAND USR 21355
180 IF PEEK 20480 = 0 THEN GOTO 155
```

The aircraft should now appear and is controlled by the keys A — up, Z — back and M — forward. Note that two keys can be pressed simultaneously to give diagonal movement. There is a limit to how far the aircraft can move forward, this can be adjusted by Poking address 21506.

Rem 15 contains seven subroutines:

(continued on page 193)

Rem 14.

```

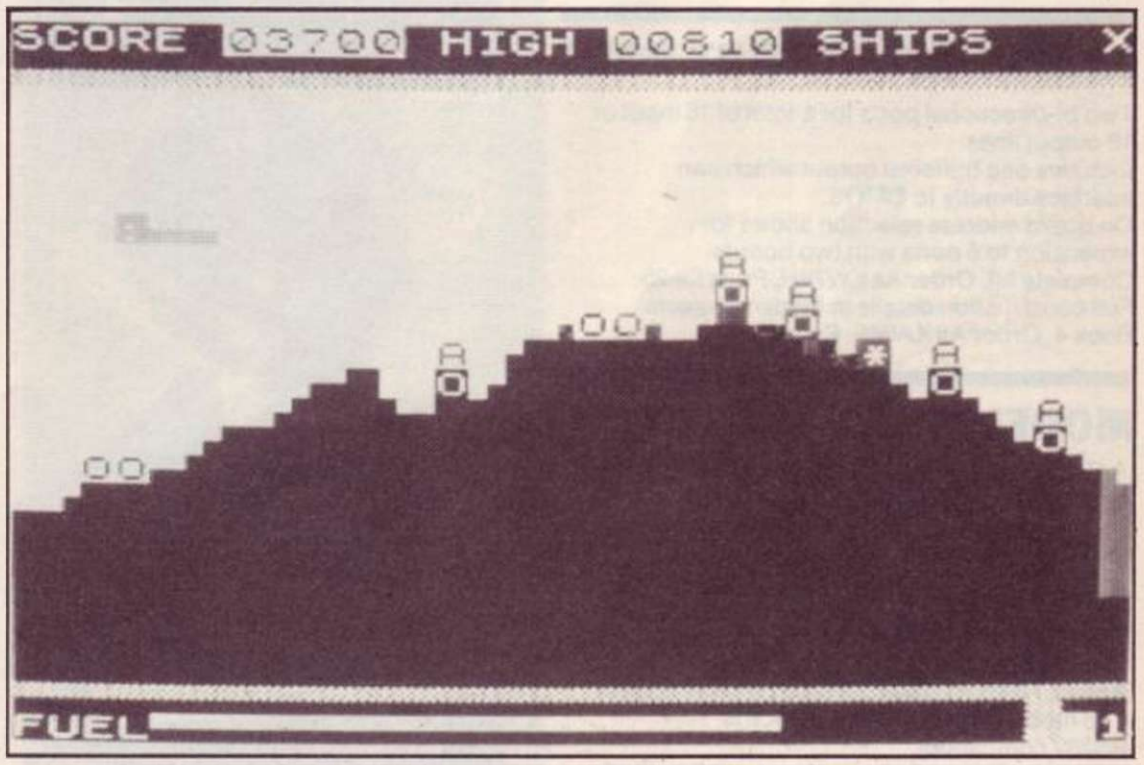
WE NOW MOVE INTO part two of the program for Scram-81. This is where the aircraft and other features of the game are added. Reserve more space for the machine code by creating Rem statements 14 to 18 of lengths indicated in table 1. Check the addresses as before.

The aircraft and bombs etc. are held on a separate screen which is superimposed onto the background and erased just before the background is moved. The time of erasure is kept to an absolute minimum to avoid any excess flickering of the screen. Enter the machine code for Rem 14. This deals with the movement of the aircraft.

In addition to the last Basic program, add or change the following:

```
131 LET F = 20499
132 FOR G = 1 TO 6
```



```
21967 - 553600112100197E = 340

EXCITING ADDITIONS FOR YOUR HOME COMPUTER

THE MAPLIN TALK-BACK for ZX81 and VIC20

Now your computer can talk

- ★Allophone (extended phoneme) system gives unlimited vocabulary.
- ★ Can be used with unexpanded VIC20 or ZX81 — does not require large areas of memory.
- ★ In VIC20 version, speech output is direct to TV speaker with no additional amplification needed.
- ★ Allows speech to be easily included in programs.

Complete kits. Order As:
LK00A (VIC20 Talk-Back). Price £24.95.
LK01B (ZX81 Talk-Back). Price £19.95.
Full construction details in Maplin Projects Book 6. Price 70p. Order As XA06G.

SOUNDS GENERATOR FOR ZX81

3-Programmable tone generators with programmable attenuators turns your ZX81 into a mini-synthesiser.
Noise generator with 3 pitch levels enables the creation of most special effect sounds.
Single address access via BASIC with PEEK and POKE. Connects directly to expansion port socket or motherboard.
Complete kit. Order As LW96E. Price £10.95.
Full construction details in Maplin Projects Book 5. Order As XA05F. Price 70p.

ZX81 INPUT/OUTPUT PORT

Two bi-directional ports for a total of 16 input or 16 output lines.
Includes one buffered output which can interface directly to CMOS.
On board address selection allows for expansion to 6 ports with two boards.
Complete kit. Order As LW76H. Price £9.25.
Full construction details in Maplin Projects Book 4. Order As XA04E. Price 70p.

MODEM

A CCITT standard modem that connects directly to your telephone line via a B.T. approved transformer. Transmits and receives simultaneously on European standard frequencies at 300 baud. May be used to talk to any other 300 baud European standard modem including the Maplin Computer Shopping modem on 0702 552941 and any British Telecom Datel 200/300 Service modem.
The modem's computer interface is RS232 compatible.
A complete kit excluding case is available. Order As LW99H. Price £39.95.
Full construction details in Maplin Projects Book 5. Order As XA05F. Price 70p.

KEYBOARD with ELECTRONICS for ZX81

- ★ Full size, full travel keyboard that's simple to add to your ZX81 (no soldering in ZX81).
- ★ Complete with electronics to make "Shift Lock", "Function" and "Graphics 2" single key selections.
- ★ Powered (with adaptor supplied) from ZX81's own standard power supply.

Full details in Project Book 3 (XA03D). Price 70p
Complete kit (excl. case) £21.90.
Order As LW72P.
Case £4.95. Order As XG17T.
Ready built-in case £29.95.
Order As XG22Y.

ZX81 TV SOUND

ZX81 sound on your TV set.
Video reversing switch for normal or inverse video display. Can be used with the Talk-Back or Sounds Generator kits.
Complete kit. Order As LK02C. Price £19.95.
Full construction details in Maplin Projects Book 6. Order As XA06G. Price 70p.

ZX81 EXTENSION BOARD

Our ZX81 Extendiboard plugs directly into the ZX81 expansion port and will accept a 16K RAM pack and three other plug-in modules simultaneously. Parts are sold separately as follows:
PCB Order As GB08J. Price £2.32.
Edge Connectors (4 needed) Order As RK35Q. Price £2.39 each.
Track pins (1 pack needed). Order As FL82D. Price 85p per pack of 50.

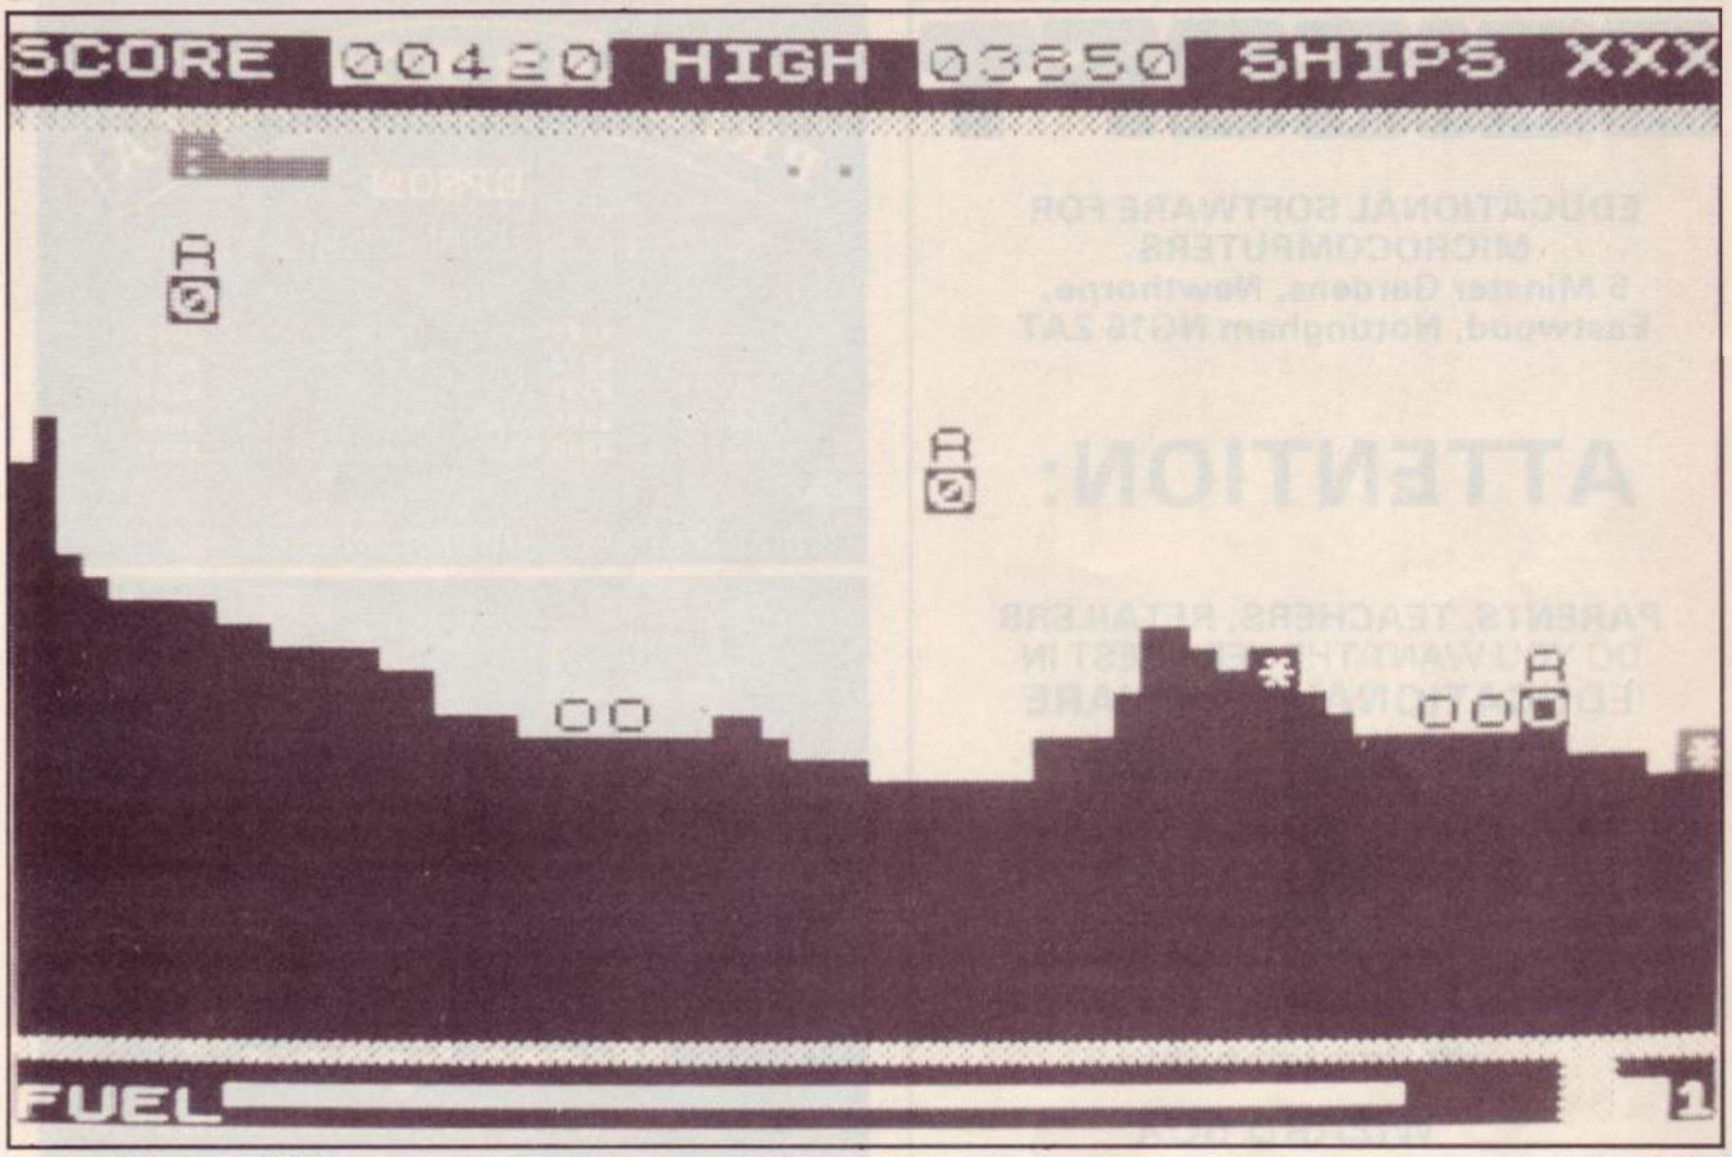
INTERFACES for MODEM

Interfaces for most popular home computers which do not have RS232 ports will be available shortly. Interfaces for the ZX81 and VIC20 that include a complete Machine Code Communications Program are available. Order AS LK08J (ZX81 Modem Interface Kit). Price £24.95
Order As LK11M (VIC20 Modem Interface Kit) Price £9.45.
Full construction details in Maplin Projects Book 7. Order As XA07H. Price 70p.

MAPLIN

Maplin Electronic Supplies Ltd., Mail Order: P.O. Box 3, Rayleigh, Essex SS6 8LR.
Tel. Southend (0702) 552911 (Sales).

159-161 King St., Hammersmith, W6. Tel. 01-748 0926. 284, London Road, Westcliff-on-Sea, Essex. Tel. (0702) 554000. Lynton Square, Perry Barr, Birmingham. Tel. (021) 356 7292.
All prices include VAT & carriage. Please add a 50p handling charge to orders under £5 total value.



(continued from page 191)

Screen score	21557-21583.
Score character convert	21584-21602.
Fuel gauge	21603-21643.
Refuelling	21644-21680.
Down scroll	21681-21721.
Crash flash	21722-21746.
Success graphics	21747-21856.

These subroutines cannot be tested properly at the moment but they should be entered just now.

Bombing and firing is held in Rem 16. This should be entered.

Also add:

172 RAND USR 21978 — firing
173 RAND USR 22074 — bombing
174 RAND USR 21603 — fuel gauge

Keys 1 to 5 operate the bombs and Return fires the bullets. There is a maximum of two bombs and four bullets. Before Running — 100 — add the following lines in Basic:

151 PRINT AT 0,0; "SCORE 00000"
152 POKE 16418,0
153 PRINT AT 23,0; "FUEL (25 x graphic 6) graphic H"

Enter Rems 17 and 18. These are the two main reset/controller programs. If the machine code has been entered correctly type:

RAND USR 22411

and the complete game should Run. To break into it, press the zero key. If it works, then congratulations, if not then check the machine code for part two. If you wish to add a title page then Poke addresses 22801 and 22775 with 201. This will let the program return to Basic at the end of every game where a title page in Basic can be added.

To complete the program, delete all the Basic except the initial Rem statements and add:

50-100 title page (if desired)
150 RAND USR 22411
160 GOTO 50.

If anyone does not wish to attempt the task of entering this large machine-code program or has problems in getting it to Run properly then a cassette version is available by writing direct to the author; P. Harwood, 12 Upper Glen Road, Bridge of Allan, Nr Stirling. Price £3.50 inc. p&p. ■

Table 1.

Rem	Length	Start address	End address	Type	Purpose
14	220	21331	21550	mc	Move the aircraft.
15	300	21557	21856	mc	Subroutines.
16	323	21863	22185	mc	Bombing and Firing.
17	213	22192	22404	mc	Reset subroutines.
18	393	22411	22803	mc	Drive/controller program.

MICRO
(Model A and Model B)

WITH COLOUR, SOUND AND OTHER ENHANCEMENTS

PROGRAMS WRITTEN IN STRUCTURED FORM

£7·95 Paperback 110 pages

NEW

These programs cover a wealth of basic concepts every child will meet in primary education. They are produced by professional educators and have been thoroughly tested in a primary school. Designed to go beyond drill & practice they promote learning through interaction and discovery. Programs range from counting and simple arithmetic to ones dealing with volume, balance and direction, mostly in form of games. Each program is short but powerful and comes with full documentation.

ATTENTION ALL ZX81 AND SPECTRUM OWNERS

Introducing the new Ricoll compatibles

Guaranteed quality and reliability at sensationally low prices

Keyboard RIKB1

Just imagine how good it would be to turn your ZX81 or Spectrum into this attractive model with its professional typewriter keyboard (full 41 keys plus spacebar) and rugged all metal body.

It's not only good looking, there's a list of features beneath the gleaming black finish and the price shows how easy we've made it turn the dream into reality.

- Adjustable fixing of P.C.B. virtually eliminates the famous 'wobble' and provides a complete choice of add-on parts.
- Simple connection, no soldering, no special skills. All you need is a screwdriver and pliers.
- Complete with full instructions.
- Double shift key.
- Switches have gold-plated contacts and a guaranteed life of 10^6 operations.
- Ergonomically shaped front ensures easy operation.

Be sure to state whether ZX81 or Spectrum type required.

All metal rugged construction

£37.95 inc. VAT
p & p £2.00

Sound Generators

RISG

Now you'll be able to add those exciting sounds you've always wanted. Our new sound generator RISG, specially developed for the Spectrum is programmable to produce virtually any sound; animals, birds, explosives, bomb blasts, trains etc.

- Completely programmable.
- Uses the popular GI Chip AY3-8910.
- COMPLETE WITH DEMONSTRATION CASSETTE.
- Sturdy plastic case.
- Own speaker and amplifier.
- Fits neatly into the back of your computer - no soldering.

RIFG

Our super sound generator has everything that the RISG offers plus programmable high quality low pass, high pass, or band pass filter. This additional circuitry offers a much wider range and control of the generated sounds.
Additional feature: the provision of two 8 bit input/output ports.

★ Special introductory prices on generators until 31st December ★

Sound Generator Software

To help you get the most from your sound generator we've developed a more comprehensive cassette which offers a wider range of sounds. **£3·50plus 40p p&p**

Buffered Motherboard

Of special interest to educational establishments and serious hobbyists

Eight slot expansion **buffered** motherboard for the Spectrum enables up to eight add-on boards to be fitted and operated with complete security.

Full data sheet available soon

16K RAM Pack RI161

Increase the power and potential of your ZX81 with our 'state of the art' 16k RAM pack. We've used the latest technology to reduce the number of I.Cs and give you better efficiency and improved operation.

- Very low power feature when used with our keyboard RIKBI, the dreaded 'wobble', overheating and memory loss become things of the past.
- Easily expandible to 32k by simply plugging in extra RAM chips - no soldering! See our special offer!
- Sturdy plastic case.
- Fits neatly into rear of computer.

'state of the art' technology

£22.95 inc. VAT
p & p £1.25

Special Introductory Offer

If you upgrade to 32k within six months of purchase, we will supply the necessary chips for your RI161 at a special price of only £13.75 inclusive of VAT (p&p £1.00).

New computer books are cropping up everywhere. Here's the pick of the bunch.

MASTERING THE COMMODORE 64

by **A.J. Jones** and **G. Carpenter**

Contents: Review of BASIC; Some BASIC Tools; Manipulating Data; Memory Management; Sound; Principles of Graphics; Moving Graphics; Peripherals; Input/Output; Introduction to Machine Code Programming on the 6510; Using an Assembler/Editor; Tables.

December'83 approx. 260pp
085312 654 2 £6.95

Published by Ellis Horwood Ltd. and marketed by John Wiley and Sons Ltd.

GETTING STARTED ON THE ORIC-1

by **D.G.J. Cole**

Contents: Introduction to the Machine; Talking to BASIC; Use of the Cassette System; Again and Again (Loops and Their Uses); Some Mathematics; Graphics; Conditions and Strings; Sound; Ordered Storage (Arrays); Subroutines; Tables; Appendices.

December'83 approx. 120pp
085312 656 9 £5.95

Published by Ellis Horwood Ltd. and marketed by John Wiley and Sons Ltd.

MASTERING THE ZX SPECTRUM

by **Lawrie Moore**

This book is about how to enjoy your Spectrum through learning programming and handling the machine: it dispels the mental block which sometimes occurs for beginners, that of grasping and understanding the building of a program.

December'83 approx. 150pp
085312 700 X £5.95

Published by Ellis Horwood Ltd. and marketed by John Wiley and Sons Ltd.

USING BBC BASIC

by **P.J. Cockerell,** *University of Kent at Canterbury*

This book aims to develop both skills in BBC BASIC and a more intimate knowledge of some of the special features on the BBC Microcomputer. Programs as well as text are presented in an easy and accessible style.

December'83 approx. 352pp
0471 90242 X approx. £6.95

THE SENSIBLE 64

by **D.Highmore** and **L.Page**

Topics covered in this book include: the keyboard and function keys; user-defined and multicolour graphics; screen displays and bit mapping; creating and using sprites; sound effects and music; programming with a disk drive; using a graphic printer.

November'83 approx. 128pp
9467 05 003 £5.95

Published by Microbooks and marketed by John Wiley and Sons Ltd.

GETTING MORE FROM YOUR NEWBRAIN

by **Andrew Pepper** and **Michelle Clark**

The Newbrain computer is fast becoming one of Britain's most sought after micros.
In this book Andrew Pepper and Michelle Clark guide you through the machine's capabilities and a BASIC programming course, and then into specifics — how you can exploit your Newbrain's 32K of RAM and excellent interfacing and expansion facilities — saving and retrieving programs, datatypes, Newbrain streams, control statements, numbers, arrays, strings, graphics, programming discipline, and Newbrain operation system. For business and technical applications, or for use in your own home, your copy of GETTING MORE FROM YOUR NEWBRAIN will make *your* Newbrain perform at peak efficiency.

December'83 approx. 150pp
0905104 676 approx. £7.50

Published by Sigma Technical Press and marketed by John Wiley and Sons Ltd.

HOT PROGRAMS TO FEED YOUR DRAGON

by **M.A. Smith** and **G.P.S. Robinson**

This book contains not only the best programs for your Dragon (or Tandy Color Computer) but also a full description of how the programs work.
The book divides naturally into four sections:
ADVANCED GAMES: These include *3d-Sub Hunt* (complete with Radar screen and Sonar), *Golf* — which realistically uses joysticks to control ball speed and direction.
SOUND AND GRAPHICS: includes *Synth* — a full sound a and music synthesiser with graphical output.
BUSINESS: For the business user of the Dragon 32, there is a full *Word Processor*, a *Telephone Call Costing System* and an *Information Retrieval System.*
UTILITIES: These include a utility to convert Tandy tapes to Dragon format and vice versa.

December'83 approx. 160pp
0905104 51X approx. £6.95

Published by Sigma Technical Press and marketed by John Wiley and Sons Ltd.

DISC DRIVES FOR MICROCOMPUTERS: How They Work and How to Program Them

by **M. Browne**

This book describes, for the non-professional computer user, the workings of disc drives and how they affect the sort of program that can be written.
Disc drives have been in general use with computer systems for many years but it is only in the last few years that they have become available to the microcomputer user and only now are they becoming available at the right price for home computer users.
One of the main features of the book is a detailed explanation of perhaps the most important of all access methods, the 'Index Sequential Access Method' (ISAM) and a section on how to create your own ISAM for your computer. The book includes a full explanation of record and file design.

October'83 approx. 144pp
0946195 10 2 £6.95

Published by Sinclair Browne Ltd. and marketed by John Wiley and Sons Ltd.

John Wiley are major publishers and distributors of books and software for the computing world. As well as Wiley professional reference books and software an extensive range of titles for the student and hobbyist is available by other leading publishers including Ellis Horwood, NCC, Sigma Technical Press, Sinclair Browne and Sulis Software.

Ask for further details now at any good bookshop or computer store.

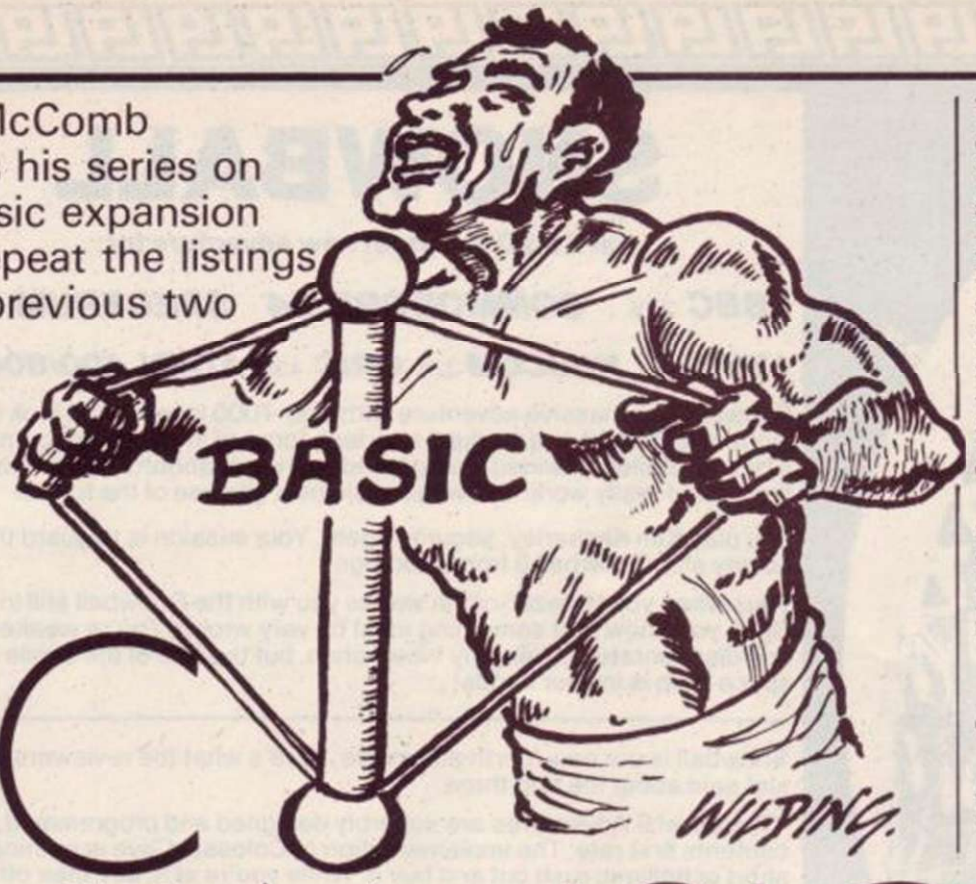
Damian McComb concludes his series on Vic-20 Basic expansion and we repeat the listings from his previous two articles.



VIC EXPANSION

THIS MONTH is the third and final part of the extended Basic program for the Vic-20 with 3K expansion. Listings from the previous two articles have been included as well as the final part of the program. I must stress that you must use a 3K expansion and no other type since they use different memory blocks. However, if you have an expansion board you may use additional 8K and 16K packs along with the 3K. When you type in and run the three extended Basic programs one after the other, the familiar

CBM BASIC V2

message should appear. You must now type the following command, which protects the program from being overwritten, before anything else:

LOMEM 2830: DOKE 2829,0:NEW

You are now ready to use the new commands. Remaining commands include:

Trace A: Parameters — A=0, turns trace off; A=1, turns trace on. This command puts a trace on a Basic program while running. The

SNOWBALL

at £9.90 is a great new adventure for:

BBC 32K ***COMMODORE 64*** ***SPECTRUM*** 48K

LYNX 48K ***NASCOM*** 32K ***ORIC*** 48K ***ATARI 400/800*** 32K

Snowball is a massive adventure with over 7000 locations. it took nine months to perfect and marks a new leap forward in adventure games – it has a detailed, planned background and is set aboard a huge starship that would really work. Snowball could be a glimpse of the future!

You play Kim Kimberley, security agent. Your mission is to guard the colony ship Snowball 9 from sabotage.

Thus when your freezer-coffin wakes you with the Snowball still in flight, you know that something must be very wrong. You're weakened and disorientated by lengthy hibernation, but the fate of the 5 mile long space-ship is in your hands!

Snowball is our new fourth adventure. Here's what the reviewers have just said about the first three:

"The Level 9 Adventures are superbly designed and programmed, the contents first rate. The implementation of Colossal Cave is nothing short of brilliant; rush out and buy it. While you're at it, buy their others too. Simply smashing!"

- SOFT, September 83

"Of the programs reviewed here, the only one that is wholly admirable is Level 9's Colossal Adventure."

- Your Computer, September 83

"I found Dungeon exceedingly well planned and wriiten, with a fast response. There are well over 200 locations and the descriptions are both lengthy and interesting."

- Computer & Video Games, September 83

"This has to be the bargain of the year . . . If adventures are your game, then this is your adventure".

- Home Computing Weekly, 30th August 83

"There are three excellent adventures on offer from Level 9 . . . the descriptions are so good that few players could fail to be ensnared by the realism of the mythical worlds where they are the hero or heroine . . . great fun to play."

- Which Micro?, August 83

MIDDLE EARTH ADVENTURES

for the same micros as Snowball

Each of these games has over 200 locations and a host of puzzles. They can be played singly or together as an impressive trilogy. Each game could well take months to solve!

1) Colossal Adventure
The classical mainframe game "Adventure" with all the original puzzles plus 70 extra rooms.

2) Adventure Quest
An epic puzzle journey in Middle Earth..

3) Dungeon Adventure
Over 100 puzzles to solve as you explore the dungeons left by the Demon Lord – outwitting their guardians.

Price: £9.90 each (inclusive)
Level 9 adventures are available from good computer shops, or mail-order from us at no extra charge. Please send order, or SAE for catalogue, describing your micro to:

```

current line number is displayed in the top left hand corner of the screen and the program can be paused at any point, to view the line number, by pressing the Ctrl, Shift or Commodore keys.

Doke A. B: Parameters — A (0 to 65535); B (0 to 65535). This command is similar to Poke, only it is used to set words — two bytes of memory at a time instead of single bytes. For example

DOKE 0, 1000

would put 232 in 0, and 3 in 1.

Put A: Parameters — A = ASCII value (0-255) repeatable. This will out a character or group of characters separated by commas to the present output device — usually the screen. For example

PUT 65, 66, 67, 32, 48, 49, 50

will output: ABC 123.

Brk produces a forced break on the Vic-20 which is the same as holding down Run, Stop, and Restore.

Setscreen resets the screen to its default status. That is to say it will reset the Ink, Paper, Bdr, Window and rows and columns of the screen.

Scroll A: Parameters — A = 0 or 1. This scrolls the screen one line up or down — 0 = up, 1 = down.

Mot A: Parameters — A = 0 or 1. This enables and disables the cassette motor — 0 = enable, 1 = disable.

Joy reads the joystick and returns a value according to direction: 0 = no direction; 1 = up; 2 = down; 4 = left, 8 = right; 128 = fire button.

Remember that the fire button can be used with any direction and diagonal directions

may be used so combinations of the above values may occur, e.g., up + fire = 129.

Pen A reads the horizontal and vertical components of the light pen. If A=0 the horizontal is read; if A=1 the vertical is read.

Pad reads the paddle controller.

Key reads the keyboard and returns the different value for every key.

Switch returns the status of the cassette switch. 64 means it is off; 0 means it is on.

Because I tried to keep the Basic extension program so short — 1.7K — this has meant a few minor drawbacks . . .

■ Command abbreviation — such as P shift O for Poke — are not available for the new commands.

■ When using the new commands directly after a Then statement you must place a colon. For example

```
IF X=0 THEN : FILL 768 , 8185, 81
```

This is the same case for any Basic extension on the Vic including the Super Expander cartridges.

■ Some of the new commands occasionally — in direct-mode only — cause a syntax error even though they are still carried out. Do not worry about this as it does not affect the execution of the commands in any way and it never happens within a program. There are several ways of avoiding the syntax errors, one of which is to type a colon — or two — after the command. For example

```
RENUMBER 100,20::
```

One point in favour of the Basic is that all parameters can be constant, variables or calculated using other functions. For example

```
PAPER 2
INK 4*N+3
WINDOW SIN(J)*10,COS(J/2)*15
```

If you missed the previous instalments of this series, I have a cassette available containing the extended Basic, demonstration game and a few other demonstration programs along with a reference manual for £5.00.

I also have cassettes of my other two programs published in this magazine — Saucer Attack and Gridmania — for £4.00 each. Make all cheques or postal orders payable to D. McComb, 23 Woodlawn Drive, Dungannon, Co. Tyrone, BT70 1AJ. ■

DTI BULLET

CP/M PLUS — THE LATEST CP/M

When you test the DTI Bullet for yourself, you will discover that, under CP/M*, it simply outperforms most 16-bit micros on the market. The DTI Bullet not only opens up for you the vast array of CP/M* compatible application software, but will offer you multi-user capability via MP/M* and networking. Education, scientific, research, or business, you will find the exciting DTI Bullet gives you more opportunities for your money.

SPECIAL PRICE UNTIL 30.11.83

£1,500

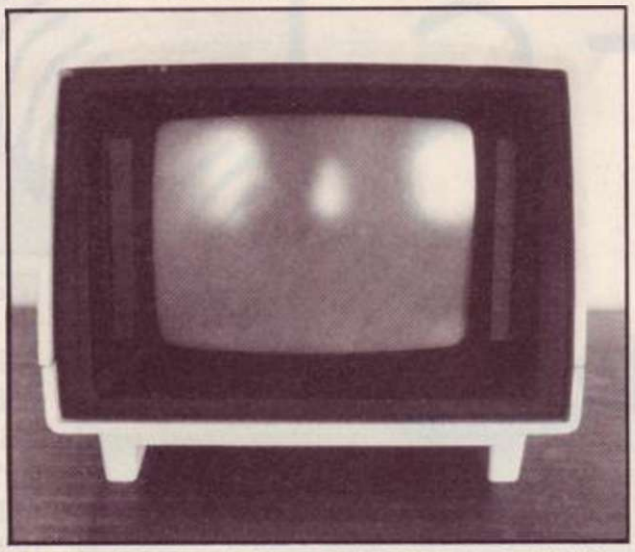
DTI Bullet at a glance:—
- Z80A Processor running at full 4MHz
- 128 KByte RAM standard
- Twin bi-directional RS232 ports
- Centronics parallel printer interface
- On-board floppy disk controller —
  - — up to 4 drives
  - — supports 5¼in or 8in diskettes
  - — single/double sided
  - — single/double density

Packaged with 2 double side /density 5¼in drives giving 800KB on-line storage
- Winchester disk interface
- Built-in power supply
- Software: Supplied complete with CP/M* Version 3 operating software licence.

Includes:
T/MAKER III
word-processor
spreadsheet organiser
list processor
file-handler
together with a comprehensive manual and demonstration programs

DTI SYSTEM B

NEW FOR BBC AND OTHER MICRO USERS



Priced:
System B1 £455
System B2 £695
System BC1 Price on application
System BC2 Price on application

Incorporating: 12" P31 Monitor and
1 5.25" 400 KB Drive-System B 1
2 5.25" 400 KB Drive-System B 2
or
12" Colour Monitor
as above System BC 1 or BC 2

Disk Drives:

6106 MINI 5.25"	⅔ HEIGHT, S/S, 40 TRACK	250 KBYTES £170
6108 MINI 5.25"	⅔ HEIGHT, D/S, 40 TRACK	500 KBYTES £190

6118 IMb 5.25" DRIVE FOR BBC MICRO £2.00

POWER SUPPLY AND PACKAGING ADD £65

Diskettes:

FLEXY DISK 5.25" S/S, S/D, 40 TRACK £17
FLEXY DISK 5.25" S/S, D/D, 40 TRACK £19
FLEXY DISK 5.25" D/S, D/D, 40 TRACK £21

HEARTSTOP

BBC

John Dawson continues his gripping hospital series with a program for the bleep system, a simulation of that used by hospital doctors.

Program 1. Erase the whole message area by filling the array with spaces.

```
DEF PROCeraseall
FOR K% = 0 TO SIZE%
BLEEP$(K%) = STRING$
(" ",30)
NEXT K%
ENDPROC
```

HOSPITALS ARE not what they used to be. A place for Christmas in hospital used to be something that was sought after, a guarantee of physical and social warmth, adequate food and care and attention. Regular Christmas attenders were welcomed on to the wards with weary affection by nursing sisters who remembered last year's complaint and the year before.

Communications systems have also lost some of the old-fashioned charm of the fifties and sixties. Radiopaging bleeps are now universal and have displaced a number of ingenious methods of attracting a doctor's attention when he or she was needed by the telephone operator, or in a different part of the hospital.

As far as I can remember it was the Royal Isle of Wight County Hospital in Ryde which had the most charming system I ever saw. Columns of either four or five different coloured lights were suspended from the ceilings of the corridors at conspicuous points. When a person was needed I think that a combination of lights was selected, possibly with a short bell sound to make people look at the new code.

Dr. Finlay, for example, would be allocated Code Red/Yellow on taking up his employment at the hospital while Dr. Kildare would be given Code Blue/Green. The colours would have been relevant only to reinforce the position of whichever of the lights was selected and a column of five lights could produce 31 combinations.

Voice message to doctor

Modern times have changed all that. Most bleep systems will now alert a specific recipient that he should telephone his answering number on the internal exchange to be connected to the person making the call. Most systems will have a broad band capability that allows the switchboard operator to give a voice message directly to the doctor. When a cardiac arrest bleep goes off you may see doctors, nurses and technicians running down the corridors holding their bleep to one ear while it announces which ward or unit they should head towards.

Less dramatic messages may be held by the switchboard if the doctor fails to answer immediately. If the doctor is in the middle of stitching a patient's lacerated arm or is busy putting up a drip, the matter will generally have to wait.

If the doctor is unable to answer the bleep or cannot ask another member of staff to take a message it is likely to go off again a few minutes later. If there is still no reply the message may be referred to a more senior doctor.

Heartstop should reflect these things as accurately as possible and the construction of the bleep procedures for the game is of central importance for this is the way in which the player's tasks are set. Answering a bleep in real life is likely to take between one and ten minutes on the initial call but may then

Program 2.

```
DEF PROCbleepdisplay
FOR K% = 0 TO SIZE%
PRINT BLEEP$(K%)
NEXT K%
ENDPROC
```

Program 3.

```
DEF PROCupstack(X%)
LOCAL I%
IF BLEEP$(SIZE%) <> STRING$(" ",30) THEN
PROCstackfull: REM call the consultant!
FOR I% = (SIZE%-1) TO X% STEP -1
BLEEP$(I%+1) = BLEEP$(I%)
NEXT I%
BLEEP$(X%) = STRING$(" ",30)
ENDPROC
```

involve further telephone calls or the doctor's attendance in a different part of the hospital.

Each time the bleep goes off in Heartstop the game clock will be advance by a number of minutes to reflect the time taken to get to a telephone. Deciding what to do about the message might be dealt with in real-time multiplied by five or 10 times.

In other words you can take as long as you like to respond to the bleep message but game time will be running at five or ten times normal speed. While you are making your decision the program should be checking the state of the game and if you run over an internal deadline your bleep may go off again.

The bleep section

The following functions are likely to be needed for the bleep section of Heartstop:

- Erase all the bleep messages. In other words, clear the stack.
- Generate a bleep message by using random numbers to Read strings from Data statements.
- Generate a bleep sound.
- Check various events withing the program and generate a bleep if the game time has passed a certain value, for example, or if a patient's condition has deteriorated.
- Display all the current bleep messages on the stack.
- Flash an urgent bleep message on to the current screen display.
- Allow the player to select a bleep message to be answered, delete that message from those waiting to be answered, and close up any remaining messages.
- Open up a space for a new message in the stack. If a new message is urgent it should be placed on the top of the stack.
- Repeat a bleep signal if there is no response from the player.
- Call in the consultant if the stack of messages exceeds the allowed total or if an urgent bleep is unanswered within a couple of minutes. This procedure will terminate the game with some prejudice to the player's future references and career prospects.

Program 4.

```
DEF PROCdownstack(X%)
LOCAL I%
FOR I% = X% TO SIZE%
BLEEP$(I%) = BLEEP$(I%+1)
NEXT I%
BLEEP$(SIZE%) = STRING$(" ",30)
ENDPROC
```

I had expected to set out listings for most of the procedures necessary to achieve these functions and show how they interfaced to the existing Heartstop program. Alas and alack-a-day I did not make a back-up copy of the cassette I was working with. In a fit of enthusiasm with the Maplin Modem I downloaded a program for the BBC machine from the London TBBS and Saved it on a cassette. At least I think that's what happened because I cannot find it now.

However, here are the outline listings for some of the procedures. They have a more general value than their inclusion in a game program might suggest. Used with a simple Repeat . . . While loop to input lines of text they couald form the basis of a very simple line oriented text editor.

Somewhere in the main body of the program you must dimension the array that will be used to hold the lines of text, each line will contain one message:

```
SIZE% = 5: REM SIZE% can be altered to set the maximum number of lines or messages.
DIM BLEEP$(SIZE%)
```

Note in program 1 that the length of each string has been set to 30 characters. In a more general text editing program that value could be changed to a variable such as

```
LINE LENGTH %
```

which could be set at the start of the program.

Program 2 assumes that the screen is in a suitable state to display the messages and that there are no odd text windows in force.

Program 5.

```
SIZE% = 120:REM approx. 2 pages of A4 text
DIM BLEEP$(SIZE%)
REPEAT: REM start of Main Command Level
INPUT C$
IF C$ = "W" THEN PROCwrite
... Here you must write other lines to call procedures to
display, print,or edit the text held in BLEEP$.
UNTIL FALSE: REM end of MCL

DEF PROCwrite
PROCeraseall
LINECOUNT% = 0
REPEAT
INPUT LINE L$
IF L$ = ".quit." THEN ENDPROC
BLEEP$(LINECOUNT%) = L$
LINECOUNT% = LINECOUNT% + 1
UNTIL FALSE
ENDPROC
```

Program 3 takes a parameter into the procedure from the main body of the program to set the position at which the stack should be split to insert a new message. All the messages above the designated point (X%) are moved up by transferring

```
BLEEP$(SIZE %-1) TO BLEEP$(SIZE%)
```

and so on all the way back down to X%. The string BLEEP$(X%) is then filled with spaces and is ready to receive the new message when the program returns from the procedure.

To close-up the message stack after a message has been removed fro action by the doctor you will need to move any remaining messages down by one place, eliminating the chosen entry — see program 4.

You can write a loop

Using a few more lines of Basic you can write a loop that will continue to ask for text until you type 'quit' when you will be returned to a Main Command Level — see program 5.

Named procedures and the Repeat . . . While construction are two of the better features of BBC Basic. Their use is extensively covered, among other things, in *Structured Programming with BBC BASIC,* written by Roy Atherton and published by Ellis Horwood. It costs £6.50 and must be among the best value in computer books on the market at the moment.

The book is the perfect Christmas present for teenagers who are using computers at school — it is published jointly by Heinemann Computers in Education — and for anyone who wants to learn how to write good, effective programs. ■

Figure 1. The bleep message stack before and after removal of a message.

```
1  New patient waiting in Casualty          TOP OF STACK
2  Please 'phone your bank manager
3  Mrs Williams blood pressure dropping
4  Peter Benthams relatives are waiting
5
6                                           BOTTOM OF STACK
```

If the doctor chooses to deal with the third message the Downstack procedure will be used to remove it from the stack and close up the remaining messages:

```
1  New patient waiting in Casualty          TOP OF STACK
2  Please 'phone your bank manager
3  Peter Benthams relatives are waiting
4

THE PROFESSIONAL APPROACH TO

SPECTRUM
SOFTWARE

CLOWN EDUCATIONAL SOFTWARE

Games designed to help children aged 3 - 7 to learn through play, while familiarising themselves with computers.

Now available:-

CLOWN ARITHMETIC I

Helps children to count and do simple addition and subtraction with the aid of imaginative graphics and sound effects.

Still available: BASIC ToolKit - add logical arithmetic functions - list variables and arrays - fast screen output - program renumber.

Price for either product:
£6.95 inc. VAT (+ 50p p. & p.)

To order or to obtain details of our other products contact:

Malva Ltd.

RESPONSE FRAME

Do you have a problem? Your manual is incomprehensible or you just cannot get the hang of that programming trick you tried — whatever it is, Tim Hartnell will do his best to answer your queries. Please include only one question per letter and mark them "Response Frame".

SAVING ARRAYS

■ **I own a ZX Spectrum and have written a fairly large program for book-keeping. Each time the accounts are updated, the date is Saved onto cassette using the Spectrum's facility for Saving arrays. Unfortunately, there are 15 separate arrays, which means that the Enter key has to be hit each time. I wonder if there is a way around this, apart from the obvious one of Saving the entire program on each occassion?**

D A C Patrick,
Leeds.

THE SIMPLEST solution, and one which may not be satisfactory, would be to Save your data in one enormous string or numeric array, using parts of this giant array to take the place of the 15 smaller arrays you are using at the moment.

JOYSTICKS

■ **I have just bought a cassette recorder for my Vic-20 and have been looking for some good quality games. But most of the games I have come across need a joystick. If I buy a joystick, will it be compatible with any game which needs a joystick?**

Shamsher Johal,
Sunnyhill, Derby.

ANY JOYSTICK advertised for the Vic-20 will work with any Vic-20 program demanding a joystick. The joystick provided by Commodore for the Vic-20, although it looks cheap, is reliable and robust. I have been using mine for over two years, and although the sheath broke off several months ago, it still functions perfectly well. You should have a good look at this unit before deciding that you need to buy a more expensive one.

JUST A MINUTE

■ **I am writing a program for a ZX-81 to help me with my job. I need to work out the efficiency of machines, to find any time lost. The problem is that I cannot figure out how to get the computer to work out the running time, say from 8.15 to 1.50, which is five hours 35 minutes. I need the minutes in decimal, which makes the time 5.58. If I put the time in, in decimal, the program works perfectly, i.e., 13.83-8.25 = 5.58. I would like to be able to enter the time as ordinary time so that other people in the factory could use the program. Your help would be appreciated.**

Jim Brush,
Belfast.

THERE IS OFTEN a problem in programs when non-standard units are being used. You must first get everything into a similar form to compare values. If the second decimal place is not vital, you could ask for the input in three stages; "enter hours", "is this am or pm?", then "enter minutes". This would be needed twice, for the starting time and the ending time. The response to the second question — is this am or pm? — could be used to add 12 where needed to the hours figure. You can change the minutes figure into a decimal in the program as follows:

```
PRINT "ENTER MINUTES"
INPUT MIN
LET MIN = (INT(100*MIN/60))/100
```

Once the two figures have been compared, you can change your decimal "minutes" into ordinary ones by multiplying the decimal figure — such as 0.53 — by 60. This should work closely enough for your needs.

BBC PROCESSOR

■ **Can you tell me if it is possible to use Z-80 machine code with the second processor attachment for the BBC Micro? Your answer will affect by choice of computer.**

Mrudang Kalaria,
Manor Park,
London.

THE SECOND PROCESSOR for the BBC can be either 6502 or Z-80. They are not available at present, but are expected around March 1984.

COMPETIBILITY

■ **I have recently purchased a Vic-20 colour computer with a 16K RAM expansion. I would like to know whether hardware for the Pet computer is compatible with the Vic-20. For instance, can the Pet printer run on the Vic-20?**

Tim Adams,
Didcot, Oxfordshire.

NO. THIS IS because the Pet peripherals communicate via the IEEE/488 interface whereas the Vic-20 — and the Commodore 64 — use a proprietory serial bus.

ZX-81 IN USA

■ **Is it possible to modify my home-built ZX-81 to operate with a TV set in the U.S.A? I realise that I will have to use a power supply suitable for the American mains voltage, but will I have to replace the TV signal modulator?**

R H Pond,
Carnoustie.

IT IS NOT A simple matter to make the conversion you describe, because of the ZX-81's ULA. And there is little point in making such a change. I have seen the TS-1000 — a ZX-81 with 2K on-board — on sale in the U.S.A. for around £12 (!) so the simplest thing to do would be to buy one of these when you get there.

RIBBON HELP

■ **Our computer club has recently been given a Nascom Micro Imp printer. However, as Nascom have gone out of business, we have been unable to get hold of a ribbon. Could you or one of the readers please help?**

Ian Anderson,
The Universal Micro Club,
35 Surrey Close,
Corby,
Northants NN17 2IG.

I HAVE INCLUDED your address in full so that anyone who can help can get in touch with you directly.

CONVERSION

■ **About a year ago I purchased a ZX-81 with 16K RAM, which I extended with the Quicksilva sound board. Since then, I have sold my ZX-81 and bought a 48K Spectrum. I have seen some advertisements for connectors to convert ZX-81 hardware to the Spectrum. Could you advise me whether such connectors would be useful? The main chip on the sound board is the AY-3-8910 which I have seen advertised for Spectrum sound boards. This spurred me to think that my three channel sound is not redundant. Is this true?**

R Woods,
Seaton Sluice,
Tyne and Wear.

THE QS SOUND board is probably mapped to the ZX-81 memory map above the ROM but before the RAM. This area is occupied by the second half of the 16K ROM on the Spectrum. Because of this, Spectrum sound boards are mapped to the I/O ports rather than the memory map. The answer then, I'm afraid, is no.

JOYSTICK CONTROL

■ **I read *Your Computer* every month and I think it is a great help to my programming. I would like to ask one small favour. I have an unexpanded Vic-20 and a joystick, which I want to use in a program I am writing. However, I do not know how to get the Vic-20 to understand that I want to use the joystick. Could you please tell me what commands to use? Will these change if I expand my Vic-20?**

S A Veitch,
Bletchley,
Milton Keynes.

THE ROUTINE TO control joysticks is not very long but it is a little tricky to use. You initialise it as follows:

```
FOR Z=0 T02:FORJ=0T02:READJS
(J,Z):NEXTJ,Z
DATA-23,-22,-21,-1,0,1,21,22,23
```

To actually read the joystick, you include the following lines:

```
POKEDD,127:S3=-3((PEEK(PB)AND
128)=0):POKEDD,255
P=PEEK(PA):S1=-((PAND8)=0):
S2=((PAND16)=0):S0=((PAND4)
=0)
FR=-((PAND32)=0):X=S2+S3:Y=
S0+S1
```

This allows you to move an object around in any direction — including diagonally. I suggest you get hold of the *Vic-20 Programmers' Reference Guide* — from which the above routine was adapted — for a full program showing the routine in action, and an explanation of how it works. The routine will work on any size Vic-20. A machine-code routine to read joysticks is given in the book *More Games For Your Vic-20* by Andrew Nelson, published by Virgin Books.

LEARNING MC

■ **I am going to purchase a ZX Spectrum and, now that I have learned Basic, I think my next step should be to learn machine code. I do not know any of this language. What should I buy to help me learn it?**

Tim Thakur,
Al-Ain,
United Arab Emirates.

THE EASIEST WAY to learn Spectrum machine code is with the help of books, plus a friend who already knows how to program in it. If you do not have any friends who can program in machine code, you could team up with one who also wants to learn it, share out the cost of the books, then help each other. It is not particularly easy to learn but machine-code skills can be acquired with patience. If you look through the advertisements in this issue of *Your Computer* you will see there are six or seven books available to help you with this.

UNFAIR DEAL

■ **I recently ordered an add-on product for my Spectrum. It took seven weeks to arrive rather than the three mentioned in the advertisement. While the demo-tape loaded alright, none of my own programs did, neither did a copy of the Spectrum program I made. On telephoning the company, I was told that my cassette recorder did not give enough volume, and I needed to buy an Atari cassette deck. The sales literature for the master unit claims: "The unit also enhances the saving signal, so that cheaper cassette recorders can be used." I feel they are contravening the Trade Descriptions Act. I also feel that £50 for an Atari cassette recorder to make a £54 add-on work is excessive.**

I J Jones,
Hartley, Plymouth.

I AGREE, AND THINK you have been treated badly. Send the unit back and demand a full refund. Such companies do not deserve your money, or anyone else's. ■

What programs will you be watching this Christmas?

★ *Don't miss . . .*

★ *Programming the BBC Micro*

Edited by *Peter Williams*

"an excellent review . . . way ahead of its rivals"
BBC Micro User

Quite simply, the best book on programming and using the BBC Micro. Practical programming points, BBC BASIC, graphics, machine code, hex, assembly language, interfacing, file handling are all covered in this guide.

Softcover £6.95

★ *Exploiting BBC BASIC*

A P Stephenson and *D J Stephenson*

BBC BASIC offers you many special features, make sure your're taking full advantage of them with this practical book. It takes you from fundamentals to the more sophisticated aspects of BBC BASIC.

Softcover £6.95 approx

★ *6502 Machine Code for Beginners*

A P Stephenson

If you've mastered BASIC then progress on to machine code – a more efficient way of programming. The book shows you how to program in machine code and is ideal for all users of the BBC Micro, Acorn Attom, Oric-1, Pet, Apple etc.

Softcover £6.95

★ *Newnes Programming Books*

A great series of programming books by experienced authors specially written for micro users. They contain sample programs and will soon have you extending your knowledge of programming and the capabilities of your micro.

Programming Languages for Micros
Garry Marshall £6.50

BASIC for Micros
Jeff Maynard £6.50

COBOL for Micros
Nigel Stang £7.95

FORTH for Micros
Steve Oakey £6.50

FORTRAN for Micros
Garry Marshall £5.95

LISP for Micros

SOFTWARE FILE

Software File gives you the opportunity to have your programs, ideas and discoveries published. We will accept contributions for any home computer provided they are submitted to *Your Computer* exclusively. Please double-check your programs and specify the memory they require before sending them, preferably on cassette. We pay between £6 and £36 for contributions published.

Bricks

Graham Pearce,
Harrogate,
North Yorkshire.

SPECTRUM

THIS PROGRAM WILL just fit into a 16K Spectrum and works on the 48K Spectrum as well. The object of the game is to knock all the bricks out of a wall at the top while trying to protect a row of bricks at the bottom. A bonus score of 100 is added after each 1,000 scored. The game is over after all the bottom row of bricks have been knocked out. If all the top bricks are knocked out they are then replaced, leaving the bottom row as it is. 10 points are awarded for each brick at the top but no score is given for a brick on the bottom which is knocked out.

On running the game there will be a long pause while the machine code is Poked and the message

PLEASE WAIT A MOMENT

will appear, followed by a prompt

THIS IS WHERE YOU ENTER YOUR SKILL LEVEL.

Level 1 is the easiest and level 4 the hardest. Only integers are accepted. To move the bat:

1 — Slow ball speed left.
5 — Slow right.
1 and 2 together — Fast — two times the ball speed — Left.
4 and 5 together — Fast right.

Labyrinth

Tony Brown,
Preston,
Lancashire.

DRAGON

LABYRINTH WILL run on a Dragon 32 or 64 and the Tandy Colour Computer with extended Basic and at least 16K. Instructions are in the program. Level 1 plays normally but if level 2 is chosen it becomes impossible to retrace your steps because the locations are filled as you leave them. The only record of the maze is stored on the text screen and this is also used to show the map. To return from the map to the high-resolution display press any key. Movement instructions are included in the program. Save program using CSave before running.

Program notes.

10-18 Movement and keyboard routines.
19-21 Map routine.
22-37 This section decided where to put each wall on the high resolution screen according to the plan on the text screen.
38-51 Instructions.
52-57 Set up variables.

Remove the Poke in line 8 if your computer cannot handle double speed.

Lancashire.

ZX-81

THIS GOLF PROGRAM for the 16K ZX-81 takes you round an 18 hole course and generates a different layout for each hole. Before making your stroke you must choose the direction and hitting strength. Direction is indicated by inputting a number from 1 to 12, where the directions correspond to the positions of the numbers on a clockface. Thus 6 indicates South and 9 West.

The program contains a short machine-code routine, so your first step is create a Rem statement followed by 13 Xs. Now use program 1 to Poke in the following numbers: 6, 176, 62, 8, 215, 215, 215, 16, 0, 46, 43, 0, 201. Press Newline after each entry.

You can now enter the rest of the program deleting lines 10 to 40 of program 1 but retaining line 1. During play press Newline to proceed — at the start of the game and at the start of each new hole.

Dodgems

Olaf Morris,
Brussels,
Belgium.

VIC-20

DODGEMS IS A version for the Vic-20 of the well known game in which you control a car driving round a four-lane track. One can change lanes at four points on the circuit. To complicate things there is a rival car driving in the opposite direction. Its objective is to crash into you. It will change lanes rarely at first, but after 10 screens it will change just about whenever necessary.

The keys are as follows: A to change lanes leftwards; D to change lanes rightwards; W to change lanes upwards, and X to change lanes downwards.

YOU HAVEN'T SEEN ANYTHING LIKE THIS ON A COLOUR MONITOR BEFORE.

An RGB monitor from JVC offering a resolution of 370 x 470 pixels for less than £150?

We guarantee you won't see another bargain like that in this or any other micro mag – or in any other supplier's showroom.

For we've managed to acquire the sole distribution rights to these superb machines and we are able to offer them at an unbeatable price.

There are two models available: medium resolution (370 x 470 pixels) at £149.95; and high resolution (580 x 470 pixels) at £229.95. (Both excluding VAT.)

The units have a 14" screen and are suitable for the BBC Micro, Lynx, Oric, Apple, and most other leading micros.

They are robustly constructed in a handsome cream casing. And come with a full year's guarantee.

Delivery is good: your monitor should arrive by courier service within ten days of our receiving your order.

You can order by filling in the coupon below and posting to: Opus Supplies Ltd., 158 Camberwell Road, London SE5 0EE. Or by telephoning 01-701 8668 quoting your credit card number. Or, of course, you can buy in person at our showroom between 9am-6pm Monday-Friday, 9am-1.30pm Saturday.

Opus. Opus Supplies Ltd.

Until now, finding out about home computers was about as simple as

focusing your right eye here

and your left eye here.

Mind boggling isn't it? But now there's Computer Choice, a new monthly magazine that gives you the facts and advice you need to choose your first home computer.

And when you've bought your computer it also helps you get the most out of it.

The first issue is out now for 60p and includes our special Buyer's Guide on micros under £200, a comparison of the Oric, Spectrum and Sord and a report on what Oric owners like and dislike about their computers and software.

As well as an article on how to learn Basic and reviews of all the latest games and software. Plus lots more to make choosing a computer easy. And owning one fun.

(continued from page 212)

to 50 points per second.

Another speed boost is given by the command name. The code is stored at byte 49152 and beyond, but by putting a machine code Goto statement at location 760, the computer takes less time to digest the address number written in Basic. The quicker point command is called SYS 760 — instead of 49152.

The second program listed — the demonstration routine — shows how to use the command and is useful in its own right. It contains a short routine which draws a 70-column bar chart using the data from line 1000 onwards, though it should be simple to adapt it for keyboard-data entry. The program is also self-scaling, so at least one column always reaches the top of the graph.

Finally, if you think 80×50 is too low a resolution to look effective, I have included a graph printout that might be impressive enough to change your mind.

Mower

Shingo Sugiura,
Putney,
London.

ORIC

THIS GAME WAS originally written for a BBC model B — April 1983, *Your Computer*. Now I have converted it to run on the Oric 48K. The original game had background music continuously ringing during the game but I am afraid I had to leave this feature out of the conversion.

Having failed all your O levels, you could only get a job as a lawn mower but the garden you mow is not a normal garden. It is littered with rocks which will crunch up your mower. The garden is enclosed in an electric fence and your mower is peculiar in that if the fuel runs out it blows up. If you lose three mowers you are fired.

You have to control your mower around the garden avoiding the rocks and the fence, gobbling up fuel cans. The difficulty lies in the fact that if you mow over an area already mowed your oil will decrease but your score will stay the same and you know what happens if your oil runs out. So the trick is to avoid areas already mowed as much as possible. Once you have mowed a certain percentage of the garden you will go on to another garden with more rocks.

Note when typing in this program that some of the characters in the listing are not directly accessible from the keyboard. This is because not all the characters on my printer are the same as that of the Oric's but share the same ASCII code. They are the following:

Line 100 a copyright sign CHR$(96)
Line 390 a pound sign CHR$(95)
Line 680 a pound sign CHR$(95)

A$	Direction.
CH%	ASCII code of character in front of the mower.
OIL	Fuel of mower.
DIE	A flag.

AGF PROGRAMMABLE JOYSTICK INTERFACE for Spectrum or ZX81

ONLY 32·95 +£1·00pp

MICRODRIVE COMPATIBLE

ABOUT OUR INTERFACE

The AGF Programmable Joystick Interface is a unique design offering the use of any Atari-compatible joystick with absolutely all software, whether it is cassette or ROM cartridge, with the Sinclair Spectrum or ZX81.

The hardware programmable interface requires no additional software and accurately replicates the keys of the computer in a manner which is responsive to absolutely *ALL* key reading methods, both BASIC and Machine Code.

The interface does not interfere with key operation and can therefore be used simultaneously with the keyboard.

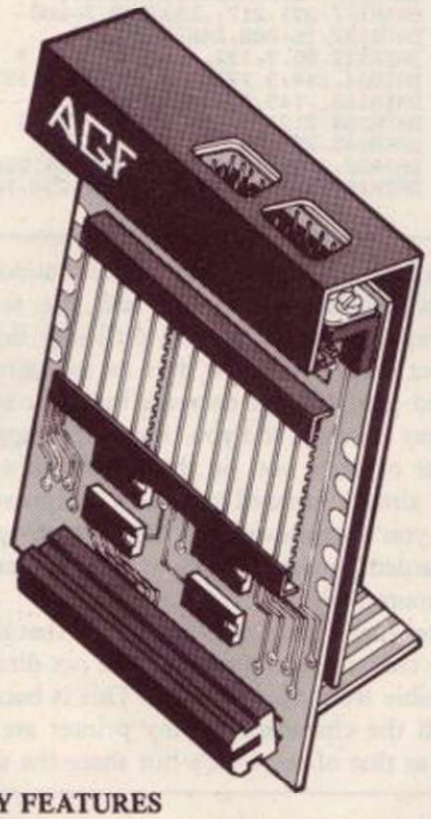
There is no need to remove the interface once fitted as the rear extension connector will accommodate further expansion, i.e printers or RAM packs etc. This important feature avoids excessive wear to the expansion port.

The key replication principle pioneered by AGF means that your own programs can use eight directional joystick movement by utilising simple key reading BASIC.

Two joystick sockets are provided which share the same keys, for use with the majority of two player games. Several interfaces may be used on the same computer for multiple joystick applications.

The interface is programmed by a two digit code, which is looked up on a programming chart supplied, for each direction and firing button. The two numbers are then selected on a pair of leads which are clipped onto appropriately numbered strips on the interface.

Once configured this can be marked on a Quick Reference Programming Card for storing with the game. As the programming is *not* power dependent the interface retains the last configuration made and can be immediately used when next switched on.



KEY FEATURES

- ★ Programmable design gives TOTAL software support.
- ★ Accepts Atari, Competition Pro, Wico, Starfighter, Quick Shot, Le Stick etc.
- ★ Rear extension connector for all other add-ons.
- ★ Free demo program and instructions.

PACKAGE CONTENTS SUPPLIED

- Programmable Interface Module as illustrated, complete with clip-on programming leads.
- Self adhesive programming chart detailing how to define which key is simulated by UP, DOWN, LEFT, RIGHT, and FIRE. This can be fixed on to the case of your computer or if preferred the protective backing can be left on. The chart is made of a very durable reverse printed plastic and is extremely easy to read.
- One pack of ten Quick Reference Programming Cards for at-a-glance setting to your games requirements. The card allows you to mark the configuration in an easy to read fashion with space to record the software title and company name.
- Video Graffiti demonstration program which is written totally in BASIC to illustrate how all eight directions and fire can be read. This is also a useful high resolution drawing program.
- 12 months guarantee and full written instructions.

Life-cycle

C Maitland,
Hammersmith,
London.

BBC

PART OF THE fascination exerted by John Conway's game, Life, lies in the way it appears to simulate a natural process — the life-cycle of a colony of cells or, perhaps, a population. Narrow your eyes when you look at the display and you can imagine that a colony of amoebas is loose in the cathode ray tube.

For the best animation effects a Life program should be fast. This version for the BBC models A and B is exceptionally quick and can handle up to 10 generations a second. It uses Mode 7 to plot the cells on a 40 by 25 grid. It treats cells along the opposite edges as adjacent so that a cluster of cells moving to the top will reappear at the bottom.

The program offers you the option of setting up the initial display yourself or taking a randomly generated display. There is also a choice of speed.

For those who are unfamiliar with the game here is a short explanation: Life generates patterns by applying a few simples rules to an array of cells. Each cell occupies a character space bounded by eight other spaces. If a cell has two or three neighbours it survives to the next generation, otherwise it dies. If an empty space is bounded by exactly three cells a new cell is born.

Bridge-builder

S Powell,
Honiton,
Devon.

SPECTRUM

DROPPING STEEL SECTIONS by helicopter may not be the usual way of constructing a bridge, but it is the method used in this game.

Type in listing 1 — the graphics loader and run it. This sets up the user-defined graphics. Type New and then type in listing 2 — the main program. Save this on tape by Goto 9998 — it is saved in two parts, program and bytes. You can now Run the program.

It will start by showing a list of the highest scores, and after a while, will give a demonstration. To start a game, press Space.

The game begins by showing an unfinished bridge with a man on it and a helicopter flying above. Unfortunately, the man is blind, and he walks slowly forward while the bridge is built. Use the Space key to drop a section of bridge from the helicopter. You must drop it next to the end of the left-hand section of the bridge, to make it longer. If you miss, then the blind man will walk off the edge and fall in the river.

Fortunately, there are three lifebelts with which to save him but the fourth time he falls in, he drowns. When you have completed a bridge, you get a 50-point bonus and another bridge to build. If you get one of the ten best scores, you can enter your name. Use the right and left arrow keys to select the correct letter, then press 0. Press enter when you have entered your name.

Laser Snaker

£100 TO BE WON PLUS MANY OTHER PRIZES

If you are skilful enough to help Snaker on his deadly mission. To penetrate the hidden depths of the egg plantation and discover the secret symbol which is your key to success and fortune.

Scavenging the egg plantation Snaker grows by munching multi-coloured eggs. With powerful laser venom for protection Snaker must battle with vicious aggrenoids, kill poisonous viproids and avoid pulsating chrystoids. Then journey through the many mazes to reach the power stones of regeneration. How far can you take Snaker on his mission?

LASER SNAKER features challenging arcade action, 100% machine code, superb graphics, colour and sound, progressive difficulty levels, bonus lives, high score table, keyboard or Kempston Joystick, £100 to be won plus runner up prizes.

FULL COMPETITION DETAILS SUPPLIED WITH EACH CASSETTE

JOYSTICKS

We carry a large range priced from **£6.95** to **£29.95.** TRACK-BALLS also stocked for ARCADE Maniacs! Wico, Quickshot etc.

CASSETTE DECKS

We carry a wide range of computer compatible cassette recorders from **£29.95.** We also stock several of the new Computer Data recorders.

Our range includes: Sanyo · Pye Data · Atari · Panasonic · Tensai · Commodore

SOFTWARE — over 1000 programs in stock

ARCADE GAMES

Vision Store carries probably the largest range of games in London. We carry all the popular titles for **SINCLAIR · COMMODORE · BBC · ATARI · DRAGON · ORIC · TEXAS etc**

Continuous Demos.

EDUCATIONAL

Programs for children from 5 yrs old to "O" level standard are kept in stock. Foreign languages, maths and general knowledge are just a few of the subjects we cover.

BUSINESS

Let us advise you on the Business application for your home computer. Word processing, Forecasting, Accounting, Stock Control, you name it we've probably got it. We always have several systems on demonstration.

EXPORT

All our hardware and software is available Tax-Free to overseas customers, please send for our comprehensive list. Please contact our Croydon office.

MAIL ORDER

We send our whole range anywhere in the UK, by FREE Insured Securicor Delivery. Please contact our Croydon office.

CREDIT TERMS

Ask about our various credit facilities with up to 3 yrs to pay.

ACCESS/ BARCLAYCARD

VAT All our prices inc VAT!

GUARANTEE

As a main computer service centre we offer a full 1 year warranty on all our equipment.

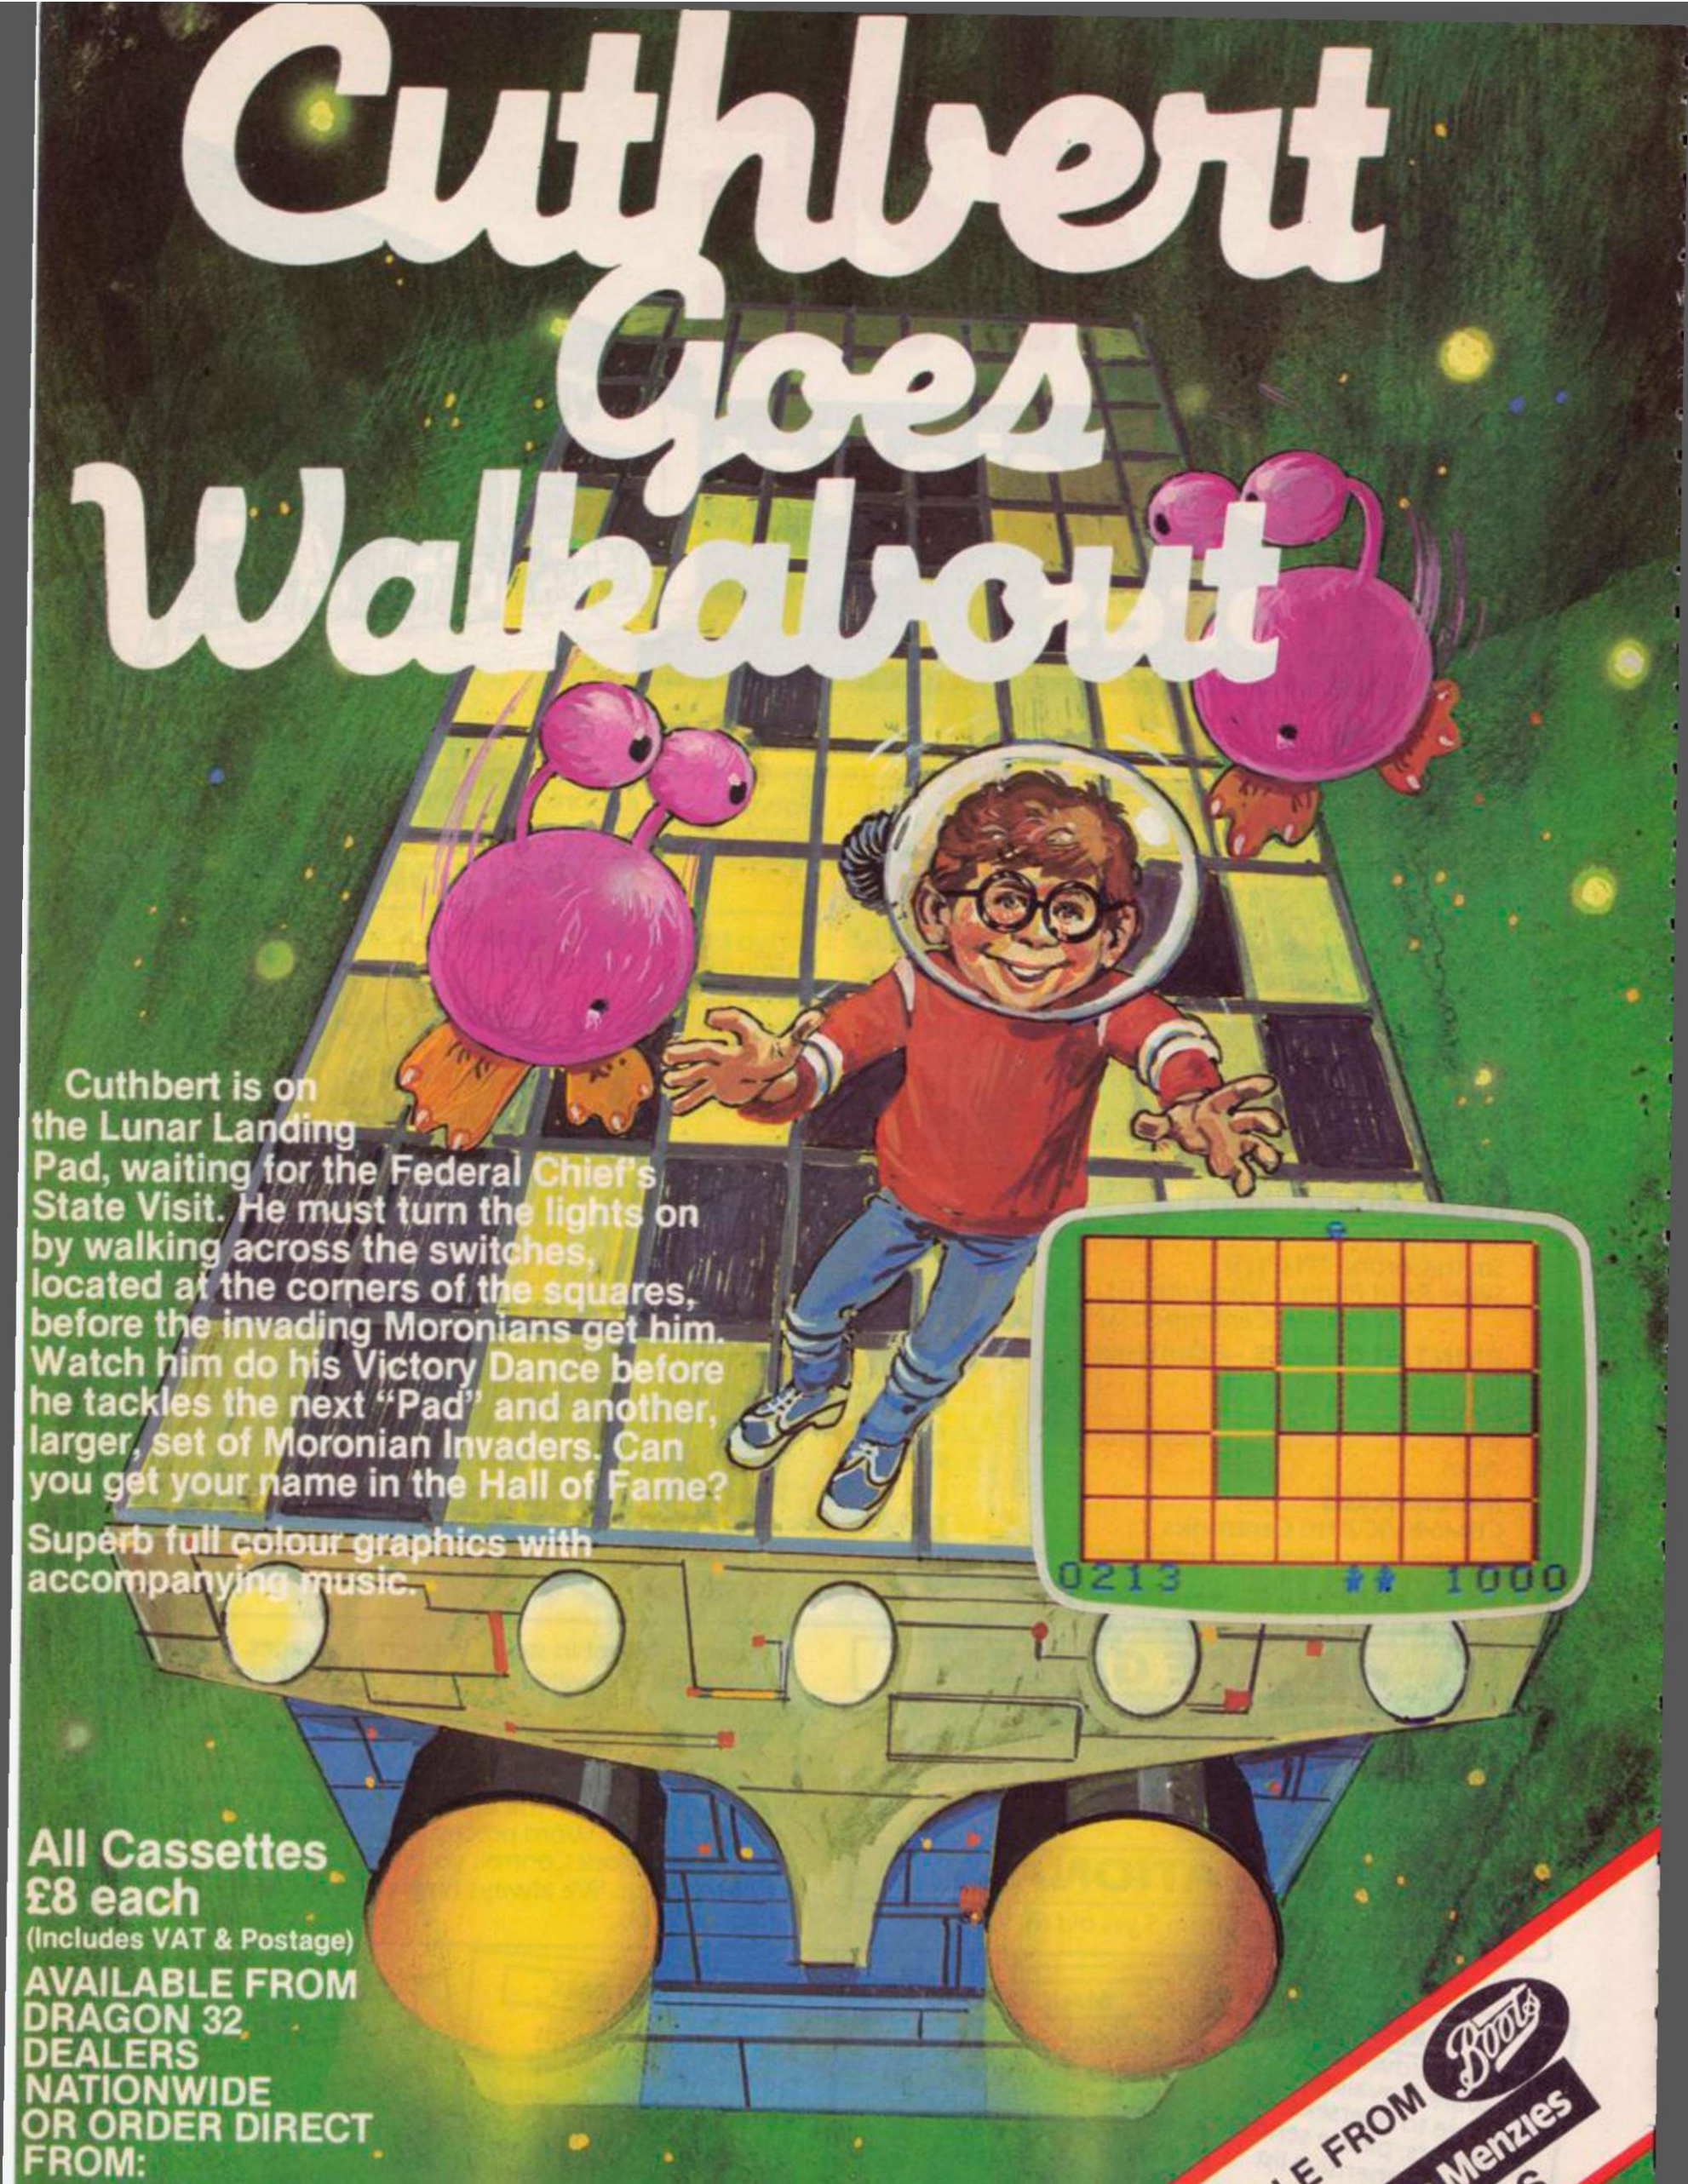
Cuthbert Goes Walkabout



Cuthbert is on the Lunar Landing Pad, waiting for the Federal Chief's State Visit. He must turn the lights on by walking across the switches, located at the corners of the squares, before the invading Moronians get him. Watch him do his Victory Dance before he tackles the next "Pad" and another, larger, set of Moronian Invaders. Can you get your name in the Hall of Fame?

Superb full colour graphics with accompanying music.

All Cassettes £8 each
(Includes VAT & Postage)

64 function key

Mark Tingle,
Harlow,
Essex.

CBM-64

THIS PROGRAM ALLOWS one to define up to four words for function keys F1, F3, F5 and two words for function key F7. The four words are accessed with the use of the function key on its own, the function key and the shift key, the function key and the Commodore key and the function key and the Ctrl key. Each defined word can be up to nine characters in length and can include the abbreviated keywords like GΓ for Goto.

No spaces can be included in the words unless the code is altered. This is because the machine code picks up a space as the end of a word. Function key F7 and the Commodore key have been programmed to alter the border colour. Function key F7 and the Ctrl key have been programmed to alter the screen colours. The code is divided into six parts:

Part 1 displays the title and the start address of the code.

KEY DEFINE BY M. TINGLE SYS256*156 STARTS

The start location for the code is 39936 to 39999.

Part 2 sets the interrupt pointer to location 40013 which is the start of the main program.

Part 3 detects which key has been pressed and then jumps to the next routine.

Part 4 is the print word routine. The start location for the code is 40151 to 40167.

Part 5 is a delay routine that stops more than one word being printed on the screen. At the end of this routine is the jump for the exit from interrupt.

Part 6 changes the screen and border colour. At the end of changing colour it jumps to the delay routine to avoid too rapid a change of colour.

The ASC codes of the words are stored from location 40500 to 40640.

Two lines of the code will need to be altered to include spaces.

410 DATA E8,C8,C9, + + ,D0,F4,88,84,C6:REM
1170 POKE M, × × :REM

As the machine code picks up a specific character at the end of a word, a character not normally used would be the best substitute e.g. π. The ASC code for π is 255 and the hex value for 255 is FF. Then + + will be replaced by FF and × × will be replaced by 255.

If a carriage return is required at the end of a word the symbol ← is used. Although there is a check carried out on the data ensure that a copy is taken before running the program.

Logger

Steven Atkins,
Appleton,
Cheshire.

ATOM

IN THIS GAME for the Atom you drive a motorboat up a log-filled river. Controls are: left — Z and right — /.

Lines 30-160 assemble the code to scroll the screen downwards. Lines 170-250 assemble the code to draw banks, click the loudspeaker and scan the keyboard. Lines 270-280 clear the screen, draw banks and set up position of boat, A, number of logs, B, and distance travelled, D.

Lines 290-300 Link to the code (lines 30-250) and move the boat. Line 320 draws the boat and logs. Line 330 increments distance and every 100 distance increases the number of logs. Line 340 checks for the boat crashing. Lines 350-370 print distance and explode the boat. Line 380 asks for another game.

SOFTWARE FOR SPECTRUM, BBC, ZX81, COMMODORE 64 AND VIC 20

3D TANX Spectrum 16K. Don Priestley £4.95
Use your skill, judgement, nerve (and a heavy artillery piece!) to knock out enemy tanks as they pour across the bridge. This is a full feature game with 3D ballistics, fantastic sound effects and is impossible to beat. Features consistently in the charts.

CENTIBUG Spectrum 16K. D. Heelas..... £4.95
Bring the arcade into your home with a faithful version of this old favourite. Popular Computing put this in the "Oh no, its 3 o'clock in the morning and I have to get up tomorrow" class.

METEOROIDS Spectrum 16K. Don Priestley £4.95
The finest version of this superb arcade game. Packed with features.

SPAWN OF EVIL Spectrum 16K. Don Priestley £4.95
How the complexities of this astounding game have been squeezed into a 16K Spectrum is a miracle of programming. This is not just another "Space Zap game". Your skill and reflexes are tested to the utmost, but you will also need nerve and strategy in dealing with the complex multi-stage alien breeding cycle.
N.B. If you want to be an expert in 10 mins DON'T BUY THIS GAME.

SOUND FX Spectrum 48K. Don Priestley..... £4.95
Enables the beginner to produce an infinite range of sound effects for his own program that even an expert would envy. No machine code knowledge needed.

DISTRON Spectrum 16 or 48K. R. Eastwood..... £4.95
A fast flexible relocatable disassembler for the Spectrum.

ASTRON Spectrum 16 or 48K. M. Lewis &R. Eastwood ... £9.95
You need to read the program booklet to appreciate the vast range of features for this combined assembler and toolkit. Useful for beginners and experts alike. Buy our booklet and get a tape FREE!!

ZXED (toolkit) Spectrum 16 — 48K. R. Eastwood £6.95
ZXED is a powerful editor for use on the 16K or 48K Spectrum, or the 16K ZX81 intended for use by the serious basic programmer, and offers several useful and time-saving features. Features ALTER, BYTES, COPY, DELETE, FIND, HELP, LINE, MOVE, RENUMBER, AUTOLINERENUMBER and VERIFY.

DICTATOR
BBC 32K. A French £6.95
Commodore 64A. A. French..... £5.95
Spectrum 48K. Don Priestley £4.95
Do you have the right blend of shrewd judgement, foresight, sheer ruthlessness and luck to survive as Dictator? Will you be able to manipulate the squabbling population, stay in favour with the powerful secret police and make the right decisions to keep control of your volatile subjects? Can you prevent, survive or even deliberately plan assassination attempts, war, and the inevitable revolution. A complex and entertaining simulation adventure featuring easy operation and excellent use of graphics, colour and sound effects.
"And excellent game not exhausted by even dozens of plays. I would rate Dictator as being among the best Spectrum games I have played" — Popular Computing Weekly.

FRUIT MACHINE Spectrum 48K. G. Pointer..... £4.95
An excellent new program from DK Tronics with such features as nudge, hold, gamble. Superb use of graphics and colour. Just like the real thing and just as addictive!

WOODWORM WHACKER VIC 20. C. Douglas..... £4.95
Take 1 Pac man — remove pills and fruit. Replace ghosts with fast moving nasties and add bouncing bombs to taste. The recipe for a tasty game for VIC 20 arcade addicts.

TROM Spectrum 16K. B. Williams..... £5.95
Don't get bitten by the bytes or nobbled by the nibbles in your desperate bit-search. An original, simple, but highly frustrating and addictive newcomer to our range.

PERSONAL FINANCE Spectrum 48K. S. Mills £6.95
Take the Bank Manager out of your wardrobe and put him to use in your Spectrum. Need we say more!

2003 A SPACE ODDITY Spectrum 48K. C. Fayers £4.95
An intriguing graphics adventures with a scenario as novel as its sound effects.

DIET Spectrum 48K. R. Fleming £6.95
Not just for the XL but a genuine aid to healthy living. Extremely user-friendly and allows for human weakness!

SLICKER
Spectrum 16K. A. Dickens..... £6.95
Vic 20. G. Pointer £6.95
Commodore 64. G. Pointer £6.95
BBC 32K. D. Regan..... £6.95
Only in a month of Sunday's does a puzzle program come along which is so simply and brilliantly original as to merit translation to four of the most popular micros. Join the Slicker Champions Club by conquering Level 8 before Xmas.

EASY ZX81. M. Wright & P. Arundell £4.95
Three excellent but simple adventure games especially written for children of all ages.

SUPER FRUITS BBC 32K. D. Hoskins..... £6.95
No need to lose money on the real thing. This is the real thing!

MAZIACS Spectrum 48K. D. Priestley..... £6.95
Programming wizard Don Priestley has magically uprated his original ZX81 best seller to exploit all the potential of the 48K Spectrum. "This game must be seen to be believed. One of the best uses of Spectrum in all aspects that I have seen" Home Computing Weekly.

GOLD MINE Spectrum 16K. S. Goodwin £4.95
Use strategy and a strong vein of luck to dig your way into riches and out of disaster.

TRAMIX BBC 32K. A. French..... £6.95
Spectrum 16K. D. Heelas £4.95
If you can think fast, act faster and you're not colour blind this completely new games experience is for you.

SPEED DUEL Spectrum 48K. K. Larter £5.95
Many have tried, but most have failed to capture the visual excitment of a truly competitive 3D race game. This is the winner.

APPLE JAM Spectrum 48K. E. Hickman £5.95
The best original zany game of 1983 starring rat ambulance hornet lift sauna bait, a very greedy fellow and of course apple & jam! Hectic and hilarious and boggles the imagination.

3D GRAND PRIX ZX81 16K. M. Wright..... £4.95
A brand new fast game for the 16K ZX81. Have the drivers view as you battle your way into the lead. Watch out for hazards and stay on the track for lap after lap and the chequered flag can be yours. A unique feature of this game is automatic difficulty regulation.

ZXED TOOLKIT ZX81. R. Eastwood £6.95
The ZX81 version of this powerful programmers utility.

METEOR STORM ZX81 D. Heelas 4.95
Fast m/c arcade action. Defend your moonbase against swarms of destructive meteoroids. (Graphics Rom version also available).

WHO DARES WINS Commodore 64. K. Moughtin £5.95
Gain promotion through the ranks with your sharp quick reactions shooting skill to eliminate desparate terrorists. But beware shooting the hostages brings demotion, demoralisation and disgrace.

ALIEN RESCUE Commodore 64. K. Moughtin £5.95
Takes minutes to learn but a lifetime to master in a hazardous rescue mission. Timing, judgement and skill are tested to extremes.

PROTEANS BBC 32K. D. Hoskins £6.95
In our humble opinion the fastest zappiest most addictive original colourful supersonic arcade game for the BBC.

SUBKILLER BBC 32K. D. Regan £6.95
1st class graphics and supersonics bring the excitement of the submarine hunter killer drama to your screen. Best subroutine ever!

GOLF Spectrum 16K. D. Johnson £4.95
Sit back and enjoy a peaceful game of Golf without the trouble and expense. Guaranteed to give hours of enjoyment. All possible features including irate spectators.

GALACTIANS Spectrum 16K. D. Turner..... £5.95
No serious games player should be without this version of an old favourite. Excellent graphics and sound. 36 different permutations of game.

ROAD TOAD Spectrum 16K..... £4.95
Join Toady on his hectic journey to the Lily Pads. An excellent full feature version.

STAR TREK 3000 Spectrum 48K. M. Florey £4.95
Boldly go where everyones been before. Then go further.

INVADERS Spectrum 16K. D. Heelas..... £4.95
An excellent version of the original and for many people still the best arcade game ever.

JAWZ Spectrum 16K..... £4.95
Get your teeth into the task of ridding the depths of hoards of marauding sharks and giant jellyfish.

MILLIE-BUG Commodore 64. K. Moughtin £5.95
A new and faithful version Commodore 64 owners have all been waiting for.

HARD CHEESE 16K Spectrum. P. Johnson & E. Farrell ... £4.95
Steer Farmer Giles around the field in his ferkinator. With crophoppers, giant cox's, cheese, beer and lethal aggrocide. A novel and witty full feature game for hoppercidal maniacs.

MUNCHMAN Spectrum 16K. D. Brewster £4.95
A refreshingly fruity power pill packed popular program with as much spirit as the original. A simply superb Spectrum special.

JUMBLY Spectrum 48K. D. Priestley £6.95
A brand new original all singing all scrolling supercolour animated multipicture puzzle program. A masterpiece of ingenuity to keep the whole family amused absorbed and enthralled until the next blue moon. PLUS the chance to earn more than £150 with YOUR contribution to JUMBLY II due out in 1984. This game MUST be rated as the best value for money program of 1983.

Trade enquiries welcome.

Available BOOTS, W.H. SMITH, LASKY'S, SPECTRUM, JOHN MENZIES and good computer software stockists throughout the UK.

Cottingham,
Humberside.

ORIC

ON MOST COMPUTERS when you type CLoad or its equivalent the computer will load the first program it comes across on tape and display the file name. However, on the Oric the file name is not displayed. This can be very annoying if you forget a file and as, apparently, there is no way to find out. This program, which occupies well under 1K and can be Newed after running, provides a way of displaying the name of a file. Type in the Basic program, run and New then type:

CALL # 400

From now on any program loaded with CLoad will have its name displayed at the top of the screen in the reserved line after loading.

```
10 P=#400

```

Earhole

Trevor Cook,
Goole,
North Humberside.

SPECTRUM

AS SPECTRUM OWNERS will be aware from their manuals, the ear socket of the computer is read via bit 6 of I/O port 254 decimal. The program contains a short machine-code routine which returns in the BC register pair, a value which is proportional to the frequency of any tone which may be present at the ear socket. The routine is designed so that if no tone is present, a value of zero will be returned. I have located the routine at 32600 dec i.e., the start of the user-definable graphics area on the 16K Spectrum. Owners of 48K machines will need to modify this accordingly by modifying line 400.

Now that we have the means to obtain a tone value, what can we do with it? There are many possibilities but, to explore just one, the program Soundscan allows us to graphically represent tones applied to the ear socket, and although written in Basic it is still fast enough to be acceptable.

Type in and save the program with:

SAVE "SOUNDSCAN" LINE 100

On running, three modes of display will be available. These follow the form of normal graph, histogram-type graph, and a point-plot display. Options exist within the program to freeze and restart the display, and to change display mode.

Lines 250-275 contain the main routine, with the Let=USR Tone in line 255 collecting the tone value from the machine-code routine. Lines 400-410 Poke the machine code into memory. Users of 48K machines should change line 405 to Let Tone = USR "a" if they wish to assign the machine code to the UDG area of memory. This has the advantage that a change of RAMtop is not necessary.

Ideally, a cassette recorder with some form of monitoring facility should be used as it enables the user to listen to the cassette output and observe the display simultaneously, which reinforces the effects of the program. The display is particularly impressive if used in Mode 1, i.e., normal graph mode using a music cassette containing a prominent female vocalist as the sound source.

Acetrace

Alan Wagstaff,
Richmond,
North Yorkshire.

BBC

HERE ARE TWO assembly-language programs for the BBC Micro. They can come in very handy when faced with bugs in long Basic programs.

The Trace facility on the BBC Micro is useful but there are occasions when one is left gazing at a screenful of line numbers, obscuring the program display and leaving one feeling a trifle non plussed.

Acetrace displays the Basic line number which is about to be executed in the top left hand corner of the screen. There is then a pause for about 2.5 seconds, which can be cut short by pressing a key, then the line is

(continued on next page)

(continued from previous page)

executed.

The assembly-language program produces machine code starting at address D01 hex. It also sets up function key 9 to enable Oswrch to be vectored to the machine code and also switch on the Trace facility.

To use Acetrace, enter and run the listing. Then enter New and load in the Basic program to be debugged. Press function key 9 then run the Basic program. When you have seen enough, press Break followed by Old. This restores the normal Oswrch vector. Acetrace is still available by pressing function key 9 provided this has not been altered.

Dynvars produces a machine-code routine starting at D01 hex. This code, when called, prints the names of all dynamic variables used by a Basic program.

To use it, enter the listing and run it. Then enter and run the Basic program. Entering

CALL &D01

will list the Basic programs variables.

DRAGON

THIS IS A COMPLICATED Artist program allowing use of all the Dragon's graphics modes and all colours the pictures can be Saved or Loaded from tape under program control. The joystick moves the flashing point cursor around the screen.

Control keys.

C	Clears screen to present colour.
S	Changes hi-res screen – 0 or 1.
1.2.3.4.	Chooses resolution – mode.
0	Sets a fixed reference point.
L	Draws line between the last cursor position and the present one.
O	Draws cursors with L.
U	Is the opposite of O and as Undraw which joins all cursor points with the fixed point from O.
B	Box – alternative to line L draws boxes to last point etc.
	Draws circle centre 0 and radius to present point in present colour.

Fire button Changes colour (0-8).

P	Part area in colour up to border of present colour.
O	Output/input screens to tap.

Auto line number

D North,
Ripley,
Derby.

SPECTRUM

THESE PROGRAMS produce automatic line numbering for either the 48K or 16K Spectrum. The machine-code program is stored above RAMtop and is called automatically by diverting the interrupt which occurs every 20ms.

The following system variables are used in the program:

ECHO E, LAST K, FLAGS, E PPC and KSTATE

A checksum is used in each program to warn if there is an error in the Data lines. If the error-in-data message appears when the program is run then carefully check through these lines correcting any errors, and run the program again, until the instructions appear.

To turn the program on:

RANDOMISE USR 65121

or 32340 for 16K machines. Pressing Enter again should produce 0010 for the first line number. If at any stage you wish to alter the next line number then delete the number printed and type in the next number required after which automatic numbering will continue from this line. The step between line numbers can be altered by Poking the required value into 65192 – 32411 for 16K.

If the Enter key is held down the routine will rapidly run through the line numbers. This can be used if you want to delete part of a program, by entering the first line number to be deleted and simply holding Enter down until the last number to be deleted is reached.

If the line number exceeds 9999 a colon — : — will be printed in the first digit position to warn that the line cannot be entered.

To turn the routine off delete the last

(continued on page 231)

Add the professional touch to your ZX81 starter pack

£34.95 inclVAT

A GREAT IDEA FOR CHRISTMAS

Memotech Keyboard

The Memotech plug-in Keyboard plus buffer pack takes the effort out of data entry for ZX81 users. The Keyboard has a light professional touch and is housed in an elegant aluminium case. The simple plug-in system means that you are not obliged to open up your ZX81, use a soldering iron or invalidate your ZX81 warranty.

Keyboard Buffer Pak
The Buffer Pak performs a "housekeeping" function for the Keyboard, interfacing directly with the port of your ZX81.

The complete range

RS232 Interface
The RS232 is an all-purpose interface which allows the ZX81 not only to output to suitable serial printers, but can link up with numerous types of peripheral or even other processors. The Interface has two main modes of operation: BASIC mode allows you to use the range of functions supplied in the RS232 EPROM within an ordinary BASIC program, and TERMINAL mode allows you to use your ZX81 as a terminal to another processor. The EPROM functions offered permit the user to send, receive and convert bytes between ZX81 code and ASCII, as well as check the status of numerous control flags. Received or transmitted data can appear simultaneously on the screen, and received data may be printed simultaneously.
£39.95 inc. V.A.T.

Memopak Centronics I/F
The BASIC commands LPRINT, LLIST and COPY are used to print on any CENTRONICS type printer. All ASCII characters are generated and translation takes place automatically within the pack. Reverse capitals give lower case. Additional facilities allow high resolution printing.
£24.95 inc. V.A.T.

Memopak HRG
This pack breaks down the constraints imposed by operating at the ZX81 character level and allows high definition displays to be generated. All 248 × 192 individual pixels can be controlled using simple commands, and the built in software enables the user to work interactively at the dot, line, character, block and page levels.
£29.95 inc. V.A.T.

Memocalc
The screen display behaves as a 'window' on a large sheet of paper on which a table of numbers is laid out. The maximum size of the table is determined by the memory capacity, and with a Memopak 64K a table of up to 7000 numbers with up to 250 rows or 99 columns can be specified.
£29.90 inc. V.A.T.

Memotext
Text is first arranged in 32 character lines for the screen with comprehensive editing facilities. On output the user simply chooses the line length required for printing and the system does the rest. Used with the Memopak Centronics Interface, the Word Processor makes available printout with 80 character lines, upper and lower case and single and double size characters.
£29.90 inc. V.A.T.

Memopak Memory Extensions
For those just setting out on the road to real computing, these packs transform the ZX81 from a toy to a powerful computer. Data storage, extended programming and complex displays all become feasible. Further details available on request.
16K Memopak £24.95
32K Memopak £34.95
64K Memopak £49.95
Prices inclusive of V.A.T.
Memopaks are available at main branches of W.H. Smith and John Menzies.

Z80 Assembler
The Assembler allows you first to code and edit a source program in the Z80 language, and then assemble it into machine code. You can now write flexible and economic programs. The Editor mode allows you to code directly in the right format, manipulate individual lines and control the exact placing of source and machine code. Routines may be merged or listed (even to a commercial printer using our Centronics Interface). The assembler mode handles all *standard Z80 mnemonics*, numbers in hex or decimal, comments and user-selected labels.
£29.90 inc. V.A.T.

All prices are inclusive of V.A.T., postage and packing.

To Order: Send your Name, Address, Memopaks required, plus a Cheque/Postal Order/ Access/Barclaycard number (please state which) to: **Memotech Limited, Station Lane Industrial Estate, Witney, Oxon, OX8 6BX. Telephone Witney 2977.**

We want you to be completely satisfied with your Memopak – all our products carry a 14 day money back guarantee.

SPOT THE DIFFERENCE!

Choosing which game to buy from the mountain available is a difficult job, especially when everyone claims to produce the best on the market. But how can you tell the best from the rest?. To help you decide, read on. . . .

THE DUNGEON MASTER

Let your Spectrum be your guide in a totally new dimension in adventures in the true spirit of traditional role playing games where YOU design the scenario.

"I have been a Dungeons and Dragons fan for several years....The package provides excellent entertainment for all fans of the cults and should prove a good introduction to the game".
....Sinclair User.

"Highly recommended for its versality, originality and quality. Definately well worth obtaining".
....ZX Computing.

ZX Spectrum 48K **£7.50**

Written by Graham Stafford.

What the real critics say. . . .

Very rarely have software titles produced such universal acclaim as 'Halls of the Things' and 'The Dungeon Master'. Now, with three brand new programs, Crystal continues to set the standard of software excellence. The difference is obvious - the choice is yours:

The Best or The Rest.

HALLS OF THE THINGS

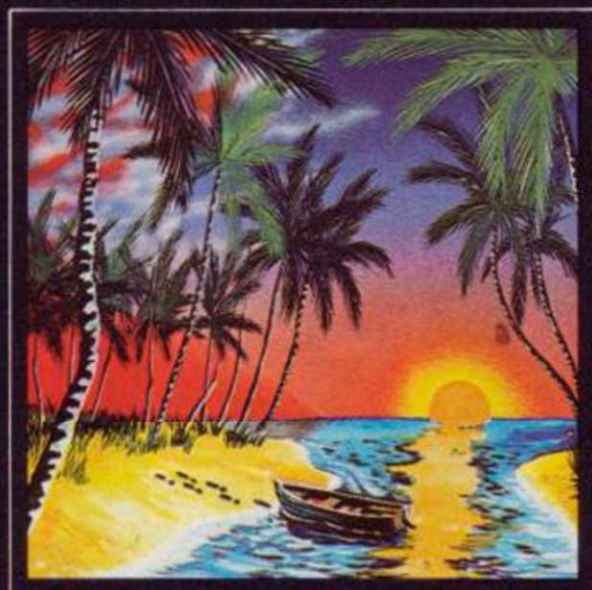
A stunning multi-level maze 'arcade adventure'.

"Excellent and dangerously addictive - could change the Spectrum games scene overnight".
....Sinclair User.

"Spectacular - One of the best games I've seen, finely balanced between simplicity and addictiveness - superb graphics and colour - I CAN'T RECOMMEND IT HIGHLY ENOUGH".
....Popular Computing Weekly.

ZX Spectrum 48K **£7.50**

Written by Neil Mottershead, Simon Brattel and Martin Horsley.



THE ISLAND

The ultimate test of logic and deduction! Can you solve the hidden mysteries of the South Pacific Island on which you have been stranded - and escape alive! A brilliant classic style adventure game to facinate and frustrate you for months!

ZX Spectrum 48K **£7.50**

Written by Martin H. Smith.

INVASION OF THE BODY SNATCHAS!

At last! a version as fast and furious and as frustratingly addictive as the arcade original. Landers, Mutants, Bombers, Pods, Swarmers and much much more combine to produce the ultimate space game!

ZX Spectrum 48K **£6.50**

Written by Simon Brattel and Neil Mottershead.

ROMMEL'S REVENGE

A brilliant interpretation of the most visually stunning arcade game of all time. Superb high resolution 3D graphics with full perspective plus a host of new and exciting features make Rommel's Revenge the most spectacular game ever produced for your Spectrum!

ZX Spectrum 48K **£6.50**

Written by Martin Horsley.

Please send SAE for our latest catalogue and details of our forthcoming software.
Catalogue FREE with every order. P&P included.
Please add £0.50 per item for overseas orders.

Please make cheques/PO's payable to:

PROGRAMMERS! Written any good software? send it to us for evaluation and details of our excellent royalty scheme.

(continued from page 226)

number printed and type

RANDOMISE USR 65111

or 32330 for 16K. This should always be done before using any other program which uses interrupts.

When the program has been successfully run it can be Saved by:

SAVE "AUTO LINE 48K" CODE 65111,157

or

SAVE "AUTO LINE 16K" CODE 32330,157

This can then be quickly loaded when required, but remember to set RAMtop first to protect the program. Alternatively, the program can be loaded from the Basic listing, and after turning on the routine the Basic lines can be quickly removed by the method described. Incidentally, it is possible to have program names longer than 10 characters by using keywords in the name. These are only available in the extended mode.

Stringdump

G Jones,
Wiltshire.

VIC-20

STRINGDUMP IS A non-relocatable machine-code routine which will print out all the string variables currently used by the Vic-20, except those stored in arrays. It is loaded by the Basic loader program into memory starting at decimal location 7424 — just below the screen memory — and is protected from the Basic program and its variables by lowering the top of memory pointer. After the machine code has been loaded, the Basic loader will New itself. The routine may then be called by SYS 7424 when needed.

Lines 10 to 50 set up a two-byte pointer to point to the end of program/start of variables by Poking 251, Peek (45) and Poking 252, Peek, (46) — in machine code. Lines 60 to 230 check for a string variable by searching through memory to find a valid sequence of characters corresponding to the name of a string and printing them, followed by "$=".

Control then passes to the routine Stringprint which calculates the start address of the string and prints it, the length of which is determined by the contents of the Y register. After the string is printed, a carriage return is printed to move down a line and then a check is made to ensure that the end of variables address has not been reached.

If it has, then the program is terminated in line 430 by jumping back to Basic. Otherwise, the whole process of searching for and printing a string is repeated. Also included in Stringdump is a means to Stop the program at will by pressing the stop-key. This is desirable when dumping a lot of strings since the string you wish to examine may scroll off the top of the screen unless the listing can be stopped.

Graffiti

Ian Fildes,
Wheldrake,
York.

SPECTRUM

GRAFFITI IS A program for the 48K Spectrum which lets you write on the screen in any of eight directions.

The program works by printing your message at the bottom of the screen in the same colour as the paper so it cannot be seen. This part of the screen is now scanned by the point command and if this gives a positive result the computer jumps to a special plot routine depending on which way up you wish to write.

A problem arises when you wish to ask the user a question, you have to write to the screen and disrupt the display. So two short machine-code routines are used to move the screen around in memory.

Ask your dealer about these exciting new **Galactic Series 2000** 2nd Generation games.

20 COMMODORE 64 HOME COMPUTERS TO BE WON

ALTERNATIVE PRIZES OF DISK DRIVES OR PRINTERS FOR WINNERS WHO ALREADY OWN CBM64's

PLUS 100 RUNNER UP PRIZES

VIC20/CBM64 OR DRAGON JOYSTICKS

Galactic Software are giving away all these prizes to the lucky number winners, anyone who buys a Galactic Series 2000 game before Christmas could win!

For YOUR chance to win a prize simply fill in the entry form with your guess at one of the lucky numbers and send to us with the bottom right corner of the cassette cover of any Galactic game OR send your entry together with your order for any game.

Our computer has chosen 120 random numbers between 1 and 10,000, one for each prize. The closest guess to each number wins the prize.

Closes Dec.24th 1983. A list of all the winners will be available.

In the future... in a galaxy far, far away a second generation of games was created. They were time warped back to our dimension for you to experience, NOW.

The Galactic Series 2000 is here at last..

Games for the VIC 20, Commodore 64 and Dragon 32.

All series 2000 games are only £5.50 each.
Money back guarantee.

Unexp. VIC20 games - Keyboard or Joystick.
Commodore 64 games - Joystick control.
Dragon 32 games - Keyboard control.

Froggy: Incredible animation in this high performance graphics experience. Frogs, trucks, cars, boats, logs, turtles and lilyponds all combined to give your brain a real workout.

Space Shuttle: Test your reflexes to the max as you attempt to rescue psychopathic scientists from the moon. Beware of the hazardous space fragments in this hectic challenge.

Bug Diver: In this fast paced addictive arcade game, as a mere beetle you've gotta be fast to outswim the merciless bug eating fish while stealing their precious eggs.

Robot Mouse: In this futuristic arcade game you collect atomic cheese from the floor of the space maze avoiding the mean malfunctioning robots who will on contact.

3D Maze: The ultimate maze game features brain power not fire power. A visually breathtaking 3 dimensional display with a tormenting time factor as the 4th dimension.

Neutron Zapper: You pilot one of the best space ships ever built, but that's no protection in this galaxy. Your survival depends totally on the speed of your reflexes.

ALL GAMES ONLY £5.50 EACH

COMPETITION CORNER

If you want to set a competition for Competition Corner, remember that the simplest solution should be calculable by a short program rather than by any other form of reckoning.

COMPETITION RESULTS

OCTOBER'S COMPETITION offered Atari's 600XL as prize. Contestants were asked to solve the crossword and finish the sentence, "I would excel with the new Atari because..."

Naturally there were dozens of "xlellents" and "atarifics" as in B. Jeeves' "the XLent XL makes it easy to XL" or S. Brewell's "it's atarific computer with an extra large future". These we thought were a little too obvious. Other entries smacked of the world of the advertising jingle. R. Buttery suggested, "it's the ideal suitor for student or tutor" while D. Gilbert wrote, "for computer needs ... Atari leads".

Many of the most entertaining entries were also the most irrelevant. C. Harris told us, "I am a binary based being from Betelgeuse". To which the reply might be: fascinating but how does Atari enter into it? Even more off-beam was M. Jasztal's "Mad frogs and Englishmen play well on the 800's son".

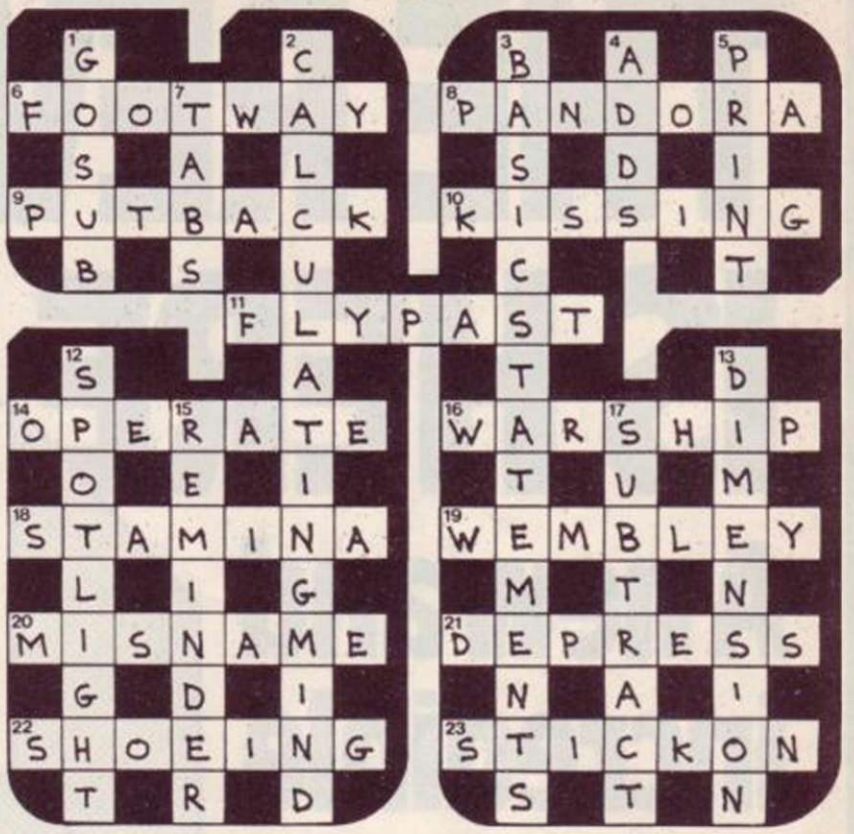
Some entries free-associated with abandon. The sequence of ideas seemed to be: XL600, rode the 600 ... Light Brigade! This produced J. Wilkinson's "the noble 600 leads the charge of the byte brigade".

On a slightly saner note R. Ford offered the crisp, "my ZX is OK but an XL would be KO"; S. Crump hoped he would have "wintry nights on an Atari — only the start of an I.C. safari"; and N. Milne pointed out that "with an Antic or two you miss the queue for the 6502".

Choosing from among so many entries would have proved tricky indeed. Fortunately, Atari itself saved us the trouble by exercising the right as prize-giver to pick the winner. We submitted a shortlist of some 20 entries. The company awarded the prize to Les Isbister, 1 Mulberry Close, Biggleswade, Bedfordshire, who said "its expandability takes the growing pains out of computing". Navy man R. Mills came a close second with "A tar I am, at sea I am, bored I am". There were only a few correct answers to October's Woodworm puzzle.

The first picked from the competition bag came from Andrew Scott, 55 Huntley Grove, Peterborough.

The maximum variety Willy the Woodworm can enjoy is 39. This total can be arrived at by following a number of different routes. The sequences 9,2,7,12,5,8,3 and 1,7,13,9,2,6,11,4 are two possibilities.



ADMAN ELECTRONICS

Add on the Adman way

The Vic 20 really can speak...but only if you use an ADMAN SPEECH SYNTHESISER It's word power is endless as there is no set vocabulary. Yet operation is simple. The 64 elements of English speech are pre-programmed to let you put your own words together as soon as you switch on. Just imagine...program adventure games with characters that can actually talk!

Also for your Vic 20 there are 8K and 16K RAM PACKS and the ADMAN 3 PORT EXPANSION MOTHER BOARD. With proven designs of the highest quality they are the best value for money around.

The Vic 20 speaks out!

Available from Spectrum, Dixons and other major computer accessory shops

Prices around:

8k Ram Pack	**£39.95**
16k Ram Pack.	**£49.95**
Motherboard.	**£19.95**
Speech Synthesiser . .	**£49.95**

To find out more about these products, why not take a lead from our speech synthesiser...go to your local dealer and ask for it! Or post the coupon.

THE REVOLUTION IS HERE

A new and incredible extension to basic that lets you write fast moving Arcade games

FIFTH

BY RICHARD TAYLOR

*FIFTH has the following NEW Commands & functions

All, Attr, Break Key Disable, Colours, Column, Current, Direction, Disable, Enable, Erase, Fill, Find, Get, Interact, Intparam, Jumps, Large, Let, Limit, Line, LMTPARAM, Mask, More, No, Object, Print, Put, Replace, Remove, Screen, Sound, Speed, Status, Temps, Use, Vector, Velocity.

*Personal Computer News said:

"Fifth provides an excellent set of commands for programming arcade type games and makes it easy for you to write fast moving games in Basic."
The packages come with an extensive manual, a demonstration program and the fifth interpreter. The commands are entered as words into your program and give you INTERRUPT, driven, fast, high resolution SPRITE graphics without losing the simplicity of Basic.

Buy FIFTH and get a City Bomber FREE!

Just TYPE in this program by Richard Taylor with your Fifth Interpreter.

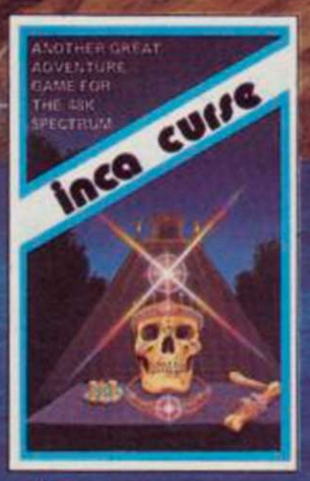
Please state whether your order is for ZX81 or SPECTRUM.
Access and Barclaycard welcome.

Send S.A.E. (9 in × 6 in) for FREE catalogue of our wide range of programs

A

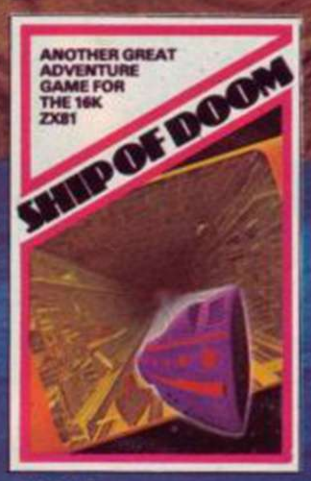
16/48K ZX/Spectrum
16K ZX81
You find yourself stranded on a strange alien planet. Your aim is to escape by finding your captured space craft. But beware of the little green man who may get to you!

B



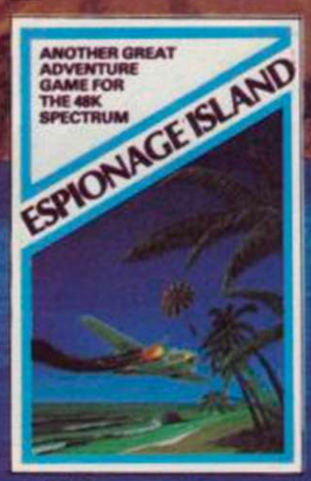
48K Spectrum
16K ZX81
You are in the middle of a South American jungle when you stumble across a strange Inca temple. Enter it to collect treasure and then try to return. But beware don't let greed be your downfall.

C



48K Spectrum
16K ZX81
While on a reconnaisance mission you are drawn to an alien cruiser on a humanoid slave mission. Try to escape from aggressive aliens, luscious androids and drunken barmen. Your only help is Fred the friendly android.

D



48K Spectrum
16K ZX81
You have to survive an engine failure while flying over an apparently uninhabitated island in the South Atlantic. Use your wits to harass the enemy, but treat the beautiful native women with respect, to escape from the island and return to an allies aircraft carrier.

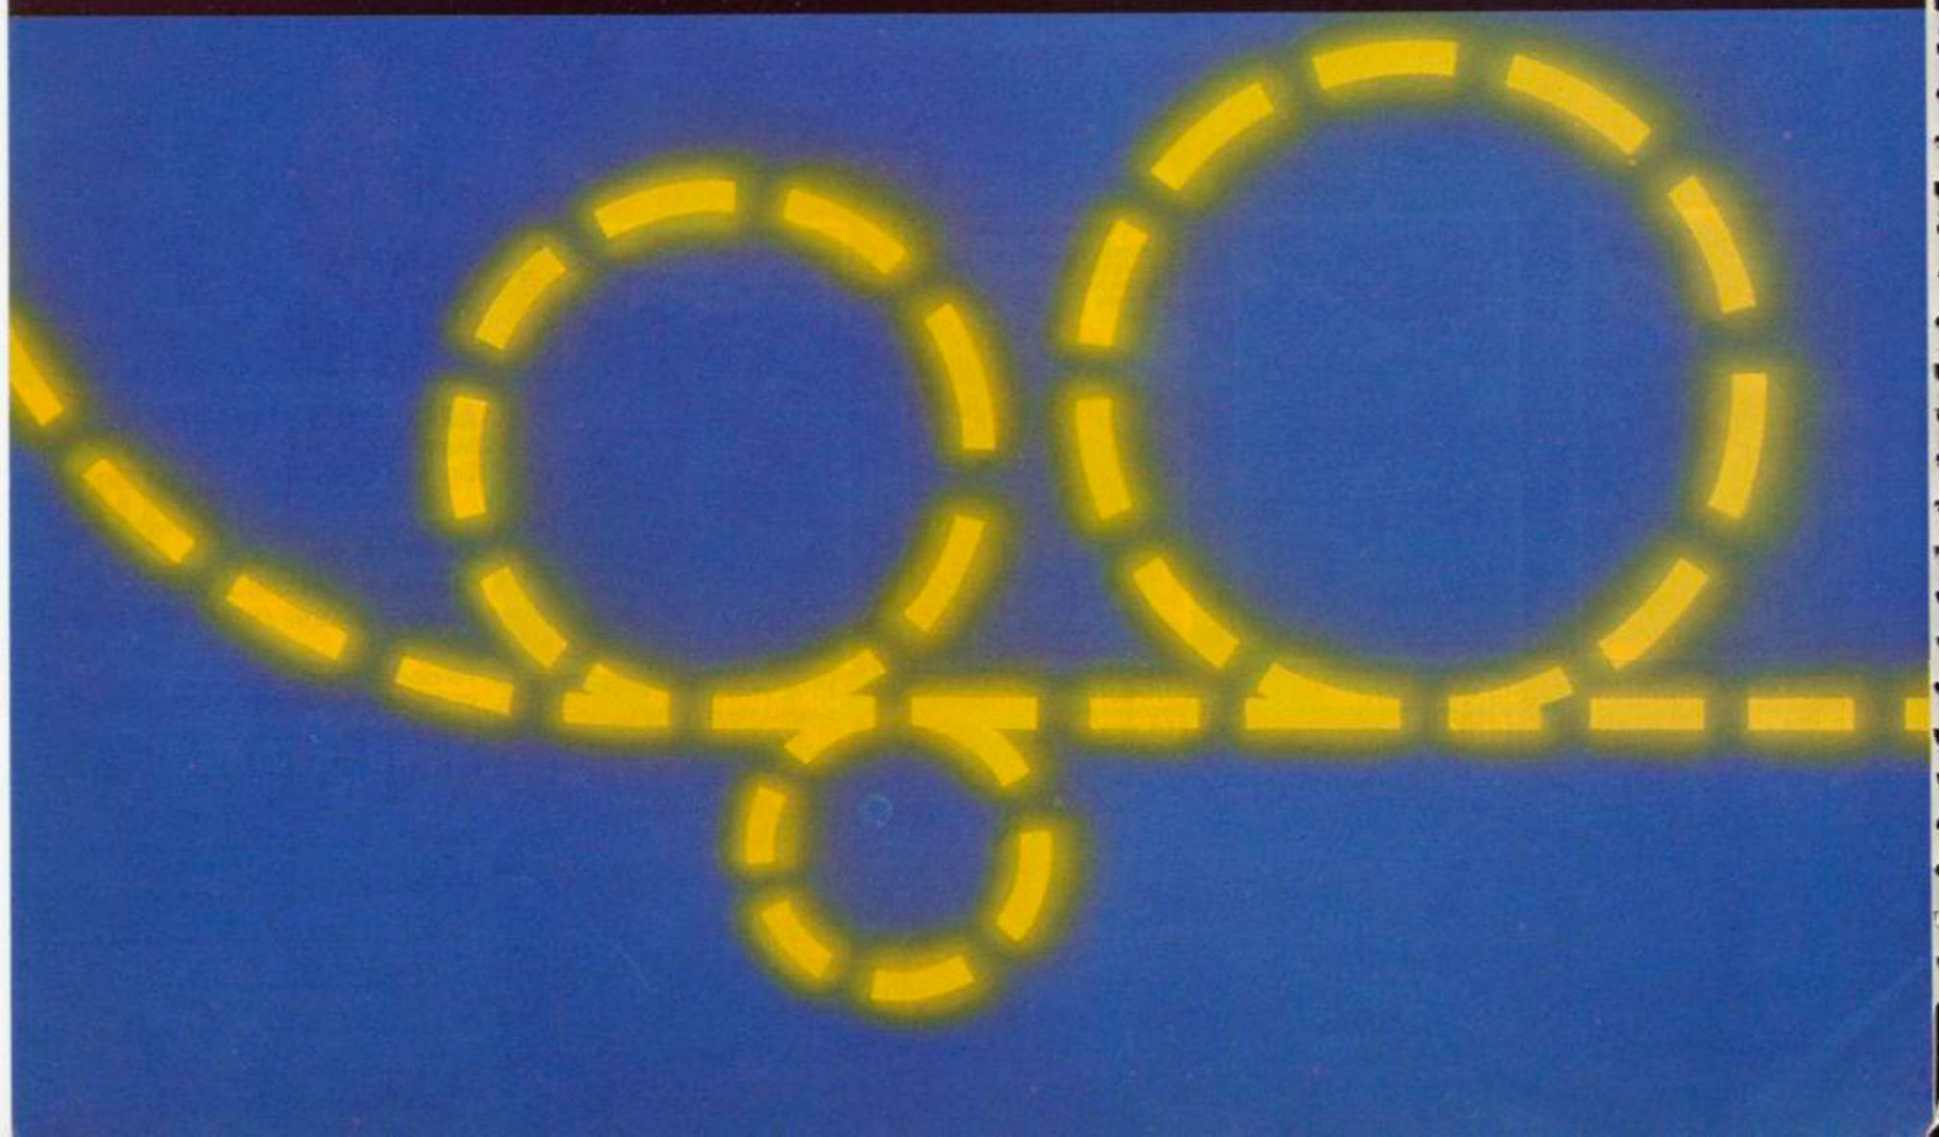
THE TRICKSTICK. A REVOLUTION THAT RUN AROUND ORDINARY JOY



TRICKSTICK TURNS YOUR SPECTRUM INTO THE MOST SOPHISTICATED GAMES MACHINE IN THE WORLD

Why is Trickstick superior to all other joystick systems?

PROPORTIONAL: A brilliant innovation in the circuitry of the interface gives proportional control (ie varying speeds and rates of turn) even with many non-proportional games. The design tears up the textbooks on conventional analogue to digital conversion and brings you unprecedented control and versatility.

ONE TO EIGHT PLAYERS: Innovative design also enables you to put up to eight Tricksticks on a single Spectrum. Each Trickstick comes with its own interface and the interfaces simply plug into each other. So games playing need no longer be a solitary occupation, and the kids won't have to fight for their turn any more.

SOFTWARE COMPATIBLE: Trickstick is compatible with any software which will work with the old-fashioned Kempston joystick.

PROGRAMMABLE: A low cost adaptor performs the technically simple job of making the Trickstick programmable, and compatible with ANY software.

NO MOVING PARTS: Small plastic-coated metal pads on the Trickstick detect how hard you are pressing by picking up electrical radiation from your fingers. This is then amplified and fed into the interface. So there are no moving parts at all;—not even the fire buttons. This arrangement was proved in competitive trials to give the greatest control and potential for spectacular skill.

S RINGS STICKS.

And this makes Trickstick the only games system which does not wear out with heavy use!

ATTAKTICS: Trickstick gives new life to your existing software. Attaktics takes you and your Trickstick to new dimensions where skill and strategy are as important as the fast reactions of the very young. The game is very, very efficiently written in machine code and allows you to move in 64 different directions on the screen, giving perfectly smooth curves. Combine this with your new-found control of speed and rate of turn, and imagine aerial combat against your Spectrum or against other Trickstick owners!

USE THE COUPON OR THE PHONE: Trickstick and Attaktics are in stock and available now. Trickstick including interface is £28. Attaktics is £7.50 if ordered with a Trickstick and £10 on its own. The Programmable Adaptor is £10 for Trickstick owners and £15 for others. The Training Tape is Free with each Trickstick. Or call us for the name of your local stockist.

Please send me:—

☐ Trickstick(s) with training cassette at £28 each £_____ ☐ Attaktics at £7.50 (with each Trickstick) or £10 (on its own) £_____ ☐ Programmable adaptor(s) at £10 (for Trickstick owners) or £15 (for others) £_____ Postage 65p. The No.1 Football Game

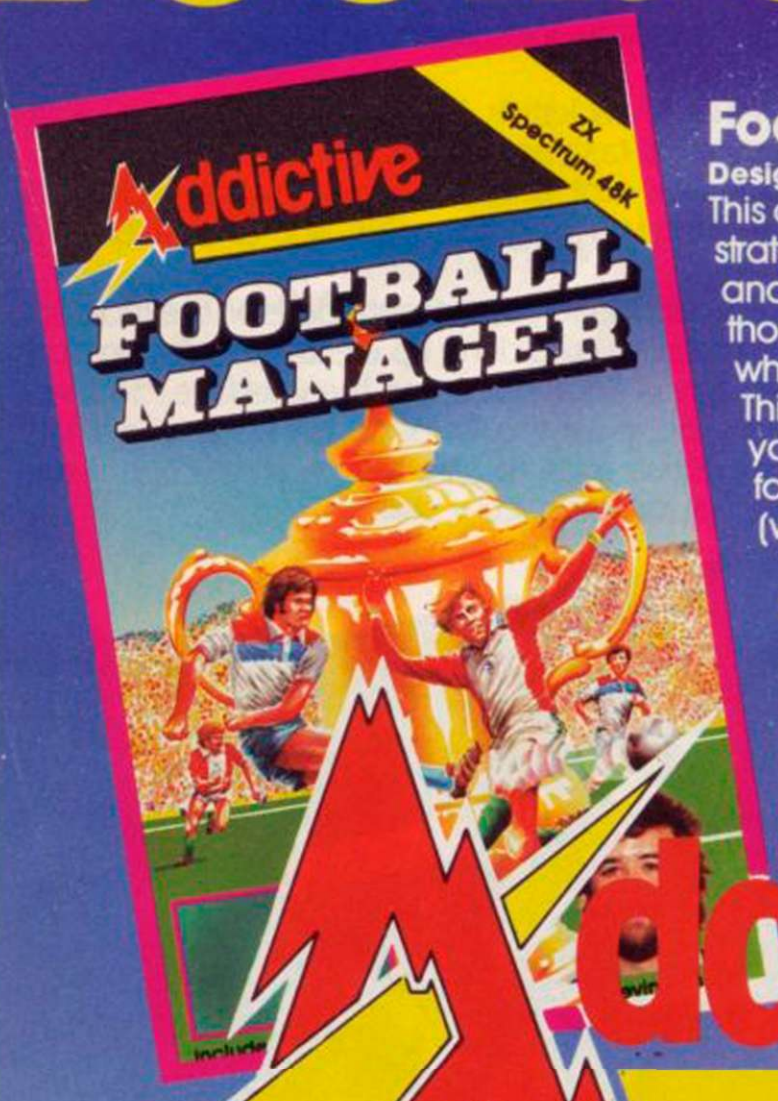
ZX81 16K, ZX Spectrum 48K
BBC and Oric versions coming soon!



Football Manager

Designed by Kevin Toms

This outstanding game of skill and strategy is now widely available and you can join the many thousands of satisfied customers who have purchased the game. This is no five minute wonder – you will be playing this game for hours over many weeks (we know – our customers tell us!).

Kevin Toms

Some of the features of the game:–

★ Matches in 3D graphics ★ Transfer market
★ Promotion and relegation ★ F.A. Cup matches
★ Injury problems ★ Full league tables
★ Four Divisions ★ Pick your own team for each match
★ As many seasons as you like
★ Managerial rating
★ 7 skill levels
★ Save game facility

Addictive

*ZX81 Chart, Home Computing Weekly 16.8.83

Programmers
We want your software. Send us a sample. If accepted, we will supply generous royalties plus cash advances plus free advice from Kevin himself!

Comments about the game from press and our customers

"FOOTBALL MANAGER is the best game I have yet seen on the Spectrum and my personal favourite of all the games on any micro ... To the ordinary person it is an excellent view of what can be done in the field of computer games ... The crowning glory of this game is the short set pieces of match highlights which show little stick men running around a pitch, shooting, defending and scoring ... It is a compulsive game but people who cannot take game sessions of 9 hours or so, which happened on one happy Sunday, will be grateful to know that there is a 'save to tape' option. FOOTBALL MANAGER has everything it could ... The originator, Addictive Games, certainly deserve the name." Rating: 19/20 (Practical Computing – August 1983).

"When I first received this game I spent the best part of the weekend playing it. Since then I have returned to it more often than any other. The truly addictive quality of this game is the remarkable way it mirrors the real football manager's problems ... "(Personal Computer Games – Summer 1983)

"It's my own fault you *did* warn me – I am totally and completely hooked on FOOTBALL MANAGER." (Mr. A. Wright – Lancashire.)

"It is by far the best software game that I have seen for the Spectrum." (Mr. N. Lincoln – Surrey.)

"I congratulate you for a marvellous game which keeps the player enthralled." (Mr. N. Creasey – Gerrard's Cross.)

"I am writing to say what a great game it is. I have spent over 45 hours on it." (Mr. D. Fearn – Gloucestershire.)

"Your FOOTBALL MANAGER game is terrific." (Mr. N. Cumming – West Bromwich.)

Action from the Spectrum version

Available from computer software stockists nationwide, including Boots & WHSMITH†

† Spectrum version only

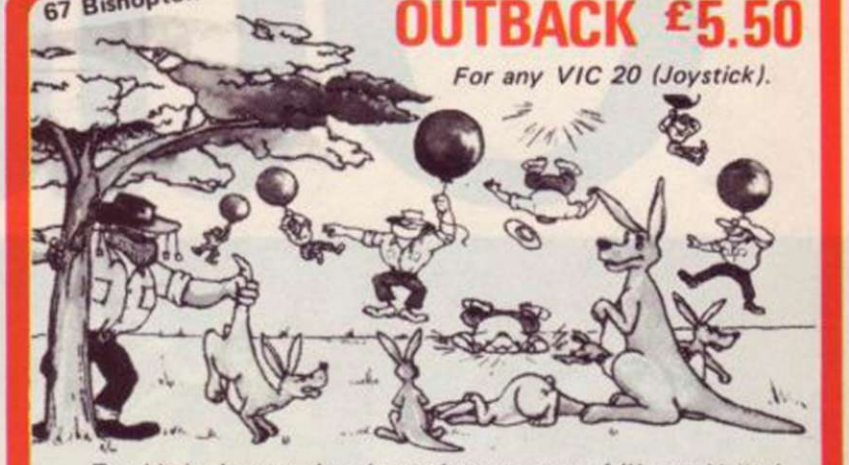
PARAMOUNT SOFTWARE

67 Bishopton Lane, Stockton, Cleveland.

OUTBACK £5.50

For any VIC 20 (Joystick).



Trouble is about to drop in on the occupants of 'Hoppy Valley' in the form of rather cunning swagmen. 'Ma Hoppy' has a very sophistocated defence set-up and , with your help, could win the day. Which is it to be– a tranquil Hoppy Valley or a swagmen takeover? How long will you survive? It gets tough and hot in the OUTBACK.

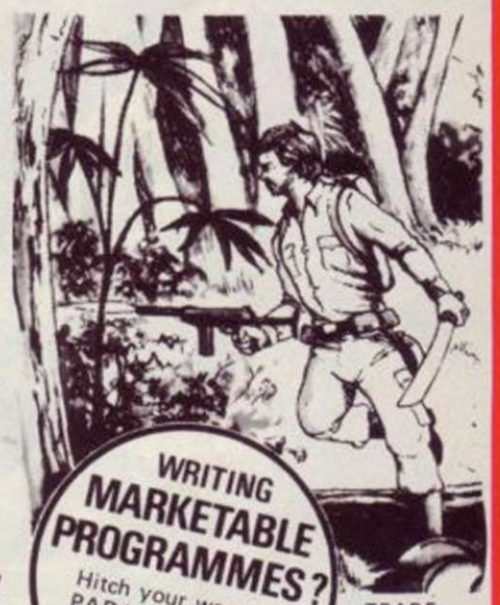
Pure Machine Code action. A game which pulls out all the stops on the VIC 20 to give you a deceptively aggressive and addictive challenge. It's a laugh too!

**5 skill levels. *6 Bonus Score symbols. *2 Bonus Life levels. *Running score on screen. *Hi Score display. *Superb Sound with 3 different tunes. *Extensive use of colour and graphics.*

COUNTDOWN £5.50

For VIC 20. 8K or 16K expansion — Joystick or Keyboard.

Your next assignment is to assist the government of a friendly power in averting a holocaust. TIME is important. ACCURACY is essential. COURAGE mandatory. But, above all, NERVE is the prime attribute needed for your mission as an agent in the crack S.M.U.



**Multi Skill/Time levels.*
**On Screen score display.*
**Bonus for each screen.*
**'Mission Accomplished' Bonus.*
**Bonus Life feature.*
**Hall of Fame.*
**Realistic Sound Effects.*
**Superb use of Colour and Graphics.*
**Keyboard or Joystick option.*

Everyone wants to get their hands on The Fuller Gift Pack.

The Fuller gift pack has got to be the computer bargain of the decade; no wonder everyone wants to get their hands on one.

This super gift pack contains the fantastic Fuller Master Unit, the ultimate unit that provides all the requirements for the serious games enthusiast. The Fuller Master Unit incorporates both the Fuller Box and Orator; its amazing features include a speech synthesiser, an independent sound synthesiser, a joystick interface, an amplifier for standard Spectrum sound, a cassette interface and a hi-fi socket. The pack will also include a Master Unit demo tape and full documentation.

As well as the Master Unit this Gift Pack also contains a de-luxe Joystick, with suction adhesion, a firm smooth action and a moulded hand grip incorporating twin firing buttons.

Once your Spectrum has been added to the Fuller Gift Pack you will have an extended computer system that is second to none.

Now you can pit your mind against the four unique, exciting computer games included in the pack. These games have been especially adapted for this superb system and have added arcade sound effects and speech to bring out the very best in your Spectrum.

The Fuller Gift Pack saves you £20 on the purchase price of buying these items separately.

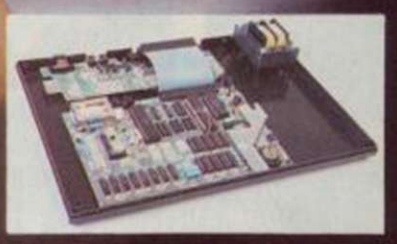
Power to your Fingertips.

All keys on the FDS keyboard contain all the Graphic Characters of the ZX Spectrum

Microdrive interface 1 easily adapted to fit inside the case



Transform your Spectrum with the FDS Keyboard and feel the newly acquired power flow from your fingertips as you enter data with lightning fast accuracy.

The Fuller FDS Keyboard has been especially designed for the professional user. This elegant, slim line, desk top system has a keyboard that inclines toward you and contains all the graphic characters of the ZX Spectrum, plus, additional function keys, shift keys on either side and a space bar. With all the entry keys double size, lightning fast accurate data entry is now made easy. Other amazing features of the FDS include:–
Gold plated key switch contacts, guaranteed for 10^6 operations. 4 cursor control keys, 2 functions for direct entry into E mode.

Based on the popular FD42 system, the Fuller FDS is simple to install; it requres no soldering or technical knowledge. For the user who is reluctant to install his computer circuit board inside the FDS, a buffer is available (£8.75 + 80p&p) which simply plugs into the expansion port and connects directly to the keyboard.

£49.95

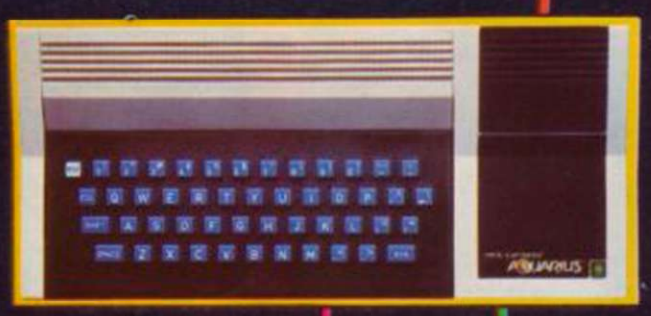
● *This is an entirely new computer system. It was designed with both eyes fixed firmly on the future. So that whatever shape the future takes, we'll be able to fit it into the system. Just as simply as the peripherals and software already available fit into the system. That way, the system will grow with you. And you'll never get left behind.*

● *Based around the Z80A microprocessor, and utilising Microsoft™ BASIC, Aquarius™ has 8K ROM and 4K RAM resident within its console. It is able to provide up to 16 colours and resolution of 320 x 192, and generates its sound directly through the television's speakers.*

● *With twin cartridge ports, the mini-expander allows simultaneous use of additional RAM and software cartridges. Twin disc game hand controls are included and the unit provides two additional sound channels. The 16K RAM cartridge plugs into either the console or the mini-expander, increasing Aquarius™'s RAM capacity to 20K.*

● *With the ability to reproduce the entire graphic and character set of Aquarius™ at 80 characters a second, the printer's 40 column output allows transcription of the complete monitor image.*



● *Using standard audio cassettes, the data recorder provides storage for programs and information, and allows the use of cassette based software. Incorporating a digital tape counter and transmission indicator, it operates sequential searching.*

● *A large number of games, designed to take advantage of Aquarius™'s sophisticated colour and sound capabilities, are available on cartridges that plug into the console either direct, or through the mini-expander. Cassette based games can be used via the data-recorder.*

● *A wide range of preprogrammed cartridges is available, including the LOGO teaching program and practical home data systems like FILEFORM™ and the spreadsheet calculator package, FINFORM.™*

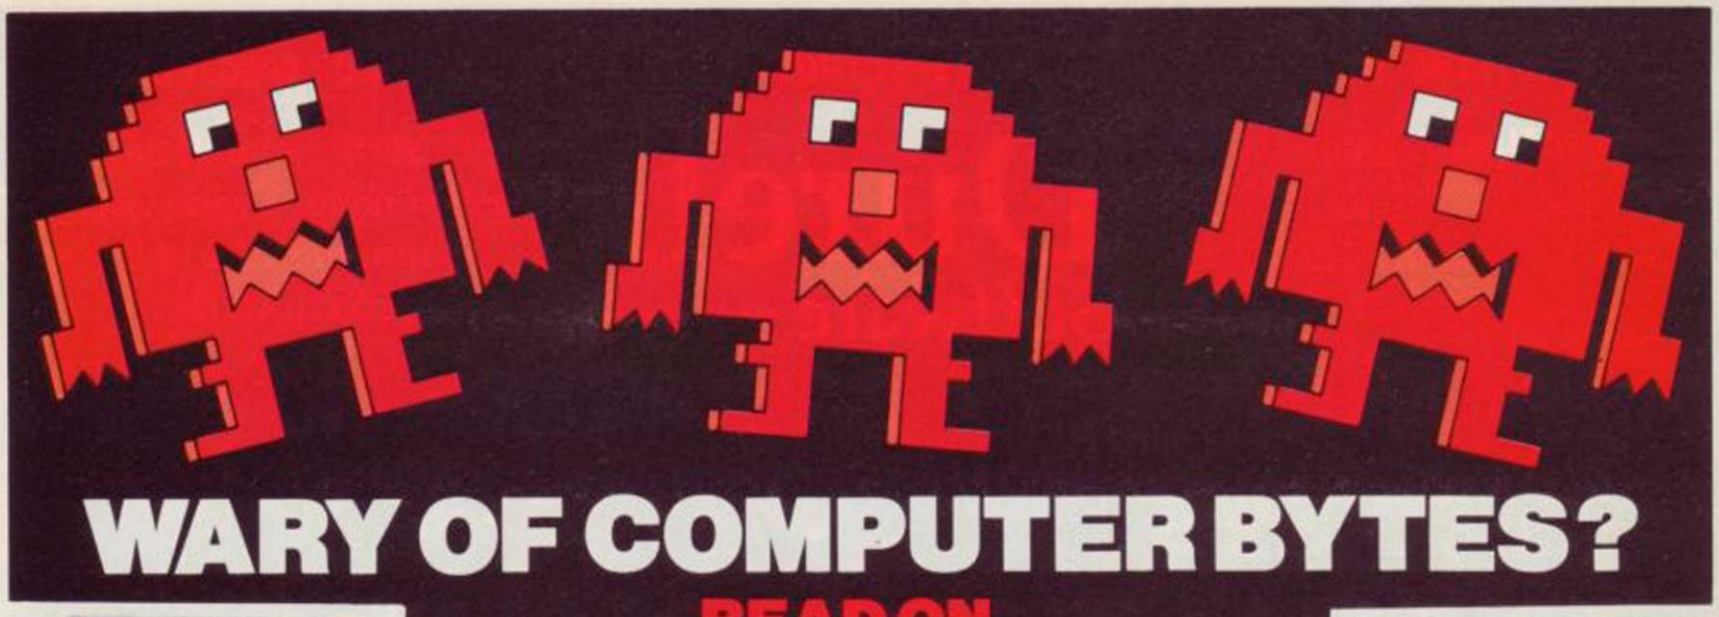
MELBOURNE HOUSE



WARY OF COMPUTER BYTES?

READ ON...

Are you missing out on all that your computer can do. These books show you how easy it is to improve your programming. Clear and concise, they will help you make the most of your computer's memory power, for more advanced uses and more exciting graphics.

YOUR FIRST BASIC PROGRAM

"How-to-Program" book for the first time computer user with colourful illustrations and simple diagrams to help you write your own first program in just one hour.

PROGRAMMING THE Z80

Instructive text, clear, precise diagrams and easy to follow examples explain everything you need to know about programming using Z80 microprocessors. Important for Sinclair, ZX81, Spectrum and TRS 80 Model users.

PROGRAMMING THE 6502

You need no prior programming knowledge to make use of this detailed book. By applying simple assembly language, you will quickly learn to make your microprocessor perform the way you want it to. Important for BBC users wishing to extend their programming capability, plus Apple, Atari and VIC 20 users.

THE VIC 20 CONNECTION

Learn the simple techniques for putting your VIC 20 computer to work controlling external devices. Control lights, electricity, burglar alarm system and other non-computer devices in your own home or office.

THE EASY GUIDE TO YOUR COMMODORE 64

A jargon-free publication that explains the practical operation of your Commodore 64 in word processing, maths, budgeting, filing and more. This friendly guide explains how to use commercially available software, as well as teaching you the basics of programming.

SYBEX

All these books are published by Sybex, renowned for their excellent, helpful publications for computer users and distributed by Computer Bookshops Limited, the UK's specialist computer book and program wholesaler. All are available from good bookshops and computer stores including Lewis's and John Menzies.
Request for catalogues: Send SAE to:- Dept. YC.12.83

Harrier Attack — ORIC-1 and SPECTRUM

Pure machine-code, super-fast, action-packed, highly addictive arcade-style game requiring great skill. The harrier takes-off from an aircraft-carrier and flies over seaborne defences to attack enemy installations on a nearby island. The harrier may fly faster, slower, higher or lower, and has bombs and rocket fire with which to protect itself and make its own attack. If it flies too high it is detected by enemy jet-fighters (which it may counter-attack) – so it needs to hug the mountainous terrain which also varies with every new game. But the island is heavily defended by anti-aircraft rockets and tanks, which again the harrier may counter-attack or try to fly through. A tally is kept of fuel, bombs and rockets, plus player score and high score. Finally the harrier must make its bomb-run over the enemy base before returning to its own carrier.

ORIC APPROVED VERSION £6.95
SPECTRUM VERSION £5.50

Starfighter — ORIC-1 (48K only)

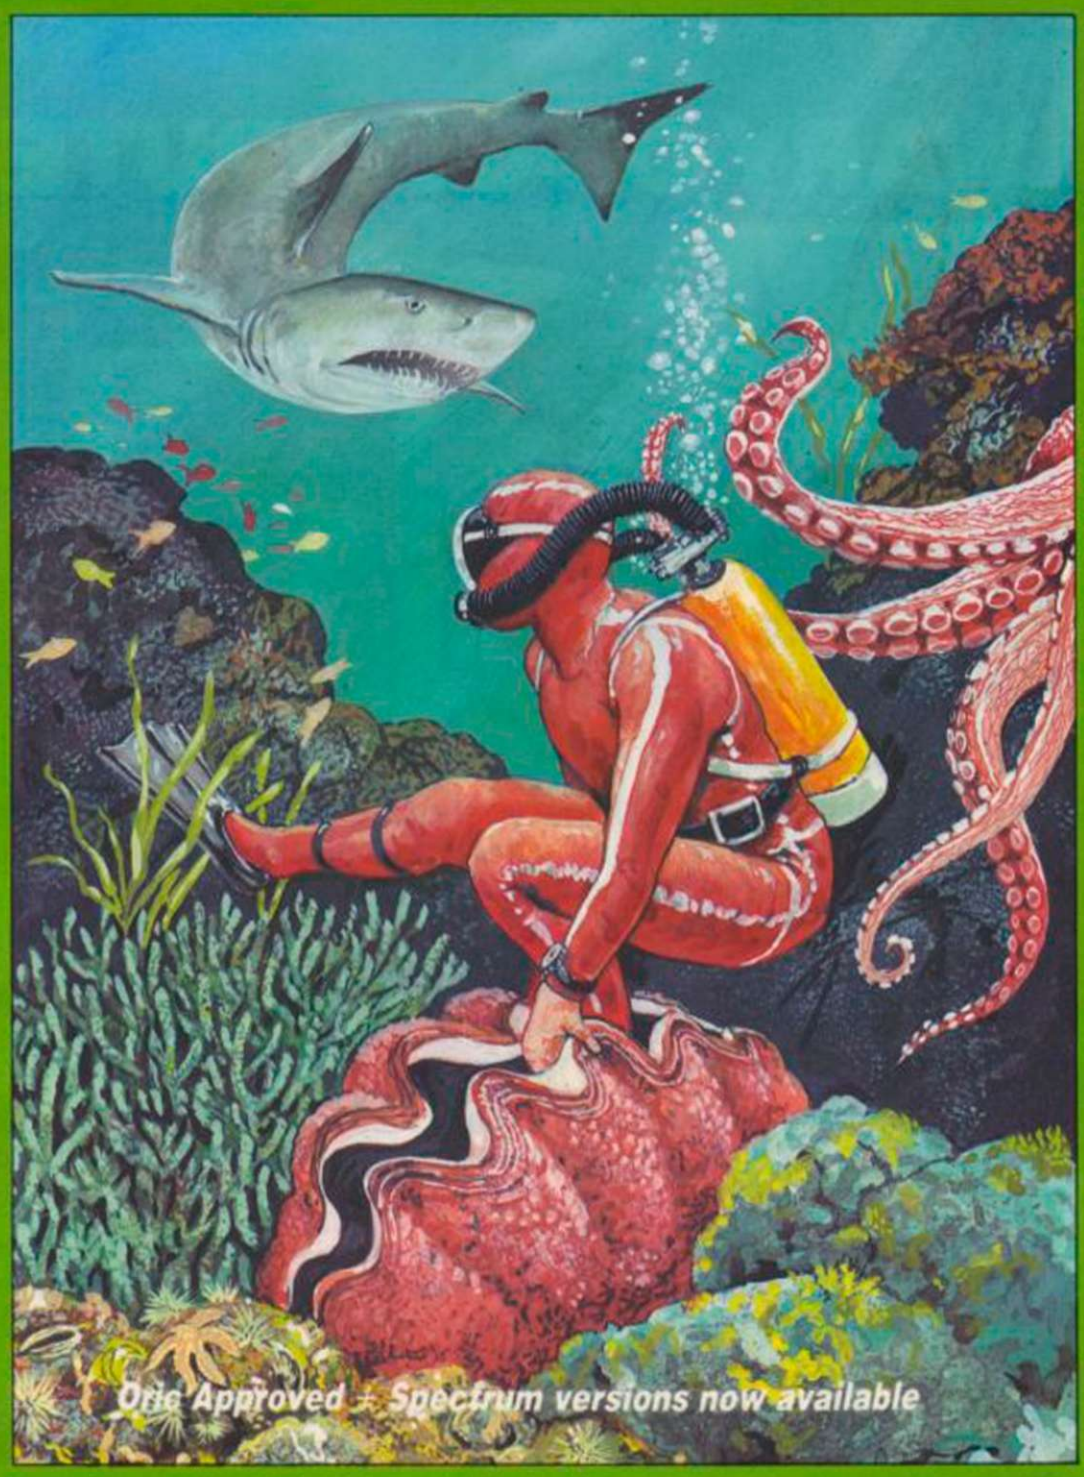
You are in command of a galactic defence vessel travelling through inter-stellar space to attack and destroy intruding aliens. At long range this is carried-out on your computer scanner which displays stars in the local quadrant, with passing planets, space stations, star-gates, and of course the aliens which may strike in packs or singly, scattering anti-matter mines around your ship. You may counter-attack the aliens with your photon torpedoes, or if you move-in close enough switch over to manual and visual control to chase the fleeing alien and blast him with your phasors. See the star-scape spin relative to your ship's manoeuvres, but watch-out for the alien mines whizzing past. You will need to conserve energy carefully to get back to the refuelling points, and then the time-gates to the other quadrants. Weapons, shield and energy status are all monitored throughout this pure machine code game, which may be set to ten levels of skill.

ORIC APPROVED VERSION £6.95

Galaxy 5 — ORIC-1

Side one of Galaxy 5 contains three pure machine code arcade type space games. They consist of 'Galaxy' which is a Galaxian-type game with 15 winged aliens swooping down to bomb a left/right controlled rocket launcher in groups of one, two or three. Next 'Astro War' is an asteroids-type game with a meteor shower moving sideways across the screen towards your ship which has right,left,up and down controls plus phasor fire to blast the meteors along with any aliens that may be hiding amongst them. The last game on this side is 'Space Chase' which gives a view from your cockpit of a fleeing alien. You fire at him and he fires back, so you must get a direct hit quickly before he destroys your force shields. Side two of this tape consists of two more arcade type space games but this time in BASIC, which are easy to learn from, being short, simple and clearly written with every line of the BASIC explained in an English REMark statement.

ORIC APPROVED VERSION £6.95



Jungle Troubles — SPECTRUM

Pure machine code with super cartoon graphics. This original and witty game is set in the depths of the African jungle. First you must direct your man to collect an axe and cross a nearby river via stepping stones that protect him from a lurking crocodile. Then he must climb a ladder to the next level, where he has to fell a number of trees in his path. As he does this a marauding ape appears from the left of the screen and steals his axe! So back to the start for another axe and more problems with the crocodile! And the ape! Having hacked a path through the forest he may climb another ladder to level three where he has to leap a pit of flames by grabbing a swinging rope. Will he ever escape back to the city? Can he jump the chasm that suddenly opens before him just as he is about to reach home? A highly amusing game with delightful graphics suited to all members of the family – but very frustrating and addictive.

SPECTRUM VERSION £5.50

Scuba Dive — ORIC-1 and SPECTRUM

Pure machine code with super cartoon graphics. You are in control of a diver who must swim down through jellyfish, sharks, barracuda and a host of other undersea nasties to locate the entrance of a submarine cave. He must then follow its twisting and branching passages which change with every new game, to locate the giant oysters with their fabulous treasures of enormous pearls. However, many of the passages lead to dead-ends, while some are filled with horrible underwater monsters, and even the giant oysters are liable to snap-shut and catch the diver just as he reaches out his hand. Each dive has to be timed carefully so that there is enough oxygen left for the return journey, which is further frustrated by the diver's boat shifting anchor and threatening to cut his head off with its propellor.

H·U·R·G

HIGH LEVEL USER FRIENDLY
REAL TIME GAMES DESIGNER

ALL YOU NEED
IS IMAGINATION

N·O·W···

THE GAMES YOU IMAGINE CAN BE THE GAMES YOU PLAY

DESIGN YOUR OWN COMPUTER GAMES IN MINUTES

Introducing the incredible H.U.R.G. — The ultimate game program for people who want to really play games. With H.U.R.G. the hardest thing you will have to do is to think of a game title, and design the characters.

HIGH LEVEL — requires no programming skills — simply design the shapes you want, and H.U.R.G. will animate them into the most amazing on-screen action you've ever seen. Choose any setting for your game, from mazes to outer space or sinister caverns — the only limit is your imagination.

USER FRIENDLY — H.U.R.G. will lead you through a series of easy to follow procedures, ending in the creation of a game that is as wild as your imagination!

REAL TIME — You can see exactly what you're creating at all times. Every game has hundreds of variations, and you can change its features at any time. You can speed up the action, change the size of the characters and even make them more vicious — it's all up to you; and you can see it all on-screen immediately.

GAMES DESIGNER — H.U.R.G. enables you to design and store the games you create on cassette and play them later using H.U.R.G. as the control program. It's the one program you will never tire of.

Now you can create all the stunning arcade effects on your Spectrum that up until now have only been available to professional software houses.

BONUS

To really fire your imagination, H.U.R.G. includes three ready-to-play fast-action arcade games, created using H.U.R.G.

Design a Game... WIN £3,000

Each month up until February 1984, three prizes will be awarded every month for the best games of the month

At the end, the best game will win a grand prize of £3,000

YOU could be a famous games designer! Every entrant has the opportunity of being published by Melbourne House and earning royalties.

Details of the competition are available with H.U.R.G.

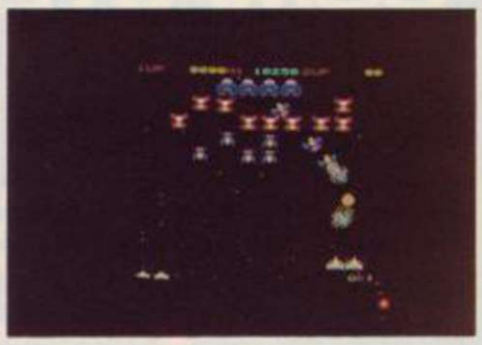
ORLANDO'S BACK!

ZALAGA

Aardvark Software, creators of the Ultimate Atom Games, bring you NOW

THE ULTIMATE BBC SPACE-GAME



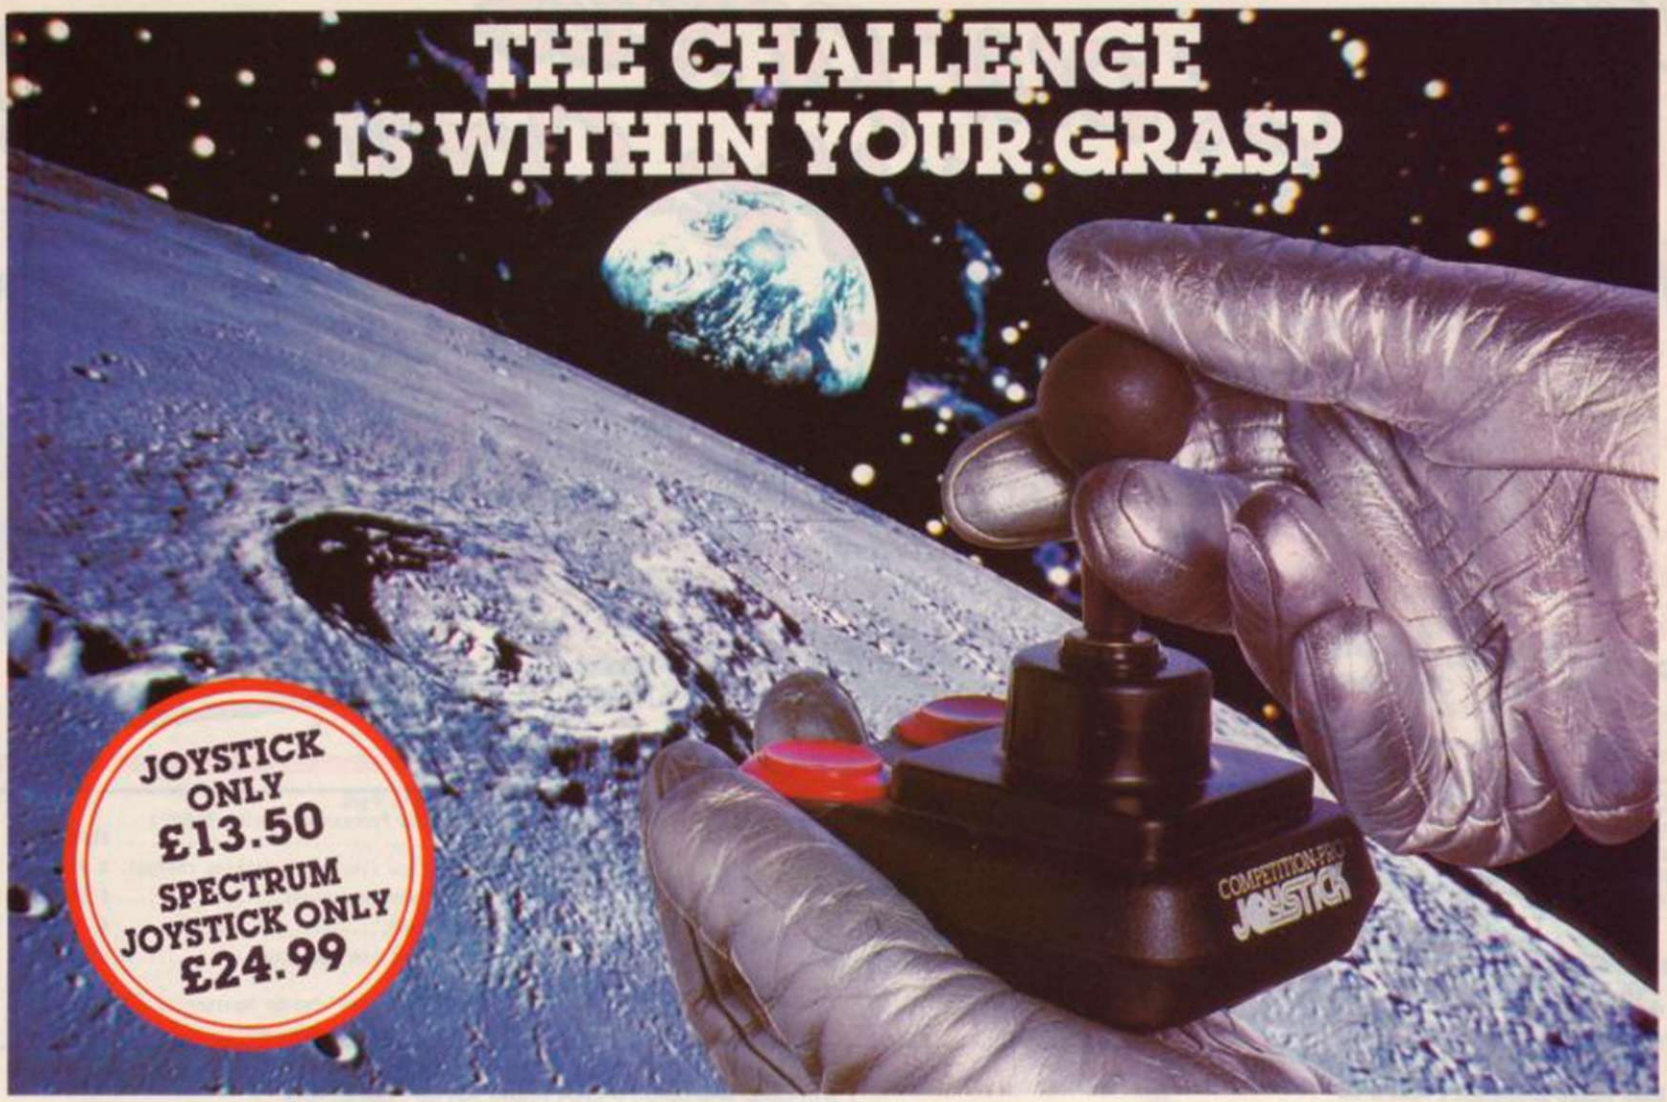
Seated at your computer, streams of multi-coloured aliens swirl past your laser-base into formation. The first squadron appears harmless, but later waves will avenge the deaths of their comrades with increasing ferocity. To combat the swooping bomb dropping meanies, you may try to link up a pair of laser-bases and **double your fire power!** Your progress through successive phases will be rewarded by challenge stages, where large bonuses may be earned. The game builds up to a dizzying crescendo of high speed motion where instant reflexes and pure technique are your only hope of survival. . .

One or two player game • Keyboard or joystick • Sound on or off • Escape facility • Works on all OS's and Tubes • Ten name Hi-score table • Mode 2 full colour graphics • Continuous rolling twinkling stars • Multiple missiles • Full screen action • Attractively packaged in a collectable library case • High quality cassette • Full instructions • For BBC model B or A + 32K •

Send cheques/P.O.s for £6.90 to

Aardvark Software,
100 Ardleigh Green Road,
HORNCHURCH, Essex.

FRAK coming soon . . .



With the vast range of games now available for home computers each holds a different challenge. Now the Kempston Competition-Pro Joystick will come to your aid and improve your playing capabilities. Your movements will become quicker, your finger poised over the fire button at the ready, your scores will be out of this world. Playng will be easier.

If you're serious about the challenge your computer presents then you shouldn't be without the Kempston Competition-Pro Joystick.

Compatible with any Atari 400/800, Vic-20, Commodore 64.

Now Available separately the Kempston Joystick Interface for the ZX Spectrum **ONLY £14.99**

Allows the use of any Atari/Commodore type Joystick with the popular ZX Spectrum computer. A must for any Spectrum owner who wants the power of a joystick added to the power of the Spectrum. Simply plugs into the edge connector at the back of the Spectrum. No modifications necessary. Only £14.99

Exclusive offer to mail order customers – a *FREE* Conversion Tape of your choice (value £4.95) if you order either the Spectrum Joystick or Spectrum Interface. Limited offer so order NOW!

If you have the hardware you'll want the software . . .

TWO GREAT TITLES from COMPUTASOLVE

MRS MOPP

Spectrum 48K

(Author: Tina Billett)

A new and totally original game for the 48K ZX Spectrum.
The Mopp household is yet again in a turmoil. Mrs. Mopp springs into action attempting to clear the debris which her untidy family have left in their wake. The frantic pace of the clear up takes its toll on Mrs. Mopp who occasionally succumbs to the pressure and resorts to the bottle for a little refreshment, with hilarious results!
The game features 8 directional movement from keyboard or Kempston joystick, increasing difficulty, great graphics, sound effects and high score feature, for just

£5·95 inc. VAT

BIRDIE BARRAGE

BBC Model B

(Author: Eddie Miles)

Welcome to Acorn Park Golf Club, a picturesque course set in the heart of Cambridgeshire. For those straying from the fairways there is plenty of difficult rough, numerous water hazards and crater-like bunkers to make life difficult.
We have a number of vacancies for new members (including ladies, juniors and senior citizens), at the very special price of £7·95 inc. VAT.
Please do not delay, membership is limited to BBC model "B" users only. Electron owners will be welcome in the very near future.
Superb graphics, excellent sound effects and a truly addictive quality make this a must for anybody hooked on the great and ancient game of golf.

£7·95 inc. VAT

After you've owned a micro for a while you begin to wish you'd invested in a bigger memory.

But when you want to upgrade you are suddenly faced with a number of problems the brochures didn't mention.

If you have one of the cheaper models you probably won't be able to upgrade at all.

And with some of the more sophisticated machines you will be shocked by the expense of the hardware required to upgrade.

Not with the Lynx.

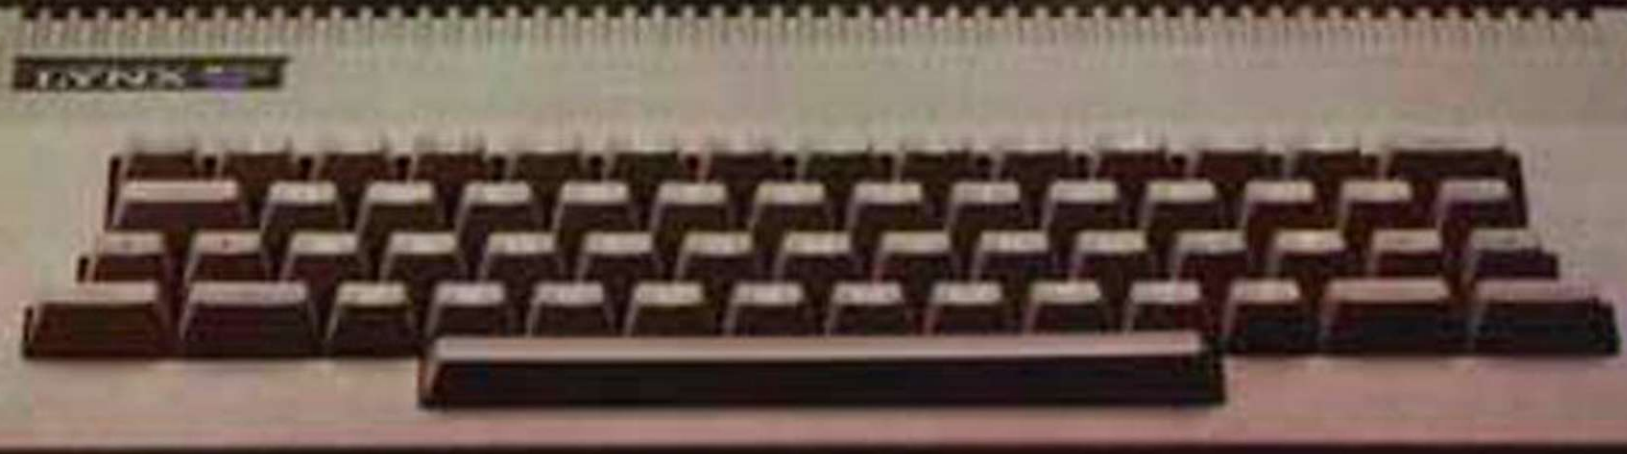
Probably the single most important aspect of Camputers' Lynx is its expandability.

From the start the Lynx was designed to be upgraded – internally. From 48K, to 96K, to a

48K Lynx £225 96K £299 128K £445

Lynx micro-computers, peripherals and software are available from selected nationwide dealer network. For your nearest stockist, telephone 0223-315063.

YOU WON'T HAVE TO BIN A LYNX.



fully professional 128K - and beyond.

The 128K Lynx (available December) with additional Disk Drives opens the door to the exciting world of CP/M* where you will find a vast range of ready made small business programs from famous software houses.

You can buy into the Lynx system at a level that suits you and your family and be assured that when you want to move on to bigger things you won't be left with a bin full of electronic junk.

CAMPUTERS LYNX

EXPANDABLE NOT EXPENDABLE

SIMPLY CREATIVE

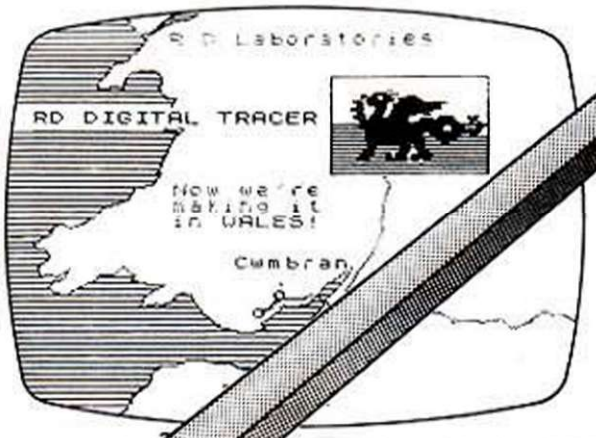
Now available for **the BBC Micro** and ZX Spectrum

The RD Digital TRACER

High resolution colour graphics facilities on micros provide outstanding opportunities for creative presentation of complex or irregular images. Maps, technical drawings, illustrations, even personalities can be accurately reproduced. But full use of these facilities is inhibited by the tedious and time-consuming plotting of individual coordinates.

The RD Digital Tracer solves the problem of tedious plotting by providing genuinely instant transfer from original drawings to display file. But a Tracer does more than that . . .

Unretouched hard copy from ZX printer



The **RD Digital Tracer** is supplied with connector/interface, software cassette, and full instructions on use. It is available from Spectrum and other computer shops, or direct from RD Laboratories.

● Instant Full Colour Image Transfer and Scaling

Faithful reproduction of any shape is produced on display file immediately, simply by moving the head of the Tracer over the original outline. Fast PAPER and INK colour change is provided. The software also includes an infinitely variable scaling routine.

● Special Constructions

Circles, lines, angles and rectangles can be rapidly sampled and applied, based on any two Tracer input points. So windows and wheels, bar charts and frames, and so on, can be added to outlines within seconds.

● Colour Fill and Texture

Fast colour fill, or a choice of colour hatching can be added within outlined areas on the display.

● Text and Symbol Positioning

Text, or user-defined symbols, can be positioned as desired, under the control of the tracing head.

● Display, Print, SAVE and Re-trace

Besides colour display, drawings may be printed, and SAVED on cassette (or video recorder). And with the re-trace routine amazing animated presentations can be made.

BBC Micro Tracer

This Tracer version operates with the BBC Micro Model B, or ADC converted Model A computers. It is suitable for all colour modes including Teletext, and a "colour palette", which can be modified whilst the program is running, relieves the user of complex GCOL colour specification. Accuracy to 1% is achieved over a full A3 tracing area. Software is provided for both serial and parallel printers. The price of **£69.95** includes P&P and VAT.

ZX Spectrum Tracer

The ZX Spectrum Tracer (compatible with ZX81) operates with all ZX Spectrum variants and accessories, including Sinclair printer and Microdrive. Original areas up to A4 may be traced with a typical accuracy greater than 2%. The price of **£55.50** includes P&P and VAT.

Please send me ___ Tracer(s) for BBC Micro at **£69.95** each, total £_____

___ Tracer(s) for ZX Spectrum at **£55.50** each, total £_____

Can you combat the ALIEN ATTACK?

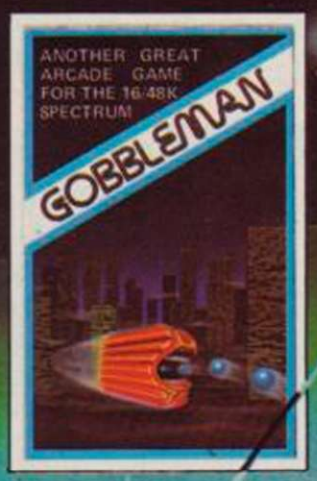
arc Computing Ltd

NEW

48K SPECTRUM ONLY £4.95
Your spaceship must survive by destroying asteroids that plummet through space at you. Your aim is to shatter and re-shatter the cosmic debris, while destroying the nasty little flying saucers.

NEW

48K SPECTRUM ONLY £5.95
The real 3-D tank battle game. You must travel across the flat plains and battle with the enemy 3-D tanks, supertanks and flying saucers. Includes a battle readout and radar above your sights. Full 3-D explosion, burning, firing and moving effects.



16K/48K ZX/Spectrum £4.95
16K ZX81 £3.95
You are doomed to roam through the haunted maze until you are eaten alive by the ravenous ghost. Similar to the classic arcade game.

16K/48K Spectrum £4.95
16K ZX81 £3.95
This full colour, hi-resolution (Spec) machine code program is as exciting as the classic arcade game. There are nine levels of play in which you must defend yourself against invisible Galaxian fighters which swoop down to bomb you.

16K/48K Spectrum £4.95
Fight the invaders as they drop, line by line, to eventually land and destroy you. This classic arcade game includes nine levels and four variations of play.

16K/48K Spectrum £4.95
16K ZX81 £3.95
In this high speed arcade game, you must blast through the alien's force field avoiding the fighters and bombers to destroy the Mother ship.

All the these games are written in machine code – to bring you the best quality in SINCLAIR GAMES

The All-Purpose System

The MTX Series is a new departure in micro-computer technology. Whether your needs as a user are for personal programming, games playing, scientific or process control, educational or business use the MTX Series is already capable or very easily adaptable to almost every application. Glance through the standard features below - you'll see what we mean.

Hardware - 32K RAM on the MTX500, 64K on the MTX512.

The MTX500 has 32K of user RAM as standard (64K on the 512), expandable to 512K plus 16K of video RAM, controlled by a separate Video Processor. Sixteen colours, 40 column text, 256 x 192 high resolution graphics with all sixteen colours available, and 32 easily moveable user defined graphics characters (Sprites) combine to make effective screen displays quick and simple to achieve. Standard outputs are centronics printer port, two joystick ports, an uncommitted I/O port, 2400 Baud Cassette port, separate TV and Video Monitor ports, 4 channel sound with hifi output plus a dedicated cartridge port. Other standard features include the Z80A processor running at 4MHz, real time clock, full moving key keyboard with 79 keys including eight 2-function keys and separate numeric pad.

Software

The MTX's 24K ROM contains several languages and routines which enable the novice or the experienced programmer to make full use of the machine. Standard languages are MTX BASIC, MTX LOGO commands, NODDY. ROM routines include an ASSSEMBLER/DISASSEMBLER with screen display of the Z80 CPU registers, memory and program,which can be manipulated from the keyboard. Machine code programs can be stepped through one instruction at a time, and easily called from within BASIC programs. A further feature is the Virtual Screen facility which enables the programmer to split the screen into a maximum of eight sections to work independently whilst maintaining all full screen facilities. Pascal is available as an add-on ROM pack.

The Disc Based Computers from Memotech

Designed to use the full power of the MTX computers the FDX and HDX make perfect business systems at prices which make perfect business sense. Both feature the CP/M operating system, giving instant access to a wide range of proven application software. Available in October these feature:

- *Full Western Digital floppy disc controller set with SASI interface for 4 drives, CP/M types 0-13.*
- *minimal latency, very high data transfer rates*
- *optional Colour 80 Column Board*
- *optional Silicon Discs (1/4 Mb) which dramatically increase the efficiency of 8 bit software to those of 16/32 bit software; increases life and reliability of mechanical drive*
- *permits single disc CP/M operation*

FDX– Floppy Disc System

1 or 2 5 1/4" Qume drives 500K unformatted, 347K formatted,

HDX– Hard Disc System

5 1/4" Qume drive, 500K unformatted, 347K formatted,
5 1/4" Winchester which may be 5, 10, or 20 Mb

All Memotech products are designed and manufactured in Oxfordshire, England

MEMOTECH

The Complete Range

Fifteen months ago Memotech developed the first 64K Memopak, designed to maximise the capabilities of the Sinclair ZX81. Since then, using the ZX81 as a starting point, we've gone on to produce a comprehensive range of Memopaks, adding 16K and 32K memory expansions, utilities packages comprising a Word Processor, Z80 Assembler and Spreadsheet Analysis, plus Communication Interfaces, High Resolution Graphics and a professional quality Keyboard.

To complete our range of ZX81 add-ons, we are now introducing the MEMOPAK RS232 Serial Interface.

RS232 Interface

The RS232 is an all-purpose interface which allows the ZX81 not only to output to suitable serial printers, but can link up with numerous types of peripheral or even other processors. The Interface has two main modes of operation: BASIC mode allows you to use the range of functions supplied in the RS232 EPROM within an ordinary BASIC program, and TERMINAL mode allows you to use your ZX81 as a terminal to another processor. The EPROM functions offered permit the user to send, receive and convert bytes between ZX81 code and ASCII, as well as check the status of numerous control flags. Received or transmitted data can appear simultaneously on the screen, and received data may be printed simultaneously.

£39.95 inc. VAT

Memopak Centronics I/F

The BASIC commands LPRINT, LLIST and COPY are used to print on any CENTRONICS type printer. All ASCII characters are generated and translation takes place automatically within the pack. Reverse capitals give lower case. Additional facilities allow high resolution printing.

£24.95 inc. VAT

Memopak HRG

This pack breaks down the constraints imposed by operating at the ZX81 character level and allows high definition displays to be generated. All 248 × 192 individual pixels can be controlled using simple commands, and the built in software enables the user to work interactively at the dot, line, character, block and page levels.

£29.95 inc. VAT

Memocalc

The screen display behaves as a 'window' on a large sheet of paper on which a table of numbers is laid out. The maximum size of the table is determined by the memory capacity, and with a Memopak 64K a table of up to 7000 numbers with up to 250 rows or 99 columns can be specified.

£29.90 inc. VAT

Memotext

Text is first arranged in 32 character lines for the screen with comprehensive editing facilities. On output the user simply chooses the line length required for printing and the system does the rest. Used with the Memopak Centronics Interface, the Word Processor makes available printout with 80 character lines, upper and lower case and single and double size characters.

£29.90 inc. VAT

Memopak Memory Extensions

For those just setting out on the road to real computing, these packs transform the ZX81 from a toy to a powerful computer. Data storage, extended programming and complex displays all become feasible. Further details available on request.

16K Memopak £24.95 32K Memopak £34.95
64K Memopak £49.95 Prices inclusive of VAT

MEMOPAKS ARE AVAILABLE AT MAIN BRANCHES OF WH SMITH and JOHN MENZIES

Z80 Assembler

The Assembler allows you first to code and edit a source program in the Z80 language, and then assemble it into machine code. You can now write flexible and economic programs. The Editor mode allows you to code directly in the right format, manipulate individual lines and control the exact placing of source and machine code. Routines may be merged or listed (even to a commercial printer using our Centronics Interface). The assembler mode handles all standard Z80 mnemonics, numbers in hex or decimal, comments and user-selected labels.

£29.90 inc. VAT

Memotech Keyboard

The Memotech plug-in Keyboard plus buffer pack takes the effort out of data entry for ZX81 users. The Keyboard has a light professional touch and is housed in an elegant aluminium case. The simple plug-in system means that you are not obliged to open up your ZX81, use a soldering iron or invalidate your ZX81 warranty.

Keyboard Buffer Pak

The Buffer Pak performs a "housekeeping" function for the Keyboard, interfacing directly with the port of your ZX81.

£34.95 inc. VAT

All Prices are inclusive of VAT, postage and packing.

To Order: Send your Name, Address, Memopaks required, plus a Cheque/Postal Order/Access/Barclaycard number (please state which) to: Memotech Limited, Station Lane Industrial Estate, Witney, Oxon. OX8 6BX. Telephone Witney 2977

We want you to be completely satisfied with your Memopak – all our products carry a 14 day money back guarantee.

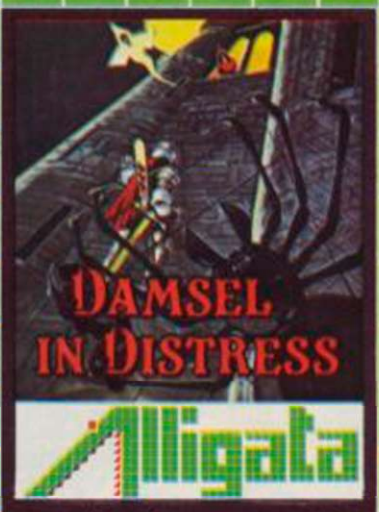
SOFTWARE WITH BITE FOR commodore 64

Brands **£7.95**

Test your skill on the Grand Prix circuit. Accelerating to breathless speeds can you overtake? Can you face the danger of night driving as the roads get narrower?

Balloon Rescue **£7.95**

Fuel level low. Time running out. Collect fresh fuel to stay in the air or plunge to certain agonising death.



Damsel in Distress **£7.95**

Menacing man-eating spiders and dreadful apparitions. Weakened by poison you must climb the battlements and rescue the princess who holds your antidote.

Bat Attack **£7.95**

Killer bats in the first wave, a myriad of asteroid discs in the second. The third wave?! ... the faster your reflexes, the more deadly the challenge.

Aztec Tomb Adventure **£7.95**

Find the lost tomb deep in the Amazon rain forest. Experience heart-stopping drama ... will you ever get there? Every location has a full graphic picture.

Squash a Frog **£7.95**

Cross a motorway of fast moving traffic. Traverse the rapids teeming with frog eating snakes, alligators and submerging turtles. Can you get him home? Or is it just Ugh! Splatt!

Outstanding quality, unbelievable value

Alligata presents an exciting range of games and utilities applying full machine code and high resolution, full colour graphics to the limit. Whether it's hours of absorbing fun or the hours saved through data manipulation – Alligata has been designed for you.

Take a giant step closer to reality with New Generation Software. The 3D Graphics of New Generation programs bring the screen alive and makes other games look as flat as snakes and ladders.

Spectrum owners will find that seeing is believing when they open the door on 'THE CORRIDORS OF GENON', the latest creation from New Generation. You will be saving the Universe from the evil that now controls all things. But beware – the sound of footsteps approaching could be Bogul!

Hurtle into a void leaving a trail for your unseen pursuers in 'KNOT IN 3D'. Weave your way through up to five trails but be careful, you could get knotted! Or travel through the depths of a moving tunnel full of bats, rats, spiders and toads in '3D TUNNEL', with a special surprise in the 48K version.

Stamina is the vital ingredient of 'ESCAPE', as you'll be venturing into the maze pursued by walking and flying dinosaurs.

ZX81 owners must be prepared for the shock of coming face to face with the T Rex that leaps out from '3D MONSTER MAZE'. '3D DEFENDER' takes you out of this world and plunges you into space in a fast moving game to defend your home planet against alien spacecraft in a blitz of explosions, plasma blasts and photon beams.

All these exciting 3D games have been designed by Malcolm Evans, the 3D expert. They'll have you leaping out of your seat because you don't just play New Generation games, you live them

Corridors of Genon for 48K Spectrum £5.95
Knot in 3D for 48K Spectrum £5.95

CONTRAST...

For Sinclair owners who take a different view

Disillusioned by programs that don't live up to their glossy expectations? Come to the Software House that puts sheer program quality first. Imaginative ideas, professional programming and brilliant screen presentation make CONTRAST tapes stand head and shoulders above the rest. No other range has been more thoroughly user-evaluated before release. Whatever your interests, CONTRAST **guarantees** your complete satisfaction....

PONTOON (48K Spectrum £4.95; 16K ZX81 £3.95): your micro is the dealer in this game also known as vingt-et-un, and you gamble on whether your cards or the dealer's total nearer 21. Screen instructions and running total of winnings. Plus (Spectrum version only) **Mastermind** and **Cribbage** (the old pub game).

PAWN-CHESS (48K Spectrum, £4.95): a thoroughly enjoyable new game based on chess played only with pawns; will beat any chess program on pawn play at this speed. Very clear instructions make it ideal for non-chess players, too; at top level it'll have you threatening violence against author Freddy Vachha BSc!

TAPE HEADER READER (16/48K Spectrum, £5.95): invaluable for indexing, bytes calculation or just probing the mysteries of an unknown BASIC or m/c program. It "reads" the first few seconds of each tape to reveal on screen or printer the name, start line, bytes used, tape running time, code block names, start address and length. Will print out a long tape of programs on its own for indexing, without stopping.

HOME-CALC (48K Spectrum, £5.95): ultimate development of the spreadsheet system for home or small business budgeting; the 12-month period can be "rolled on" indefinitely and so never gets out of date. Up to 30 expenditure accounts; multi-month entries; subtotalling for any number of months; flexible analysis. Easy to use, accountant-approved.

TEXT (16K ZX81, £5.95): little doubt that this is the most powerful and versatile m/c word processor for ZX81. Amazing capacity of up to 350 lines (11,200 characters!), with 30 (yes, 30) menu-operated routines for editing, searching, reformatting etc.

MICROPEN (16/48K Spectrum, £5.95): at last a really versatile word processor also available to the 16K user. On-screen editing, automatic paragraph re-formatting, rapid scrolling, search/edit a given word, optional justification, instantly recalled "help" page without loss of text.

UTILITY (16K ZX81, £5.95): put your ZX81 to real practical use for indexing, numerical sorting etc., plus functions like count remaining bytes, auto-save your programs, read code and text-edit: easy-to-use subroutines to save and use within and call up from your own programs.

3-D DEFENDA (48K Spectrum, £4.95): dare to play this stunning arcade game, for if you should lose you'll be assaulted by the most mind-blowing effect ever to emanate from a Spectrum! Hear the aliens chuckle with glee as they dodge your laser weapons! Plus **Rally-Z**, which puts you at the wheel of a rally car on a terrifying course—a real test of lightning reactions.

HANOI KING (16/48K Spectrum, £4.94): cleverest development yet of this addictive problem of logic in stacking different sized rings, in order, on three pillars. Start at the very easiest level (7 moves to win), and progress to the 711-move game (your friendly Spectrum might even advise you). Now plus **Little Boxes**, also 100% m/c—try to beat the computer at the old pencil-and-paper game of making boxes out of a grid of dots, enlivened with music!

COMPOSER (48K Spectrum, £5.95): compose tunes and save them in your own programs—Colonel Bogey for the loser, perhaps? Up to 199-note compositions, each note selected is heard but not recorded until confirmed or edited—virtually a musical word-processor, and great fun to use.

LAZATRON (48K Spectrum, £4.95): refreshingly different **two-player** arcade games with vibrant colour and sound. Annihilate your opponent with the deadly trail of your lite bike before he does the same to you! Plus **Mazechase**, a great 2-player action game in which one of you finds out what it's like to be the ghost for a change!

ADVENTURE ISLAND (48K Spectrum, £4.95): an entertaining simulation game—roam the island to rescue a maiden from evil Dr Marko, assailed by deadly creatures; plus **Munchman**—and excellent version—and **Outline**, a brilliant arcade chase game.

SIEGE OF FORT APACHE (16K ZX81, £3.95): defend your garrison against fierce Red Indians; an unusual simulation where your decisions mean life or death!

WORLD OF ILLUSIONS (16K ZX81, £3.95): science-fiction fantasy adventure: beat the evil Dr Brock and his terrifying 3-D monster bats, helped by your faithful robot!

"Many thanks for your very prompt and courteous reply...It makes a pleasant change to find a company that treats the customer as something other than a necessary evil"—A.W.T., Burton-on-Trent.

The best accessory for your micro

ONLY
£34.49
(P+P £2.50)

The Rotronics Portable Case

Here is the ideal portable work station for home, school or work. Specially made for most home microcomputers, it contains your ZX81, Spectrum, Oric or VIC 20 within a smart executive style case with removable lid for convenience in use.

The individually tailored foam insert securely protects your micro, printer, cassette recorder, tapes and manuals during transit. A scalpel is provided to modify the insert for expansion units and an alternative insert can be supplied if you change your hardware in the future.

All components remain fully operational within the case via interconnections routed between the double layers of foam, so there are no unsightly leads.

This is the first case designed for easy use with each component positioned for convenient operation. The overall dimensions are 138mm x 700mm x 363mm.

Value Corner

ZX Panda

The best 16K RAM for the ZX81.

CHOOSING A HOME MICRO

WARNING

Choosing a home micro can be a daunting task to the newcomer, and with an ever increasing number of micros emerging on the market, even up-grading, say, from a ZX81 can be a risky and expensive exercise if the wrong decision is made. It is important to look at the real facts and specifications, and check exactly what you get for your money before choosing your micro-computer system.

THE PITFALLS

"DON'T LET THE ADD ONS ADD UP"

A number of large companies are offering packages that seem to be good value and low cost.
These offers usually have a hidden sting inasmuch as the essential accessories such as connection leads, peripherals and software often carry very high cost premiums.
e.g. software for low cost hardware usually costs between £29 and £49 for a ROM cartridge!!

CHECK THE QUALITY OF THE PRODUCT.

Raw materials are now an area where corners can be cut, and shoddy workmanship during 'building' can effect the 'up-time' of your unit.
Areas to watch out for are unreliable edge connectors, corrosion and poor quality P.C.B.s. Low quality components and bad design will seriously effect the reliability of the end product, and can lead to false economy.

DON'T BUY A GAMES MACHINE

Unless you want just games and nothing else! With a games computer you are limited.
Some computers, however, have the advantage of both games facility plus the whole world of computing to explore, as your interest and skills develop. A real computer system will allow you to expand your knowledge of the Hi-Technology world, and help earn its keep with its added uses in the field of education, communication and home business use.

SOFTWARE

Make sure the system you choose has a growing library of support software, to enable you to realize the full potential of your machine.

KEY POINTS TO LOOK FOR

● High Resolution Colour

In general most home computers have a poor graphics resolution (or detail). Check on the vertical and horizontal resolution in graphic mode and multiply the two numbers together. If the result is less than 35,000, then the graphics can hardly be considered high resolution.
Without high resolution graphics displays such as those used in games tend to be "Chunky" in appearance.

● High Quality Sound

Some computers claim to provide a sound channel when in reality all that can be found inside the computer is a small buzzer controlled by electronic pulses. At the very least a sound facility should provide more than one channel and a raise channel as well (for gun shot effects in games for example). The best systems also provide envelope control of the sound channels to produce very sophisticated effects; very important for generating music. Also look for the ability to connect to external amplifiers.

● Keyboard

For accurate entry of programs and data into a computer it is important that the keyboard has a good tactile feel in operation. Coupled with acoustic feedback the user is fully aware when the computer has accepted his/her actions. Also of importance in a keyboard is layout. A standard computer keyboard layout will familiarise the user with the vast majority of computers used in the world of business and professional applications; very important if the purpose of purchasing a computer is educational.

● RAM

One of the most important features of a computer is the amount of RAM, or memory, included. In general the more powerful and exciting a computer program is the more RAM it requires. But take care, all computers are advertised quoting the total RAM used in the system. Computers use up a great deal of their own RAM for storing essential data and particularly in supporting the graphics display and the CPU.
If it is less than 32K think again, is it enough?

● Computer Language

It is too dificult to program a computer in its own binary language so high level languages are used, the most popular being BASIC. However, there are a number of BASICs, some being very different from the rest.
A de facto standard in the computer industry is Microsoft BASIC.
Learn this one and you will be able to program in the majority of computer BASICs; such an important point if a home computer is to be used to educate your children to face the technology of the future.

● Expansion

As your interest and knowledge of computing grows, you will need a computer system that will grow with you; able to accommodate Printers, Disk-drives, Joysticks, Communications Modem, and Colour Monitor, as well as produce HI-FI sound effects.

Choosing the right system carefully will save you from throwing your money away. Check full specification, plus peripherals and software prices, before you buy. Preferably choose a Real computer system that can expand to meet your needs.

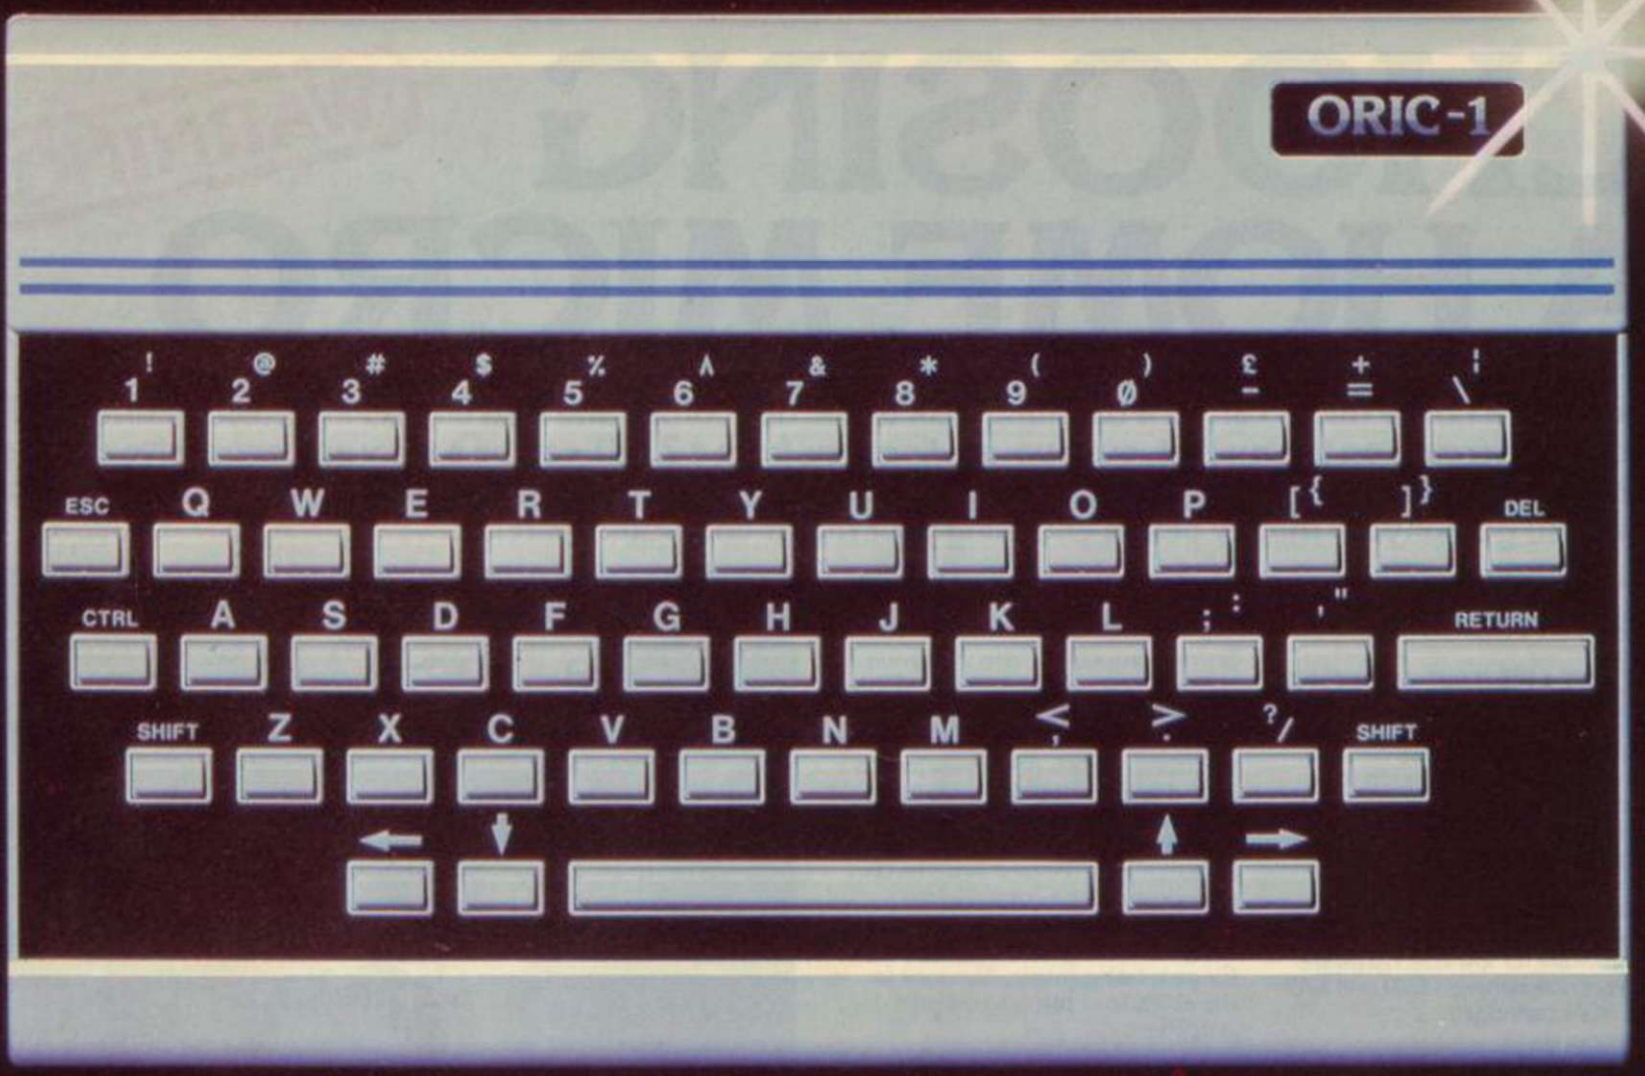
● Software

The computer you choose should have a growing selection of utility software to make the most of its capability.
Remember, computing is here to stay. You can't learn to compute on a toy, or a device which does not behave like a real computer.
In short, look out for a computer which offers all the points above, and you will be sure of getting the best value for money.

To find out which company offers you the right choice, with:-

- Good value, high specification, quality micros.
- A quality, 4 colour, plain paper printer/plotter.
- Communications Modem.
- Micro Disk Drives.
- Comprehensive and growing range of software

TURNOVER...



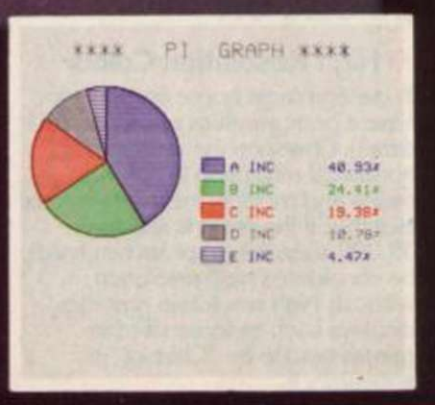
The Growing System

ORIC 3" MICRO FLOPPY DISK DRIVE

Coming soon the incredible new 3" Oric Micro Drives. Small size. Compact. High precision disks with storage capabilities from 100K Bytes to in excess of 1 Megabyte unformatted. With their own built-in power supply, these easy to use units will add big system capability to your home micro.

ORIC MCP 40 COLOUR PRINTER/PLOTTER

The Oric Colour Printer is quality engineered to provide 4 colour hard copy on plain paper, with superb graphics and text capability, printing either 40 columns or 80 columns. It prints in red, green, black and blue, onto a 4½" width standard paper roll. With a print speed of 12 characters a second, the MCP 40 comes with its own power supply and all necessary leads to connect straight into your Oric or to any standard Centronics interface.



This superb printer represents excellent value at just **£169.95 including VAT.**

ORIC PRODUCTS INTERNATIONAL LTD. COWORTH PARK, LONDON ROAD, ASCOT, BERKS.

The right choice for real computing

ORIC-1

Before making your final choice, check any other home micro in the same price bracket, against the incredible specification of the ORIC-1.

Quality of build and materials		Real computer keyboard layout and moving keys

BOOK A TEST FIGHT TODAY!

You'll have a REAL fight on your hands when you tackle our new games.

They're all-action games designed to push your senses to new limits. Take "Brain Damage"; trapped in your computer's micro-circuits you'll need all your resources to defeat the CPU's electron panzers ... and if they don't get you, the Rogue Programs will.

When you get your breath back you'll be running for your life again in "Exterminator". Transported into the future you'll find that earth is a very different place. Robots rule the world and the human race is almost extinct, there's only one family left. You have to save them ... but hurry you don't have much time.

Sitting in defense command, your hands poised at the controls, you scan the sky for activity knowing that it will shortly erupt. "Armageddon" is about to begin ... only YOU can save the last six cities.

If you're still in control of your senses you can try your hand at rescuing the miners trapped on Titan ... easy you think! Ride your ship through the mini-meteor storm and pick up the men. But you didn't reckon on the corporation spaceships making this "Mission Impossible".

Book your test flight today. Buy any of Silversoft's new games and find out if you're really in control.

BETA BASIC

ENHANCED BASIC FOR THE ZX SPECTRUM 16/48K

26 NEW KEYWORDS — 10 NEW FUNCTIONS — MANY EXTRA FEATURES

Keywords include:

ALTER	– allows extensive manipulation of the attributes file.
AUTO	– for automatic entry of line numbers.
CLOCK	– controls a digital clock with alarm and alarm-initiated GOSUB facility.
DELETE	– any block of lines.
DO	– DO. . .LOOP structure, with WHILE, UNTIL and EXIT IF.
DPOKE	– double POKE.
EDIT	– a specified line number.
ELSE	– used with IF. . .THEN.
GET	– waits for keyboard entry; doesn't use ENTER.
KEYWORDS	– shifts between new keywords and normal graphics mode.
ON	– GOSUB or GO TO a line number from a list of line numbers.
ON ERROR	– allows trapping of most reports; has available ERROR, LINE and STAT variables.
POP	– removes data from BASIC's stack.
PROC	– named procedures, with DEF PROC and END PROC.
RENUM	– renumber part or whole program with specified start line and increment. Handles GO TO, GOSUB, ON, etc.
ROLL	– pixel movement of part or whole screen in any direction, with wrap-round.
SCROLL	– as ROLL, but without wrap-round.
SORT	– sorts part or all of string or numeric arrays according to specified substring or column. SORT INVERSE sorts in reverse order. One hundred strings can be sorted in about one-fifth of a second!
TRACE	– allows display of line and statement numbers as a program is running. Display of selected variables, single stepping, and reduced speed are also possible.
USING	– used with PRINT; formats numbers.

Functions provide:

Conversion between decimal and hexadecimal — conversion between integers and two-character strings (allows "integer arrays") — formatting of numbers — INSTRING and STRING$ equivalents — amount of free memory — double PEEK — current time.

Features include:

Single-entry keywords (in graphics mode) with syntax check on entry — seven new error messages — compatibility with Spectrum BASIC — program occupies just 5.6K — cursor can move in all directions in a line being edited — flashing current line pointer — BREAK gets you out of even machine code lock-ups — PLOT lets you plot string anywhere on the screen — PLOT and DRAW scale and offset values can be set using XRG, YRG, XOS and YOS — 16K and 48K versions on same tape — comprehensive manual.

Only £11.00 inclusive!

Please send me ..... copies of **Beta BASIC.**

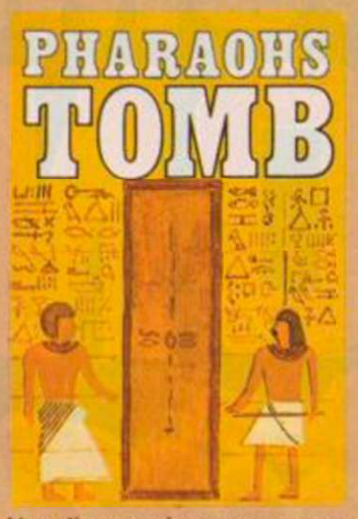
48K ZX SPECTRUM ADVENTURES – PICTURE GRAPHICS AND COLOUR

You are a Knight of Camelot, searching for Merlin's lost treasure. On your way you will discover the Witches' Tower, rescue a Princess held by the wicked Wizard of Trill. **£5.95**

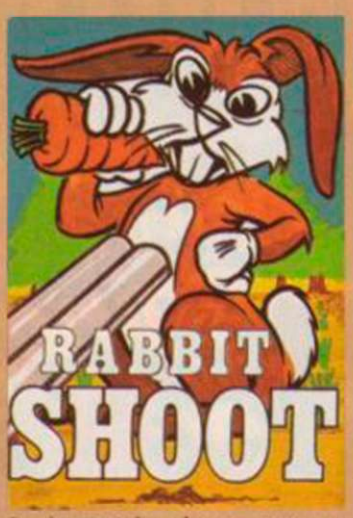


You discover the entrance to an ancient pyramid blocked by a rock. Once inside, you discover fire rooms, ice rooms and other traps set by the builders to protect the Pharaoh. **£4.95**

A rope above a rock fissure is the only way into this Magic Mountain, or is it? Legends tell of vast stores of treasure but also of poisonous spiders, lizards and magic at work. **£4.95**

An old deserted mining town holds the clues to the location of a lost gold mine. Once in the mine, your problems are not over – the roof creaks alarmingly and might cave in. **£4.95**

16K ZX SPECTRUM GAMES AND PUZZLES



It is nearly dawn, you are poaching rabbits in a field of carrots. See how many you can bag undetected by the game keeper. Highly original arcade style game. **£4.95**

The cassette of the book. Contains six games (including Castle Walls, Great Fire of London, Reversi) machine code assembler, disassembler. **£5.95**
Book available separately **£6.50**

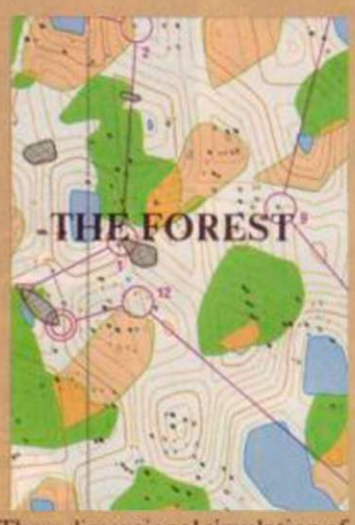
The traditional game with superb screen presentation. Score points by making the two ends add to a multiple of five or three. The first one to reach 72 points wins. **£4.95**

The computer breaks and shuffles a two by two coloured square, whilst you watch the moves it makes. You must then unscramble it to reassemble the original squares. Machine coded. **£4.95**

48K ZX SPECTRUM GAMES

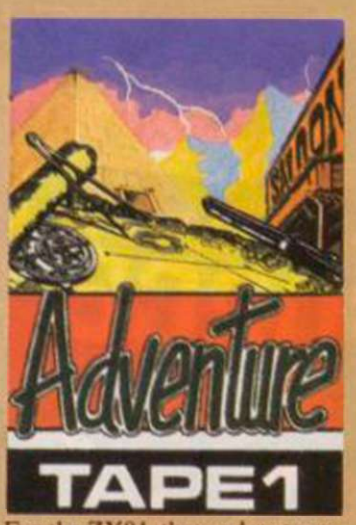
To find the Black Planet you need 7 pieces of the key each hidden on different planets, and needing different puzzles to be solved. On the way, you fight off the pirates who get steadily more desperate. **£5.95**

You are Spectrasses, battling in the arena with Gorgon, whose stare can turn you to stone. To recover the lost chalice, you must also win a swordfight with Grang, inside his cave. **£4.95**



Three dimensional simulation of the sport of orienteering. Display is continuously updated as you run. Ideal for map reading practice. Instructions, colour map and cassette. **£9.95**

16K ZX81



For the ZX81, three adventures – black and white text. Magic Mountain, Pharaoh's Tomb, Greedy Gulch, as described above. Superb value for money. **£5.00**

JUST AROUND THE CORNER, A NEW

BLACK CRYSTAL

The Classic, six program adventure game for the 48K Spectrum and 16K ZX-81 computers. No software collection is complete without it.

"BLACK CRYSTAL is an excellent graphics adventure and a well thought out package" (Sinclair User, April '83).

"BLACK CRYSTAL has impressed me by its sheer quantity and generally high quality of presentation. I am afraid I have become an addict" (Home Computing Weekly, April '83).

SPECTRUM 48K 180K of program in six parts . . . only £7.50
ZX-81 16K over 100K of program in seven parts . . . only £7.50

Why pay more for less of an adventure?

ZX-81 COMPENDIUM

Alien Intruder, Wumpus Adventure, Numerology, Hangman, Hieroglyphics, Movie Mogul.

The ideal software package for all 16K ZX-81 owners. Six major programmes on two cassettes for only £6.50.

"Alien Intruder/Hieroglyphics — Both programs make good use of graphics and words to make a very entertaining package." (Sinclair User, Aug '82)

"Alien/Hieroglyphics/Wumpus/Movie — A varied mix from Carnell, all featuring imaginative responses and graphics and all of them good games for all ages (Hieroglyphics is particularly good for children)." (Popular Computing Weekly, Aug '82)

THE ADVENTURES OF ST. BERNARD

An exciting, fast moving, machine code, arcade game where you guide your intrepid St. Bernard through the perils of the icy wastelands to rescue his Mistress from the clutches of the abominable snowman.

STARFORCE ONE

Take on the robot guardians of the central computer in a superbly stylised three dimensional battle game.

(100% MACHINE CODE ARCADE ACTION)

THE CRYPT
written by Stephen Renton

Prepare yourself for the many challenges that shall confront you when you dare to enter "THE CRYPT".

You will battle with giant scorpions, Hell spawn, Craners, Pos-Negs and if you are unlucky enough — the Dark Cyclops in this arcade style adventure.

Available now for the 48K Spectrum @ £4.95

THE DEVIL RIDES IN

I uttered the last incantations as the clock struck thirteen. All fell silent except for a faint rustling in the corner. From out of the shadows they came, all Hell's fury against me but I was not defenceless until the Angel Of Death, astride a winged horse, joined the battle. Avoiding his bolts of hell fire, I took careful aim. My chances were slim, but if my luck held . . .

(Fast moving, machine code, all action, Arcade game)

RANGE FROM CARNELL SOFTWARE

"THE WRATH OF MAGRA"

The first born has been destroyed. The Black Crystal of Beroth has been banished. The alliance of Evil has been defeated by the armies of Lord Fendal. So ends the Third Age. Now we invite you to write your name in the history of the Fourth Age of the Third Continent.

You will meet friends and enemies, old and new, in the long awaited sequel to Volcanic Dungeon. Using high resolution graphics and combining the best qualities of "Black Crystal" and "Volcanic Dungeon", we will allow you to become part of this tale of revenge.

"The Wrath Of Magra" comes as three, 48K programs on cassette, boxed with instruction manual and book detailing the history of the Third Continent and the many spells you will be using throughout the game.

NOTE: "The Wrath Of Magra" is a complete adventure. You need not buy "Volcanic Dungeon" or "Black Crystal" to play it.

Available through most good computer stores or direct from:
Carnell Software Ltd, North Weylands Industrial Estate, Molesey Road, Hersham, Surrey KT12 3PL.
Dealers: Contact us for your nearest wholesaler.

CARNELL SOFTWARE LTD

Now a business spreadsheet for home computers

Clear and easy to use

2000 cells (600 in 16K VIC 20)

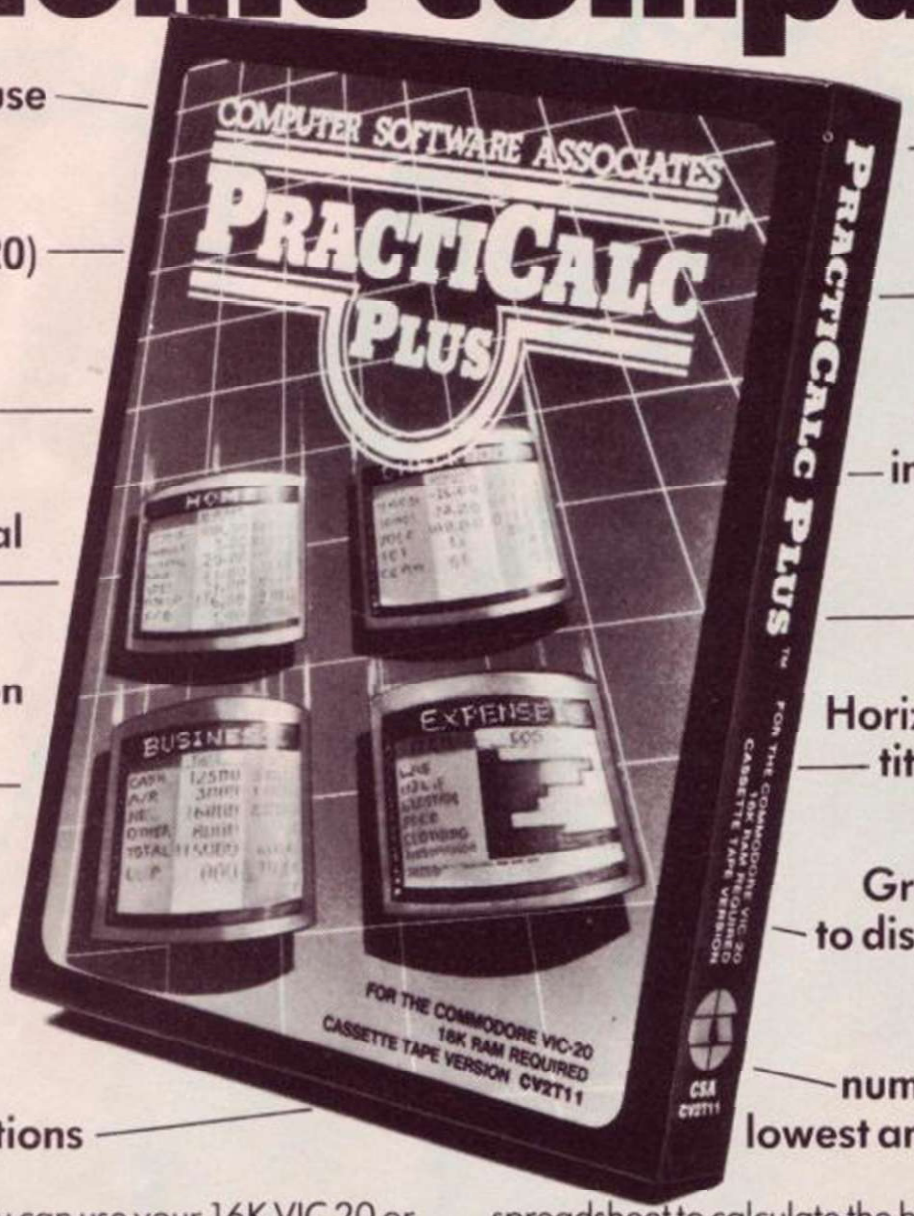
Global column width adjustment

Variable individual column width

Insertion or deletion of rows and columns

Save, load and merge capabilities.

22 mathematical and statistical functions



Formatting by cell or whole sheet

Fast alpha-numeric search

Comprehensive instruction manual

Replication across columns and rows

Horizontal and vertical titles can be fixed

Graphics facility to display your results

Powerful alpha-numeric sort, highest to lowest and lowest to highest

With Practicalc you can use your 16K VIC 20 or Commodore 64 to carry out sales forecasts, modelling, cash flow projections and much more.

Compare the professional features and power of Practicalc Plus or Practicalc 64 with other spreadsheets.

Compare the price. You won't need a spreadsheet to calculate the best buy.

FAST CODES AVAILABLE:
    D  H      FOR    WXYZ
```

A uniquely sophisticated EPROM PROGRAMMER as used by various labs. incl. Sinclair Research.

BLOPROM-81
Eprom programmer for the 2516, 27XX single supply families. Yes, even the 27128 from Intel. Check, Read, Program + Verify all or part of Eprom.
So immensely user friendly you'll hardly need the manual. Designed for the beginner but includes a single key entry route for the professional. Supplied as firmware, the m/c driver routine alone is worth more than the price of BLOPROM-81. No Personality Cards or other additions, just a ZX81. Several inbuilt safety features. On-board Vpp generation. 28 pin ZIF socket. Cabled connector and extender plug. ABS case.
Note: Can provide up to 36 inputs or 40 outputs as an I/O **£79.95**

MEMIC-81.2 Faster than a Floppy. Easier than an EPROM.
A 4K CMOS memory and Lithium battery unit. Saves programmes upto 10 years without external power. Plug it into the ZX81 and flick a switch and your program is ready for retrieval. A simple PRINT USR . . . entry loads your program into RAM. Resides in 8-12K but can be moved to 12-16K. Comprehensive notes + example **£29.95**

CRAMIC 81 Banish the Whir, Click and Try again of ZX81 Systems.
16K CMOS RAM and Lithium battery in cabled ABS case, with expansion adaptor. Powers off the ZX81 when running. Resides in 16-32K. Can be used like an ordinary 16K but can also retain program upto 10 years. Ingenious hardware/software allows swopping of RAMs from program **£79.95**

PIO-SP An 8 + 8 line parallel Input/Output card which lets the Spectrum communicate with external systems. Connections on 16 pin sockets. Mating plugs supplied **£18.50**

PIO-81 As PIO-SP but for the ZX81 **£13.00**

DREAM-81 Full 64K Rampack with link options to disable 0-8-16K. Plus a 28 pin EPROM socket for 2716/2732/2764 and even the latest 27128 from Intel. Fast/slow Eprom option. Professionally built and tested. In an ABS case with an LED indicator **£49.95**

PROMER-81 At last! A low cost reliable programmer for 2516/32, 2716/32 EPROMS. This is the solution to using EPROMs instead of tape. Requires 4×PP3 batteries for a regulated 25 volts. Remarkably prices at **£19.95**

ROM-81 Provides two 24 pin sockets for up to 8K of EPROM memory in the 8-16K area. Eproms are permanent memory which require programmers (see above) to write them. Can use 2516/32 or 2716/32 **£14.95**

AMSOFT

MACHINE CODE, ASSEMBLER, AND BULK DATA HANDLING SYSTEMS FOR THE SERIOUS SINCLAIR USER

NO EXTRA HARDWARE NEEDED

AM-ZXFILE allows you to create data files of unlimited size on cassettes from your own basic programmes. You can read and write files in the same program, and use tapes just as if you had a big machine. Ideal for club records & small businesses.

ZX81 and **Spectrum** versions £4.00

AM-ZXSP will load a saved ZX81 basic program directly into the Spectrum, leaving it ready to run, save or edit., No more hours of retyping those old ZX81 programs. Just load ZXSP into the Spectrum, and it does the work.

Spectrum version £6.50

AM-ZXMON is a superb machine code monitor and operating system which allows you to create, edit, run, and checkpoint machine code routines, and to save them on tape. You can build libraries of your own routines on tape, and merge them into new programmes. AM-ZXMON is the operating system for the other programs below.

ZX81 version £6.00 **Spectrum** version £7.00

On the **ZX81** you can create assembly language source tapes and assemble them into machine code using **AM-ZXEDIT** and **AMAZON**, running under the control of AM-ZXMON. AMAZON can assemble programs of up to 6K in size at one time, and accepts user symbols, hex., decimal, and string constants, and the full Zilog mnemonics.

Combined pack, two tapes, of AM-ZXEDIT and AMAZON, for ZX81 £9.00

On the Spectrum **AM-EDIZON** is a combined editor/assembler with all the facilities you need to assemble and save machine code programs fast. It can be used to create, edit, and assemble up to 1500 lines of assembly language text at one time & produce up to 4½ K of machine code. The code and source program can be saved on tape for later use or for merging with other programs. Output tapes can be added to BASIC programs by the LOAD CODE command. Code can be assembled to run at any address, at a speed of 800 lines/minute.

Spectrum version £10.00

AM-ZXCONV will load tapes created by the ZX81 versions of AM-ZXMON or AMAZON, and load them into the Spectrum; the easy way to transfer machine code from one to the other.

Spectrum version £4.50.

All prices include VAT, post & packing. We provide a telephone advisory service from 9.00-6.00 Mon-Fri and 9.00 until 12.00 Sat.

HISOFT PASCAL

Hisoft Pascal 4 is a very fast and powerful microcomputer Pascal compiler that is the result of three years development work. The compiler conforms very closely to Stanard Pascal as described in the Pascal User Manual and Report (Jensen/Wirth) and produces Z80 object code directly in one pass; no P-codes to be subsequently interpreted. HP4 is also small (not more than 19K including runtime routines and tables) but this does not imply any lack of power – the compiler and runtimes were written in Z80 assembler language and a great deal of time was spent on increasing the speed and decreasing the size of the critical routines.

We have designed HP4 to be simple to use, very fast, close to Standard Pascal (with extensions) and inexpensive. Thus we see it as being an attractive package in the educational field (from teaching yourself at home to teaching students at university level) and in the area of system development. To this end Hisoft Pascal 4 is available in both cassette tape and diskette versions for a wide range of Z80 machines. The tape and disk versions are virtually identical except that the cassette version does not support FILEs, instead the user is given the ability to store and retrieve any variable to and from tape. The tape version (HP4T) is organised in a manner that makes it very easy to adapt to most Z80 systems and we supply details on how to do this in our HP4T Alteration Guide available separately.

In addition to our Pascal we also have available DEVPAC – a Z80 development package which includes a fast and powerful conditional assembler, a labelling disassembler, a debugger with single-step facility (even in ROM) and (on diskette) an extended screen editor. DEVPAC is a highly professional suite of programs which will greatly facilitate your software development.

*****STOP PRESS*****

Hisoft Pascal now available for the SHARP MZ700!
Pascal for the ZX SPECTRUM now includes FREE Logo-style Turtle Graphics!
DEVPAC 3 is now available with *all* the features you will ever need from an assembler/disassembler – see review in Which Micro (September).

NEW

FOUR STAR

16/48K SPECTRUM

includes games to suit all ages, from 5 to 105

INVASION: Our version of the Classic Arcade Game, surely one of the best around. Includes Full Colour High Res. Graphics, Sound and it's incredibly fast at the end.

KAMIKAZE: If you like Scramble, you'll love this. 16 levels (long ones at that), of tortuously twisting caverns, Missiles, Starfishes (which move in between games, so it's never the same next time around), Bases, Fuel Dumps (watch you don't run out of fuel!), and two speeds (difficult and impossible). Definitely a game for those amongst you with a suicidal tendency, when playing games, because you can score even when you crash! (If you can make it past level 8, write and let us know, 'cause that's as far as we've managed!).

MINEFIELD: A totally new game, in which you have to lay mines in a forest. Sounds simple doesn't it? But, once you start, you can't stop and there lies the rub (or to be more exact the explosion!). Guaranteed to get your fingers in a twist!

UFO: Dodge the Asteroids, blast the Alien Craft and work off your aggressive instincts on the keyboard. Gets progressively more difficult the longer you last!

All of these for only **£4.95**

GAMESTAPE 1

1K ZX81

10 Games incl. ASTEROIDS, UFO, CODE, BOMBER, GUILLOTINE, KALIEDESCOPE, etc.
PROBABLY THE BEST VALUE 1K TAPE AVAILABLE.
We've done it 1K games which some of our competitors require 16k to do!

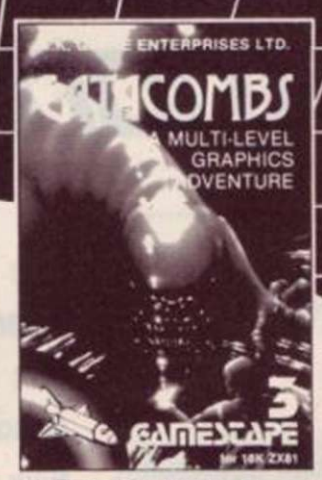
only **£3.95**

GAMESTAPE 2

16K ZX81

***STARFIGHTER** Superb machine code Space Battle, set against a background of twinkling stars, with stunning explosions – if you can hit the enemy!
PYRAMID Can you move the Pyramid? Make a mistake and it will collapse! A thinkers game.
ARTIST The ultimate Graphic Designers aid. 8 Directions, 10 Memories, SAVE, COPY, RUBOUT, CLS, etc.

only **£3.95**



GAMESTAPE 3

16K ZX81

***CATACOMBS** A Multi-Level Graphics Adventure. Each level can contain up to 9 Rooms, 8 Passages, 7 Monsters, Food, Gold, Traps, Phantoms, an Exit (to the next level), and there's an infinite number of levels!
NOTE ... This is NOT one of the necessarily limited text Adventures as sold elsewhere.

"An excellent addictive game which will keep you amused for hours" ... COMPUTERS & VIDEO GAMES.

only **£4.95**

3D VORTEX

16/48K SPECTRUM

After a successful warp transfer, you drop your craft below light speed, only to discover you are caught in the irresistible gravity well of a giant Neutron Star. You are dragged past the Event Horizon, and then the fun really begins! Gravitic Tidal pressures have created a mind boggling Vortex through the tortured supra-matter of the Neutron Star. And guess who's caught in it? The onboard Navigational Computer copes for a while, but what mere machine can withstand the awesome forces inherent in such an anomaly. Soon the Nav. Com. will cease functioning, and then (of course), it's all down to you.
Are you capable of "seat of the pants" flying, it won't be easy? Not only does the Vortex twist and turn, like some demented worm, but your Tau-Sigma Shield will only withstand 10 contacts with the boundary layer. And, as if that wasn't enough, you have to dodge, or laser, the Octoplasms, Droids and Sirius Class Battlestars. Best of luck? You'll need it!

Features ...
Stunning 3D Graphics.
Full Sound Effects.
High Speed Machine Code Animation.
Full Instructions.
Choose your own Control Keys.
Compatible with most Joysticks.

only **£5.95**

If you prefer to see before buying, our range of Gamestapes are stocked by W.H. Smith, John Menzies and good computer stores Nationwide.

More than fun and games!

FIRST STEPS with the Mr. Men

by Primer Educational Software

The ever-popular Mr. Men help prepare young children for reading with four simple and absorbing games designed to exercise essential skills as well as entertain.

An easy-to-use, colour-coded key guide is included with an illustrated introductory book, featuring the Mr. Men. For ages 4 to 8 years. Available now on cassette for the BBC B (Spectrum 48K cassette version coming shortly). **£8.95**

QUICK THINKING!

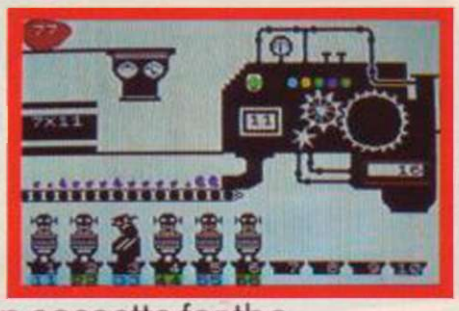
by Widgit Software

Two mind-stretching, space-age games to test mental arithmetic and nimble fingers.

In **Sum Vaders** alien robots invade the earth. Only quick thinking and fast reactions can prevent them. Several levels of difficulty and a two-player game with a handicap option make Sum Vaders equally testing for all family members, from 8 years to adult.

Robot Tables challenges the young player to make a series of perfect robots.

Knowing your multiplication tables is the key to controlling the robot-making machine. With a learning mode and a testing mode, Robot Tables is a fun way for early learners, and more advanced children, to master an important and often neglected skill.



Available now on cassette for the Spectrum 48K and Commodore 64 (BBC B and Electron versions coming shortly). **£6.95**

CÆSAR THE CAT

by Andromeda Software

Meet Caesar, a cheeky young cat on duty in a well-stocked larder. He's kept busy chasing a gang of hungry mice eating the family's food. Playing against the clock, you guide Caesar along crowded shelves to pounce on the mice.

A fast, colourful, all-action, arcade-style game with catchy music and a best-score record. Challenging for high-scoring arcade addicts as well as great fun to play for the novice.

Available on cassette for the Commodore 64 **£8.95**

Prices include VAT and post and packaging.
MIRRORSOFT programs will be available soon from selected branches of W.H. Smith and Boots, and other leading software stockists.
Trade enquiries welcome: phone 01-822 3580.

THE NEW FDS for the SPECTRUM, ZX81, LAZER 200, JUPITER ACE,

This elegant desk top system, designed for the professional user. In its slimline case, the superior keyboard contains all the graphic characters for the above computers. With the additional function keys and SPACE-BAR, speedy and accurate data entry is made simple. The Fuller FDS is easy to install, based on the very popular FD42 system, it requires no soldering or technical knowledge. For the user who is reluctant to install his computer circuit board inside the FDS a buffer is available (at extra cost) which simply plugs onto the expansion port and connects directly to the keyboard. The FDS is now Microdrive compatible.

The Natural Extension.

Firmly established in the development of computer hardware, the acknowledged leaders in their field, the vast range of Fuller experience is available to you through their comprehensive selection of accessories. This ever expanding range make Fuller the natural extension for your Computer.

THE FD42 KEYBOARD

For the ZX81 or Spectrum. The FD42 has long been a best seller, the unit, housed in an attractive A.B.S. plastic case, transforms the Sinclair computer into a useful professional unit, providing graphic characters for the ZX81 or Spectrum. The full travel keyswitches have gold plated contacts and are guaranteed for 10^6 operations. Installation is simplicity itself, and no soldering or technical knowledge is required.

THE MASTER UNIT – The Ultimate Games Unit

The Master Unit provides all the requirements for the serious games enthusiast, containing not only the FULLER BOX, but also the FULLER ORATOR, all contained within the standard case.

The Speech Unit and sound synthesiser combines to provide exciting voice and sound for your games.

The other features include, Cassette interface, a variable audio output which may be connected directly to a HI-FI system. The MASTER UNIT provides endless scope in applications, and it allows asccess to the SPECTRUM for other periferal, via its duplicate user port, i.e. printerface. The MASTER UNIT is complete with full documentation and demo tape which includes the type of speech and sound you can achieve.

£54.95
(inc. VAT)
+ 80p P&P

The Fuller Box – The Sound System for the Spectrum

The FULLER BOX added to the ZX Spectrum, improves the sound quality enormously. The built-in audio amplifier working well with all SPECTRUM programs.

The FULLER BOX allows you to program your own music, explosions, zaps, chimes, whistles and an infinite range of other sounds. Based around the popular G1-AY-3-8912 sound chip. It gives you complete control over 3 channels of tone and/or white noise, plus an overall envelope control.

Also provided with a joystick port, the unit gives instant command over all your own games programs. The port is compatible with all the commercially available joysticks eg. Atari/Commodore.

The FULLER BOX is complete with full documentation and a demo tape which includes the type of sounds you can achieve. It also allows you to program your own sounds. Fitting neatly onto the back of the SPECTRUM, the FULLER BOX still allows access for other peripherals, including the new SPECTRUM Micro Drives, via its duplicate user port.

Certain Imagine, Arctic and A&F games now with speech and sound effects.

£29.95
(inc. VAT) + 80p P&P

Upgrades for the Fuller Box and Orator

The systems can be expanded to MASTER UNIT specifications including the full range of controls. The upgrades must be fitted by us, at FULLER MICRO's.

PRICES (inc. V.A.T.) ORATOR to MASTER UNIT **£14.95** FULLER BOX to MASTER UNIT **£24.95**

The Fuller Orator – Speech for the Spectrum

A smash hit at a number of recent Micro Fairs, the FULLER ORATOR uses an allophone system. Based on the G1-SP0256 AL voice synthesiser chip. Directly accessable in BASIC, it is able to say anything you command using the keyboard or a games program. It comes in the standard case complete with its own audio amplifier, it allows access to the SPECTRUM for other peripherals via its duplicate user port. Full documentation and demo tape included.

PRICE (inc. V.A.T.) **£39.95** plus 80p p&p.

16K to 48K Memory Expansion Pack for the Spectrum

For the 16K SPECTRUM owner – upgrade your machine to 48K of RAM with the FULLER upgrade kit. Complete with full assembly instructions. (Model 2 or 3 only).

PRICE (inc. V.A.T.) **£24.95** plus 80p p&p.

Ram Adaptor Boards for the ZX81

Allows you to fit your Ram Pack inside the FD42 system. Accepts most commercial Ram Packs.

PRICE (inc. V.A.T.) **£9.35** & 80p p&p.

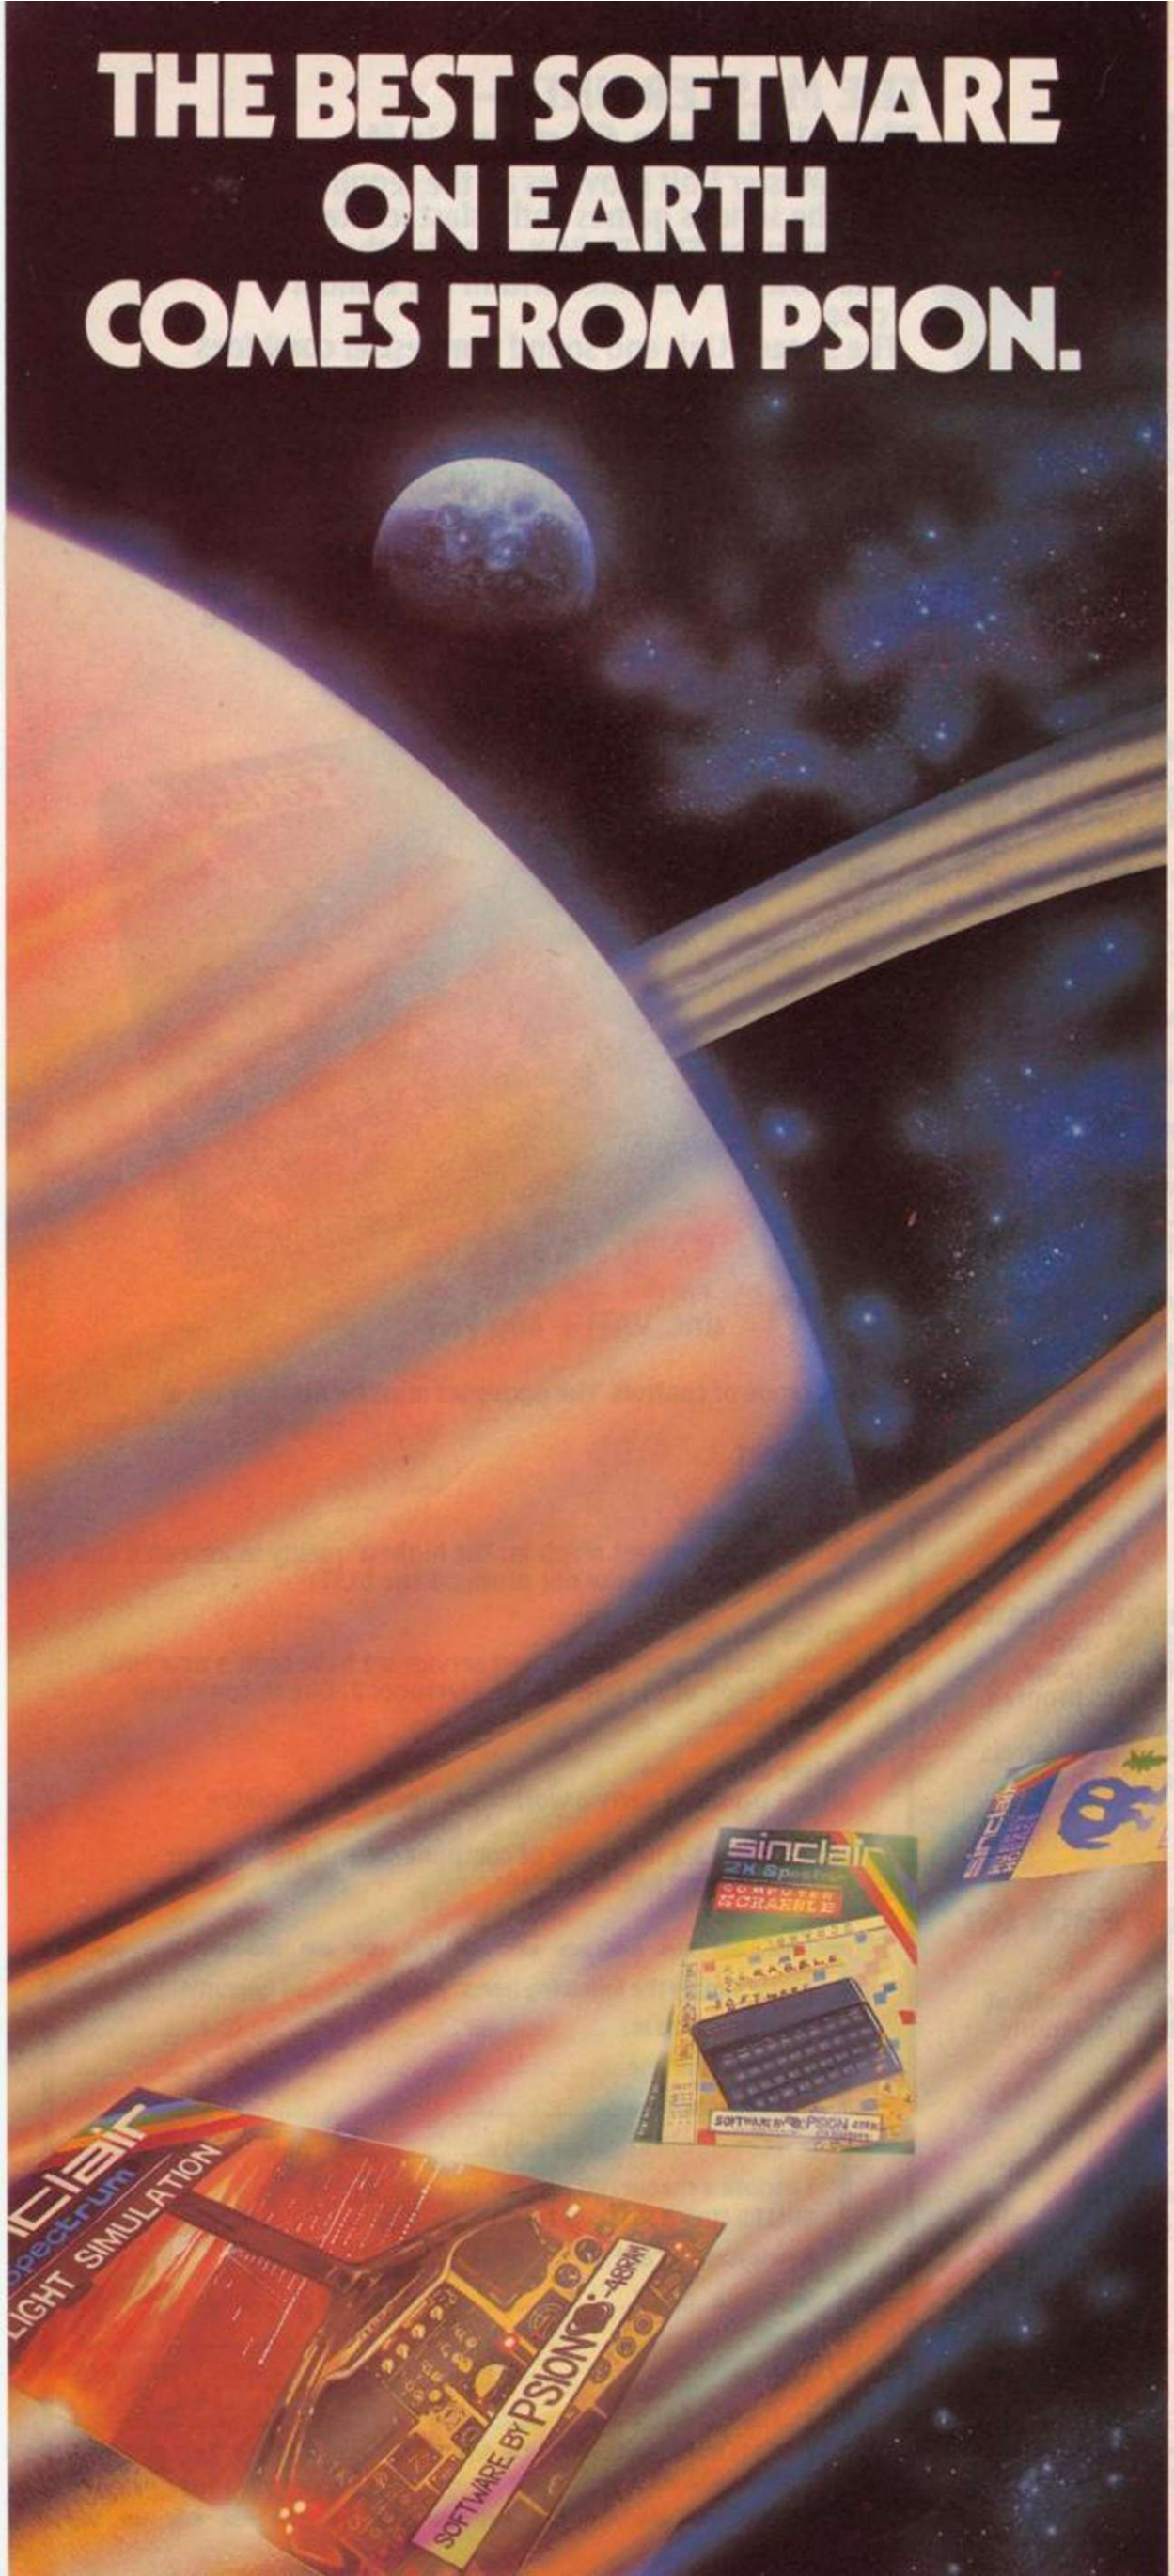
THE BEST SOFTWARE ON EARTH COMES FROM PSION.



Psion is the source for the best software programs you'll ever see on a Sinclair Spectrum.

Our range runs rings round other software. In short, it's faster, livelier and more colourful.

Why?

Ideas. At Psion, they're bigger and more ambitious.

We combined a 12,000-word dictionary with complex logic – and the result is spectacular: our Computer SCRABBLE® program. Then there's the 'Horace' series...

It's all down to programming skill. Flight Simulation – a 'real-time' program – is a special breakthrough in this field. Few other programs make such full use of your Spectrum's capabilities.

In all, there are 12 challenging titles, published exclusively under the Sinclair label. (Not counting the free 'Horizons' cassette that introduced you to your computer.)

Psion programs for the Spectrum:

- Flight Simulation (48K)
- Chess (48K)
- Space Raiders
- Planetoids
- VU-CALC
- VU-FILE
- VU-3D (48K)
- Hungry Horace
- Horace and The Spiders
- Horace goes Skiing
- Backgammon
- Computer SCRABBLE® (48K)

'Horace' series produced in conjunction with Melbourne House. SCRABBLE® trademark and copyright licenced by Scrabble Schutzrechte und Handels GmbH – a J. W. Spear and Sons PLC subsidiary.

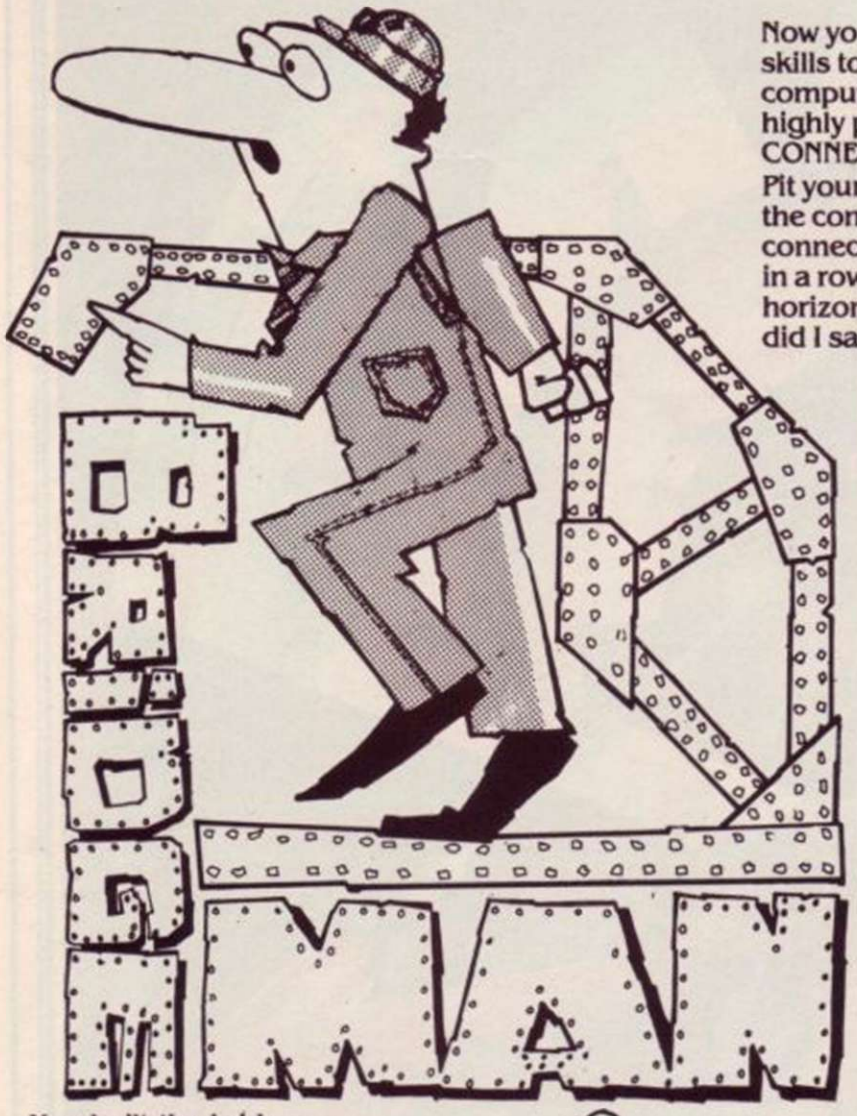
Unbelievable? A recent W H Smith chart of best-selling Spectrum programs speaks for itself. No less than 7 of the top 12 cassettes are by Psion. And there's more to come. Watch out for our very latest program, 'Chequered Flag.'

In fact, if you're choosing software for your Spectrum, there's just one way to find the best...

Look for the Psion symbol on the cover of the cassettes.

PSION

The start of something new!!



You built the bridge and the responsibility is all yours. As bridges go it's not a bad job. Only one snag, due to a shortage of building materials there is only one section left and six gaps to fill. The Boss is on his way to inspect the job, can you juggle the single section around quickly enough so that he won't notice the gaps? It ain't going to be easy.

Now you can stretch your skills to the limit with this new computer version of the highly popular game CONNECT 4.
Pit your wits and skill against the computer and simply connect four of your counters in a row, either vertically, horizontally or diagonally . . . did I say simply?

Any of these games for just

£5.00

EACH

Can you steer your Silly Cyclops through the Barrier and then through five other mind-boggling games? Only one thing you can be sure of, it's going to be Practically Impossible. In some of the games Silly Cyclops closes his eye so you can't even see him. How on earth do you help a guy when you can't see him? As I've said, it's Practically Impossible . . . .

Practically Impossible

Please supply the following titles at £5 each.

Blast off to ADVENTURE

Create and solve ADVENTURE programs on your Spectrum, Commodore 64, Dragon, Oric or BBC Micro.

CREATING ADVENTURES ON YOUR ZX SPECTRUM – Peter Shaw and James Mortleman. Create and solve Adventure programs on the Spectrum with this exciting new book which includes five complete major programs, plus chapter after chapter of hints and tips to help you write your own programs. Chapter headings include Creating Locations; Picking Things Up; Monsters; Adding Graphics; and Adding to the Vocabulary. Just **£4.95** and you're up and away.

CREATING ADVENTURE PROGRAMS ON YOUR COMPUTER – Andrew Nelson. If your computer uses a version of Microsoft BASIC, then this book is for you. It contains three complete Adventure programs, along with extensive documentation to help you create and solve Adventures. Suitable for use with the Commodore 64, Dragon, Oric, BBC Micro, Sirius, IBM PC and Apple, you'll find this book an easy-to-understand primer on Adventure creation. The full-length programs include WEREWOLVES AND WANDERER and THE AFTERMATH OF THE ASIMOVIAN DISASTER. This book is just **£4.95**

TASWORD TWO THE WORD PROCESSOR

48K SPECTRUM

64 CHARACTERS PER LINE ON THE SCREEN AND TO PRINTERS!
MICRODRIVE COMPATIBLE — instructions supplied

TASWORD TWO The Word Processor

Your Spectrum becomes a **professional** word processor with TASWORD TWO. TASWORD TWO gives you an amazing **64 characters per line** on your screen. This is ideal for standard A4 paper and TASWORD TWO prints your text just as it appears on your screen.

Tasword Two drives the following interfaces:

Cobra RS232 I/O Port
Euroelectronics Interface
Hilderbay Interface
Sinclair ZX Interface 1
Kempston Interface
Morex Interface
Tasman Interface

The same program drives these interfaces. A short easy to follow set of instructions takes you through setting up your Tasword Two to drive the interface you have or choose to buy.

Tasword Two also drives the ZX printer.

£13·90 fully inclusive mail order price.

TASWORD TWO TUTOR

TASWORD TWO comes complete with a manual and a cassette. The cassette contains your TASWORD TWO **and** TASWORD TWO TUTOR. This teaches you word processing using TASWORD TWO. Whether you have serious applications or simply want to learn about word processing, TASWORD TWO and TASWORD TWO TUTOR make it easy and enjoyable.

TASWORD TWO £2 Demonstration Cassette

See for yourself the powerful features of TASWORD TWO. Send just £2 for the Tasword Two demonstration cassette. A voucher is included which gives you £1 off the price of TASWORD TWO.

TASWIDE – 64 characters per line!

A machine code utility program, TASWIDE **doubles** the information that your own programs can display. Make a simple change to your print statements and your output appears on the screen at 64 characters per line instead of the normal 32. Both print sizes can be mixed on the screen. 16K and 48K versions supplied on the same cassette.

£5·50 fully inclusive mail order price

TASMAN PRINTER INTERFACE

Plug into your Spectrum and drive any printer fitted with the Centronics standard parallel interface. Supplied complete with ribbon cable, connectors, and driving software. The cassette includes LLIST, LPRINT, and **text** screen copy software for **all** centronics printers **and** fast machine code high resolution screen copy software for Epson, Star, Seikosha, and Tandy Colour Graphic (in colour!) printers. Send s.a.e for sample print-outs and full list of printers supported by screen software.

£45 fully inclusive mail order price

All prices include VAT and post and packaging.

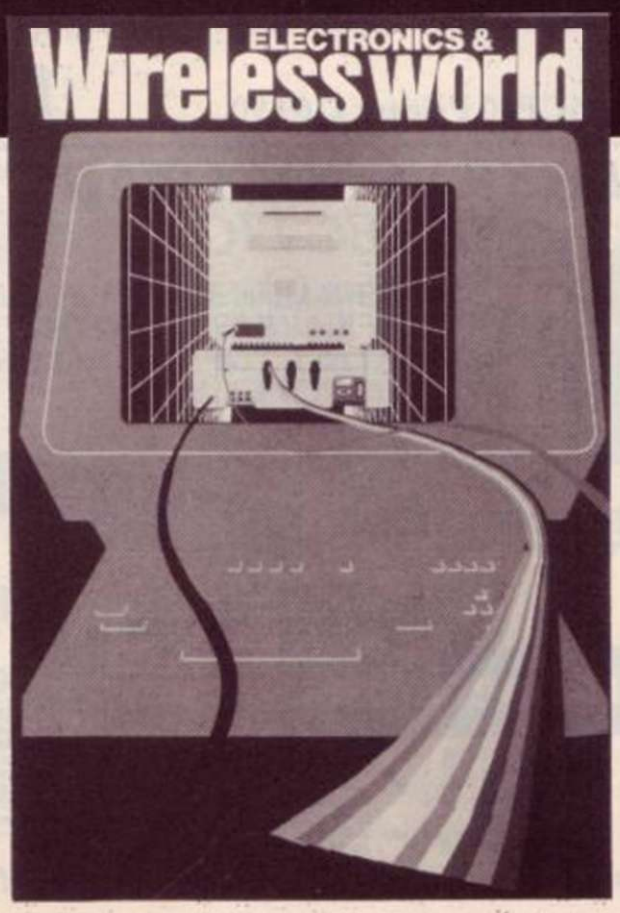
The other side of the micro.

ELECTRONICS & Wireless world



Another first from Wireless World.

This month's Wireless World won't be telling you what a micro does, instead we'll tell you how to choose the micro that's most relevant to your technical needs.

This is possibly the most detailed guide to microcomputer facilities yet to be offered in a monthly publication in the UK.

December's Wireless World lists the available micros, their characteristics and facilities for connecting peripherals.

This is a survey for engineers and experimenters, who need to know how individual computers can be used in their work–the emphasis is on the interfacing capabilities of the machines described.

We were the first with the inside stories of television and video, in the December issue we're first again.

Out now.

The best books & software for popular home computers

What the reviewers say

* *"If you can't write a half-way decent game after reading Dragon 32 Games Master then it will be down to your own lack of imagination. I would recommend the Brain's book as the best of this selection"* WHICH MICRO — SEPT '83

* *The Working Dragon 32 "It's a good one* PERSONAL COMPUTER NEWS — 20 MAY '83

* *"The style of The Working Commodore 64 is easy to follow and informative"* PERSONAL COMPUTER NEWS — 18 AUGUST '83

* *"Commodore 64 Machine Code Master is a truly useful book for the machine code programmer — and its easy to read as well. It is impossible to overpraise"* PERSONAL COMPUTER NEWS — 25 AUGUST '83

* *"There clearly is a need for books like The Working Dragon 32 which provides more than just games"* PRACTICAL COMPUTING — SEPT '83

* *"Blind Alley is simply madly addictive. It is bound to be hugely popular"* WHAT MICRO — JULY '83

Maurice Minor

Out for a quiet drive in your Morris Minor when, you inadvertantly wander on to a race track and find yourself in the middle of a Grand Prix. To turn back against the other cars would be suicide. The only thing to do is grit your teeth, grip the wheel, put your foot down and make for the finishing line and safety. If you can avoid the crash barriers and oil slicks, drive fast enough to avoid being run over by Mario and Nelson behind you, then you can think about overtaking the cars in front. Can you make it before your car falls to pieces? Another superb Arcade style game with animated high resolution colour graphics and sound. Requires one joystick.
A very fast action with accelerator, damage report, timer, six levels of skill and hall of fame.
SUPPLIED ON CASSETTE **£6.75**

Be Spoilt

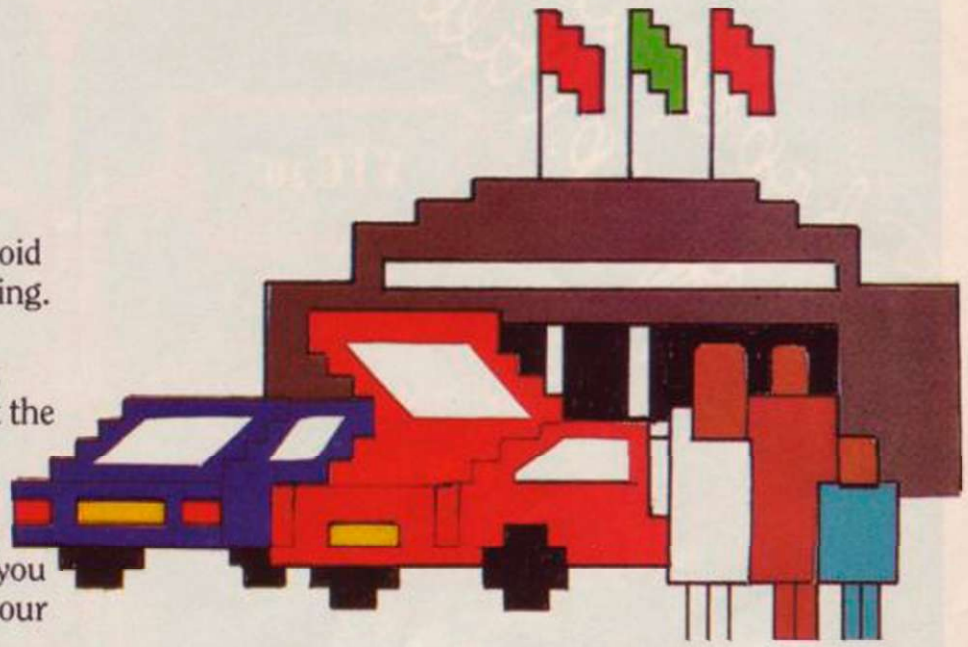
Your Computer Christmas Fair

50p OFF

This voucher entitles the bearer to – a 50p reduction on the purchase of one adult or child full price ticket. This cannot be used with any other offer.

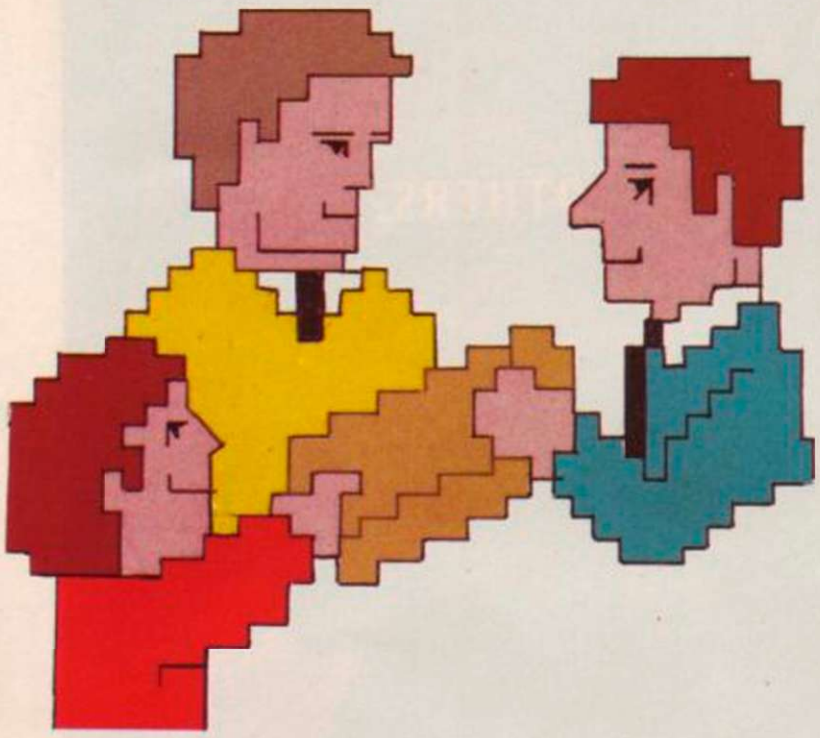
December 15-18, 1983 Wembley Conference Centre

For Choice...



Why not be spoilt for choice this Christmas and avoid all the usual rush, hassle and frustration of present buying. By visiting the first Your Computer Christmas Fair (December 15-18) you can be sure of seeing a truly vast range of microcomputer products, all under one roof at the Wembley Conference Centre, the most modern and comfortable exhibition venue in the country.

Whether you're interested in choosing a micro for home management, child education or games playing, you can see everything demonstrated at the show, with all your questions answered by expert sales staff from the manufacturers, dealers and software houses. Huge amounts of software and hardware, add-ons like joysticks and printers, plus a special Sinclair Village, will be at the show, so you can purchase the system you really want.



Large product stocks held on site mean no one will be disappointed and, because most exhibitors will accept major credit cards, you can try and buy in comfort, at the show.

As Wembley Conference Centre has parking for a staggering 5,000 cars you will be able to take away all the purchases you make on the day. The Conference Centre, with its excellent and economical catering facilities, is the ideal pre Christmas treat for the whole family, away from the high street crush.

Opening times are from 10 am to 6 pm every day except Friday – Special late night 8 pm closing. Because the exhibition remains open until 6 pm on the last Sunday before Christmas you can be assured of buying all your micro goodies.

There's never been a better way to shop for micro computer presents. So wrap up your Christmas gift worries at the Your Computer Christmas Fair.

Lock up your children!

The innocent-looking, smiling man to the right is after them. He's Tim Hartnell, and he's after your kids for just one thing . . . to make them RFA's.

An RFA is a rich and famous author. Tim has done it before.

Clive Gifford is just 17, and his book MAKING THE MOST OF YOUR DRAGON has been the UK's best-selling Dragon book for the past four months.

Seventeen-year-old Scott Vincent saw his book DYNAMIC GAMES FOR YOUR TI 99/4A outsell all other game books on the Interface Publications stand at the PCW show.

Chris Callender is only 15, but he already has three successful Interface books in print — PUTTING YOUR BBC MICRO TO WORK, PUTTING YOUR ZX SPECTRUM TO WORK, and 36 CHALLENGING GAMES FOR THE BBC MICRO, which he co-wrote with 17-year-old Richmond student, Tim D. Rogers.

If you could stand being an RFA, you're reliable, can program quickly and well, and can stick to a deadline, Tim would like to hear from you. Send him a sample of your work along with a detailed synopsis of the book you'd like to write, and he'll get back to you.

Tim Hartnell has written more than 35 best-selling books on microcomputers, including America's number one computer book for February and March 1983 (MASTERING THE TIMEX SINCLAIR 1000, co-authored by Dilwyn Jones, Waldenbooks Survey). Recent works in the UK include THE GIANT BOOK OF COMPUTER GAMES, THE GIANT BOOK OF SPECTRUM GAMES, MAKING THE MOST OF YOUR HX20 and HOW TO PROGRAM THE IBM PC. He is editor of the Virgin Books games series, and is computer consultant to Fontana Paperbacks.

You can get in touch with Tim by writing to this address:
Tim Hartnell, RFA Department, Interface Publications, 44-46 Earls Court Road, London W8 6EJ.

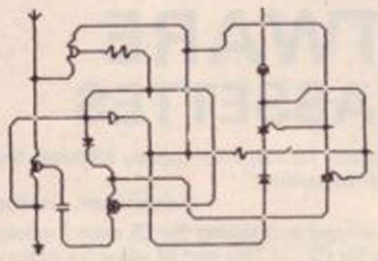
Prices include surface postage worldwide - overseas customers requiring airmail please add 10%.
Dealer enquiries welcomed.

DIGITAL CIRCUIT DESIGNER £ 9.95

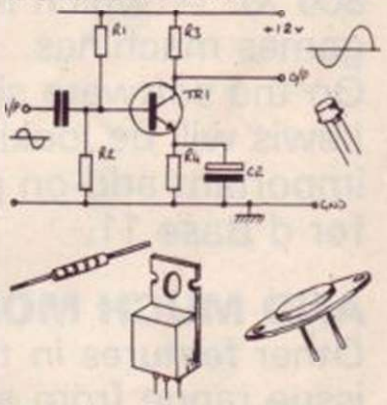


Ever spent hours drawing a circuit diagram, transferring it to a breadboard, burning out a few components and having to start again? Laborious, expensive and infuriating? Not any more! Electronics allows you to draw your circuit diagram on screen using standard symbols for logic gates, transistors, resistors, capacitors, diacs, triacs, diodes, etc, etc... Symbols can be rotated, wiring interconnected or crossed over as required. Once complete the computer will 'power up' your circuit - high voltage levels turn red, low levels turn green. Circuits can be de-activated, modified and re-activated until they function as required, all without touching a soldering iron! Part completed circuits may be saved for future work and displays can be sent to the printer. All components are fully interactive i.e. they can change the state of sections previously activated in the sequence - even oscillators can be seen oscillating. Warning is given of short-circuits. (57 defined graphics are employed)

PERSONAL DIETARY ADVISOR £ 6.95

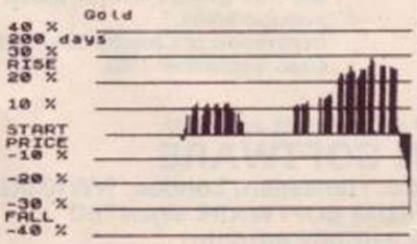
Nutrion is far more than a diet book! Builds up a personal profile based on individual characteristics and lifestyle then monitors food intake. It warns of any potential shortages of any of the essential nutrients, offers advice on suitable foods to restore the balance, advises on your ideal weight, calorie and nutritional requirements and can offer detailed information on the exact amounts of 23 essential nutrients, including calories, contained in 275 different foods. It can be used to plan balanced meals in advance and can operate in both metric and imperial units. Designed to be exceptionally User friendly it can be operated easily by all members of the family.

A. C. NETWORK ANALYSER £ 14.95



Linnet does for a.c. networks what Electronics does for digital ones! Input characteristics of complete networks, including sub-circuits, are entered. The computer performs either time or frequency domain analyses, presenting the output data in any of a choice of forms, both graphical and written. The program detects the presence of a printer and, if connected, can produce detailed graphical displays by printing lengthways along the paper. Happily deals with highly complex networks - the instruction book provides numerous examples using transistors, I.C.s, bandpass filters, op amps, etc, etc... An invaluable tool for both professional and amateur designers.

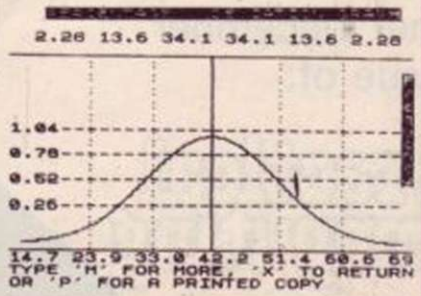
INVESTMENT MONITOR £ 6.95



Shares continuously monitors up to 20 shares/investments with prices entered on a daily basis. Will display holdings, original and current prices, percentage fluctuations, annual equivelants plus performance graphs for the previous 12 days, 200 days or full year. Automatically updates itself after one year.

Numeric can solve or draw graphs of any formula with a single unknown which can be entered via the keyboard. Graph axes can be varied or reversed to suit individual functions. Solves Right Angle Triangles, Simultaneous and Quadratic Equations, Arithmetic Mean, Standard Deviation and Coefficient of Correlation between lists plus Deviation Curves.

MATHS TOOLKIT £ 6.95



Practical Computing

If you want to know even more about computers.

- **GAMES**
  Fram Pac-Man to Corplan — in December's special section we survey the entire games spectrum — from arcade games based on death and destruction to serious business and educational games that — at least in theory — teach you things while you're having fun!
- **REVIEWS**
  Hardware on the test bench ranges from the small but extremely powerful Hewlett Packard series 16 with Sony micro-floppies, to the new Atari 800 XL — which is more than a games machines.
  On the software side, Mike Lewis will be looking at some important add-on programmes for d Base 11.
- **AND MUCH MORE!**
  Other features in the December issue range from an in-depth look at word processing on the Commodore 64 to an investigation of computer fraud. And there will be all the news of new micros, our regular columns and departments, plus pages of free software in Open File

Make sure you don't miss the December issue of:

ORWIN SOFTWARE
ZX81 CASSETTES

"Michael Orwin has built a reputation for value-for-money software and his Cassette 4 offers quantity as well as quality."
Sinclair User, October '82

"If each game was on a separate tape and selling for £5 each I would still recommend them. But all on one for £5 . . ! This sort of value for money just has not been seen before on any personal computer."

"Without sounding pushy I would like to conclude this review by saying – if you have a ZX-81 and like games, then you should buy Michael Orwin's cassette 4."
2 extracts from *ZX Computing*, Oct/Nov '82

"Eight games, including an excellent version of the Scramble arcade game . . . East to operate, graphically impressive and good value for money."
The Times, Saturday 11th December 1982 (about Cassette 4)

CASSETTE 4 — 8 GAMES FOR 16K ZX81 — £6

ZX-Scramble (machine code) with 3 stages
Gunfight (machine code)
Invaders (machine code)
Galaxy Invaders (machine code)
Snakebit (machine code)
Life (machine code)
3D Tic-Tac-Toe (Basic)

"New polich on old favourites . . . the quality of the software and the smooth action displays created on the screen make the programs worth-while for anyone who has a ZX-81 and plays the games using it.

CASSETTE 5 — 8 GAMES FOR 16K ZX81 — £6

Byte-man (machine code)
Space Rescue (machine code)
Breakout (machine code)
Blitz (machine code)
Planetoids (machine code)
Dodgems (machine code)
Draughts (machine code)
Merchant (Basic)

Most of the games include well-presented instructions which make them easier to play. It is pleasant to see that Orwin's kind of quality is available again."
from review of Cassette 5 in *Sinclair User*, September 1983.

If you're still playing games with your COMPUTER

Even to begin to realise the untapped potential of your micro is a task in itself. Those of you who confine its activity to playing games are merely restricting the wealth of knowledge and entertainment your computer can offer.

For the price of a stamped addressed envelope, MFM Data Services will send you a comprehensive catalogue of book titles that are the means to untap your potential as a programmer as well as that of your machine.

The book prices start at £5.95. They are written by expert programmers, are produced by the largest publishing houses, and cover the leading micros such as Spectrum, ZX81, BBC, Electron, Dragon, Commodore and Oric. The display below shows a small sample of the titles available.

CUT IT OUT!

So go on - cut it out → you can add a lot more colour to your micro.

MFM DATA SERVICES Ltd

Send to: MFM Data Services Ltd., Dept YC1, Ightham, Sevenoaks, Kent TN15 9BD.

The BBC-Side Way RAM System

The BBC-Side Way RAM:
The most exciting add-on for the BBC micro, which many have been waiting for Acorn to produce!
Neater, more reliable and far more economical than plugging ROMs into your micro!

What is the Solidisk Side Way RAM Board?
The Solidisk Side Way Ram board is simply a small memory board which fits into a Side Way Rom socket on the BBC micro. Functionally, it is similar to other Side Way Roms in that you can load into it anything like BASIC 2, FORTH, PASCAL, BCPL, WORDWISE, VIEW, DISC DOCTOR, EXMON, etc. — in fact, any software normally sold on ROM.
Acorn has planned to release a similar system on the ELECTRON.
Rather than being a software piracy aid, the Side Way Ram is the key solution to selling more software to users. This is because the same programs can be sold cheaper on tape or disk rather than on ROM.
Solidisk's BBC Side Way Ram will also take you a step further towards the BBC SOLIDISK — a super fast and very user friendly Silicon drive.
PRICE (including operating software and V.A.T.): £34.95

The BBC-SOLIDISK:
The BBC-SOLIDISK is simply a memory board which is dedicated to working as a super fast disk drive. You must have at least one disk drive before using the BBC-SOLIDISK. You will not notice the presence of the BBC-SOLIDISK before booting up the SOLIDISK operating system. The computer will then display:

```
BBC Computer 32K
ACORN DFS
PLUS SOLIDISK AS DRIVE 1
100K AVAILABLE

BASIC
>
```

From now on, your system will have access to 2 disk drives: drive 0 is the floppy disk and drive 1 is the SOLIDISK. There is no functional difference between the 2 drives, since they are both controlled by Acorn's Disk Filing System. The SOLIDISK Filing System is merely added to handle read/write to drive 1.
The most striking impression when using the BBC-SOLIDISK is one of user friendliness. Not only does the system not produce any noise, or light up LEDs which may distract your attention, but also produces any file smoothly and naturally. For example, everyone will notice that when doing *TYPE, the screen stops slightly after every 256 character block. With the BBC-SOLIDISK, the screen just scrolls smoothly from beginning to end, no matter how long the file may be. Another example: when you type in the name of the program it is there before you know it! Simply mind boggling speed.
Other occasions when you will notice the speed of the BBC-SOLIDISK is when doing *COPY or *BACK-UP. Only the floppy drive will whirr away continuously, and even then the whole system will be twice as fast as a dual floppy drive system!
Users spend next to no time in getting used to the BBC-SOLIDISK, since there is nothing to be learned. Once they have tried it, they wonder how people can spend £200 for a second floppy drive!
PRICE (including operating software and V.A.T.): £119.95

TECHNICAL SPECIFICATIONS:

BBC-Side Way RAM:
MEMORY CAPACITY: 16K bytes, directly expandable to 32k bytes
ADDRESSING: from &8000 to BFFF in paged mode (sharing the same memory space with other Side Way Roms)
SIDE WAY PAGE IDENTITY: 15 (and 14 if expanded to 32K), write protected.
OPERATING SOFTWARE: on 40 track single density disc. (or tape at 1200 Bauds on request)
POWER CONSUMPTION: less than 300 mA/5V. No extra PSU required.
DIMENSIONS:
Cartridge base: 50mm x 27 mm x 20 mm
Rom cartridge: 45 mm x 28 mm x 7 mm
Side Way Ram Card: 190 mm x 47 mm x 7 mm

BBC-SOLIDISK:
MEMORY CAPACITY: 128K bytes, 100k bytes formatted and 16k bytes as Side Way Ram. The remaining space is reserved for the operating system.
ADDRESSING: from &8000 to &BFFF in paged mode.
SIDE WAY PAGE IDENTITY: from 8 to 15. Can be used as 8 side way RAMs
OPERATING SOFTWARE: Solidisk overlay, requires ACORN DFS release 0.90 (the only official release on DFS), available on 40 track single density floppy disk.
POWER CONSUMPTION: less than 800 mA /5V, no extra PSU required.
DIMENSIONS:
The BBC-Solidisk is the 32k Side Way Ram with a 96k Solidisk extension measuring 168 mm x 35 mm x 10 mm.

VIRGIN GAMES ARE ON THE ROAD! Look out for the **VIRGIN GAMES FUN BUS**. From **SEPTEMBER** onwards our eye-catching double-decker, games bus will **VISIT TOWNS** throughout the **U.K.**, demonstrating our games to the public, in conjunction (where possible) with local radio stations.

GAMES AVAILABILITY

If your **LOCAL RETAILER** is not yet stocking **VIRGIN GAMES** – tell him he should be – but, however, you can **ORDER DIRECT** from **"I'VE GOT NO GOOD LOCAL RETAILER"** dept., **VIRGIN GAMES, 61-63 PORTOBELLO ROAD, LONDON W11**, enclose a cheque or postal order for the right amount and **DON'T FORGET** to put your name and address – people do, you know!

THE "I WANT TO BE RICH AND FAMOUS" DEPARTMENT

If you have a yearning to be **RICH AND FAMOUS** and have written an **ORIGINAL GAMES PROGRAM**, with good graphics, for any of the popular home computers other than the ZX81, **PLEASE SEND A CASSETTE VERSION** (with details) **TO US**.

To obtain **REVIEWS** of current releases please write to the **"DON'T JUST TAKE OUR WORD FOR IT! Dept."** at:
VIRGIN GAMES LTD. 61-63 PORTOBELLO ROAD LONDON W11 3DD

Our fun-to-play games are available from **W.H. SMITH, BOOTS, DIXONS, SPECTRUM, MICROMANAGEMENT, LEISUREBASE, SELFRIDGES, HAMLEYS, WILDINGS, GAMES CENTRE, VIDEO PALACE, VIRGIN STORES, HARRODS, WOOLWORTHS** and all **GOOD** computer shops everywhere.

48k

WIN THE POOLS?

SPECTADRAW 2 — THE BEST SELLING POOLS PREDICTION PROGRAM FOR THE 48K ZX SPECTRUM

The program looks at the recent form of the teams playing in each week's English and Scottish football league matches and then refers to a large database to see what has happened in the past when teams with similar form met. By combining the lessons learnt from the past with the teams' current league position, the program generates a draw probability factor for each match. It can then identify the matches which are likely to yield draws and output suitable predictions. It will also output the least likely draws for the benefit of those who prefer the fixed odds lines on coupons.

Program, 8000 match database (both on high quality cassette) and instruction manual £12.95 inclusive.

NEW!!! SPECTASORT — THE PERM GENERATION PROGRAM

Spectasort takes the 14 most likely and 10 least likely draw predictions and produces ten 8 from 10 full over perms, enabling you to complete your pools coupon directly from the screen. The program will run on its own in 16K, using your own predictions, or has the unique feature of being able to merge with SPECTADRAW 2 to provide a complete Pools Prediction package!!

Spectasort program on high quality cassette £4.95 inclusive.

(Cheques /POs payable to B.S. McAlley)

SPECTRUM CHESS

Dare you face The Turk

The original Turk was an eighteenth century automation, a life-size mechanical figure resplendent in Turkish costume and seated behind a wooden cabinet on which a chess board and pieces were placed.

OCP now offer you the twentieth century equivalent of that Turk — a chess-playing computer program. **The Turk challenges you to a game of chess!**

MANY OPTIONS INCLUDE:

- 6 Levels of Difficulty
- Demonstration Mode
- Board Editor
- Games Printout Facility
- Blitz Chess Against the Clock
- Two Player Mode
- Unfinished Games can be Stored
- Recommended Move

DRAGON 32 BBC MODEL/B TRS80 C/C 32K

747 FLIGHT SIMULATOR

Superbly realistic instrumentation and pilot's view in lifelike simulation which includes emergencies such as engine fires and systems failures. This program uses high resolution graphics to the full to produce the most realistic flight-deck display yet seen on a home computer. There are 21 real dials and 25 other indicators (see diagram). Your controls operate throttle, ailerons, elevators, flaps, slats, spoilers, landing gear, reverse thrust, brakes, etc. You see the runway in true perspective. Uses joysticks and includes options to start with take-off or random landing approach. "A real simulation, not just another game." (*Your Computer* Apr. 83).

NOTICE TO PARENTS from INFO-STREAM
Computer Assisted Learning

Although the use of microcomputers in primary and secondary schools is becoming more widespread, there are — and are always likely to be — far more pupils than available machines, which means that many students have very limited time on a school computer.

INFO-STREAM offers software for home ZX81, SPECTRUM, BBC and VIC-20 micros to help solve the problem of scarce school resources. The programs cover most subjects in the school curriculum and cate for all ages and abilities. They range from early learning for three year olds through to revision aids for higher examinations.

For a 42-page catalogue detailing over 220 educational programs, please send £1 (refundable on first order) to:— INFO-STREAM (Dept YC), 36a Chase Green Avenue, Enfield, Middx, EN2 8EB.

YOUR MICRO COULD TEACH YOU A THING OR TWO ABOUT THE FRENCH...

...OR THE GERMANS...OR THE SPANISH

A home computer is an expensive toy; and, if playing games is all you do with it, a toy is all it is.

Now, using the New Personal Computer Superlearning System (PCSS) you can have fun with your micro and learn something at the same time.

PCSS language courses comprise 12 lessons on 3 audio cassettes used in conjunction with a fourth software cassette, to add a new dimension to learning.

Initially the software package enables you to see the words you're learning; then, as your vocabulary develops, it will test your skill in your new language.

Anyone can learn this way – no previous knowledge of the language is required. The unique PCSS method develops your overall learning and memory skills in a way thats both relaxing and enjoyable.

Each PCSS language pack – French, German or Spanish – contains a comprehensive booklet detailing the 12 audio lessons and the function of the interactive software. Additionally the booklet expands on the broader benefits of the PCSS method.

At only £29.95 per pack PCSS costs less than other home language courses yet it offers much more in terms of education and enjoyment.

Complete the coupon below and try PCSS for yourself – you'll be amazed what your micro can teach you.

MDA

COMPUTERISED EDUCATION SYSTEMS

(PCSS software is compatible with the ZX81 (16K), ZX Spectrum, BBC Micro, Acorn Elektron Micros.)

Each pack comes with a full money back guarantee if not completely satisfied.

Send your cheque or Postal Order for **£29.95** made payable to: **MDA Modon Associates Limited, 561 Upper Richmond Road West, London SW14 7ED.**

or, alternatively telephone **Teledata 01 200 0200** and quote your Visa, Diners Club, Access or American Express number.

Tick which Audio/software package you require. (Prices include VAT. Add £1.45 for postage and packing on each order.)

Please supply the following Audio/software Packages

FRENCH ☐ GERMAN ☐ SPANISH ☐

DATEBASE

December

Local, national and international micro events are updated here. To publicise your event, phone Paul Bond on 01-661 3472.

The ZX Microfair

The ninth ZX Microfair will be held at Alexander Palace on December 3 and 4. Over 150 suppliers will be there in force. The show is open on Saturday from 10 till 6, and on Sunday from 10.30 to 4.30. One pound for adults to get in, 50p for children. Contact 01-801 9172.

The BBC Micro Exhibition

A special convention is being held in parallel with the show. The venue is the New Horticultural Hall in London, and the Exhibition runs from December 8 to December 11. Telephone Database Publications on 061-456 8383 for more details.

Clive Scott, overall winner in ITV's Ultra Quiz, with the Epson QX-10 which apparently was no better than astrologer Russell Grant at predicting who would win, despite the special psychic peripheral clearly shown on top of the VDU.

Your Computer Christmas Fair

The most widely read and influential magazine for home computer enthusiasts is holding its Christmas Fair at the Wembley Conference Centre in London from December 15 to December 18. Telephone Reed Exhibitions on 01-643 8040 for other information, or have a look at page 81.

THE RAMPACK

STL

MICROPERIPHERALS - MADE IN ENGLAND

£19.95

ZX81

NEED WE SAY MORE?

EXPANDABILITY:

full details with the rampack. You can choose now or later various optional extras:

- **The Keyboard Sounder:** A tone is produced every time you press a key. You can also program the Sounder by USR 699
- **The X-ROM system:** based on the NEC 8255A chip. The system provides direct connection to an EPSON printer (or similar) and ATARI joystick. Programs EPROMS, auto-runs software and is supplied with 8k utility ROM containing 21 preprogrammed functions conveniently cased together with the Ram Pack
- **Various** software on ROMs

Further hardware add-ons:

- **The HARD TOP Keyboard Overlay:** 40 professional keys are positioned over the actual keyboard making typing much easier. The Hard Top overlay is finished in the same quality standard as our other products
- **The 80 Column Card:** Releases the ZX processor from picture display, therefore, the ZX runs always in fast mode. The screen will have a programmable size, up to 24 lines × 80 characters. UDG (User defined Graphic Characters) is standard

SPECIFICATIONS:

- **Memory Capacity:** 16k bytes
- **Maximum speed:** 200ns
- **Use exclusively** Sinclair PSU
- **Absolute stability** with a built-in autolocking system, incorporating special anti-wobble ridge.
